

Solution Overview

DigitalShipper offers affordable multi-carrier shipping solutions to low, mid and high volume customers. Built on Microsoft.NET technologies, DigitalShipper is one of the most robust and versatile shipping software applications on the market today. Whether automating your shipping processes using the standard Browser plug-in architecture or through DigitalShipper's SOA-designed Web Services, you can quickly adapt to business changes and solve even the most complicated warehouse problems.

DigitalShipper is easy to integrate with other software applications such as ERP, WMS and TMS systems and includes built-in features for rate shopping, batch shipping, customer preferences, and many more. DigitalShipper offers compliant modules for all the major small parcel national carriers and most regional carriers. DigitalShipper is also geared to handle all your LTL/TL, international, freight forwarding, local courier, and internal truck shipments.
