The Prior Notice System Interface allows individuals and organizations to submit, track and manage their notifications to the FDA.

Upon submitting the required information electronically, a **Prior Notice Confirmation Number** will be generated for each different article of food.

Enter your shipment information first, followed by details on each item of food in your shipment. Once you've finished, you'll receive a summary of the information for your shipment.

Click the 'SAVE' button to proceed to the next once you finish a section. After you've completed and saved your preliminary notice information, take a moment to review it.

Your final step will be to submit.
