## FREIGHT SHIPPING SERVICES

These options give you lower rates for your packages and freight. Your freight will have space reserved and confirmed until its final destination, ensuring the timely delivery of your shipments. Remember that to use this service, all shipments must be palletized, wrapped in shrink plastic and ready to be handled by forklifts, in pieces or packages over 68 kg (150 lb) to 1,000 kg (2,200 lb). Only palletized shipments weighing more than 1,000 kg (2,200 lb) are accepted with prior approval. Backed by your money-back guarantee[1].

### FedEx International Priority® Freight (IPF)

Choose this service for your palletized loads with more urgent transit times with delivery to major global markets in 1-3 business days, depending on destination.

### FedEx International Economy® Freight (IEF)

A cost-effective solution for the delivery of less urgent palletized loads to more than 80 countries and territories worldwide. Delivery in 4 to 6 business days.

# Calculate Dimension Weight (DIM)

## Dimension Weight Rate Calculate for Your Shipments

The rate calculation according to the dimensional weight applies to each shipment packed by the customer. The FedEx packaging may also be subject to price calculation depending on dimensional weight. If the dimensional weight exceeds the actual weight, may be calculated based on dimensional weight.

## HOW TO CALCULATE DIMENSIONAL WEIGHT

- Measure the length*, the width and the height of your package in centimeters.
- Find the volume and divide by 5,000 to get the dimensional weight in kilograms. Round fractions to the next full digit.
- If the dimensional weight exceeds the actual weight of the package, dimensional weight is used to calculate your rate.

$$\text{Dimensional weight factor} = \frac{\text{WIDTH} \times \text{LENGTH} \times \text{HEIGHT}}{5{,}000} = \text{Kilograms}$$

*Length is defined as the longest side of the object or package. The circumference is calculated by taking twice the width plus twice the height of the object or package.*
