## Packaging Tips

To ensure your consignments arrive on time and in good condition, it is vital you take time to pack and label them correctly.

### DO

- a. Only use rigid cartons in good condition with all edges intact.
- b. Don't exceed the weight specifications for your box.
- c. Pack contents in the centre of the carton, cushioned on all sides using polystyrene chippings or bubble wrap. Ensure that the items not fitting into cartons or have sharp edges and protrusions are thoroughly wrapped, with taped corrugated panels or pads.
- d. If you send liquids, check that the cases are hermetically sealed.
- e. For the shipping of fragile goods, we suggest the use of wooden cases and separators inside. Include inside the carton a document (e.g. business card or letterhead) that carries your address, and both your and your recipient's telephone numbers.
- f. Tape all seams and flaps well, with pressure-sensitive plastic tape. Tape should be at least 5.1 cm wide, but preferably 7.6 cm wide.
- g. If finishes could be damaged or soiled in transit, place them in a protective container.

### DON'T

- a. Don't ship light weight gift boxes unless packed in stronger cartons.
- b. Don't ship packages smaller than 18 cm x 10 cm x 5 cm. Instead, pack small items into larger cartons.
- c. Never use cellophane tape, masking tape, string or rope, and avoid duct tape and kraft-paper tape for sealing.

## Measuring Length and Girth

The length and girth formula is simple:

Packages can be up to 274 cm in width and 330 cm in height and girth combined ( $\text{girth} = 2 \times \text{height} + 2 \times \text{width}$ )

## FedEx Electronic Trade Documents (ETD)

ETD\* is a feature within the FedEx Ship Manager (FSM) shipping tool that reduces customs clearance delays by allowing you to submit customs documentation electronically, so you no longer need to print multiple copies. In a world where business moves at the speed of a click, filing important international documents electronically helps you save time, paper and money.

### Benefits of ETD

- Prepare your customs documents electronically.
- Simplify and enhance the international shipping process.
- Reduce risk of customs clearance delays.
- Reduce your carbon footprint and save time and money
- Minimize risk of lost, missing or damaged trade records.
- We may notify you if your shipment is going to be delayed by customs clearance.
- Quicker pick-up time due to simple process.

\*For countries that require paper copies for customs clearance, you can benefit from Electronic with Original (EWO), which also enables you to seamlessly upload your customs documentation. EWO gives you access to all countries that ETD doesn't support. When you chose the country you are shipping to, the system will default automatically to EWO if it's not ETD supported.

## Commercial Invoice

A Commercial Invoice (CI) is mandatory for all non-document shipments. Entering the information accurately helps ensure swift customs clearance. Please enclose one original invoice along with two copies of the invoice to your shipment, each with an original signature.

- 1 Shipper/Exporter details:** add the contact name, company name, full address and VAT number of the shipper.
- 2 Recipient/Consignee details:** fill in the name, address (including postal code and phone number) of the recipient.
- 3 Country of manufacture:** state each country of origin next to each corresponding product, in case the goods were made in more than one country. The country of origin is the country in which the goods were initially produced – not the country from which they are exported.
- 4 Quantities:** show individual and totals columns for:
  - 4a** the number of shipments and units
  - 4b** the units of measurement
  - 4c** weight
- 5 Description of goods:** give a complete description of the item(s). Generic descriptions are insufficient. Indicate:
  - a. what it is
  - b. what it is made of
  - c. what the value of each item is
  - d. how many/how much items
  - e. how it will be used

For example: write “10 boxes of stainless steel screws for civil aircraft,” rather than “civil aircraft parts.”
- 6 Specify the currency:** specify the unique three-letter code for each currency (e.g. USD, CAD). The dollar sign (\$) is insufficient, as several countries use it.
