

Transforming supply chains for Healthcare

In your industry, things move fast. And the contents you ship are as important as they are sensitive. With SenseAwareSM powered by FedEx, you can monitor in near real-time the location, temperature, humidity, and other important information regarding your most delicate shipments. The result is unmatched visibility, increased security, and the power to make your supply chain more efficient and reliable than ever before.

Be in control.

When supply chain control is absolutely vital, rely on SenseAware.SM

From biologic manufactured items to pharmaceuticals, the items you ship are important, sensitive, and difficult to replace. SenseAware gives you an inside view of your shipments by combining a powerful web-based application with an advanced multisensor device. Whether you're shipping domestically or internationally, air or ground*, you don't have to wonder whether sensitive contents are being compromised or if supplies will reach their destination on time. You'll know, and you'll have the power to intervene when necessary.** Plus, SenseAware can be used with many different carriers, putting you in charge of your shipping options. With SenseAware, you'll have the visibility you've always wanted and the information you need to be in control.

Always know the environmental conditions of your most sensitive shipments.

SenseAware provides near real-time information about your shipments, allowing you to monitor data and set custom alerts. From location and temperature to humidity and light exposure, you'll know more about your shipments than you ever thought possible. You'll also have the tools you need to analyze information, collaborate with business partners, and make improvements to your supply chain.

SenseAware provides you with vital information about your shipments:

Current location – Know where your shipments are in near real-time.

Accurate temperature – Verify the temperature of sensitive shipments, and receive timely notifications if the temperature leaves a customized range.

Light exposure – Receive instant alerts of a potential security breach, compromised packaging or shipments opened prematurely.

Relative humidity – Stay up-to-date on moisture levels when shipping sensitive materials.

Barometric pressure – Detect changes in the levels of atmospheric pressure.

Sensitive, vital shipments demand the highest level of control.

In healthcare, there's no room for error. With SenseAware, you have control, which enables you to heighten security, improve supply chain efficiency, and increase reliability.

VISIBILITY

Whether you're monitoring data in near real-time or receiving alerts when your shipments experience environmental changes on their journey, SenseAware puts actionable data in your hands. It also allows you to quickly collaborate with partners and other decision-makers — saving you valuable time and resources. Plus, SenseAware can increase visibility into complex, global supply chains with access to a growing list of international opportunities.

INTERVENTION

A high level of visibility makes it possible to intervene at the most crucial moments.** Notification of shipments that travel off-route or that may have been opened prematurely gives you an extra layer of security. Your ability to stay ahead of the information curve and take control of challenging situations will help you earn confidence from your business partners.

INSIGHT

Gain a deeper understanding of your supply chain with in-depth, data-driven analysis. SenseAware will help you strengthen your chain of custody and improve asset management. Now you can test your packaging, storage and transportation methods to ensure your business is operating as efficiently as possible.

Be in control of your supply chain. Contact your FedEx account executive or go to senseaware.com to learn more and express interest in becoming a SenseAware customer.
