

FedEx Ship Manager® Server Release Notes for v 11.0.9

The following topics are included in this FedEx Ship Manager® Server version 11.0.9 Release Notes document:

- Product Key
- Upgrade Paths
- Summary of Features
- Software Fixes
- Customer Support

Product Key:

Product Key = VZ52YPI9T6E44QWY

This product key is valid until April 22, 2015

Upgrade Paths:

FedEx Ship Manager Server v 11.0.9 can be used to upgrade over the following previously released FedEx Ship Manager Server versions:

FSMS v 11.0.9 Upgrade Versions								
10.0.1	10.0.2	10.0.3	10.0.4	10.0.5	10.0.6	10.0.7	10.0.8	10.0.9
10.6.1	10.6.2	10.6.3	10.6.4	10.6.5	10.6.7	10.6.9		
11.0.2	11.0.3	11.0.4	11.0.5	11.0.6	11.0.7			

Summary of Features:

FedEx Ship Manager Server version 11.0.9 contains the following FedEx feature enhancements:

- FedEx SmartPost® Intelligent Mail Package Barcode (IMpb)
- FedEx SmartPost Parcel Select Lightweight
- FedEx Freight® Integration
- Hold at FedEx Location (HAL) for FedEx Ground
- ORM-D for FedEx Express only – Effective Jan. 2013, dangerous goods requirements are changing for the Other Regulated Materials for Domestic (ORM-D) class to comply with new regulations. Go to fedex.com/hazmat for more details on shipping requirements and regulations.

Software Fixes Included in FedEx Ship Manager Server v 11.0.9:

Because quality is important to you, FedEx Ship Manager Server v 11.0.9 contains resolution to multiple software issues. The following table lists known issues that have been corrected.

	Software Fixes in FSMS v 11.0.9	Defect ID
1	A FedEx Ground domestic MPS with multi-occurrence tags in the transaction appears to print a Total Doc Tab Label containing a mixture of information on the label.	231829
2	Initiative Controls in an alphabetical order, instead of the pre-defined order.	235070
3	When Tag #1274=82 (FedEx International DirectDistribution Surface Solutions Service for CA/MX formerly called FedEx Transborder Distribution), a deleted PC is missing the VOIDED tag in the hourly upload file.	235197
4	FedEx International Priority Distribution consolidated commercial invoice does not total the commodity value correctly when nested multi-occurrence tags are used.	235215
5	When processing an OpenShip single-piece shipment as create in a first transaction and confirmed in a second transaction, the human readable information is missing on the label.	235261
6	Meter Registration Web Services Request omits email address "emailIdNotProvided" when not provided.	235372
7	During a heavy load of FedEx SmartPost clients, the OpenShip service stops and must be manually restarted.	235794
8	Electronic Trade Documents content and format of "FedEx Ground Batch Upload Failure" report is not accurate.	236007
9	Commercial Invoice report is generated for both FedEx Express and FedEx Ground international shipments without request being sent in the input.	236144
10	Message Type code (Tag #557) is returning wrong value when Ancillary Endorsements (Tag #2416) is provided as other than 2 (Address Service Requested) or 4 (Return Service Requested).	236331
11	Attempts to confirm an IPD shipment that has over 4000 packages tied to it generates an error message = 'Database problem! Cannot confirm an IPD/IDF/IED shipment.'	236404
12	On a reimaged server, reports do not generate after an end of day close.	236415
13	Query service and the Remote Access Connection Manager dependency.	236692
14	FedEx International Ground DirectDistribution consolidated commercial invoice is missing the package count.	237352
15	Dangerous Goods Shipment with Excepted Package Radioactives with Reportable Quantity (Tag #1331 as 'Q') and 1900 as other than 'I' is not successful.	237574
16	Query service stalling.	238389
17	Electronic Trade Documents for FedEx Ground not uploading the commercial invoice.	238823

18	COD label prints the COD dollar amount (from Tag #53) instead of the accumulation amount (cross-reference with defect 214687).	238972
19	Tag #660 special handling acronyms (and a select few others) appear to be returning values at a shipment level value, instead of piece level - as specified in requirements.	238989
20	Generating a "Special service(s) mismatch" error message when Priority Alert is included in a transaction - where FSMS 11.0.5 successfully generates a label.	240074
21	Configuration screen-system settings tab, "receive rates" checkbox for international master meter is not checked but .DLL reconcile runs during reconcile anyway.	241492
22	Manually added master meter hourly upload files are not being generated by the hourly upload process.	242553
23	International master meter (not US, CA or PR), close transaction returns error -- "close is already running for this meter".	243181
24	A database trigger to generate FedEx SmartPost .SPC files is incorrect causing only the header record to be created.	243191
25	Unable to Close Future Day FedEx SmartPost Shipments.	244929
26	Unable to Close Future Day FedEx Ground Shipments.	244935
27	Intra CA OpenShip MPS shipment processing successfully with Tag #1670 greater than the limit.	246960
28	A database trigger, as it pertains to a trailer close feature, sporadically produces a message = "error inserting record into database".	247475
29	FedEx Ground shipment with Hold at Location as special service is failing with error as 'No default Ground HAL Location exists for this destination postal code'.	248123
30	004 transaction is failing with "Error processing input transaction" for FedEx 1D enabled accounts with FedEx Ground account number greater than 7.	249965
31	The hourly upload file is truncated when control characters are encountered in the recipient name field.	251904
32	"Digital Letterhead and Digital Signature" section is displayed in report setting tab for FedEx Ground NAFTA certificate of origin reports.	253587
33	Incorrect Environment name (TEST) is displayed in FedEx Web Services request in production environment.	253782
34	No rates are returned at ship time although the field "no ship-time rates" is unchecked, implying rates should return.	254590
35	Intra Mexico shipping returns "Invalid service type" when requesting route information.	256725
36	Initiative Control entries on configmanager.xml file is not matching.	259653
37	Delta implementation is not successful.	260413
38	Initiative Control entries order is different from the clean build.	260774

39	Delta implementation is not successful.	260777
