Payment

You must remit payment in accordance with the *FedEx Service Guide*, tariff, service agreement or other terms or instructions provided to you by FedEx from time to time. You may not withhold payment on any shipments because of equipment failure or for the failure of FedEx to repair or replace any equipment.

Inaccurate Invoices

If you generate an inaccurate invoice, FedEx may bill or refund to you the difference according to the *FedEx Service Guide*, tariff service agreement or other terms or instructions provided to you by FedEx from time to time. A request for a refund on a FedEx shipment must be made in accordance with the applicable Service Guide or terms or instructions provided by FedEx from time to time. A shipment given to FedEx with incorrect information is not eligible for a refund under any FedEx money-back guarantee. FedEx may suspend any applicable money-back guarantee in the event of equipment failure or if it becomes inoperative.

Disclaimer

All Improper Transaction scenarios are for example only. They do not reflect all error condition scenarios.

About This Document

The *FedEx Ship Manager® Server Developer Guide Supplement* provides technical information about features in this release. It contains descriptions of new features, transactions and transaction fields that make up the new functionality and enhancements included in the software since the v 20.0.1 release.

This document is *not* intended for use as a coding reference or as a detailed technical specification of the new features. Details for all the features described in this document are included in the *FedEx Ship Manager® Server Transaction Coding Reference Guide* and the *FedEx Ship Manager® Server Developer Guide*.

Note: This document lists the data elements for this release of the FedEx Ship Manager® Server.

Audience

This document is intended for the following audiences.

- Shipper managers, users, or developers interested in obtaining FedEx Ship Manager® Server.
- Customer managers, users, or developers using FedEx Ship Manager® Server for the first time.
- Customer managers, users, or developers already using FedEx Ship Manager® Server wanting to learn about the new and enhanced features in this release.
- Managers, users, or developers of third-party development organizations.

Conventions

This guide uses the following conventions in the text.

Indicator	Description
Courier New	Sample transaction code is formatted in Courier New.
Note	Important notices begin with the word “Note.”
Bold	In task instructions, software user interface elements, or information you need to enter in a field or transaction, are formatted in bold.
italics	Names of documents and FSMS transactions are shown in italics. For instance, the *020/120 Global Ship Request/Reply*. The first occurrence of a term is italicized followed by a definition. For instance, *EEI filing* (Electronic Export Information).
purple	Cross-references.

Version 20.01

FedEx Extra Hours™ Service

This service caters to customers seeking next-day delivery in local areas with late pickup and next day deliveries covering larger zone delivery options. Fast overnight local delivery.

Feature details

- FedEx Extra Hours service is used when you order item(s) late in the day and expect next-day delivery, and the FedEx pickup cutoff window has passed.
- This contract-only service provides FedEx Express late pickups, allowing customers to receive packages the next day within normal commitment times.
- FedEx Extra Hours is available for FedEx First Overnight®, FedEx Priority Overnight®, and FedEx Standard Overnight® shipments.
- All FedEx Extra Hours services are available for pickup with overnight 1-day transit commitment Monday through Saturday. Saturday pickup will have 2-day transit with Monday delivery.

Service benefits

- Enables retailers to fulfill evening orders with a FedEx Express next-day local delivery.
- Provides overnight express shipping from stores or distribution centers by offering a later pickup cutoff time.
- Get products from your store or distribution center to your customer's door sooner than competitors with later cutoff times.
- Lowers transportation costs by using your local store inventory to fulfill orders during evening hours. Plus, improves inventory management by using local stores as distribution centers.
- Shipping of ORM-D packages in an express shipment now possible with FedEx Extra Hours.

Process to follow

To request FedEx Extra Hours services in 020 transactions, send below values in the field 1274:

- **E1** – Extra Hours Priority Overnight
- **E5** – Extra Hours Standard Overnight
- **E6** – Extra Hours First Overnight

Note: For ORM-D packages, specify value "O" in the package tag 1900 for a single piece, and in 1900-2, 1900-3, etc. for MPS shipments.

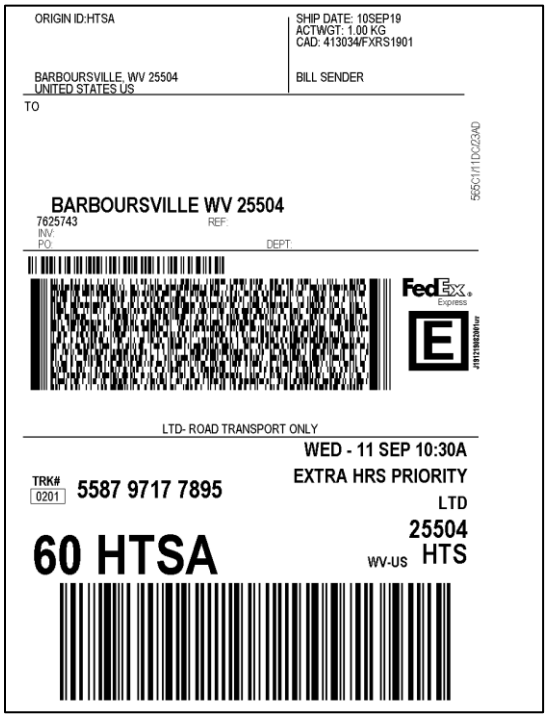
Sample shipping label



FedEx Ground® 7-Day Delivery

Get flexible residential delivery with FedEx Home Delivery®. Now available to all U.S. locations, Monday to Friday and most

on Saturday and Sunday.

FedEx Home Delivery enhancements

- Beginning January 19, 2020, FedEx Home Delivery® now makes residential deliveries 7 days a week, with delivery to most locations on Saturday and many on Sunday.
- Having a Sunday fall between the transit days may no longer affect the delivery day.

Increase in FedEx Home Delivery package weight limit

As of February 2020, the weight limit for FedEx Home Delivery packages has increased from 70 lbs. to 150 lbs.

Estimated delivery date and time of delivery

To provide precise shipping experience, FedEx Ground, FedEx International Ground and FedEx Home Delivery shipments return the estimated delivery date and time of delivery.
Deliver by Time is a new tag added to provide the estimated delivery date and time of delivery.

Table 2: Deliver by Time

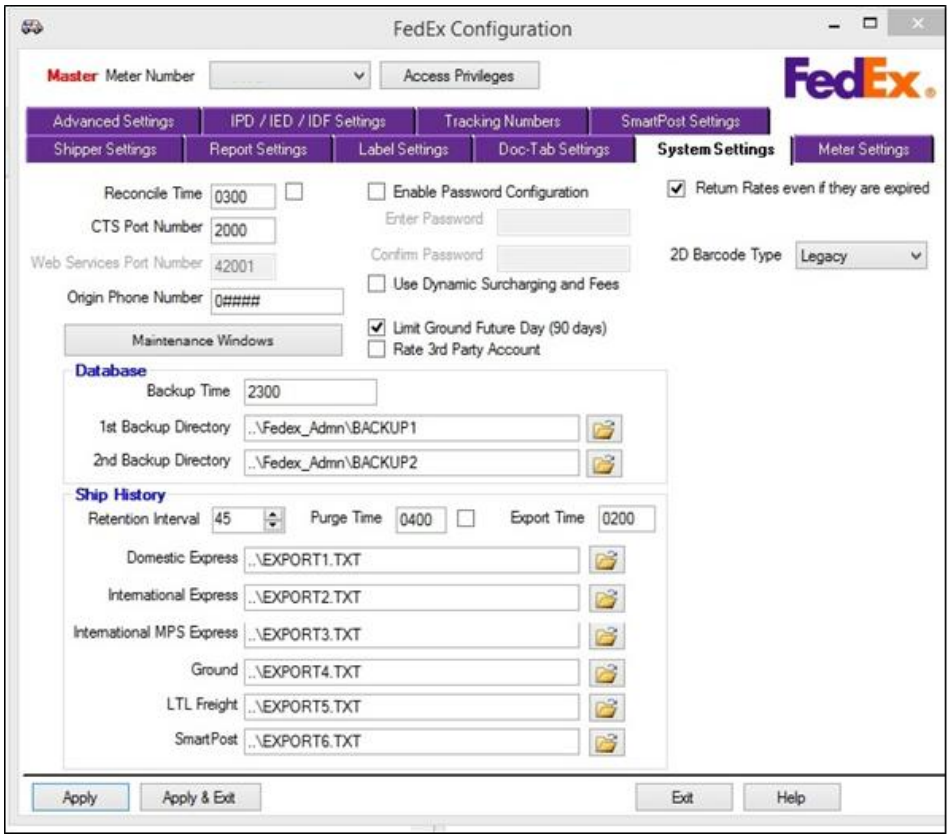
Deliver by Time						
Field ID	**Field Length**	**Data Type**	**Service**	**Input/ Output**	**Valid For**	**Basic Description**
2450	Min=1 Max=20	Time	FDXE FDXG FHD	O	All	**Field Level:** Shipment **Description** Use this tag to display precise delivery time in Route or Rate-Route combo or Time-in-Transit reply transaction. Valid values are: • type #1 is a time stamp=08:50 PM • type #2 is human-readable=End of Day *Examples:* • 13:00:00 is reformatted as 1:00 PM • 08:00:00 is reformatted as 8:00 AM • 23:59:00, this value is reformatted to a text value = End of Day

Return Rates

Experience uninterrupted shipping as this version of application continuous to **return rates and processes the labels** even when the rate files are expired or have rate conflicts and when the rates are returned as 0/blank/null.

The figure below shows the ***Return Rates Even if They are Expired*** checkbox in System Settings tab of the configuration utility.

Figure 1: System Settings screen with Return Rates even if they are expired checkbox



Find International Documents

To enhance Find International Document feature, the following new tags are added:

Find International Document Name

Table 3: Find International Document Name

Table 19: Find International Document Statement 3rd Party Name

Field ID	Field Name	Update	Affected Transaction
2540	Find International Document Statement 3rd Party Name	New Field	120 Global Ship Reply transaction
	Description Indicates the 3rd Party Name of the statement. This is used at the discretion of the customer. It is needed to download or view the international document request.		
	Type: A	Minimum Length: 1	Maximum Length: 256
	Multiple Occurrence: Y	Input/Output: O	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): Any URL type (to a web site or local folder) Default Value (if applicable or NA): NA **Optionality:** Not applicable **Shipment vs. Piece vs. Commodity Level:** Combination level - provided in a reply if tag 2513 = Y; depending upon the origin/destination pair, this tag will be empty if no such statement support type is returned.		

Find International Document Statement URL

Table 20: Find International Document Statement URL

Field ID	Field Name	Update	Affected Transaction
2541	Find International Document Statement URL	New Field	120 Global Ship Reply transaction
	Description Indicates the URL of the statement. This is used at the discretion of the customer. It is needed to download or view the international document request.		
	Type: A	Minimum Length: 1	Maximum Length: 256
	Multiple Occurrence: Y	Input/Output: O	Carrier: FDXE, FDXG

Field ID	Field Name	Update	Affected Transaction
	Valid Values (if applicable or NA): Any URL type (to a web site or local folder) Default Value (if applicable or NA): NA **Optionality:** Not applicable **Shipment vs. Piece vs. Commodity Level:** Combination level - provided in a reply if tag 2513 = Y; depending upon the origin/destination pair, this tag will be empty if no such statement support type is returned.		

Find International Statement Description

Table 21: Find International Statement Description

Field ID	Field Name	Update	Affected Transaction
2542	Find International Statement Description	New Field	120 Global Ship Reply transaction
	Description Indicates the statement description that provides additional information returned during an international transaction. This can be used for any type of regulatory document needed for prospective international shipments.		
	Type: A	Minimum Length: 1	Maximum Length: 320
	Multiple Occurrence: Y	Input/Output: O	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): Any URL type (to a web site or local folder) Default Value (if applicable or NA): N **Optionality:** Optional/Conditional 1 - Conditional and only can be returned in a 120 reply after the input tag 2513 is received in a 020 transaction. 2 - Optional based upon the content from the web services reply. **Shipment vs. Piece vs. Commodity Level:** Combination level - the lookup will trigger a shipment or commodity level of type of statement description that is recommended.		

Find International Document Filename

Table 22: Find International Document Filename

Field ID	Field Name	Update	Affected Transaction
2543	Find International Document Filename	New Field	120 Global Ship Reply transaction
	Description • Indicates the document filename that is stored locally in an FSMS folder for retrieval. OR • Link to a web site where the document filename can be reviewed or displayed.		
	Type: A	Minimum Length: 1	Maximum Length: 10
	Multiple Occurrence: Y	Input/Output: O	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): NA Default Value (if applicable or NA): NA Optionality: Not applicable **Shipment vs. Piece vs. Commodity Level:** Combination level - provided in a reply if tag 2513 = Y; depending upon the origin/destination pair, this tag will be empty if no such filename is returned.		

Find International Document Support Type

Table 23: Find International Document Support Type

Field ID	Field Name	Update	Affected Transaction
2544	Find International Document Support Type	New Field	120 Global Ship Reply transaction
	Description Indicates the Support Type which can be any combination of the following: • FedEx Generated • Print Only • SAMPLE		
	Type: A	Minimum Length: 1	Maximum Length: 20
	Multiple Occurrence: Y	Input/Output: O	Carrier: FDXE, FDXG

Field ID	Field Name	Update	Affected Transaction
	Valid Values (if applicable or NA): FEDEX_GENERATED, FILLABLE, PRINT_ONLY, SAMPLE **Default Value (if applicable or NA):** NA **Optionality:** Not applicable **Shipment vs. Piece vs. Commodity Level:** Combination level - provided in a reply if tag 2513 = Y; depending upon the origin/destination pair, this tag will be empty if no such filename is returned.

	Type: A	Minimum Length: 1	Maximum Length: 256
	Multiple Occurrence: Y	Input/Output: O	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): Any URL type (to a web site or local folder) Default Value (if applicable or NA): NA **Optionality:** Not applicable		

Field ID	Field Name	Update	Affected Transaction
	Shipment vs. Piece vs. Commodity Level: Combination level - provided in a reply if tag 2513 = Y; depending upon the origin/destination pair, this tag will be empty if no such filename is returned.		

Find International Document path/link

Table 27: Find International Document path/link

Field ID	Field Name	Update	Affected Transaction
2514	Find International Document path/link	New Field	020 Global Ship Request transaction/157 Demand Download Reply transaction
	Description Provides a path/link to a document including the actual document (as part of the path/link). The usage of this path/link is recommended to the customer for an international shipment.		
	Type: A	Minimum Length: 1	Maximum Length: 256
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): • Y = Perform a lookup • N = No lookup will be done Default Value (if applicable or NA): NA Optionality: NA **Shipment vs. Piece vs. Commodity Level:** Combination level - the lookup will trigger a shipment or commodity level of type of document path/link that is recommended.		

United States-Mexico-Canada agreement (USMCA/T-MEC/CUSMA)

USMCA is intended to create a modernized free-trade system between the three parties that addresses recent and emerging critical issues, such as the harmonization of regulatory systems, e-commerce, and the protection of intellectual property.

Feature details

Under the USMCA, importers will no longer be required to complete a formal certification document.

Certification of origin can be achieved using informal documentation, such as the commercial invoices and can be completed by the importer, exporter, or producer or as a stand-alone document.

Changes in duty and taxes for the customers.

Benefits

Ensures customers remain compliant with the governmental regulation for free trade between US, Mexico, and Canada by supporting additional values on the Commercial Invoice that are not currently provided.

Improves user experience, reliability, and business processes.

Critical value or capability compared to competition.

Allow customers to be able to continue completion of the Commercial Invoice using FedEx generated documents for USMCA/T-MEC/CUSMA, which will allow for seamless integration for Electronic Trade Documents (ETD).

The Customers can electronically report to local Customs according to the changes to the import regulations and to provide accurate duty and tax assessment and get duty reduction benefits.

USMCA/T-MEC/CUSMA Certification of Origin (COO)

A USMCA/T-MEC/CUSMA Certification of Origin (COO) is provided for goods that qualify for reduced or duty-free entry as a product of one of the three UNITED STATES-MEXCIO-CANADA AGREEMENT (USMCA/T-MEC/CUSMA) participants: Canada, Mexico and the U.S. The certification is completed by the exporter or manufacturer of the goods and is provided with the commercial invoice.

Currently the USMCA Certification of Origin is a set of 9 mandatory data elements, Integrated into existing shipping document.

Certifying statement to be added in Certification of Origin (COO) as below:

"I certify that the goods described in this document qualify as originating and the information contained in this document is true and accurate. I assume responsibility for proving such representations and agree to maintain and present upon request or to make available during a verification visit, documentation necessary to support this certification"

USMCA/T-MEC/CUSMA low-value statement

USMCA/T-MEC/CUSMA low-value statement for goods valued under $2500 USD/$3300 CAD/$1000 USD

"I hereby certify that the goods covered by this shipment qualifies as an originating good for purposes of preferential tariff treatment under USMCA/T-MEC/CUSMA".

The USMCA/T-MEC/CUSMA statement is printed in the lower left corner of the below invoices:

FedEx Consolidated Commercial Invoice

FedEx Ground Commercial Invoice

Ground Consolidated Commercial Invoice

International commercial invoice

USMCA/T-MEC/CUSMA Origin Criterion

Canada shippers set the USMCA/T-MEC/CUSMA Origin Criterion for each commodity shipped using field 2152 (USMCA/T-MEC/CUSMA Certification of Origin Preference Criterion) in the 020 Global Ship Request transaction. The valid values "D1" and "D2" are preference sub-criteria which pertain to progressive tariff reduction on goods. If selected, D1 or D2 would then print on the Certification of Origin.

