FedEx ®

Simplify Your Shipping, Satisfy Your Customers

Technology is the key to working smarter, not harder. FedEx® Compatible certified technology solutions make small-business shipping simpler than ever before, from integrating your systems to automating your entire shipping process and even managing shipments from your mobile device.

As your small business multiplies, you may need multiple systems to run it. Avoid the complexities of using separate systems by integrating them into one user-friendly platform with all of the functions you need. When you choose FedEx Compatible software, you're choosing a software solution that has the FedEx stamp of approval, so you can be certain that the shipping services you need to run your business and to make your customers happy are integrated.

23% of the workday. That's the average time small and medium businesses spend manually inputting data. That time adds up! In one week, these businesses lose more than a full day to manual processes.
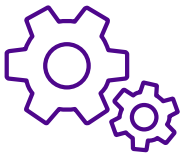

Choose

FedEx Compatible offers software to fit every budget, for all types of small businesses, including home offices and e-commerce sellers, doctor's offices, professional services and more. With software options for mailing and parcel systems or software to help with accounting, inventory management or order management, FedEx Compatible has a certified solution to meet your business goals.

Grow

Looking to ship more products internationally or import raw materials? In today's global economy, imports and exports go hand in hand. FedEx Compatible solutions make international shipping simple with FedEx shipping options built in. With tools and services like Electronic Trade Documents and Express shipping, as well as international freight distribution and consolidation, FedEx Compatible software offers service to more than 220 countries and territories to help your small business expand.

Connect

Connect all of the technology pieces that help your small business operate. With hundreds of integrations for online marketplaces and shopping carts as well as card processing, accounting, inventory and other business tools you use, FedEx Compatible software solutions connect your business and help you streamline your processes.

What does being certified by FedEx Compatible mean? FedEx Compatible certified software solutions go through a certification process to ensure each solution has the latest features and is fully functioning. With the FedEx Compatible stamp of approval, you'll be sure you get the reliability you expect from FedEx – with easy access to FedEx shipping options and rates, fast processing, powerful tracking and a broad array of services.
