

FedEx Freight XML Tracking Application Is Retiring. Please Follow These Important Instructions Moving Forward.

To streamline our automation solutions and make tracking even easier for you, FedEx Freight will be retiring the Extensible Markup Language (XML) tracking application on December 31, 2014. We recommend integrating FedEx Web Services into your systems moving forward. The FedEx Web Services section of the Development Resource Center is a convenient source for developer guides, sample code, production keys, and other information you will need to integrate FedEx into your website or application.

Over the next few years, FedEx will be retiring the other FedEx Freight XML applications, including Bill of Lading, Rates, and Pickup. If you use other FedEx Freight XML applications, you will be receiving additional instructions regarding migrating to FedEx Web Services at a later date. For any questions you have regarding the XML tracking changes, please email FedEx Web Services at websupport@fedex.com.
