FedEx Ship Manager Server v 15.0.1 Upgrade Paths				
13.0.1	13.0.4	13.0.5	13.0.6	13.0.7
14.0.1	14.0.3	14.0.4		

## Summary of Features

FedEx Ship Manager Server version 15.0.1 contains features and functionality to enhance your shipping experience. The FedEx Ship Manager Server v 15.0.1 features outlined on the following page will help your day-to-day operations run more smoothly and make your shipping process work smarter.

## Customer Support

To take advantage of the new features, contact your FedEx customer integration consultant or if you have questions or need assistance, please contact the FedEx Technical Support Center at **1.877.FDX.Assist 1.877.339.2774**, Monday through Friday, 7 a.m. to 9 p.m. CST; and Saturday, 9 a.m. to 3 p.m. CST.

## Additional Resources

Go to [fedex.com/server](http://fedex.com/server) to learn more about FedEx Ship Manager Server and how integration with your existing business systems can make shipping around the world faster and easier. This business site will provide you with online developer resources along with feature and service information.

## International Shipping Enhancements

### Standard Overnight Intra-Canada

**Express Service** will give you next business day delivery; example, ship on Wednesday and receive on Thursday. It's a new domestic Canada FedEx Express® service, offering next business day to businesses by 5 p.m. and by 8 p.m. to residences in most metropolitan areas.

### Delivery International First Expansion

provides a 2-day business delivery to 32 new origin countries for a faster international shipping service.

**Global Language Translation** will allow you to send/receive ship alerts, email notifications, and print return instructions not only in English but also in Arabic, Czech, Finnish, Hungarian, Norwegian, Polish, Russian and Turkish.

**International Enhancements** will require you to select one country code which represents where the majority of goods were manufactured. You will no longer be able to use XX for your country code as this option is now invalid and an error will be produced.

**Currency Conversion** features an improved conversion process to accurately calculate surcharge amounts and customs values.

## Shipping Label Enhancements

### FedEx SmartPost® Label Standardization

provides you the ability to indicate what to print in the secondary barcode space on your label; customer reference, 2D barcode or blank space.

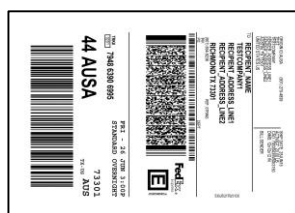

### Automation Label Standardization

The FedEx plain paper label layout is changing from a 7 x 4 3/4" PDF or PNG image label to an image of the 4 x 6" thermal label for U.S. domestic FedEx Express and FedEx Ground® shipments only. The thermal label image will be rotated 90°. The Terms and Conditions will continue to print below the fold and you will continue to fold the printed paper in half, placing the barcode side facing out in the plastic pouch. There are no other changes, but the labels will look differently.

FedEx Old Plain Paper Label

FedEx New Plain Paper Label

## FedEx Ground Shipping Enhancements

**Service Availability Enhancements** allows you to receive a number of FedEx Ground transit times with service availability requests, so you will be able to better compare what services are available, at what prices, and with expected delivery dates. You'll be able to make better shipping decisions with more ease.

## Dangerous Goods Shipping Enhancements

### Class 1 Explosives Dangerous Goods

provides the ability to input required data regarding Class 1 dangerous goods which will be in compliance with the International Air Transportation Association's regulations.

### Express Dangerous Goods

**Enhancements** allows you to add additional qualifying words to the technical name; Solution, Mixture, Molten and Stabilized, as well as gives the option to include global telephone numbers within the fields available for dangerous goods.

## Systems Enhancements

**Messaging Utility** allows you to proactively monitor your FedEx Ship Manager Server systems and the functions of multiple meters.

**Software Distribution Tool** will now allow you to schedule specific times during the day for downloading and implementing components to your device.

## Support Additional Operating Systems

will include Windows 8, Windows 8.1, Windows 8 Pro, Windows 8.1 Pro, Windows 8 Enterprise and Windows 8.1 Enterprise, Windows Server 2012 (Standard Edition) and Windows Server 2012 R2 (Standard Edition) environments as well as updates provided by Microsoft.
