Summary of Features:

FedEx Ship Manager Server version 12.0.1 contains the following FedEx feature enhancements:

- **FedEx Global Returns.** This new service will facilitate returns between all regions as well as intra-country domestic shipments in U.S., Brazil, Canada, Colombia, Mexico, Switzerland and United Arab Emirates.
- **FedEx Freight®** Now you can use a single shipping device for all modes of shipping, preparing and managing FedEx Freight shipments with the same solutions you use for FedEx Express® and FedEx Ground® shipments. The integration of FedEx Freight into FedEx Ship Manager Server provides greater ease in freight shipping, both domestically and internationally.
- **Intelligent Mail® package barcode (IMpb).** FedEx SmartPost® users will experience better end-to-end visibility and enhanced performance of the new U.S. Postal

Service® (USPS®) Intelligent Mail barcode (IMpb). Mandated by the USPS for all commercial and online consumers, the IMpb has new data elements that define mail class, subclass and extra services within the barcode.

- **FedEx Priority Alert™** Proactive management of shipments with priority boarding and clearance — a real benefit for customers whose shipments are time-critical, environmentally sensitive or high value.
- **Enhanced International Traffic in Arms (ITAR) Routing.** A streamlined process facilitates the shipment and clearance of defense-related articles, to help reduce customs issues, shipment delays and associated fines and penalties.