Note: When the Origin Criterion "D" is split into "D1" and "D2", "D1" becomes the default and 'D' is not used. FedEx Ship Manager Server notifies customers when the Origin Criterion default value changes from 'D' to the sub-criterion value 'D1' with the following message: "The default value of USMCA/T-MEC/CUSMA Origin Criterion has been changed from 'D' to 'D1', ensure this is the proper value for your shipments."

Generating a USMCA/T-MEC/CUSMA Certification of Origin

You can generate a USMCA/T-MEC/CUSMA Certification of Origin (COO) for International Ground shipments from U.S. to Canada and Canada to U.S. You must first configure your report settings before you can generate a USMCA/T-MEC/CUSMA Certification of Origin.

Use Field 1373 (Report Code) set to 058 — USMCA/T-MEC/CUSMA COO to indicate that you want to print the USMCA/T-MEC/CUSMA certification of origin (COO) report.

To generate a USMCA/T-MEC/CUSMA Certification of Origin

1. Create a 020 Global Ship Request transaction.
2. Pass the USMCA/T-MEC/CUSMA COO fields with the data you want on the certification form.
3. FedEx Ship Manager Server pre-populates the certification form with the passed data.
4. Create a *095 Reprint Request* transaction.
5. Pass Field 1373 set to 058 to indicate that you want to print the USMCA/T-MEC/CUSMA COO form.
6. FedEx Ship Manager Server generates the pre-populated form that you can now print.

Note:

- *You can also generate a USMCA/T-MEC/CUSMA Certification of Origin (COO) for International Express USMCA shipments.*
- *While shipping to a destination country not tied to USMCA through a 020 Express shipping transaction, if the USMCA/T-MEC/CUSMA flag is enabled, the request to print the USMCA/T-MEC/CUSMA certification of origin is ignored.*

Table 28: Conditions to print USMCA/T-MEC/CUSMA report statements

Report Name	Condition	Statement
• FedEx Ground Commercial Invoice • International commercial invoice	Origin= U.S. or Puerto Rico or Mexico Destination = Canada and USMCA/T-MEC/CUSMA flag = Y	"I certify that the goods referenced in this invoice/sales contract originate under the rules of origin specified for these goods in the UNITED STATES-MEXICO-CANADA Agreement (USMCA/T-MEC/CUSMA) and that further production or any other operation outside the territories of the Parties has not occurred subsequent to production in the territories."
Ground Consolidated Commercial Invoice.	USMCA/T-MEC/CUSMA flag = Y	"I certify that the goods referenced in this invoice/sales contract originate under the rules of origin specified for these goods in the UNITED STATES-MEXICO-CANADA Agreement (USMCA/T-MEC/CUSMA) and that further production or any other operation outside the territories of the Parties has not occurred subsequent to production in the territories."
Consolidated Commercial Invoice	Origin= U.S. or Puerto Rico or Mexico Destination = Canada and USMCA/T-MEC/CUSMA flag = Y *Note: A USMCA/T-MEC/CUSMA certification is not required per regulation 19 CFR 181.22 (d) (iii).*	"I hereby certify that the goods covered by this shipment qualifies as an originating good for purposes of preferential tariff treatment under USMCA/T-MEC/CUSMA."
• Consolidated Commercial Invoice • International Commercial Invoice • FedEx Ground Commercial Invoice	Origin= Canada or Mexico Destination = U.S. or Puerto Rico or U.S. Virgin Islands and USMCA/T-MEC/CUSMA flag = Y *Note: A USMCA/T-MEC/CUSMA certification is not required per regulation 19 CFR 181.22 (d) (iii).*	"I hereby certify that the goods covered by this shipment qualifies as an originating good for purposes of preferential tariff treatment under USMCA/T-MEC/CUSMA."

USMCA/T-MEC/CUSMA new tags

To enhance USMCA feature, the following new tags are added:

Importer Email Address

Table 29: Importer Email Address

Field ID	Field Name	Update	Affected Transaction
615	Importer Email Address	New Field	120 Global Ship Reply transaction
	Description Importer Email Address specifies the email address of an importer.		
	Type: A	Minimum Length: 1	Maximum Length: 60
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FXFR
	Valid Values (if applicable or NA): NA Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional): NA Shipment vs. Piece vs. Commodity Level: Shipment		

Exporter Email Address

Table 30: Exporter Email Address

Field ID	Field Name	Update	Affected Transaction
623	Exporter Email Address	New Field	120 Global Ship Reply transaction
	Description Exporter Email Address specifies the email address of an Exporter.		
	Type: A	Minimum Length: 1	Maximum Length: 60
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FXFR
	Valid Values (if applicable or NA): NA Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional): NA Shipment vs. Piece vs. Commodity Level: Shipment		

Producer Email Address

Table 31: Producer Email Address

Field ID	Field Name	Update	Affected Transaction
624	Producer Email Address	New Field	120 Global Ship Reply transaction
	Description Producer Email Address specifies the email address of a producer.		
	Type: A	Minimum Length: 1	Maximum Length: 60
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FXFR
	Valid Values (if applicable or NA): NA Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional): NA Shipment vs. Piece vs. Commodity Level: Shipment		

USMCA/T-MEC/CUSMA Producer Phone Number

Table 32: USMCA/T-MEC/CUSMA Producer Phone Number

Field ID	Field Name	Update	Affected Transaction
625	USMCA/T-MEC/CUSMA Producer Phone Number	New Field	120 Global Ship Reply transaction
	Description • Specifies the phone number of the producer. • The maximum length of this field is 10 for U.S. and CA, 15 for all other countries.		
	Type: AN	Minimum Length: 10	Maximum Length: 10
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FXFR
	Valid Values (if applicable or NA): NA Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional): Optional Shipment vs. Piece vs. Commodity Level: Shipment		

USMCA/T-MEC/CUSMA Indicator

Table 33: USMCA/T-MEC/CUSMA Indicator

Field ID	Field Name	Update	Affected Transaction
1799	USMCA/T-MEC/CUSMA Indicator	Updated Field	120 Global Ship Reply transaction
	Description Indicates the role of shipper/certifier in the new certification of origin regulatory document.		
	Type: A	Minimum Length: 1	Maximum Length: 1
	Multiple Occurrence: Y	Input/Output: I	Carrier: FDXE, FDXG, FXFR
	Valid Values (if applicable or NA): E — Exporter, I — Importer, P — Producer Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional – state why or NA): Required Shipment vs. Piece vs. Commodity Level: Shipment		

USMCA/T-MEC/CUSMA Origin Criterion

Table 34: USMCA/T-MEC/CUSMA Origin Criterion

Field ID	Field Name	Update	Affected Transaction
618	USMCA/T-MEC/CUSMA Origin Criterion	New Field	120 Global Ship Reply transaction
	Description • Identifies if the good(s) being shipped are wholly obtained or produced entirely in the territory of one or more of the parties (Producer, Exporter, Importer). • This tag is used in a (formerly known as NAFTA transaction) 020 international shipping transaction for a US, CA, or MX origin to an associated and unique international destination country of US, CA, or MX (nor an intra-country shipment).		
	Type: A	Minimum Length: 1	Maximum Length: 2
	Multiple Occurrence: Y	Input/Output: I	Carrier: FDXE, FDXG, including Freight

Field ID	Field Name	Update	Affected Transaction
	Valid Values (if applicable or NA): A, B, C, D1, D2, D3 Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional – state why or NA): Required Shipment vs. Piece vs. Commodity vs. Combination Level: Commodity		

Blanket Period From Date

Table 35: Blanket Period From Date

Field ID	Field Name	Update	Affected Transaction
2193	Blanket Period From Date	New Field	120 Global Ship Reply transaction
	Description • Specifies USMCA/T-MEC/CUSMA COO blanket period from date. • Up to 12 months of period covered by certification (if applicable). • Include the period if the certification covers multiple shipments of identical goods for a specified period of up to 12 months as set out in Chapter 5, Article 5.3 (Basis of a Certification of Origin) of the agreement.		
	Type: Date	Minimum Length: 8	Maximum Length: 8
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FXFR
	Valid Values (if applicable or NA): Format = YYYYMMDD Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional): NA Shipment vs. Piece vs. Commodity Level: Shipment		

Blanket Period To Date

Table 36: Blanket Period To Date

Field ID	Field Name	Update	Affected Transaction
2194	Blanket Period To Date	New Field	120 Global Ship Reply transaction

Field ID	Field Name	Update	Affected Transaction
	Description • Specifies USMCA/T-MEC/CUSMA COO blanket period to date. • Up to 12 months of period covered by certification (if applicable). • Include the period if the certification covers multiple shipments of identical goods for a specified period of up to 12 months as set out in Chapter 5, Article 5.3 (Basis of a Certification of Origin) of the agreement.		
	Type: Date	Minimum Length: 8	Maximum Length: 8
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FXFR
	Valid Values (if applicable or NA): Format = YYYYMMDD Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional): NA Shipment vs. Piece vs. Commodity Level: Shipment		

Exporter/PPI Address Line 3

Table 37: Exporter/PPI Address Line 3

Field ID	Field Name	Update	Affected Transaction
626	Exporter/PPI Address Line 3	New Field	020/120 Global Ship Request/Reply transaction
	Description Exporter/Principal Party in Interest address line 3 field allows you to include an additional exporter address line in a transaction.		
	Type: AKE	Minimum Length: 1	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FXFR
	Valid Values (if applicable or NA): NA Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional – state why or NA): Optional Shipment vs. Piece vs. Commodity Level: Shipment		

Print the Low Value Statement on the Commercial Invoice

Table 38: Print the Low Value Statement on the Commercial Invoice

Field ID	Field Name	Update	Affected Transaction
691	Print the Low Value Statement on the Commercial Invoice	New Field	120 Global Ship Reply transaction

	Description
	• This tag allows the customer to enable printing of the low-value statement on the commercial invoice. If enabled, the low-value statement is included in the regulatory document also.
	• The low-value statement is included based on the importing country and the total customs value of the shipment. It is applicable when the customs value is under a threshold value as mentioned below:
	  ○ For U.S. <= $2500 USD
	  ○ For CA <= $3300 CAD
	  ○ For MX <= $1000 USD		

	Type: A	Minimum Length: 1	Maximum Length: 1

Field ID	Field Name	Update	Affected Transaction
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FXFR
	Valid Values (if applicable or NA): • C – Conditionally checked based upon the customs value provided in a transaction • Y – Customer requests the printing of the low-value statement on the commercial invoice (for a USMCA/T-MEC/CUSMA type of shipment) • N – DO NOT print the low-value statement on the commercial invoice (for a USMCA/T-MEC/CUSMA type of shipment) Default Value (if applicable or NA): C Optionality (Required, Optional, Conditional): Conditional Shipment vs. Piece vs. Commodity Level: Shipment		

USMCA renamed tags

To enhance USMCA feature, the following existing tags are renamed:

Field ID	Field Name
2153	USMCA/T-MEC/CUSMA Certification of Origin Commodity Producer
2154	USMCA/T-MEC/CUSMA Certification of Origin Net Cost
2155	USMCA/T-MEC/CUSMA Certification of Origin Net Cost Begin Date
2156	USMCA/T-MEC/CUSMA Certification of Origin Net Cost End Date
2157	USMCA/T-MEC/CUSMA Certification of Origin Country of Origin
2158	USMCA/T-MEC/CUSMA Certification of Origin Producer
2159	USMCA/T-MEC/CUSMA Certification of Origin Producer Company Name
2160	USMCA/T-MEC/CUSMA Certification of Origin Producer Contact Name
2161	USMCA/T-MEC/CUSMA Certification of Origin Producer Address line 1
2162	USMCA/T-MEC/CUSMA Certification of Origin Producer Address line 2
2163	USMCA/T-MEC/CUSMA Certification of Origin Producer City

2164	USMCA/T-MEC/CUSMA Certification of Origin Producer State Code
2165	USMCA/T-MEC/CUSMA Certification of Origin Producer Postal Code
2166	USMCA/T-MEC/CUSMA Certification of Origin Producer Country Code
2167	USMCA/T-MEC/CUSMA Certification of Origin Producer Tax ID/EIN
2168	USMCA/T-MEC/CUSMA Certification of Origin Company
2169	USMCA/T-MEC/CUSMA Certification of Origin Name
2170	USMCA/T-MEC/CUSMA Certification of Origin Title
2171	USMCA/T-MEC/CUSMA Certification of Origin Telephone Number
2172	USMCA/T-MEC/CUSMA Certification of Origin Fax Number

Language expansion

Language expansion provides you the ability to communicate in 13 more languages for shipment notification. The additional languages are Indonesian, Bulgarian, English (non-U.S.), Estonian, German, Greek, Latvian, Lithuanian, Romanian, Slovak, Slovenian, Ukrainian and Vietnamese.

The following fields are updated to support the shipment notifications in 13 new languages:

Broker Language Code

Table 39: Broker Language Code

Field ID	Field Name	Update	Affected Transaction
1561	Broker Language Code	Updated Field	020/120 Global Ship Request/Reply
	Description Broker Language Code field specifies the language for Broker Delivery, FedEx ShipAlert, and Exception email.		
	Type: A	Minimum Length: NA	Maximum Length: 2
	Multiple Occurrence: Y	Input/Output: I	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): bg—Bulgarian, de—German (Switzerland), el—Greek, en—English (non-U.S.), et—Estonian, in— Indonesian, lv—Latvian, lt—Lithuanian, ro—Romanian, sk—Slovak, sl—Slovenian, uk—Ukrainian, vi—Vietnamese **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** NA **Shipment vs. Piece vs. Commodity Level:** NA		

Shipper Language Code

Table 40: Shipper Language Code

Field ID	Field Name	Update	Affected Transaction
1555	Shipper Language Code	Updated Field	037/137 Email Label Transaction, 020/120 Global Ship Request/Reply Transaction
	Description The Shipper Language Code field specifies the language for Shipper Delivery, ShipAlert, and Exception email. Use this field to display notification in a language other than English.		
	Type: A	Minimum Length: NA	Maximum Length: 2
	Multiple Occurrence:	Input/Output: I	Carrier: FDXE FDXG FXFR FDXS
	Valid Values (if applicable or NA): bg—Bulgarian, de—German (Switzerland), el—Greek, en—English (non-U.S.), et—Estonian, in— Indonesian, lv—Latvian, lt—Lithuanian, ro—Romanian, sk—Slovak, sl—Slovenian, uk—Ukrainian, vi—Vietnamese **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** NA **Shipment vs. Piece vs. Commodity Level:** NA		

Recipient Language Code

Table 41: Recipient Language Code

Field ID	Field Name	Update	Affected Transaction

Table 42: Other Language Code

Field ID	Field Name	Update	Affected Transaction
1552	Other Language Code	Updated Field	020/120 Global Ship Request/Reply Transaction, 060/160 Freight Create BOL Request, 037/137 Email Label Transaction
	Description This field specifies the language used for all notifications (delivery, FedEx ShipAlert, exception) sent to Field 1204 (Ship Alert Email Address).		
	Type: A	Minimum Length: NA	Maximum Length: 2
	Multiple Occurrence: Y	Input/Output: I	Carrier: FDXE FDXG FDXS FXFR
	Valid Values (if applicable or NA): bg—Bulgarian, de—German (Switzerland), el—Greek, en—English (non-U.S.), et—Estonian, in— Indonesian, lv—Latvian, lt—Lithuanian, ro—Romanian, sk—Slovak, sl—Slovenian, uk—Ukrainian, vi—Vietnamese **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** NA **Shipment vs. Piece vs. Commodity Level:** NA		

Additional tags

Standard Delivery Day

This new field is used to indicate the estimated day when then the package is going to be delivered. More details are explained in the following table.

Table 43: Standard Delivery Day field

Field ID	Field Name	Update	Affected Transaction
7654	Standard Delivery Day	New Field	150 Service Types and Special Services Reply
	Description This new field is used to indicate the estimated day when then the package is going to be delivered. Standard Delivery Day will be printed on the shipping label if it was provided. The valid values vary from 0 through 7 for each position.		
	Type: N	Minimum Length: 1	Maximum Length: 2
	Multiple Occurrence: NA	Input/Output: O	Carrier: FDXE
	Valid Values (if applicable or NA): NA **Default Value (if applicable or NA):** None **Optionality (Required, Optional, Conditional):** Optional **Shipment vs. Piece vs. Commodity Level:** Shipment		

Standard Delivery Time

This new field is used to indicate the estimated time delivery. More details are explained in the following table.

Table 44: Standard Delivery Time field

Field ID	Field Name	Update	Affected Transaction
7655	Standard Delivery Time	New Field	150 Service Types and Special Services Reply
	Description This new field is used to indicate the estimated time delivery. Standard delivery time is printed on the shipping label when provided.		
	Type: Time HH:MM Military time	Minimum Length: 1	Maximum Length: 2

Field ID	Field Name	Update	Affected Transaction
	Multiple Occurrence: Y	Input/Output: I	Carrier: FDXE
	Valid Values (if applicable or NA): 0 through 9 for each position **Default Value (if applicable or NA):** None **Optionality (Required, Optional, Conditional):** Conditional **Shipment vs. Piece vs. Commodity Level:** NA		

Packaging Type Volume

This field is used to indicate the volume of packaging type in cubic centimeters for each packaging type. More details are explained in the following table.

Table 45: Packaging Type Volume field

Field ID	Field Name	Update	Affected Transaction
7656	Packaging Type Volume	New Field	150 Service Types and Special Services Reply
	Description This field is used to indicate the volume of packaging type in cubic centimeters for each packaging type.		
	Type: N	Minimum Length: 1	Maximum Length: 3
	Multiple Occurrence: NA	Input/Output: I	Carrier: FDXE
	Valid Values (if applicable or NA): 0 through 9 for each position **Default Value (if applicable or NA):** None **Optionality (Required, Optional, Conditional):** Conditional **Shipment vs. Piece vs. Commodity Level:** NA		

Address lines enhancement

Achieve quick and precise doorstep delivery of shipments with additional recipient address line to give more information about your delivery location.

