

# U.S. CPSC New eFiling Requirements: What you need to know

## What is changing?

Starting July 8, 2026, mandatory electronic filing (eFiling) is required for products imported into the United States that are regulated by the U.S. Consumer Product Safety Commission (CPSC).

## What this means for you?

Additional information will be required for each CPSC-regulated product entering the U.S. Certificate of Compliance data must be provided with shipping documentation so it can be electronically transmitted via the CPSC Participating Government Agency (PGA) message set at the time of entry into the U.S.

Failure to provide the required information may result in entry delays, shipment holds, examinations, or additional documentation requests.

## What products are affected?

The requirement applies to finished consumer products regulated by the CPSC and require certification under [16 CFR Part 1110](#).

Examples of affected product categories include (but are not limited to):

**Children's products**

**Household goods and furnishings**

**Consumer electronics and electrical products**

**Home improvement and recreation products**

**Textiles and apparel regulated by CPSC rules**

Tips:

- CPSC regulates finished products only.
- Use the CPSC Regulatory Robot [here](#) to check whether your product is regulated and identify applicable compliance and certification requirements.

## How does CPSC eFiling work and what's required?

CPSC eFiling is submitted through the U.S. Customs and Border Protection's Automated Commercial Environment (ACE).

One of two eFiling methods is used, depending on whether a product is preregistered in the [CPSC Product Registry](#).

	<b>Method 1 – Full CPSC PGA Message Set</b>	<b>Method 2 – Reference (Abbreviated) PGA Message Set</b>
When this applies	Product <b>not registered</b> in the CPSC Product Registry	Product <b>pre-registered</b> in the CPSC Product Registry
What's Required	<p><b>Seven Certificate of Compliance data elements</b> for each shipment:</p> <ol style="list-style-type: none"> <li>1. Product identifier (i.e. Global Trade Item Number)</li> <li>2. Each applicable CPSC safety rule (16 CFR part 1110)</li> <li>3. Date of manufacture</li> <li>4. Manufacturer/ producer / assembler contact information^</li> <li>5. Date of most recent compliance test</li> <li>6. Compliance test facility / laboratory contact information^</li> <li>7. Test records keeper / owner contact information^</li> </ol> <p>^Contact information includes name, address, phone number and email address</p>	<p><b>Three data elements only:</b></p> <ol style="list-style-type: none"> <li>1. Product ID</li> <li>2. Certifier ID</li> <li>3. Certificate Version ID</li> </ol>
Best For	Occasional or one time CPSC regulated imports	Repeated imports of the same CPSC regulated products and want to streamline clearance

Because requirements may change or vary by circumstance, customers should consult original sources or appropriate professionals for specific advice.

## Get started with CPSC Product Registry

Visit CPSC Product Registry [here](#) to start the registration process.

**Act now** – the process may take up to six months to complete.

For trade partners who are not the importer, CPSC product registration is the responsibility of the direct supplier or shipper. FedEx does not register products on behalf of customers.

## We're Here to Help

- Customs brokerage and compliance expertise
- Guidance on CPSC eFiling requirements
- Support to minimize clearance disruption
