

# See What's New with FedEx Ship Manager® Server v17.0.1

## Experience the difference

The 2017 version of FedEx Ship Manager Server brings enhancements to make your international shipping and clearance process more efficient, provides further visibility and control over the delivery schedule and options, and makes your dangerous goods shipments more compliant with regulations. It also brings new tools to improve the performance of your FedEx Ship Manager Server so that your day-to-day operations will run more smoothly and shipping processes will work smarter.

## Here are the highlights

**FedEx® Electronic Trade Documents (ETD)** enhancements allow you to upload your trade documents at any time after completing your shipment, but before the courier picks up the shipment. For pre- and post-shipment uploads, the filesize has been increased from 1 MB to 5 MB.

You can now utilize the FedEx Electronic Trade Documents process and upload your trade documents regardless of whether or not the destination country accepts trade documents electronically. This will aid in clearance. If the destination country requires printed trade documents, you will be able to do so.

**FedEx International Ground Consolidation (IGC)** shipment provides a way to consolidate your multiple international FedEx Ground packages from Canada to the US and US to Canada into a single consolidated shipment that clears customs as one entry, thereby significantly reducing your brokerage costs. It can also help to reduce the time in transit for your packages and provides end-to-end visibility for your recipient.

**Dangerous Goods (FedEx® DG Ready) Enhancements** offer you a simplified way to ship FedEx Express dangerous goods (DG) and FedEx Ground hazardous materials (hazmat) when you use a 3rd party FedEx DG Ready Solution to create your DG declaration or hazmat shipping paper and upload the data to FedEx before creating a shipping label. FedEx DG Ready allows you to ship DG and hazmat with confidence as you reduce errors and save time.

Learn more and find a list of 3rd party FedEx DG Ready solution providers at [fedex.com/dgready](http://fedex.com/dgready).

**Estimated Delivery Notification (EDN)** brings a new notification option for your FedEx SmartPost® shipments, which triggers an email on the delivery date. FedEx Express® and FedEx Ground® shipments already support this notification feature.

**Lithium Batteries Special Service Shipments** now allow you to choose an appropriate classification type for your Section II Lithium Batteries.

**Messaging Notifications** feature allows you to set up notifications of key events generated during FedEx Ship Manager Server operations and can help you mitigate potential problems.

**Customized Transaction Buffer Memory Size** feature allows you to configure an optimal memory size that is most suitable for your shipping transactions. It serves as an excellent solution to optimize your FedEx Ship Manager Server performance.

**Windows® Server 2016** support in FedEx Ship Manager Server provides you an opportunity to migrate to an operating system for better software performance, fewer patches and updates, faster restarts, better resource utilization, and enhanced security.

**Third Party Billing for FedEx SmartPost®** offers a new billing option for payers, who perform FedEx SmartPost shipments.

To take advantage of all the new features, contact your FedEx customer integration consultant or contact the FedEx Technical Support Center

- The United States and Canada, call 1.877.339.2774.
- Indian Subcontinent, the Middle East, and Africa, send an email to [meisatechsupport@fedex.com](mailto:meisatechsupport@fedex.com)
- Europe, send an email to [techsupport\\_emea@fedex.com](mailto:techsupport_emea@fedex.com)
- Asia-Pacific (APAC), send an email to [fdxhelpdesk@fedex.com](mailto:fdxhelpdesk@fedex.com)
- Brazil, send an email to [ct-brazil@corp.ds.fedex.com](mailto:ct-brazil@corp.ds.fedex.com)
- The rest of Latin America and the Caribbean (LAC), [click here](#) for your country's dedicated support phone number.

You can also go to the newly redesigned FedEx Developer Resource Center at [fedex.com/us/developer](http://fedex.com/us/developer) for interactive self-help tools, software information, documentation and Alert Notification System registration in order to receive email updates.

**Migrate Account and Meter Information** functionality enables you to export and import your meter information. During import, the meters can be configured automatically by using the earlier exported information and the required meter components can be downloaded from the FedEx server. It simplifies and expedites your FedEx Ship Manager Server software installation.

**Hold at Location** service now provides additional flexibility to select a particular "Hold at Location" matching with the specified location ID.

## Service Types and Special Services

**Transaction** extends the lookup availability for the intra country shipments to support all applicable origin destination countries.

**Master Air Waybill Label** of your FedEx International Priority DirectDistribution® shipment now supports printing of your shipment description.