Recipient Address Line 1

The maximum field length of the Recipient Address Line 1 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 46: Recipient Address Line 1

Field ID	Field Name	Update	Affected Transaction
13	Recipient Address Line 1	Updated Field	020/120 Global Ship Request/Reply transaction
	Description Recipient Address Line 1 field states the first address line of the recipient address.		
	Type: AN	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** Required **Shipment vs. Piece vs. Commodity Level: Shipment**		

Recipient Address Line 2

The maximum field length of the Recipient Address Line 2 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 47: Recipient Address Line 2

Field ID	Field Name	Update	Affected Transaction
14	Recipient Address Line 2	Updated Field	020/120 Global Ship Request/Reply transaction
	Description Recipient Address Line 2 field states the second address line of Recipient. This is the address to which the shipment is sent.		

Field ID	Field Name	Update	Affected Transaction
	Type: AN	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** Optional **Shipment vs. Piece vs. Commodity Level: Shipment**		

Recipient Address Line 3

A new field Recipient Address Line 3 enables the customer to include an additional recipient address line in a transaction. The details of this field are explained in the following table.

Table 48: Recipient Address Line 3

Field ID	Field Name	Update	Affected Transaction
2944	Recipient Address Line 3	New Field	020/120 Global Ship Request/Reply transaction
	Description This enables the customer to include an additional recipient address line in a transaction.		
	Type: AN	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** Optional **Shipment vs. Piece vs. Commodity Level: Shipment**		

Sender Address Line 1

The maximum field length of the Sender Address Line 1 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 49: Sender Address Line 1

Field ID	Field Name	Update	Affected Transaction
5	Sender Address Line 1	Updated Field	020/120 Global Ship Request/Reply transaction, 070/170 Meter Query or Configuration Transaction, 035/135 Child Meter Registration Transaction, 037/137 Email Label Transaction, 060/160 Freight Create BOL Transaction
	Description Sender Address Line 1 field indicates the primary address line of Shipper/Sender address from which the shipment originates.		
	Type: AN	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA): NA** **Optionality (Required, Optional, Conditional):** Required **Shipment vs. Piece vs. Commodity Level:** Shipment		

Sender Address Line 2

The maximum field length of the Sender Address Line 2 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 50: Sender Address Line 2

Field ID	Field Name	Update	Affected Transaction
6	Sender Address Line 2	Updated Field	020/120 Global Ship Request/Reply transaction, 070/170 Meter Query or Configuration Transaction, 035/135 Child Meter Registration Transaction, 037/137 Email Label Transaction, 060/160 Freight Create BOL Transaction
	Description Second address line 2 of Shipper/Sender address. This is the address from which the shipment originates.		
	Type: AN	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** Optional **Shipment vs. Piece vs. Commodity Level:** Shipment		

Sender Address Line 3

A new field Sender Address Line 3 enables the customer to include an additional address information line. The details of this field are explained in the following table.

Table 51: Sender Address Line 3

Field ID	Field Name	Update	Affected Transaction
2420	Sender Address Line 3	New Field	020/120 Global Ship Request/Reply transaction, 070/170 Meter Query or Configuration Transaction, 035/135 Child Meter Registration Transaction, 037/137 Email Label Transaction, 060/160 Freight Create BOL Transaction

Field ID	Field Name	Update	Affected Transaction
	Description This enables the customer to include an additional address information line.		
	Type: AN	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA): NA** **Optionality (Required, Optional, Conditional): Optional** **Shipment vs. Piece vs. Commodity Level: Shipment**		

Importer of Record–Address Line 1

The maximum field length of the Importer of Record–Address Line 1 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 52: Importer of Record–Address Line 1

Field ID	Field Name	Update	Affected Transaction
172	Importer of Record–Address Line 1	Updated Field	**020 Request Transaction**
	Description • Importer of Record–Address Line 1 field is the first line of the address on the Importer of Record. • Prints on the standard commercial invoice and the FedEx International Priority DirectDistribution® consolidated commercial invoice.		
	Type: A	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA):** Not applicable **Optionality (Required, Optional, Conditional):** Required Data used for this tag is required and will extend the previous max length from 35 to the new max length of 100. **Shipment vs. Piece vs. Commodity Level:** Shipment		

Importer of Record–Address Line 2

The maximum field length of the Importer of Record–Address Line 2 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 53: Importer of Record–Address Line 2

Field ID	Field Name	Update	Affected Transaction
173	Importer of Record–Address Line 2	Updated Field	**020 Request Transaction**
	Description • Importer of Record–Address Line 2 field is the second line of the address on the Importer of Record. • Prints on the standard commercial invoice and the FedEx International Priority DirectDistribution® consolidated commercial invoice.		
	Type: A	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA):** Not applicable **Optionality (Required, Optional, Conditional):** Required Data used for this tag is on an as needed basis by the shipper to allow for more detail regarding the Importer of Record-address. **Shipment vs. Piece vs. Commodity Level:** Shipment		

HAL Address Line 1

The maximum field length of the HAL Address Line 1 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 54: HAL Address Line 1

Field ID	Field Name	Update	Affected Transaction
44	HAL Address Line 1	Updated Field	120 Global Ship Reply transaction
	Description • First address line of the FedEx Hold At Location where package is held for pickup. • Ground will default to the First address line of the default HAL Location defined for the recipient postal code in the downloaded Ground HAL default location data.		

Field ID	Field Name	Update	Affected Transaction
	Type: A/N	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** Required Data used for this tag is required and will extend the previous max length from 35 to the new max length of 100. **Shipment vs. Piece vs. Commodity Level:** NA		

HAL Address Line 2

The maximum field length of the HAL Address Line 2 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 55: HAL Address Line 2

Field ID	Field Name	Update	Affected Transaction
3148	HAL Address Line 2	Updated Field	120 Global Ship Reply transaction
	Description • Second address line of the FedEx Hold At Location where package is held for pickup. • Ground will default to the second address line of the default HAL Location defined for the recipient postal code in the downloaded Ground HAL default location data.		
	Type: A/N	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA): NA** **Optionality (Required, Optional, Conditional): Required** **Data used for this tag is required and will extend the previous max length from 35 to the new max length of 100.** **Shipment vs. Piece vs. Commodity Level: NA**		

Buyer/Sold-To Line 1

The maximum field length of the Buyer/Sold-To Line 1 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 56: Buyer/Sold-To Line 1

Field ID	Field Name	Update	Affected Transaction
7754	Buyer/Sold-To Line 1	Updated Field	020/120 Global Ship Request/Reply Transaction
	Description • Buyer/Sold-To Address 1 field indicates first line of the address for the buyer/sold-to party of the goods for an International Ground shipment. • Buyer/Sold-To Address 1 is printed in the buyer/sold-to party section on the Ground Commercial Invoice.		
	Type: AN	Minimum Length: 1	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA): NA** **Optionality (Required, Optional, Conditional):** Required **Shipment vs. Piece vs. Commodity Level: Shipment**		

Buyer/Sold-To Line 2

The maximum field length of the Buyer/Sold-To Line 2 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 57: Buyer/Sold-To Line 2

Field ID	Field Name	Update	Affected Transaction
7755	Buyer/Sold-To Line 2	Updated Field	020/120 Global Ship Request/Reply Transaction
	Description • Buyer/Sold-To Address 2 field indicates the second line of the address for the buyer/sold-to party of the goods for an International Ground shipment. • Buyer/Sold-To Address 2 is printed in the buyer/sold-to party section on the Ground Commercial Invoice.		
	Type: AN	Minimum Length: 1	Maximum Length: 100

Field ID	Field Name	Update	Affected Transaction
	Multiple Occurrence: N	Input/Output: I	Carrier: FXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA): NA** **Optionality (Required, Optional, Conditional):** Required **Shipment vs. Piece vs. Commodity Level: Shipment**		

Broker Address Line 1

The maximum field length of the Broker Address Line 1 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 58: Broker Address Line 1

Field ID	Field Name	Update	Affected Transaction
1181	Broker Address Line 1	Updated Field	020/120 Global Ship Request/Reply Transaction
	Description • Broker Address Line 1 field is the first line of address of the broker who will clear the shipment (if other than FedEx). • Prints on commercial invoice.		
	Type: AN	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA): NA** **Optionality (Required, Optional, Conditional):** Required **Shipment vs. Piece vs. Commodity Level: Shipment**		

Broker Address Line 2

The maximum field length of the Broker Address Line 2 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 59: Broker Address Line 2

Field ID	Field Name	Update	Affected Transaction
1182	Broker Address Line 2	Updated Field	020/120 Global Ship Request/Reply Transaction
	Description • This tag is designed to allow the customer to use the existing Broker address line 2 in a transaction and allow for a new length 100.		
	Type: AN	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FXE
	Valid Values (if applicable or NA): ASCII 7-bit format **Default Value (if applicable or NA): NA** **Optionality (Required, Optional, Conditional):** Required **Shipment vs. Piece vs. Commodity Level: Shipment**		

Alternate Return Address Line 1

The maximum field length of the Alternate Return Address Line 1 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 60: Alternate Return Address Line 1

Field ID	Field Name	Update	Affected Transaction
1487	Alternate Return Address Line 1	Updated Field	**020 Request Transaction**
	Description • Alternate Return Address Line 1 specifies the first line of return address. • For shipping, use Single Shot, Single Piece, Openship, or MPS.		
	Type: A	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FDXS

Field ID	Field Name	Update	Affected Transaction
	Valid Values (if applicable or NA): ASCII 7-bit format Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional): Required Shipment vs. Piece vs. Commodity Level: Shipment		

Alternate Return Address Line 2

The maximum field length of the Alternate Return Address Line 2 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 61: Alternate Return Address Line 2

Field ID	Field Name	Update	Affected Transaction
1488	Alternate Return Address Line 2	Updated Field	**020 Request Transaction**
	Description • Alternate Return Address Line 2 specifies the second line of the return address. • For shipping, use Single Shot, Single Piece, Openship, or MPS.		
	Type: A	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FDXS
	Valid Values (if applicable or NA): ASCII 7-bit format Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional): Required Shipment vs. Piece vs. Commodity Level: Shipment		

C.O.D. Return Address Line 1

The maximum field length of the C.O.D. Return Address Line 1 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 62: C.O.D. Return Address Line 1

Field ID	Field Name	Update	Affected Transaction
1240	C.O.D. Return Address Line 1	Updated Field	**020 Global Ship Request, 060 Freight Create BOL Request**
	Description C.O.D. Return Address Line 1 field specifies the first line of the return address for the FedEx® Collect on Delivery (C.O.D.) package.		
	Type: A/N	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FXFR
	Valid Values (if applicable or NA): ASCII 7-bit format Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional): Required Shipment vs. Piece vs. Commodity Level: NA		

C.O.D. Return Address Line 2

The maximum field length of the C.O.D. Return Address Line 2 field is updated to accommodate 100 characters. The details of the update are as follows:

Table 63: C.O.D. Return Address Line 2

Field ID	Field Name	Update	Affected Transaction
1241	C.O.D. Return Address Line 2	Updated Field	**020 Global Ship Request, 060 Freight Create BOL Request**
	Description C.O.D. Return Address Line 2 field specifies the second line of return address for the FedEx® Collect on Delivery (C.O.D.) package.		
	Type: A/N	Minimum Length: 2	Maximum Length: 100
	Multiple Occurrence: N	Input/Output: I	Carrier: FDXE, FDXG, FXFR

Field ID	Field Name	Update	Affected Transaction
	Valid Values (if applicable or NA): ASCII 7-bit format Default Value (if applicable or NA): NA Optionality (Required, Optional, Conditional): Required Shipment vs. Piece vs. Commodity Level: NA		

Nonstandard Container Flag update

The field Nonstandard Container Flag is updated with new rules. The updated details of this field are explained in the following table.

Table 64: Nonstandard Container Flag

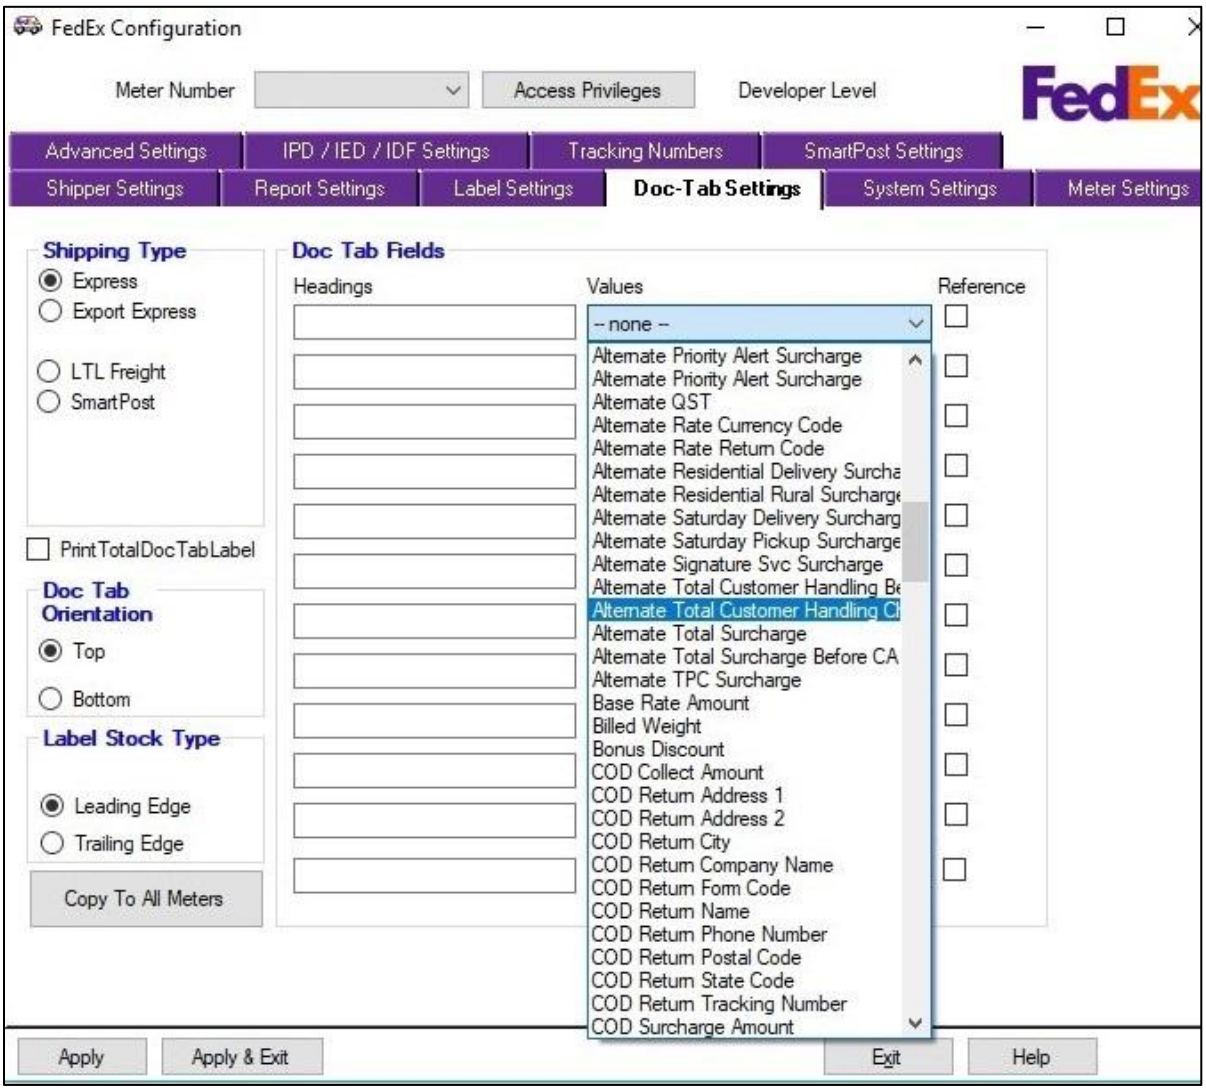
<table>
<tr><th>Field ID</th><th>Field Name</th><th>Update</th><th>Affected Transaction</th></tr>
<tr><td rowspan="6">3018</td><td>Nonstandard Container Flag</td><td>Updated Field</td><td>020 Global Ship Request, 025/125 Rate Available Services Request/Reply</td></tr>
<tr><td colspan="3">Description
Non-standard Container Flag field specifies if non-standard packaging is used in the shipment.
Non-standard packaging is defined as a container that is >62" on any one side
Note: Non-standard Container Flag is set to Y when it is sent in a transaction.</td></tr>
<tr><td>Type: A/N</td><td>Minimum Length: 1</td><td>Maximum Length:1</td></tr>
<tr><td>Multiple Occurrence: N</td><td>Input/Output: I/O</td><td>Carrier: FDXG, FDXS, FDXE</td></tr>
<tr><td colspan="3">Valid Values (if applicable or NA):
Y-if non-standard packaging is used
N-if non-standard packaging is not used
Default Value (if applicable or NA): N
Optionality (Required, Optional, Conditional): Required
Shipment vs. Piece vs. Commodity Level: NA</td></tr>
</table>

