

Freightview earns FedEx Compatible's 2021 Solution of the Year!

Recognition for a high-achieving Compatible Solution

A top-tier award: Solution of the Year

Awarding a shining star within the FedEx
Compatible Program

The Solution of the Year Award winner can proudly display this badge on their website and other marketing materials.

Each year, we evaluate and rank all Compatible Solutions based on various metrics. Program engagement, software adoption, year-over-year growth, and overall FedEx feature support are a few of the many areas that are taken into consideration. Top Solutions can earn their place in our Diamond, Platinum, or Community Tier depending on their previous year performance. Additionally, one outstanding Solution is awarded Solution of the Year for going above and beyond Program expectations.

The FedEx Compatible team would like to congratulate Freightview for being named the 2021 Solution of the Year!

Freightview was founded in 2013 to equip shippers with revolutionary technology to streamline their less-than-truckload (LTL) freight quoting, booking, tracking, and reporting for their domestic US shipping needs.

Freightview has since expanded to a one-stop shipping platform that offers parcel and truckload modes. One of their core values is using customer feedback as the driver of their product roadmap. Freightview's software is designed to keep customers' rates safe, secret and secure. Freightview takes pride in their best-in-class user experience, SaaS technology and easy implementation for new customers. Their mission is to solve logistics problems in unconventional ways.

Freightview joined the FedEx Compatible Program in 2018 and has shown strong, consistent growth in multiple strategic areas. They added Parcel to their platform to improve the customer experience, and they are a top performer with FedEx Freight.

Being a newer solution within the FedEx Compatible Program, this was Freightview's first year to compete in the Tier Program. Being named Solution of the Year is as good of a Tier introduction as it gets, and we are very excited to see what the future has in store for this Compatible solution.
