

## FedEx Ship Manager® Server Release Notes for v 10.0.2

The following features and enhancements are included in the maintenance update for FedEx Ship Manager® Server 10.0.1 to FedEx Ship Manager Server 10.0.2.

### **New ZPL Thermal Printer Supported in FedEx Ship Manager Server 10.0.2**

In addition to the other ZPL thermal printers already supported by FedEx Ship Manager Server 10.0.1, FedEx Ship Manager Server 10.0.2 supports the Zebra ZM400.

### **FedEx International Economy DirectDistribution<sup>SM</sup> Service Expands to Hawaii**

APAC now includes Hawaii as a valid destination of outbound FedEx International Economy DirectDistribution<sup>SM</sup> Service. This is a contract service; therefore contact your Account Executive for more information. After you contract for this service, this service will be made available in the monthly URSA file. Transaction coding is not required to enable this feature.