User Experience enhancements

Doc-Tab Settings

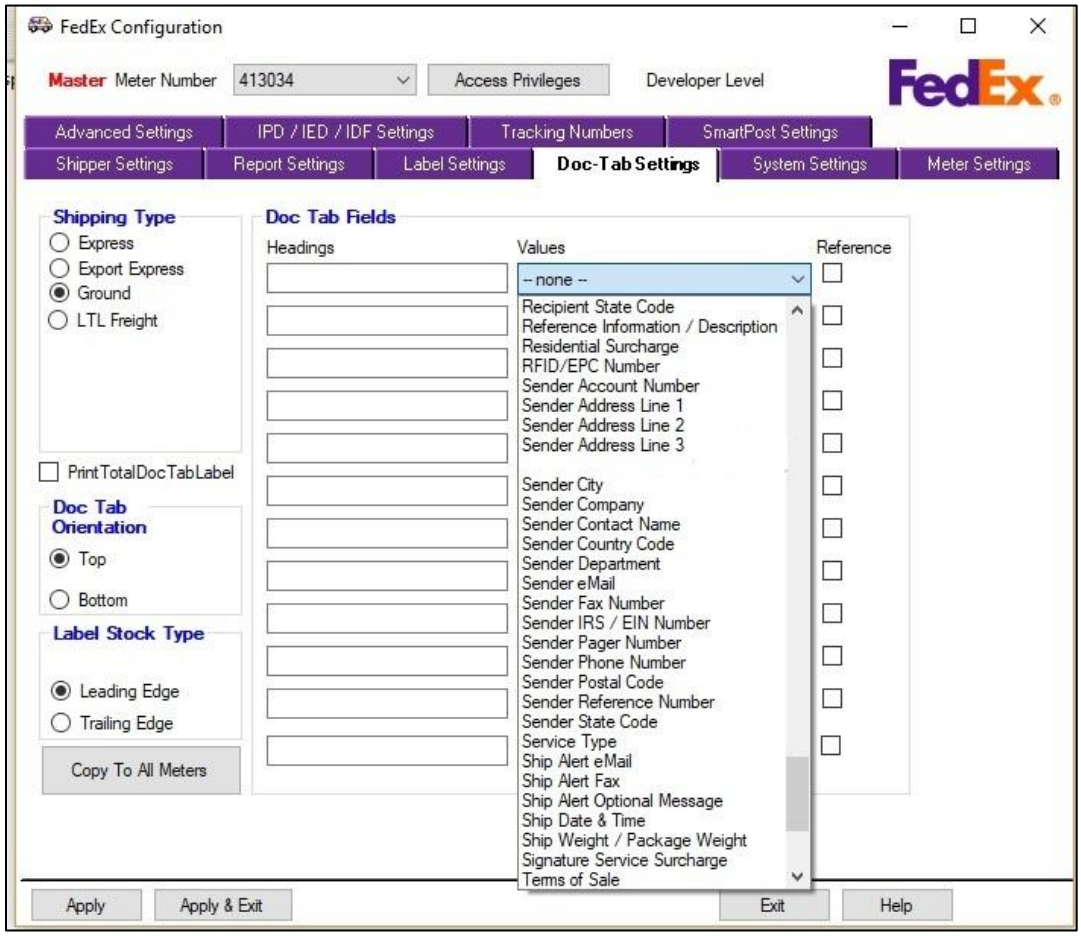
- The "Values" drop-down list in Doc-Tab setting is now sorted in alphabetical order (A-Z or ascending sort order). Users can now easily select the values from the drop-down list. The alphabetically sorted values make it easier to locate them.
- A new dropdown value **Sender Address Line 3** is added into Values dropdown list of Doc-Tab Settings in the FSMS Configuration screen.

Figure 3: Doc-Tab Settings tab



Note: Going forward the default value of Shipping Type will be "Express."

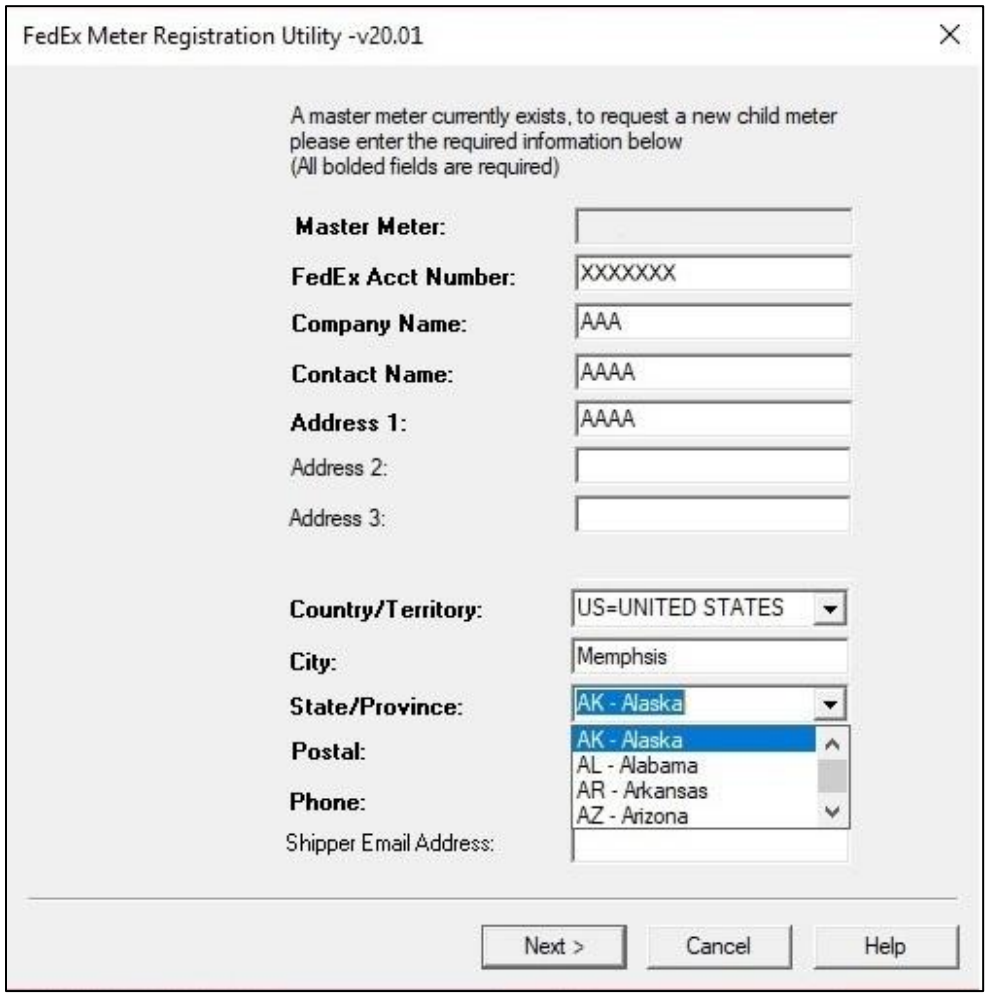
Figure 4: Doc-Tab Settings tab with new sender address line



Meter Registration Utility

- The “State/Province” drop-down list has been optimized to improve the user experience. The 2-character state codes are now listed in the ascending order (A-Z) making it easier for the user to locate them.
- Address line 3 is added into the Meter Registration Utility screen which is used to enter any additional address information, like nearby landmarks and directions.

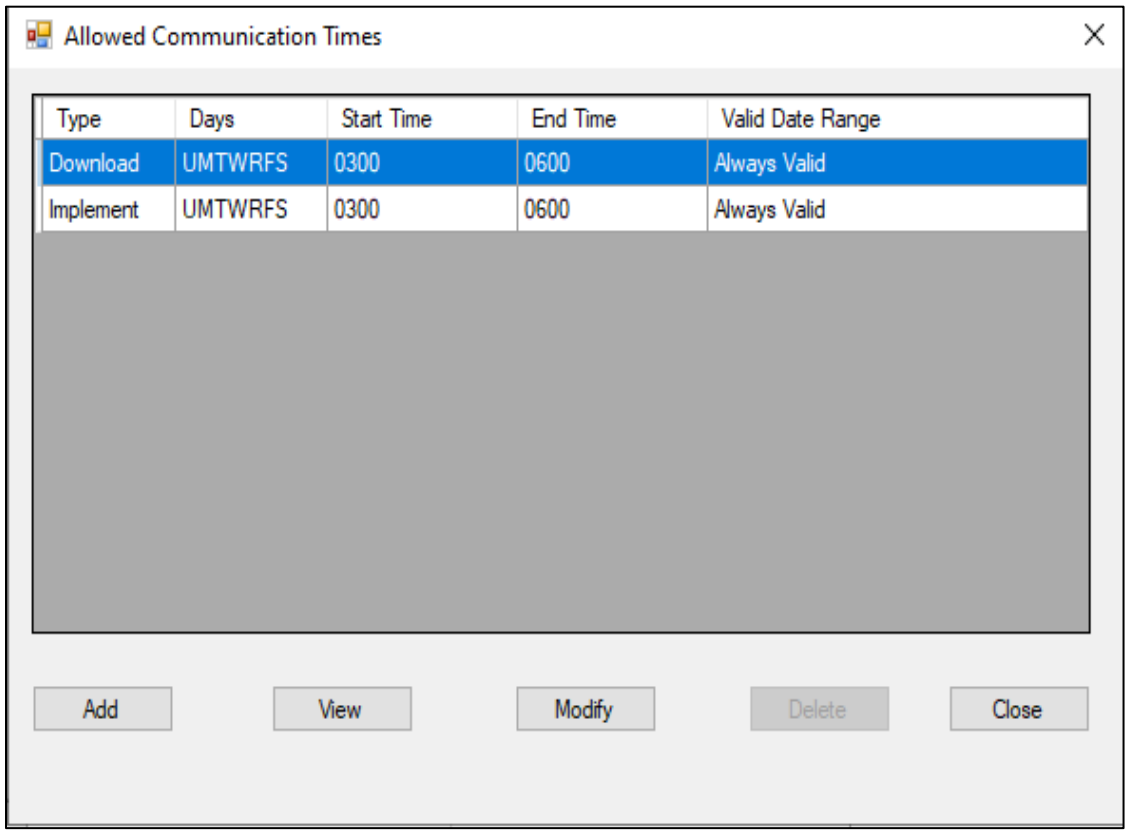
Figure 5: State/Province Drop Down List in Alphabetical Order



Maintenance Window

A close button is provided in the Maintenance Window screen to enable the user to dismiss the pop-up window.

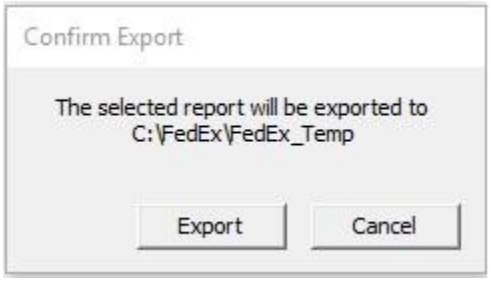
Figure 6: Maintenance Windows screen



Report Viewer Utility

- **To improve user experience, the SETTINGS menu displays "Export Directory" as first entry.**
- **An updated message is displayed once the mail icon is clicked on the Report Viewer Utility (accompanied by the existing parameterized folder location).**

Figure 7: Report Viewer Utility - Export option



PEEP checkbox

PEEP checkbox enables you to trigger the hourly upload when the first package for a day is shipped for the following shipment types: FedEx Express®, FedEx Ground®, FedEx SmartPost® with FedEx Ground, FedEx IPD/IDF and FedEx Intra country.

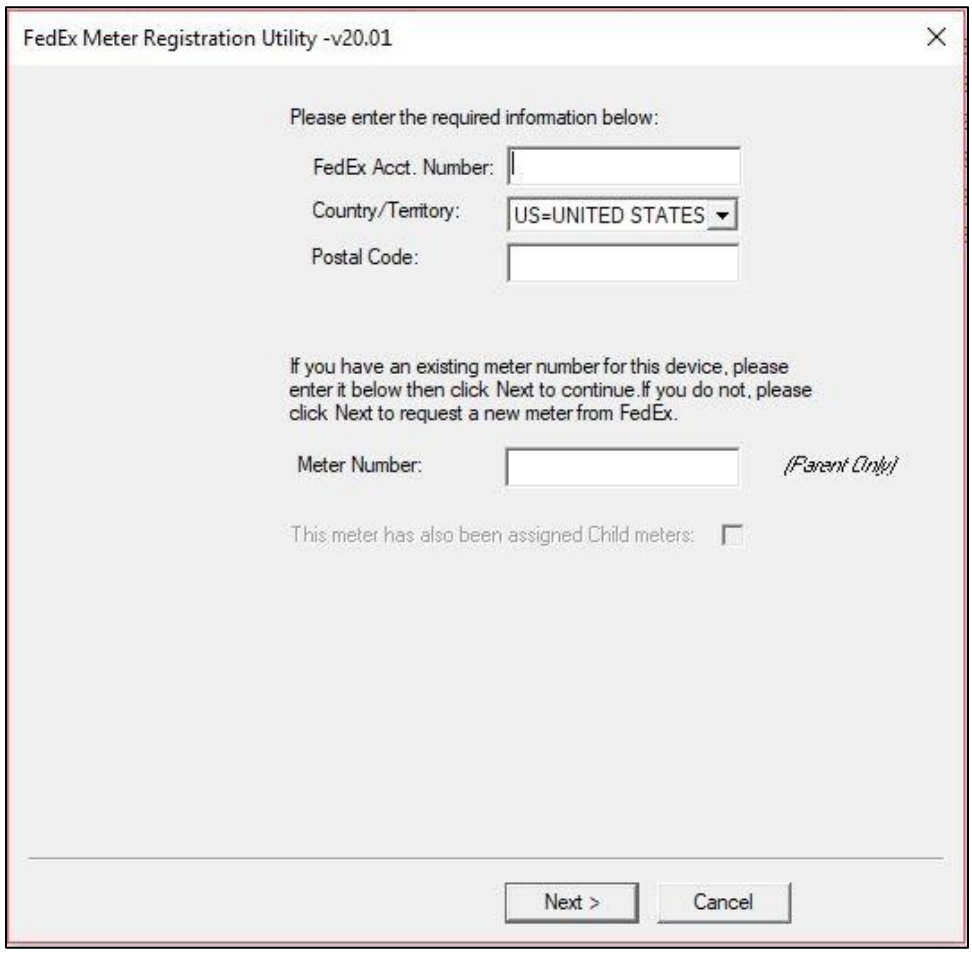
Figure 8: Meter Settings screen

Note: To learn more about the access and functionalities of above peep checkbox, please contact your FedEx customer integration consultant or contact the FedEx Technical Support Center.

Country field name updated to Country/Territory

The Country field name is updated as Country/Territory to improve the user experience throughout the application. Following is one of the screenshots of the change.

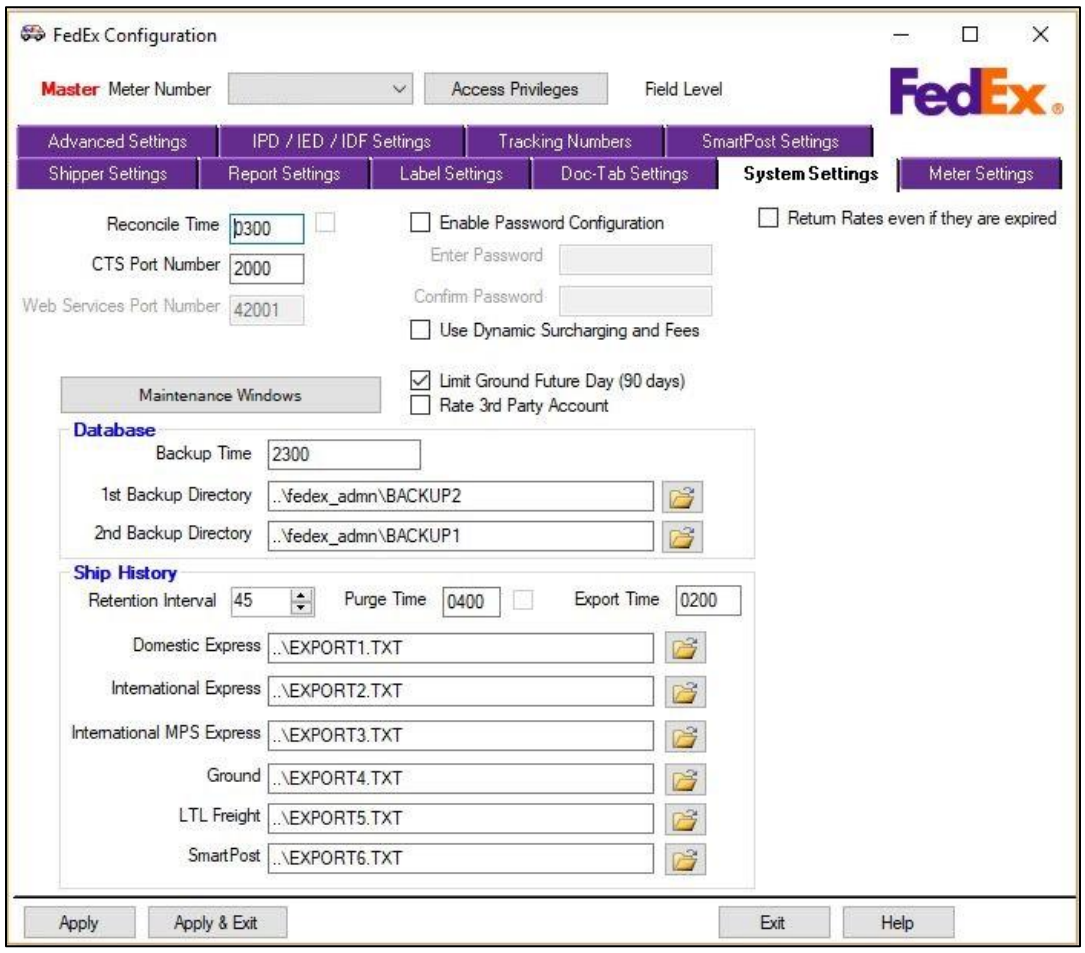
Figure 9: Meter Settings screen



System Settings

The Extend 90-Day Limit - Ground checkbox is renamed as Limit Ground Future Day (90 days) to improve the user understandability.

