

FedEx Ship Manager® Server Release Notes for v 10.0.7

The following topics are included in this FedEx Ship Manager® Server version 10.0.7 Release Notes document:

- Upgrade Paths
- Summary of Changes
- Software Fixes
- Key Components
- Customer Support

Upgrade Paths:

FedEx Ship Manager Server v 10.0.7 can be used to upgrade over the following previously released FedEx Ship Manager Server versions:

8.5.1	8.5.2	8.5.3	8.5.4	8.5.5	
10.0.1	10.0.2	10.0.3	10.0.4	10.0.5	10.0.6

Summary of Changes:

Edits for Technical Name

This feature supports a new edit when processing a dangerous goods shipment governed by revised International Air Transport Association (IATA) regulations. Instead of only checking for an '*' at the end of the proper shipping name to see if a technical shipping name is required, also read the IATA Table column labeled Technical Name Required.

Software Fixes Included in FedEx Ship Manager Server v 10.0.7:

Because quality is important to you, FedEx Ship Manager Server v 10.0.7 contains resolution to multiple software issues. The following table lists known issues that have been corrected in v10.0.7.

	Issues Corrected in v 10.0.7	Defect ID
1	IPD: Error while confirming IPD shipment after deleting a package.	155657
2	FedEx Ground CI is defaulting with IOR (Importer of Record) when BSO (Broker Select Option) is passed rather than supplied input data.	159944
3	Hazardous Materials: The 020 rate transaction with multiple hazardous materials items (commodities) included returns the message "OpenShip service is not responding".	161730
4	Mixing of ADG/IDG - or vice versa - appears to apply an additional surcharge with multiplier tag 2600 = 3.	164072
5	Intra Canada multiple piece shipment (MPS) labels are not generated with total pieces and total weight.	165006
6	Invalid shipment level handling charge is being applied.	166167
7	MPS COD: When attempting to process a FedEx Express MPS COD transaction with multi-occurrence tags, the COD amount to be collected (returned) prints 0.00 instead of the value in tag 53.	169575
8	Field 3064 "PDF-417": Barcode returns 24 lbs in human readable, but returns 2 lbs on the barcode for MPS.	174435
9	Ground ED is still applied although DisableGroundED=Y is set in rateoptions.ini	174483
10	IPD: No error returned when creating IPD shipment when no tracking numbers are available.	175510
11	International Shipping: Clearance entry fee is being doubled in the return transaction.	177531
12	Ship Manager exception is generated due to a transaction buffer-length overflow.	173537
13	Under an extreme load, (Server Cloud), instead of the 120 reply, the 020 is returned.	177249
14	International Shipping: While running continual international transactions, a pop-up window appears advising of the server.ini being corrupt, ultimately leading to the reply: "OPENSHP IS NOT RESPONDING".	182964
15	Field 1332, when set to (Y or) N, overrides reference information with a value = "\$AW" when generating FedEx Ground shipments.	191043

Key Components Updated in v 10.0.7

Component	Version	Build Date
