# The next big little thing is here.

Introducing freight's new shipping label — the next generation of efficient shipping.

Your LTL shipping experience has just taken a giant leap forward with our new shipping label. Each label has a unique 12-digit tracking number that lets you track individual pallets.\* To enable this new feature, just add a label to each pallet in your shipment.

\*Tracking individual pallets may not be available in all service locations.

# NEW SHIPPING LABEL BENEFITS:

- 1 The ability to apply your own logo and customized messages (available through FedEx Ship Manager™ Software and FedEx Web Services).
- 2 Reference numbers such as POs, which allow you to quickly identify individual shipments.
- 3 All the data drivers need for pickup confirmation — no more manual entries.\*
- 4 Individual 12-digit tracking number for each pallet within a shipment.
- 5 Service, special service, origin and destination prominently displayed.

Just remember, you need to add this label to every pallet in your shipment.

\*Enhanced shipping and driver notifications may not be available in all service locations.