Figure 10: System Settings screen



Meter Settings

A new checkbox "HAL Requirements – Destination US" is added into Meter Settings screen and It enables you to set additional Hold At Location fields as mandatory while processing 020 U.S. Domestic/International shipments.

Figure 11: Meter Settings screen

Table 65: FedEx Metter Settings field

Field	Description	User Level	User Level -View	Field Level	Support Level
HAL Requirements – Destination US	This checkbox enables you to set additional Hold At Location fields as mandatory while processing 020 U.S. Domestic/International shipments.	Visible and Editable	Visible and Editable	Visible and Editable	Visible and Editable

Label Settings

Now "Mask Sender Account Number for T/C and D/T" checkbox is enabled for Field and Support level users and allows to mask the sender account number on an International Priority & Economy Air Waybill (AWB) label.

Note: T/C is Transport charges, paid by shipper and D/T is Duties/Taxes, paid by recipient.

Figure 12: Label Settings screen

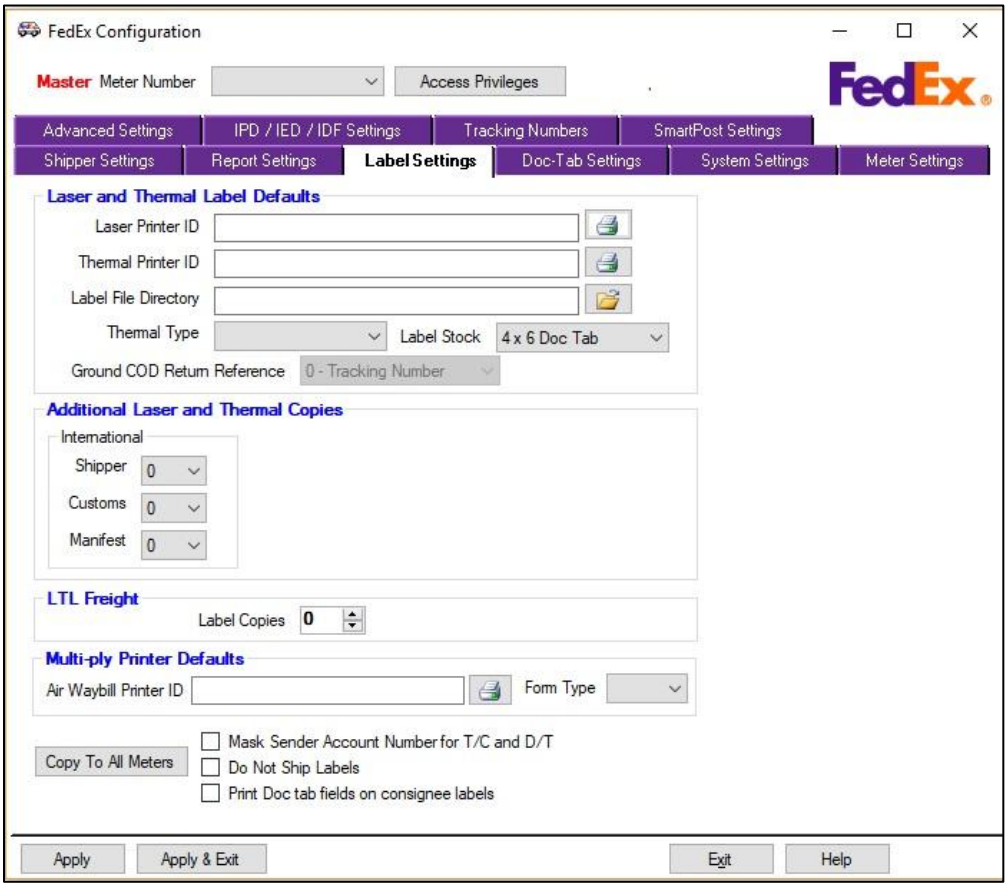


Table 66: Label Settings fields

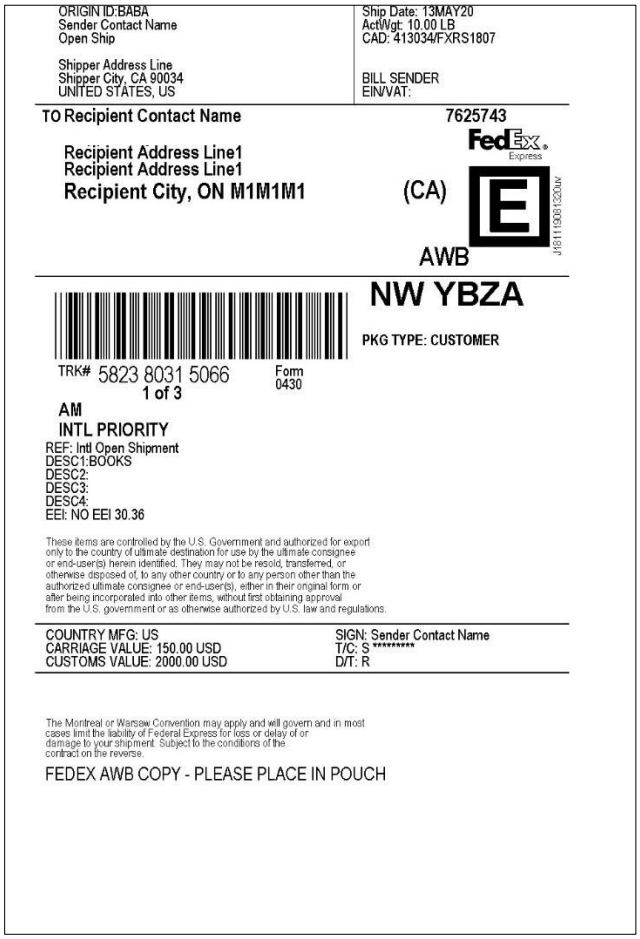
Field	Description	User Level	User Level -View	Field Level	Support Level
Mask Sender Account Number for T/C and D/T	Use this checkbox to mask the sender account number on an International Priority and Economy AWB label.	Not available	Not available	Visible and Editable	Visible and Editable

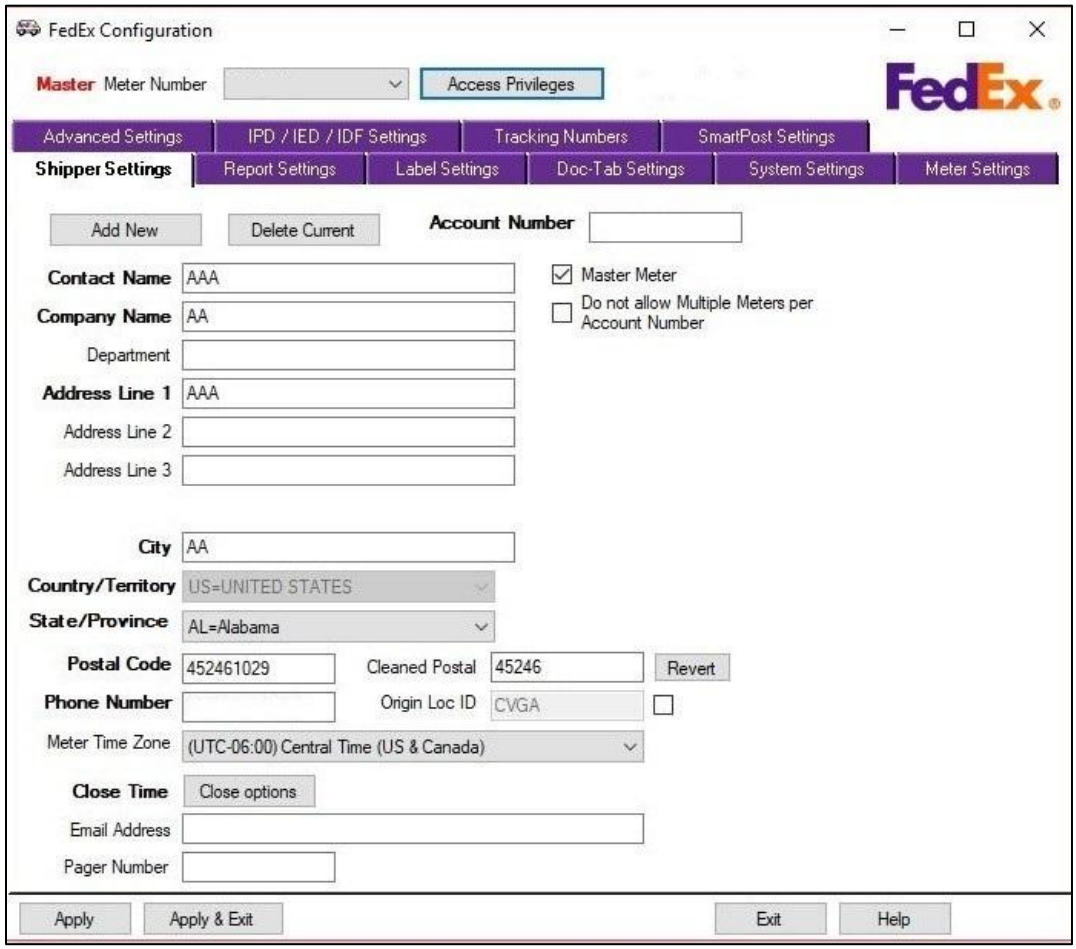
Figure 13: Thermal AWB Label Image (with masked sender account number)



Shipper Settings

The field name **State** is renamed as **State/Province** to improve the user understandability.

Figure 14: Shipper Settings screen



Internal Web Services communications

Internal Communications Port checkbox

A new "Internal Comms Port" field is added in FSMS Configuration System Settings screen to change the port (defaults port is 8083) used for internal web service communications between FedEx Open Ship Service and the FedEx Common Services Service.

Note: Once you update the port the FedEx Common Services service and the FedEx Openship Service must be restarted for the changes to reflect.

Figure 15: System Settings screen

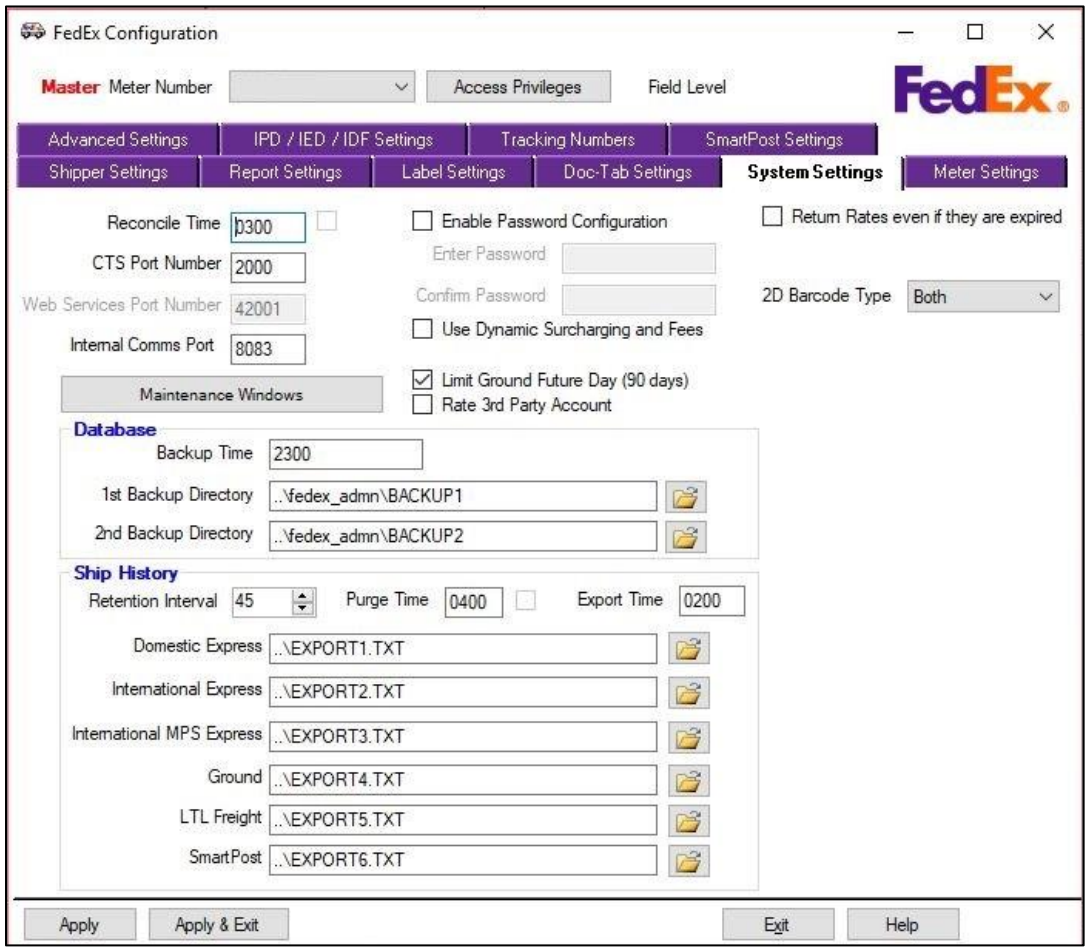


Table 67: System Settings tab fields

Field	Description	User Level	User Level -View	Field Level	Support Level
Internal Comms Port	Enables you to change the port (defaults port is 8083) used for internal web service communications between FedEx	Visible	Visible	Visible and Editable	Visible and Editable

Field	Description	User Level	User Level -View	Field Level	Support Level
	Open Ship Service and the FedEx Common Services Service. Once you update the port the FedEx Common Services service and the FedEx Openship Service must be restarted for the changes to reflect.				

Internal Comms Port tag

A new field Internal Comms Port is added. The details of this field are explained in the following table.

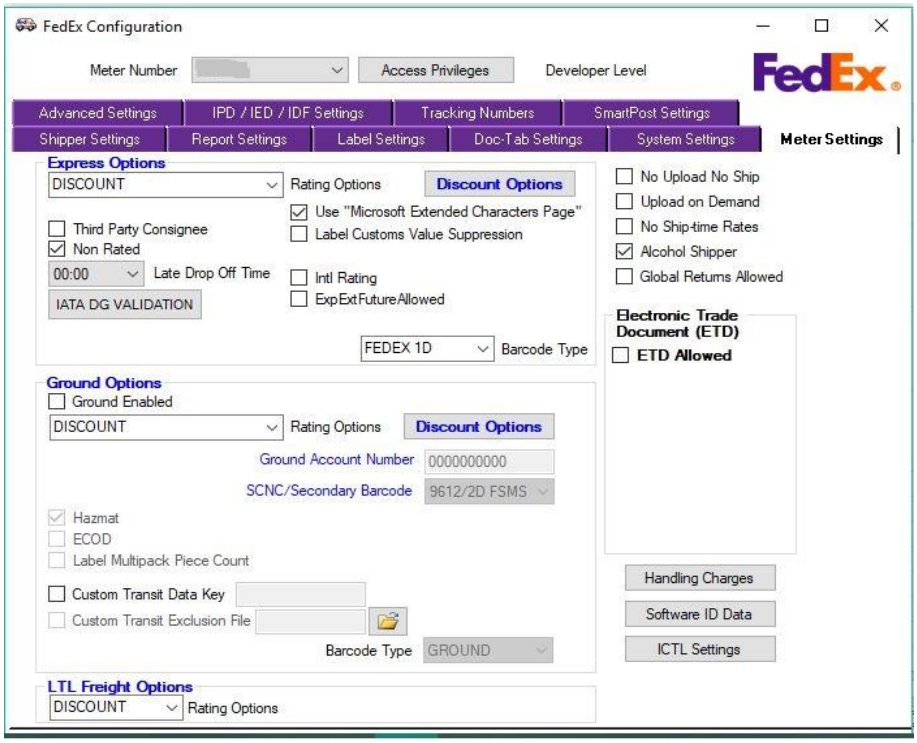
Table 68: Internal Comms Port

Field ID	Field Name	Update	Affected Transaction
617	Internal Comms Port	New Field	070/170 Meter Query or Configuration Transaction
	Description Use this tag to set and retrieve internal Comms port.		
	Type: N	Minimum Length: 4	Maximum Length: 5
	Multiple Occurrence: N	Input/Output: I/O	Carrier: NA
	Valid Values (if applicable or NA): Any port number for example 8083 **Default Value (if applicable or NA): 8083** **Optionality (Required, Optional, Conditional):** Optional **Shipment vs. Piece vs. Commodity Level:** NA		

Special Character support

To support extended special characters or symbols, the Use “Microsoft Extended Characters Page” checkbox has been added.

Figure 16: Meter Setting screen



Initiative Control Settings updates

The Initiative Control settings now supports the below new features:

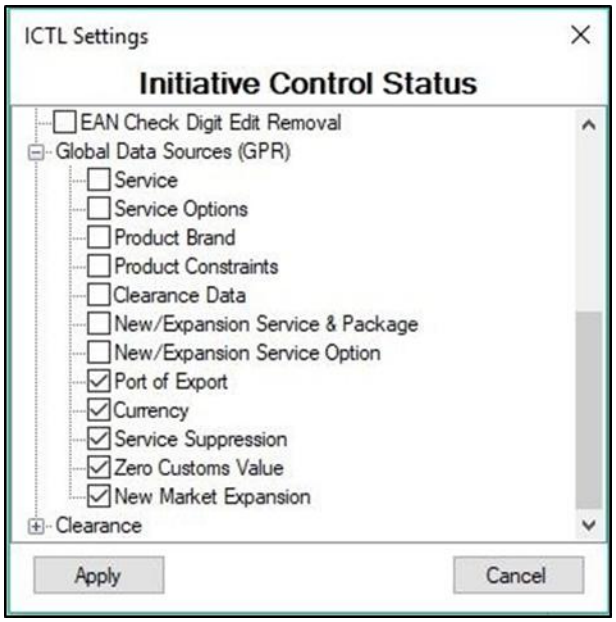
Global Data Sources

These settings can be viewed only by the users with Field, User Level-view and Support Level access.

