Dimensional Weight (Volumetric Weight)

For large-sized lightweight shipments, the greater of either the dimensional weight (volumetric weight) or actual weight will be charged. The dimensional weight (volumetric weight) (in kg) of a shipment is calculated as:

Length x Width x Height (cm or inches)
(then divided by 5,000 for "cm" or divided by 305 for "inches")

Dimensional-weight pricing is applicable on a per-package basis to all shipments in customer's own packaging and FedEx Pak shipments exceeding 940 cubic inches or 15,403 cubic centimeters. Size and weight restrictions may vary depending on country and destination.
