FedEx RESTful APIs offer better experience, more services, and simpler integrations.

FedEx has launched its RESTful APIs that are centered on a modernized customer experience. The FedEx Web Services (SOAP Based) is now in development containment, and all new features and enhancements will only be available in our RESTful APIs. To learn more and prepare your upgrade from SOAP to REST, please visit the FedEx Developer Portal for more details.

Benefits of FedEx RESTful APIs

OMNICHANNEL EXPERIENCE
Power seamless shipping and tracking, driving competitive advantage for your company.

ENHANCED SERVICE OFFERINGS
Bring more to your business with estimated delivery windows, predictive delay notifications and enhanced visibility.

MORE OF WHAT YOU WANT
The FedEx Developer Portal is an easier, self-guided experience requiring fewer steps and offering more manageable updates.