The following checkboxes have been added under Global Data Sources branch:

- **Port of Export** provides applicable port of export code, port of unlading code and conveyance information.
- **Currency** enables retrieval of available base currencies from the Base Currency file to determine the currencies supported by FedEx.
- **Service Suppression** enables suppression of services in 050 transaction that are not returned in the 150-transaction reply.
- **New Market Expansion** enables Authoritative Data Source (ADS) to determine if the country is served domestically or international by FedEx Express.
- **Zero Customs Value** determines whether total custom value can be zero or not.

Figure 17: ICTL Settings screen



Clearance

Now new checkboxes are available under Clearance branch:

- **Clearance Prohibits and Waivers** prevents the application from processing shipments that are prohibited by FedEx or a government agency for the export/origin or import/destination country. Prohibits apply to a country, shipment or commodity/document. Application allows shippers to process a prohibited shipment only after verifying the parties to the shipment have a waiver on file for the export and/or import restriction in their Customer Clearance Profile.
- **Regulatory Workflow** determines whether to allow customers to query what regulatory capabilities are available for a given lane such as estimated duty/taxes and prohibits functionality.
- **Vague Description Workflow** determines whether to query the new vague description file for every international shipment with a commodity or document description to determine if the description provided is too vague.
- **Doc/Non-Doc** determines whether a given origin and destination pair can accept a document, commodity, or both types of shipments.
- **Find International Documents** determines whether to allow customers access to documents that are required, maybe required, or optional for a given origin destination pair.

Figure 18: ICTL Settings with renamed branch Clearance

***Note: Clearance Prohibits and Waivers** has been renamed as **Clearance** so that clearance-related controls can be grouped together under this renamed branch.*

Renewal Data Download checkbox

The **Renewal Data Download** checkbox is added.
The Renewal Data Download checkbox enables support personal to view the database status of initiative control setting (DSMS.DISABLEMENT_FLAG) from the user interface.

Figure 19: ICTL Settings screen with Renewal Data Download checkbox

Note: To learn more about the access and functionalities of above initiative controls, please contact your FedEx customer integration consultant or contact the FedEx Technical Support Center.

USMCA/T-MEC/CUSMA checkbox

The **USMCA/T-MEC/CUSMA** checkbox is added.
The USMCA/T-MEC/CUSMA checkbox enables report generation with new USMCA/T-MEC/CUSMA report content.

Figure 20: ICTL Settings screen with USMCA/T-MEC/CUSMA checkbox

Note: To learn more about the access and functionalities of above initiative controls, please contact your FedEx customer integration consultant or contact the FedEx Technical Support Center.

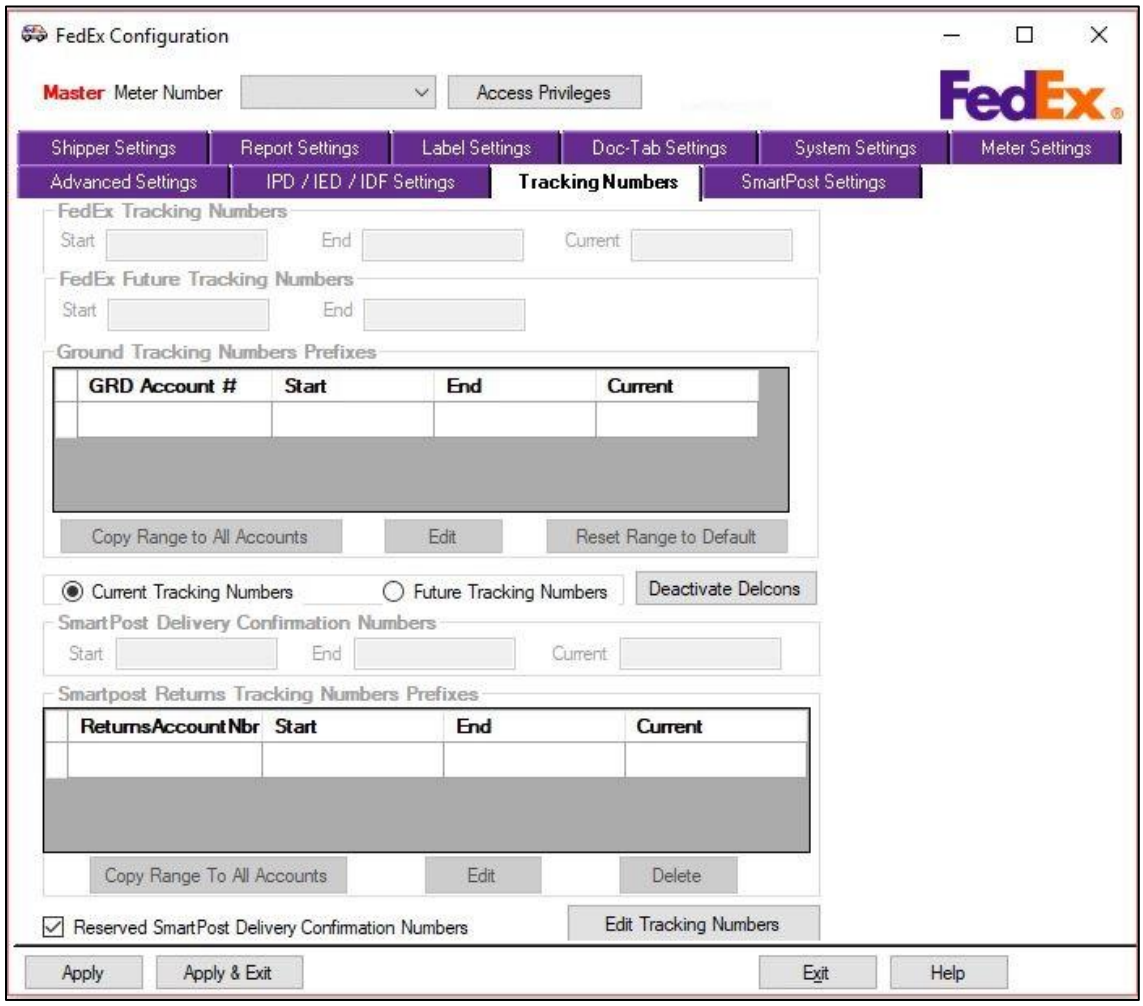
FedEx SmartPost® Delivery Confirmation Numbers

The SmartPost Delivery Confirmation Numbers (Delcon) enhancements introduce a new range which begins with zero. The new Full Grand Master Range is available for download in batches for the current and future allotments.

The Reserved SmartPost Delivery Confirmation Numbers feature allows the user to request a segment of the Full Grand Master Range to be downloaded for that specific meter/account. This feature is not applicable for non-SmartPost meter numbers.

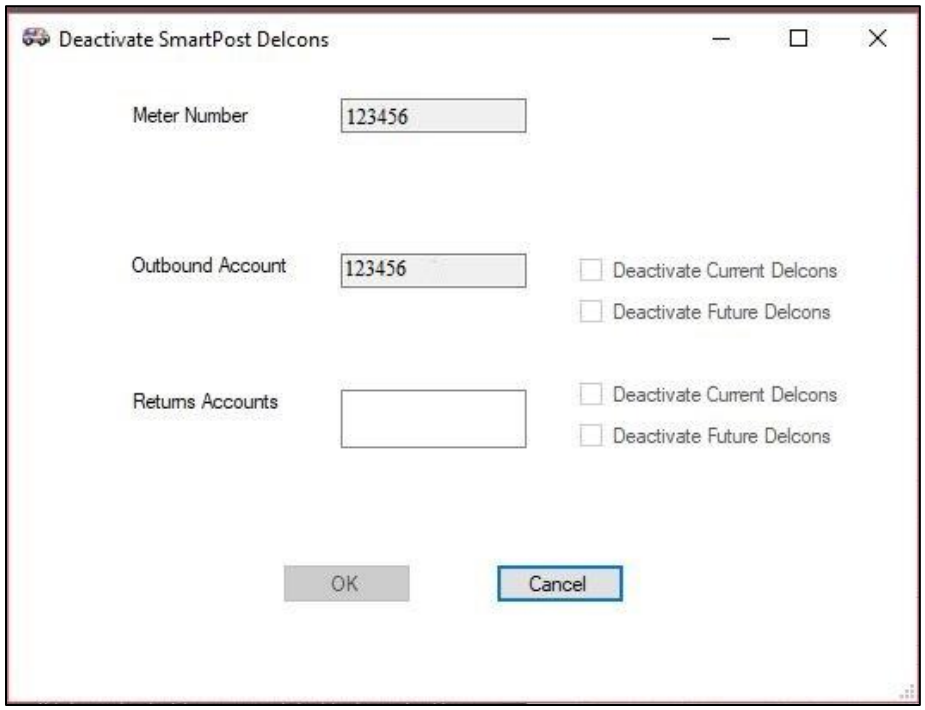
The figure below shows the Reserved SmartPost Delivery Confirmation Numbers checkbox in the Tracking Numbers tab of the configuration utility.

Figure 21: Reserved SmartPost Delivery Confirmation Numbers checkbox



Deactivate Delcons is another such feature added to the Tracking Numbers tab which allows the user to selectively deactivate the current and future Delcon ranges of the SmartPost Outbound or Return account numbers. Deactivate Delcons button is disabled for any meter number other than a SmartPost meter number.

Figure 22: Deactivate SmartPost Delcons screen



2D Barcode enhancements

Now new tags are added to enable printing of 2D custom labels in base 64 format.

2D Base 64 Barcode

A new field to specify 2D barcode is added. The details of this field are explained in the following table.

Table 69: 2D Base 64 Barcode

Field ID	Field Name	Update	Affected Transaction
5791	2D Base 64 Barcode	New Field	020/120 Global Ship Request/Reply transaction
	Description This reply tag allows 2D custom labels to be printed in base 64 format.		
	Type: AN	Minimum Length: 2	Maximum Length: 600
	Multiple Occurrence: N	Input/Output: O	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): NA **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** NA **Shipment vs. Piece vs. Commodity Level: Piece**		

C.O.D. Return 2D Base 64 Barcode

A new field to specify C.O.D. return 2D base 64 barcode is added. The details of this field are explained in the following table.

Table 70: C.O.D. Return 2D Base 64 Barcode

Field ID	Field Name	Update	Affected Transaction
5792	C.O.D. Return 2D Base 64 Barcode	New Field	020/120 Global Ship Request/Reply transaction
	Description This reply tag allows C.O.D. Return 2D custom labels to be printed in base 64 format.		
	Type: AN	Minimum Length: 2	Maximum Length: 600
	Multiple Occurrence: N	Input/Output: O	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): NA **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** NA **Shipment vs. Piece vs. Commodity Level: Piece**		

IPD/IED/IDF 2D Base Barcode

A new field to specify IPD/IED/IDF 2D base 64 barcode is added. The details of this field are explained in the following table.

Table 71: IPD/IED/IDF 2D Base 64 Barcode

Field ID	Field Name	Update	Affected Transaction
5793	IPD/IED/IDF 2D Base 64 Barcode	New Field	020/120 Global Ship Request/Reply transaction
	Description This reply tag allows IPD/IED/IDF 2D custom labels to be printed in base 64 format.		
	Type: AN	Minimum Length: 2	Maximum Length: 600
	Multiple Occurrence: N	Input/Output: O	Carrier: FDXE, FDXG
	Valid Values (if applicable or NA): NA **Default Value (if applicable or NA):** NA **Optionality (Required, Optional, Conditional):** NA **Shipment vs. Piece vs. Commodity Level: Piece**		

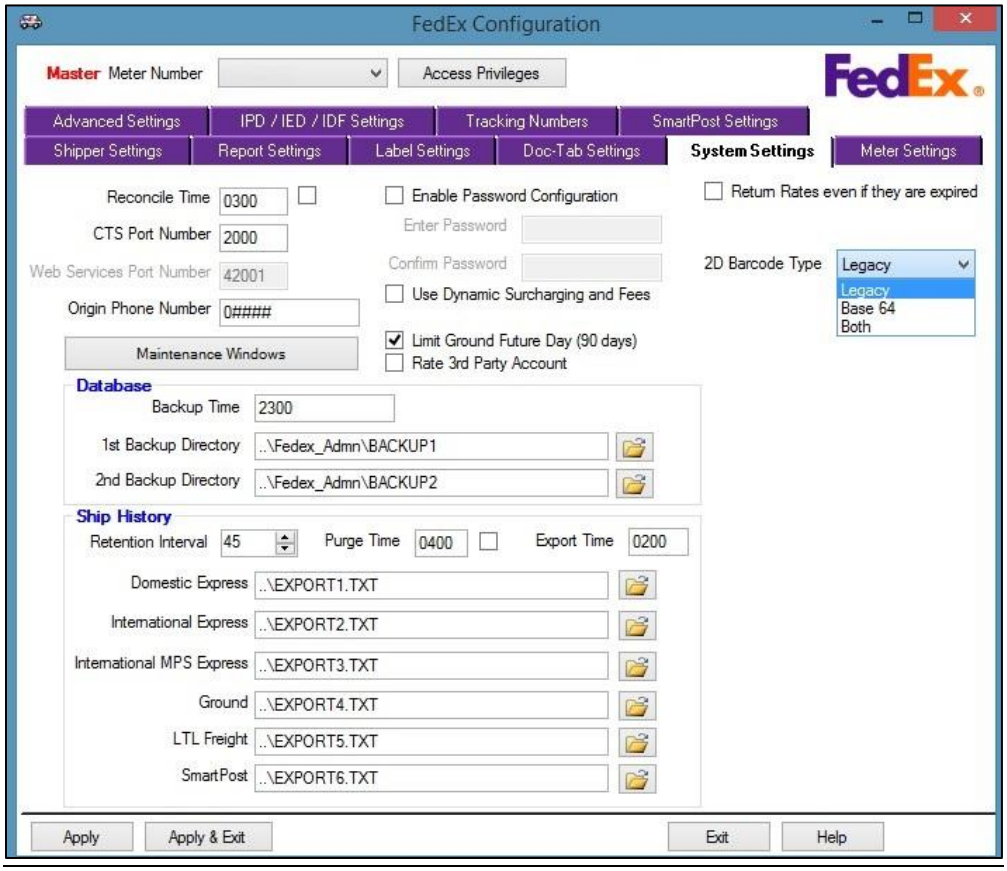
2D Barcode Type dropdown

The new “2D Barcode Type” dropdown added in the System Settings screen enables the customer to choose a specific 2D Barcode type to reflect in the 120 Global Ship Reply Transaction. The options are as follows:

- Legacy
- Base 64
- Both

Note: Now the default value is set to “Both”.

Figure 23: System Settings screen with 2D Barcode Type dropdown



No Signature Required (NSR) option

Now customers can process International Priority DirectDistribution® shipment inbound to U.S. or CA with Signature option (tag#2399) as "NSR".

Figure 24: Sample label IPD shipment with NSR

Dry Ice weight update

To successfully process a dry ice Multiple Piece Shipment, the shipment should not exceed individual piece weight and weight of child piece should not be ≤ 200 KGS (i.e., tag 16).

