How to calculate rates for FedEx® global third-party shipments

- Find the region for origin and destination:** For your FedEx global third-party shipment, find the region for origin and destination in the tables at right. The same step applies for determining origin and destination region.
- Find the zone:** Using the zone chart on [p. 2](#), find the origin region in the vertical listing and find the destination region in the horizontal listing. The letter listed in the intersection is your list-rate zone.
- Determine the weight:** Determine your total shipment weight.
- Choose your service:** Choose the service you wish to use. For FedEx International Priority® Freight, FedEx International Economy® Freight, and FedEx® International Deferred Freight, determine your service option (door-to-door, dropoff, hold-at-location, or dropoff and hold-at-location).
- Find your rate:** Find the rate for your zone, service, and weight combination using the rate tables on pp. [3-34](#).
- Determine fees:** For fees and other nontransportation charges, please refer to the current [FedEx Service Guide](#) for details.

Example:

For a shipment with origin Mexico and destination Hong Kong SAR, China:

- Find the regions for Mexico and Hong Kong SAR, China, in the origin/destination region chart at right.
 - Mexico is region OC
 - Hong Kong SAR, China, is region OG
- Find the zone that corresponds to origin and destination regions in the zone chart on [p. 2](#).
 - Origin OC to destination OG = Zone B
- The package weighs 25 lbs.
- The service is FedEx International Priority.
- Using the rate table for FedEx International Priority zone B on [p. 4](#), at 25 lbs. the rate will be \$506.
- See the [FedEx Service Guide](#) for applicable fees.
