The rates in this document are effective January 4, 2021 and supersede the rates shown in the 2020 rate sheets. Based on the package weight, any fraction of a pound/kilo takes the next higher rate. Rates do not include any other fees or charges that may be assessed such as (but not limited to) declared-value charges, special handling fees, customs duties and taxes, ancillary fees and surcharges.

Calculating dimensional weight

Dimensional weight applies when your package is relatively light compared with its volume. If the dimensional weight exceeds the actual weight, charges based on the dimensional weight will be assessed.

HOW TO CALCULATE DIMENSIONAL WEIGHT

1. Measure the length*, height, width of the package and multiply them.
2. Divide the total by the specific dimensional weight factor.
3. If the dimensional weight exceeds the actual weight, use the dimensional weight of your package to calculate your rate.

$$\text{Dimensional weight} = \frac{\text{Length} \times \text{Width} \times \text{Height}}{139} = \text{Pounds}$$

* Length is the longest side of the package or objects. Girth is (2 x width) + (2 x height).

How to calculate your rate

1. Find your destination and look for the zone in the "Table of FedEx countries and territories"
2. Choose the service and zone you wish to use
3. Determine rate* by weight
4. If your shipment weights more than 50 lb, use the "Rates per lb" table
5. In the "Rates per lb" table, the rate will be either the computed rate or the initial rate of the next weight break, whichever is less

Get rate quotes and transit time online; FedEx account holders can log in for an account-specific courtesy rate.

* The rates in this document are effective January 4, 2021 and supersede the rates shown in the 2020 rate sheets. Based on the package weight, any fraction of a pound takes the next higher rate. Rates do not include any other fees or charges that may be assessed such as (but not limited to) declared-value charges, special handling fees, customs duties and taxes, ancillary fees and surcharges.

** The FedEx® 10kg Box and FedEx® 25kg Box fixed rates only apply when used with the boxes specially designed for this service and can only be shipped via FedEx International Priority®. Shipments that weigh more than the specified amounts will be charged based on the rates per lb. chart on the rate sheet. Rates are subject to change without notice.

How to calculate your rate

1. Find your destination and look for the zone in the "Table of FedEx countries and territories"
2. Choose the service and zone you wish to use
3. Determine rate* by weight
4. If your shipment weights more than 50 lb, use the "Rates per lb" table
5. In the "Rates per lb" table, the rate will be either the computed rate or the initial rate of the next weight break, whichever is less

Get rate quotes and transit time online; FedEx account holders can log in for an account-specific courtesy rate.

* The rates in this document are effective January 4, 2021 and supersede the rates shown in the 2010 rate sheets. Based on the package weight, any fraction of a pound takes the next higher rate. Rates do not include any other fees or charges that may be assessed such as (but not limited to) declared-value charges, special handling fees, customs duties and taxes, ancillary fees and surcharges.