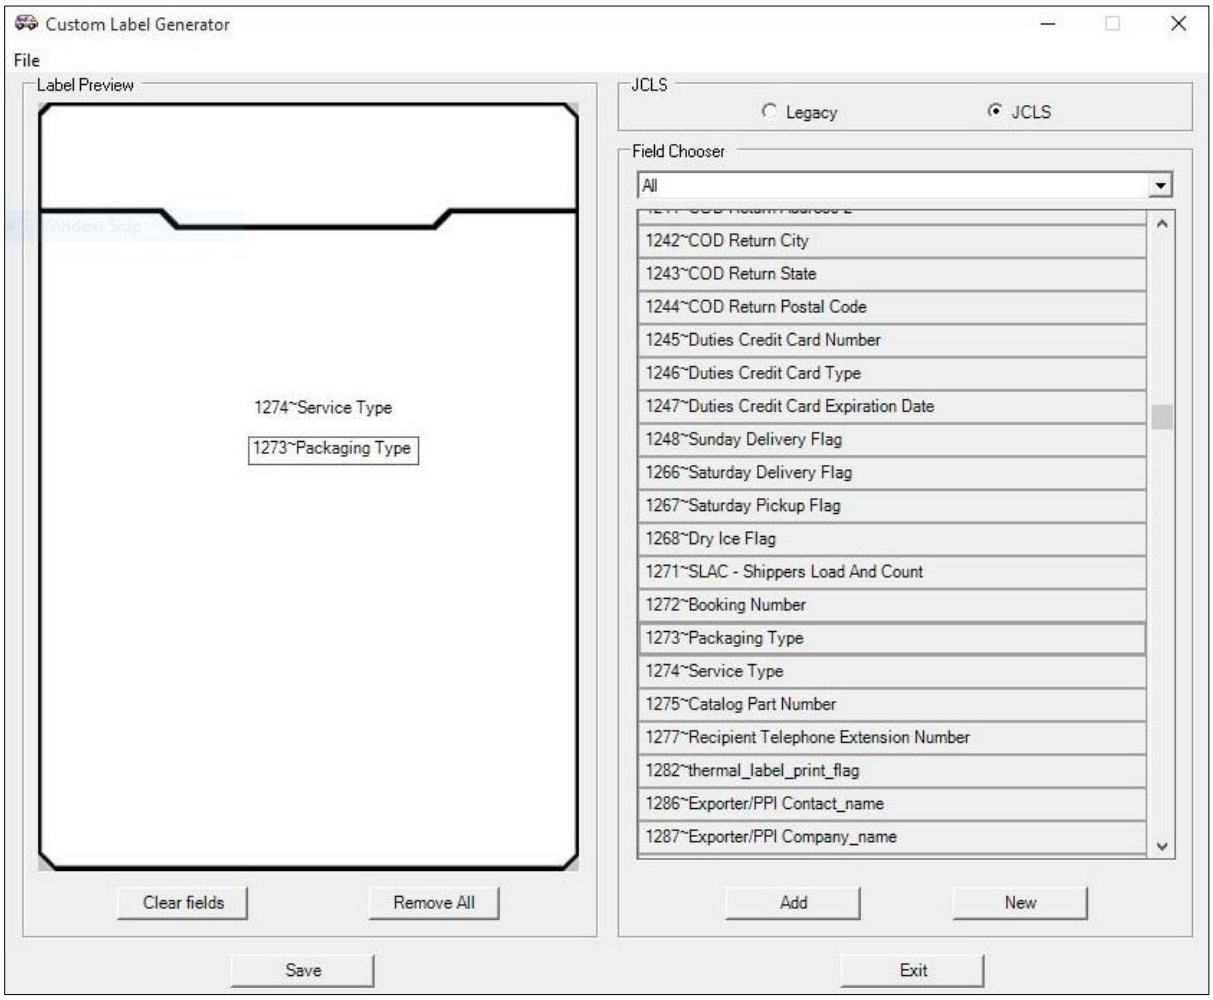
Custom Label Generator Utility

The Custom Label Generator Utility allows you to create and print a custom non-shipping label using the following label formats:

- 4" x 6" Doc-Tab, and 4" x 6" (Non Doc-Tab)
- 4" x 6.75" Doc-Tab
- 4" x 6.75" (Non Doc-Tab)
- 4" x 8", and 4" x 9"

The below figure displays the new screen implemented for the Custom Label Generator Utility.

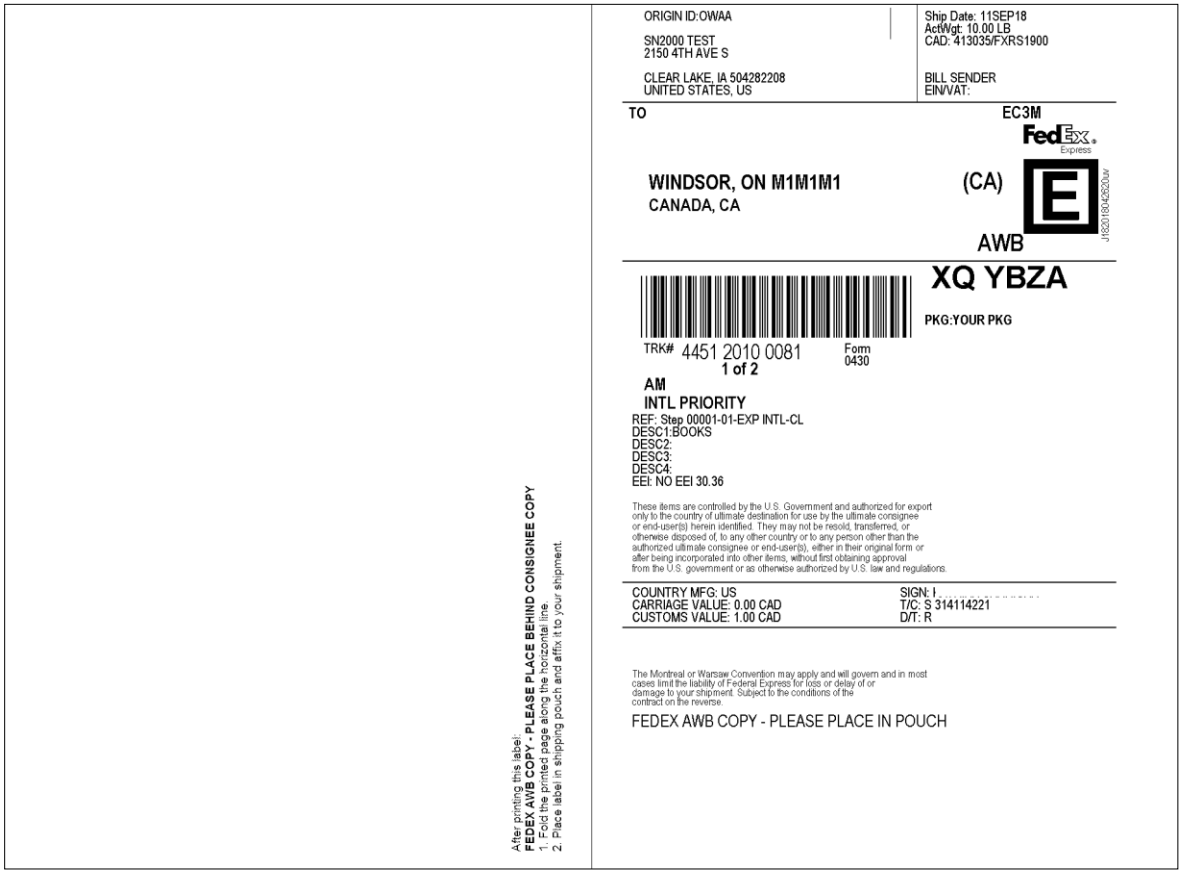
Figure 25: Custom Label Generator Utility



Airway Bill label

The Airway Bill label will now display Packaging Type Name (e.g., PKG: YOUR PKG) and Service Type Name (e.g., INTL PRIORITY) as shown in the below image:

Figure 26: Airway Bill sample



.Net Framework Version 4.8

FedEx Ship Manager® Server (FSMS) now only supports .Net Framework 4.8 and higher versions.
The following error message is displayed if the installer detects a lower version of .Net Framework installed:
"FedEx Ship Manager® Server requires that your system has the .Net Framework version 4.8 installed. Please install the required .Net Framework then run the Installer. Your system has not been modified."

Remap of Regulatory value

The regulatory rules are updated with a new value **Deliver at Point of Unloading (DPU)** in place of **Deliver at Terminal (DAT)** for shipping transactions that utilize Terms of Sale (i.e. tag 72).

Error codes and error messages

Following is the list of newly added error codes and error messages.

Table 72: List of new error codes and messages

Error Code	Error Messages
0216	Total package count cannot exceed 99.

Error Code	Error Messages
0230	Invalid service type.
0761	Incomplete dimension information.
0916	The packaging type for this shipment is not available for your application.

2404	Multiple shipper meters exist for your Shipper Account Number.
2732	Prior Freight booking required. Please call Customer Service.
2943	The selected service is not available for this origin and/or destination. Please select a different service.
5038	Payer Account Number is not configured.
5125	Pharmacy Delivery is not available with this service or for this origin and/or destination. The Pharmacy Delivery service option will be removed.
5175	The number of copies for this document is unknown for the current shipping scenario. It is your responsibility to determine if any additional documents are required. For additional assistance, please go to fedex.com/international or the country's customs agency.
5176	Electronic letterhead/signature on documents is prohibited at this time for the current shipping scenario. It is your responsibility to determine if any additional documents are required. For additional assistance, please go to fedex.com/international or the country's customs agency.
5177	Shipment-specific documentation was retrieved. Commodity-specific documentation is not available. It is your responsibility to determine if any additional documents are required. For additional assistance, please go to fedex.com/international or the country's customs agency.
5501	Tag #2152 Certificate of Origin Preference Criterion is a legacy tag. Please begin using tag #618 USMCA /T-MEC/CUSMA Origin Criterion.
5502	The content received in tag #2152 = 'E' is an invalid value. This tag is a legacy tag and the new tag number 618 - USMCA/T-MEC/CUSMA Origin Criterion is the new required tag for this type of shipping.
5503	The content received in tag #2152 = 'F' is an invalid value. This tag is a legacy tag and the new tag number 618 - USMCA/T-MEC/CUSMA Origin Criterion is the new required tag for this type of shipping.
5504	The USMCA/T-MEC/CUSMA Indicator value in tag 1799 = 'I' is missing the associated Importer content. Please include that associated Importer content and retry the shipment.

Error Code	Error Messages
5505	The USMCA/T-MEC/CUSMA Indicator value in tag 1799 = 'E' is missing the associated Exporter content. Please include that associated Importer content and retry the shipment.
5506	The USMCA/T-MEC/CUSMA Indicator value in tag 1799 = 'P' is missing the associated Producer content. Please include that associated Importer content and retry the shipment.
9004	The document id [FID_Document_ID_number] provided is unable to be located. Please ensure that the correct document id number being provided, or needed, is correct and reattempt a download.
9999	Transaction not recognized or not supported.

Version 20.04

United States-Mexico-Canada agreement (USMCA/T-MEC/CUSMA)

USMCA/T-MEC/CUSMA is a trade agreement between the United States, Canada, and Mexico that replaces NAFTA effective from July 2020.
USMCA is intended to create a modernized free-trade system between the three parties that addresses recent and emerging critical issues, such as the harmonization of regulatory systems, e-commerce, and the protection of intellectual property.

Feature details

- As per USMCA/T-MEC/CUSMA trade agreement, importers will no longer be required to complete a formal certification document.
- Certification of origin can be achieved using informal documentation, such as the commercial invoices and can be completed by the importer, exporter, or producer or as a stand-alone document.
- Changes in duty and taxes for the customers.

Benefits

- Ensures customers remain compliant with the governmental regulation for free trade between US, Mexico, and Canada by supporting additional values on the Commercial Invoice that are not currently provided.
- Improves user experience, reliability, and business processes.
- Critical value or capability compared to competition.
- Allow customers to be able to continue completion of the Commercial Invoice using FedEx generated documents for USMCA/T-MEC/CUSMA, which will allow for seamless integration for Electronic Trade Documents (ETD).
- The Customers can electronically report to local Customs according to the changes to the import regulations and to provide accurate duty and tax assessment and get duty reduction benefits.
- Ability to customers to create a combined Commercial Invoice Certification of Origin (CI-COO) document in the FedEx Ship Manager Server.

For more information, please visit FedEx.com/USMCA.

USMCA/T-MEC/CUSMA Commercial Invoice Certification of Origin (CI-COO) document is added into report list. This report is generated when Express and Ground USMCA shipment transaction is done with tag 2404 with value Y.

This report is similar to Commercial Invoice (CI). Few new fields are introduced as follows:

Declaration Statements

- I certify that the goods described in this document qualify as originating and the information contained in this document is true and accurate. I assume responsibility for proving such representations and agree to maintain and present upon request or to make available during a verification visit, documentation necessary to support this certification.
- I declare that all the information contained in this invoice to be true and correct.

Digital Signature

Digital signature is incorporated in this report. You can sign this report digitally.

Invoice No (tag 3002- Shipment Invoice number)

This tag displays the invoice number of the shipment.

Purchase Order No (tag 3001- Shipment Purchase Order Number)

This tag displays the purchase order number of the shipment.

Tax ID

Tax ID number of shipper/certifiers for specific country is displayed on the report.

List of Tax ID’s displayed on the report:

- Tag 2167 USMCA/T-MEC/CUSMA Producer Tax ID
- Tag 1295 USMCA/T-MEC/CUSMA Exporter Tax ID
- Tag 180 USMCA/T-MEC/CUSMA Importer Tax ID

Phrase for US imports only

When a 020 USMCA/T-MEC/CUSMA shipping transaction is received, and the import country is the U.S. (United States) then following phrase is displayed:

“This invoice must be completed in English.”

Special Instructions (tag 693- USMCA/T-MEC/CUSMA Commercial Invoice - Certification of Origin Special Instructions)

This tag displays any kind of special instructions for the shipment. The special instructions are specifically defined by any party affiliated with the shipment (shipper, recipient, exporter, importer, producer).

Purpose of Shipment (tag 2397- Purpose of Shipment Code)

This tag prints on Commercial Invoice (CI) or Pro forma Invoice or USMCA/T-MEC/CUSMA Commercial Invoice Certification of Origin (CI-COO) when valid values are entered.

USMCA/T-MEC/CUSMA tags

To enhance USMCA feature, the following tags are updated/added:

USMCA/T-MEC/CUSMA Origin Criterion

Table 73: USMCA/T-MEC/CUSMA Origin Criterion

Field ID	Field Name	Update	Affected Transaction
618	USMCA/T-MEC/CUSMA Origin Criterion	Existing field	120 Global Ship Reply transaction
	Description Indicate the USMCA/T-MEC/CUSMA Origin Criterion for the good(s) being shipped. This tag is used in a (formerly known as NAFTA transaction) 020 international shipping transaction for a U.S., Canada (CA), or Mexico (MX) origin to an associated and unique international destination country of U.S., CA, or MX (or an intra-country shipment).		
	Type: A	**Minimum Length:** 1	**Maximum Length**: 2
	Multiple Occurrence: Y	**Input/Output**: I	**Carrier:** FDXE, FDXG, including Freight
	Valid Values: A, B, C, D, E **Criteria Explanation:** • **A** - The goods are wholly obtained or produced entirely in the territory of one or more of the USMCA/T-MEC/CUSMA countries, as defined in Artic le 4.3 of the Agreement. • **B** - The goods are produced entirely in the territory of one or more of the USMCA/T-MEC/CUSMA countries using non originating materials, provided the goods satisfy all applicable requirements of product-specific rules of origin, as defined in Article 4.3 of the Agreement. • **C** - The goods are produced entirely in the territory of one or more of the USMCA/T-MEC/CUSMA countries exclusively from originating materials. • **D** - The goods are produced entirely in the territory of one or more of the USMCA/T-MEC/CUSMA countries. It is classified with its materials or satisfies the “unassembled goods” requirement and meets a regional value content threshold of not less than 60% if the transaction value method is used, or not less than 50% if the net cost method is used (not including RVC for autos); except for goods in Chapter 61-63 of the Harmonized Tariff Schedule (HTS). • **E** - Applicable for US, CA & MX imports as a transactional value. *Notes:* • *When the value "E" is provided for U.S. imports during a 020-shipping transaction then statement “Product of Schedule II of the USMCA Appendix A to 19 CFR 182 – Rules of Origin Regulations” will be printed on USMCA/T-MEC/CUSMA Certificate of Origin report and USMCA/T-MEC/CUSMA Commercial Invoice - Certificate of Origin report.* • *When the value "E" is provided for Canada imports during a 020-shipping transaction then statement “Schedule 2 of the CUSMA Rules of Origin Regulations” will be printed on USMCA/T-MEC/CUSMA Certificate of Origin and USMCA/T-MEC/CUSMA Commercial Invoice - Certificate of Origin.*

FedEx® International Connect Plus

FedEx International Connect Plus is a contractual service which offers shipping options with varying prices which are less expensive and similar to FedEx International Priority® service.

Features and Benefits:

- Offers door-to-delivery, customs-cleared delivery options
- Typically delivering in 2-5 business days
- Accommodates lower-weight pieces (ideally below 70 lbs.)
- Shipment is redirected to an alternate location for customers to collect at their convenience if the delivery attempt is unsuccessful
- No residential delivery surcharges
- Service is available through latest FedEx automation platforms and many FedEx certified solution providers
- Only contractually available in select markets
- No money back guarantee
- Provides near to real-time tracking and notification options throughout the shipping journey

ETD Document Type

This field is updated with new values. The details of the update are as follows:

Table 79: ETD Document Type

Field ID	Field Name	Update	Affected Transaction
2818	ETD Document Type	Existing field	020/120 Global Ship Request/Reply/049/149 Pre-Shipment Document Upload Request/Reply/049/149 Document Upload Postshipment Request/Reply
	Description • ETD Document Type field determines type of document(s) that are electronically uploaded. It is used with field 2819 (Electronic Trade Documents filename). • For multiple documents being uploaded in this transaction, each occurrence of Field 2819 must have a corresponding occurrence of Field 2818 with the valid value set. • Example: If the first occurrence of 2819 (2819-1) has a file name of "C:\Folder\CommercialInvoice.txt," then subsequently, Field 2818 and the first occurrence (2818-1) should be set to 1 (Commercial Invoice) for the document type. *Notes:* • *It is the customer's responsibility to ensure that the document uploaded matches the valid value passed in for this tag.* • *There are a few countries (e.g., China) that will allow ETD but not allow the CI or PI to be uploaded. In this scenario, if the user has indicated the shipment as ETD via tag# 2818 (ETD Document Type), the documents can still be uploaded as long as the required images (letterhead, signature or both) are included. ETD takes precedence in this scenario.*		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: N	**Input/Output:** I/O	**Carrier:** FDXE, FDXG
	Valid Values: • 0 - Label Upload (this is an output response value only) • 1 - Commercial Invoice • 2 - Certificate of Origin • 3 - Pro forma Invoice • 4 - USMCA/T-MEC/CUSMACOO - USMCA/T-MEC/CUSMA Certification of Origin • 5 - Other – Unidentified or Not Classified • 6 - USMCA/T-MEC/CUSMACICOO - USMCA/T-MEC/CUSMA Commercial Invoice - Certification of Origin **Default Value:** Blank **Optionality:** Required **Shipment vs. Piece vs. Commodity vs. Combination Level:** Package		

Rate Quote Type

This field is updated with new values. The details of the update are as follows:

Table 80: Rate Quote Type

Field ID	Field Name	Update	Affected Transaction
3062	Rate Quote Type	Existing Field	020 Global Ship Request, 025 Rate All Services Request
	Description Specifies the type of rates returned in the120 Global Ship Reply transaction.		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: N	**Input/Output:** I	**Carrier:** FDXE, FDXG
	Valid Values: • 1 - Account Specific Rates only (default) • 2 - Standard List Rates and Account Specific Rates • 3 - No Ship-time Rates • 4 - Account Specific Rate, Standard List Rate and Alternate Rate • 5 - Account Specific Rate and Alternate Rate • 6 - Standard List only **Default Value:** NA **Optionality:** Optional **Shipment vs. Piece vs. Commodity Level:** Shipment		

CTS Port Number

A new tag CTS Port Number is added. The details of this field are explained in the following table.

