

# Discontinued TNT services & features

# Optimising our portfolio to better serve you

We're continuously working hard to optimise our operations and meet all your evolving needs as a customer. As part of this effort, you'll enjoy access to our widest range of services and shipping solutions ever at FedEx. However, some TNT services and features will be discontinued as you move. This allows us to focus on improving our existing portfolio, enhancing safety, reducing lead times and improving your overall customer experience.

Our goal is to offer you a seamless service and, in most cases, FedEx provides equivalent alternatives for what you're used to with TNT. For any features where a direct match isn't available, our team will work closely with you to find the best options that suit your business needs.

Here's a detailed overview of what to expect moving forward, including specific TNT services that will no longer be available and the FedEx alternatives you can leverage to continue shipping smoothly.

# International discontinued services overview

# International TNT services discontinued
