

What's New in FedEx Ship Manager® v3500

Experience the Difference

FedEx Ship Manager offers a wide range of new features added to make your everyday operations run more smoothly and achieve smarter shipping processes. This version of software is bundled with enhancements that enable faster processing of LTL Freight Shipments, enhanced security, a new Dangerous Goods module, Faster Data Transfers, new printer support and updated pricing features.

Through continuous enhancements, FedEx Ship Manager aims to accommodate all your logistic requirements and facilitate a best-in-class shipping experience.

FedEx Ship Manager Enhancements

Now **include more number of handling units per LTL Freight shipment** as the limit on the number of handling units allowed is increased from 25 to 50 handling units.

This version of the software allows LTL Freight shippers to **include both Hazardous and Non-Hazardous materials within a single handling unit**. Additional fees for incorrect paperwork can now be avoided as it is not necessary to designate all items in a handling unit as hazardous.

Viewing tracking information at shipment level is now made easy with the **new LTL Freight Trailer Manifest Report**. Quick scanning of trailer level information is easier than before.

International Economy Distribution and International Priority Distribution shipments inbound to the U.S. and Canada can now select No Signature Required (NSR) as one of the signature options. This **eliminates Manual addition of “No Signature Required” stickers** to the packages.

Importing commodity data is easier with this version of the software as filling information in multiple fields to import the commodity data is no longer required. The reduced number of required fields enable **faster importing of commodity data**.

Improved eBOL preference feature **enhances customer experience** by saving your eBOL Printing preferences for future use.

Now **avoid unnecessary surcharges based on dimensions** as the height dimension for LTL Freight shipments mentioned in the handling unit details is no longer reordered by the application.

Reduced critical shipping errors that occur due to too many characters in the Purchase Order field as the character limit is now set to 30 characters.

This version of the software **reduces chances of additional charges** applied due to missing weight value in LTL Freight shipments by reminding you if the weight value is blank.

Disable additional address line 3 at your convenience for all the shipments or just for domestic shipments for Express, Ground and Freight shipments offering **convenience in filling the shipping information**.

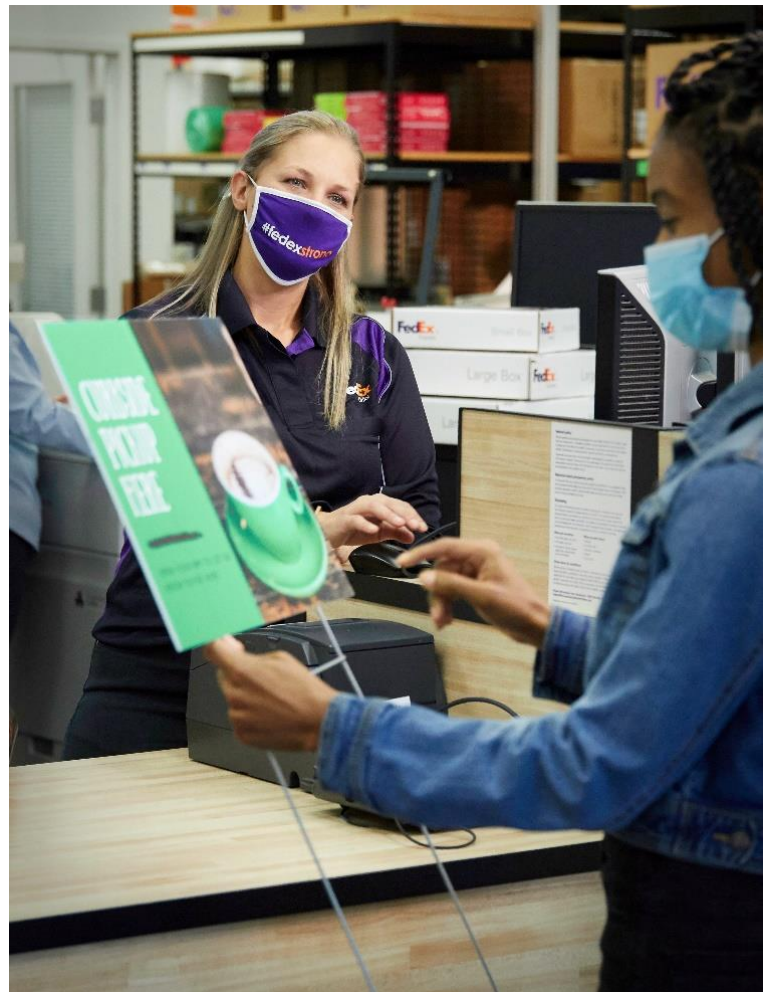

This version of the software requires **.Net 4.8 and higher versions**.

Shipping International shipments is now convenient with the simplified Electronic Export Information (EEI) filing process. The application now validates if EEI is required to be filed for a shipment based on the origin and destination country combination ensuring shipments are not caged by the customs.

Now enjoy **secure shipping experience** as the security protocols are updated to Transport Layer Security (TLS) 1.3. This update also ensures **safer and quicker data transfer**.

Reduced critical shipping errors that occur due to too many characters in the Purchase Order field as the character limit is now set to 30 characters.

Now use the printer of your choice as this version of the software supports new Zebra ZT411 model to **Print labels at your convenience**.

FedEx® Integration Assistant Enhancements

International Economy Distribution and International Priority Distribution shipments inbound to the U.S. and Canada can now select No Signature Required (NSR) as one of the signature options. This **eliminates Manual addition of “No Signature Required” stickers** to the packages.

This version of the software provides the **ability to assign child tracking numbers for LTL Freight shipments** with multiple handling units.
