

Dear Valued Customer,

In line with the requirements of onboarding your Customs Code and VAT number on the SARS RLA system, it is a legislative requirement that clients who have registered or licensed, or migrated through updating, on the new RLA system, must disclose any "customs and excise relationship" i.e. a business relationship which involves an activity regulated by the Act with another person that is a registered person or licensee in terms of the Act. This must be done under the Relationship Management Component on the RLA system.

Should you be prompted to make a selection on Registration, please feel free to make use of the details below.