Table 81: CTS Port Number

Field ID	Field Name	Update	Affected Transaction
622	CTS Port Number	New Field	070/170 Meter Query or Configuration Transaction
	Description Use this tag to modify or retrieve the port number which listens/receives a transaction from a client. *Note:*		

<table>
<tr><th>Field ID</th><th>Field Name</th><th>Update</th><th>Affected Transaction</th></tr>
<tr><td></td><td colspan="3">The port must be currently inactive to listen an incoming transaction. Any port already in use can pose a conflict, at which point, another port number should be used. Higher level of success can be achieved when using (or starting) at port 1000 and higher as a lower bound implying the minimum length should be 4 digits, rather than 1.
The range of the tag is min= 1024 to max= 65535. If the value exceeds the maximum value, then an error message is displayed.</td></tr>
<tr><td></td><td>Type: N</td><td>Minimum Length: 4</td><td>Maximum Length: 5</td></tr>
<tr><td></td><td>Multiple Occurrence: N</td><td>Input/Output: I/O</td><td>Carrier: FDXE, FDXS</td></tr>
<tr><td></td><td colspan="3">Valid Values: 1024 – 65535
Default Value: 2000
Optionality: Optional/Required
Optional = at the discretion of a user wanting to do any update via the 070-meter update transaction.
Required = being added as new functionality for a 070-meter query transaction to return all relevant information for a configured meter.
Shipment vs. Piece vs. Commodity Level: NA</td></tr>
</table>

Use Dynamic Surcharging

A new tag Use Dynamic Surcharging is added. The details of this field are explained in the following table.

Table 82: Use Dynamic Surcharging

Field ID	Field Name	Update	Affected Transaction
1381	Use Dynamic Surcharging	New Field	070 Meter Query or Configuration Request
	Description Field is used to enable or disable the Dynamic Surcharging functionality for Express, Ground, and SmartPost shipments.		
	Type: A	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: N	**Input/Output:** I/O	**Carrier:** FDXE, FXFR, FDXS
	Valid Values: • Y – Enable • N – Disable **Default Value:** N - Disable **Optionality:** Optional **Shipment vs. Piece vs. Commodity vs. Combination Level:** Shipment/Configuration		

Shipper Phone Extension Number

A new tag Shipper Phone Extension Number is added. The details of this field are explained in the following table.

Table 83: Shipper Phone Extension Number

Field ID	Field Name	Update	Affected Transaction
621	Shipper Phone Extension Number	New Field	070 Meter Query or Configuration Request
	Description • Field allows to modify or retrieve the shipper phone extension number. • It is a numeric only field.		
	Type: A	**Minimum Length:** 1	**Maximum Length:** 6
	Multiple Occurrence: N	**Input/Output:** I/O	**Carrier:** FDXE, FXFR, FDXS
	Valid Values: Digits 0 to 9 (up to a maximum length of six are allowed). **Default Value:** NA **Optionality:** Required/Optional Required = To return all relevant information for a configured meter. Optional = If you want to make updates via the 070-meter update transaction. **Shipment vs. Piece vs. Commodity vs. Combination Level:** NA		

Ship History Export Code

A new tag Ship History Export Code is added. The details of this field are explained in the following table.

Table 84: Ship History Export Code

Field ID	Field Name	Update	Affected Transaction
628	Ship History Export Code	New Field	070 Meter Query or Configuration Request
	Description • This field allows you to modify or retrieve a code value which is associated with a "header"/"label"/"field name"/“label type” from the FedEx Config screen for a specific directory or filename for the items defined in the ship history or database backup sections on the System Settings tab. • This field is used in conjunction with field 689 - Directory/folder path for Ship History/Database Export.		

Field ID	Field Name	Update	Affected Transaction
	Type: AKE	**Minimum Length:** 3	**Maximum Length:** 3
	Multiple Occurrence: Y	**Input/Output:** I/O	**Carrier:** FDXE, FXFR, FDXS

</table>

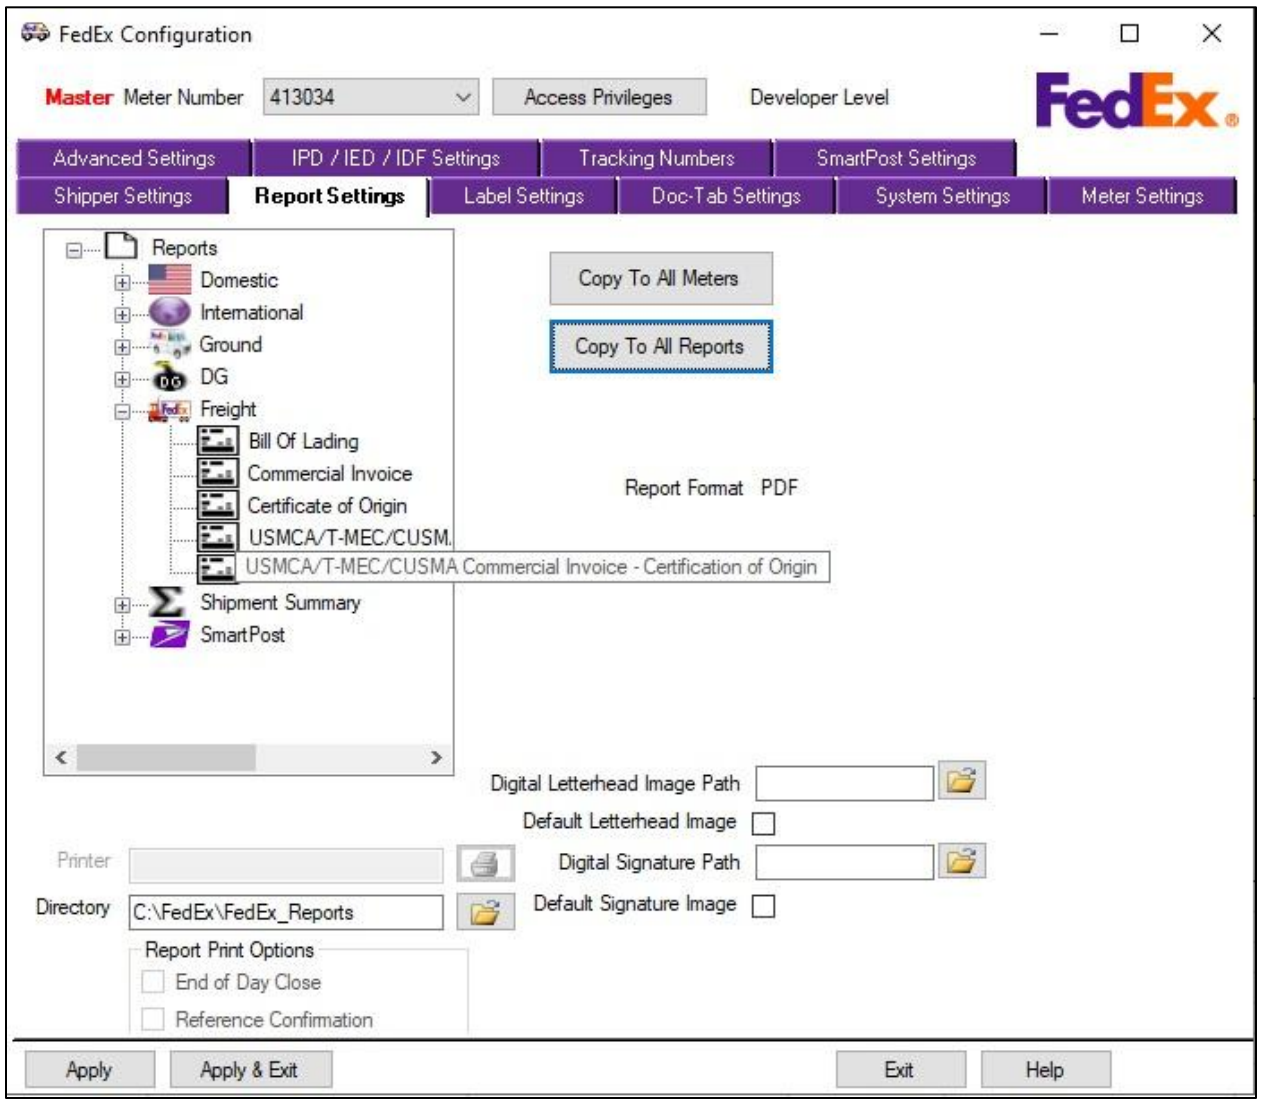
User Experience enhancements

Report Settings

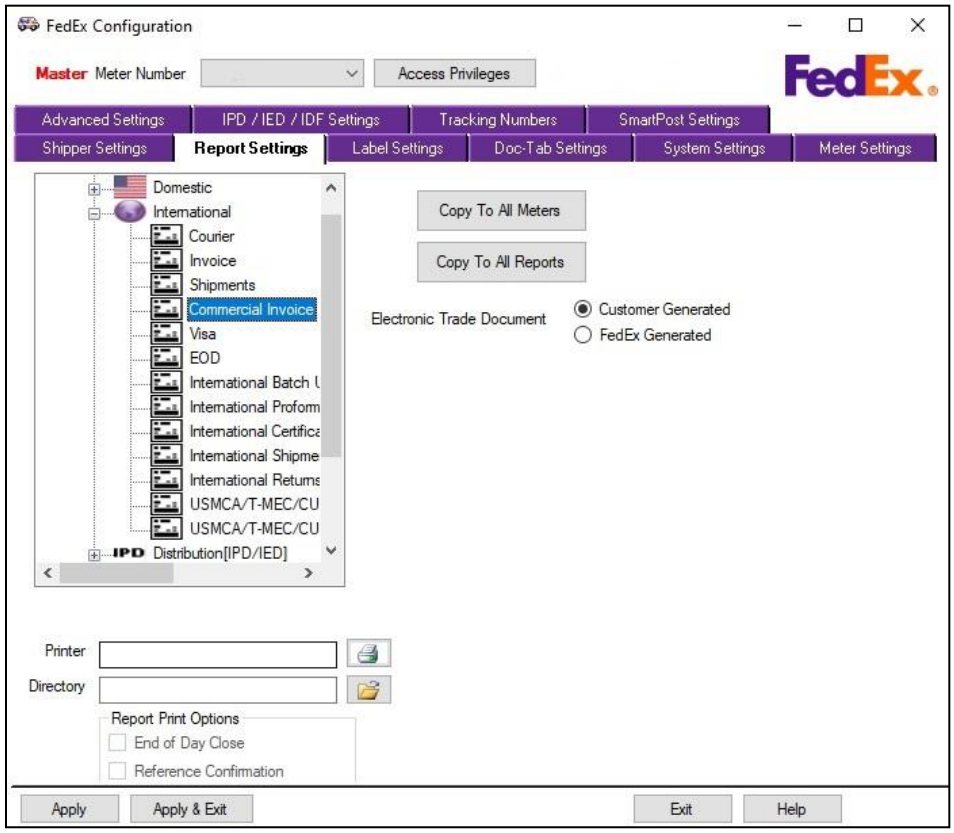
A new Freight report named USMCA/T-MEC/CUSMA Commercial Invoice - Certification of Origin is added into Report Settings.

Figure 29: Report Settings screen



The radio button **FedEx Generated** on the Report Settings screen is rewritten accurately as per Brand name of the company **FedEx Generated**.

Figure 30: Report Settings screen



During Ground or Express shipments, the Report Settings tab enables you to either choose **Customer Generated or FedEx Generated** option for documents **USMCA/T-MEC/CUSMA Commercial Invoice - Certification Origin or USMCA/T-MEC/CUSMA Certification Origin** report.

If any of the option is not selected, then by default **Customer Generated** option is selected.

Figure 31: Screen with USMCA/T-MEC/CUSMA Certification Of Origin report selected

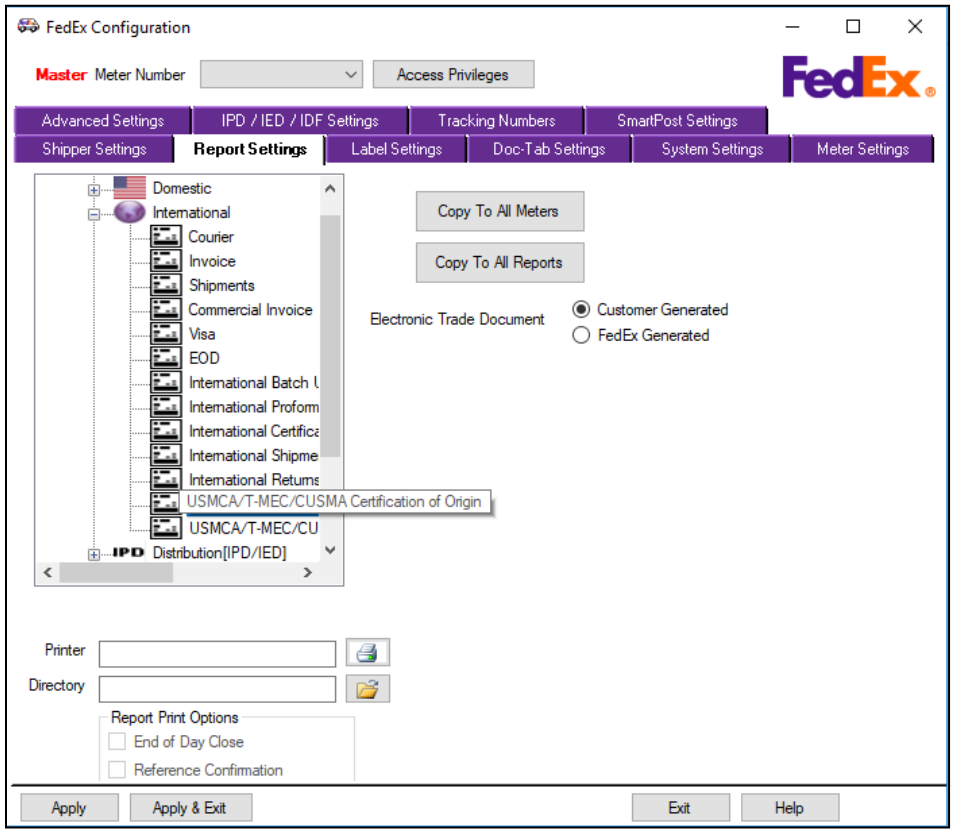


Figure 32: Screen with USMCA/T-MEC/CUSMA Commercial Invoice - Certification Of Origin report selected

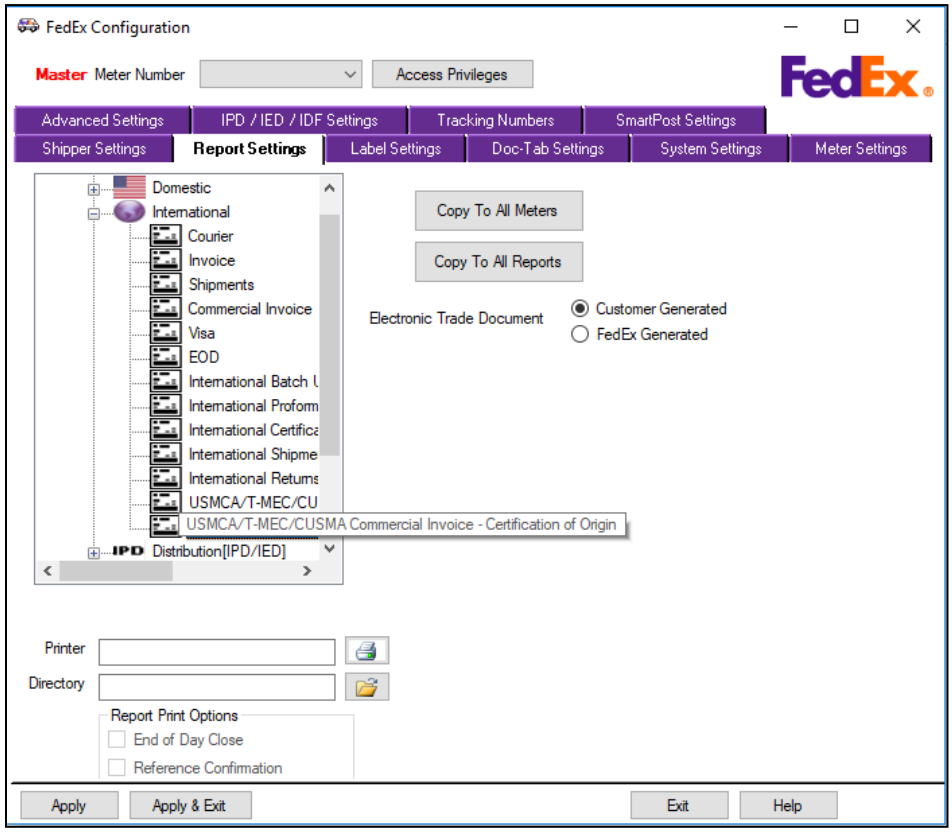
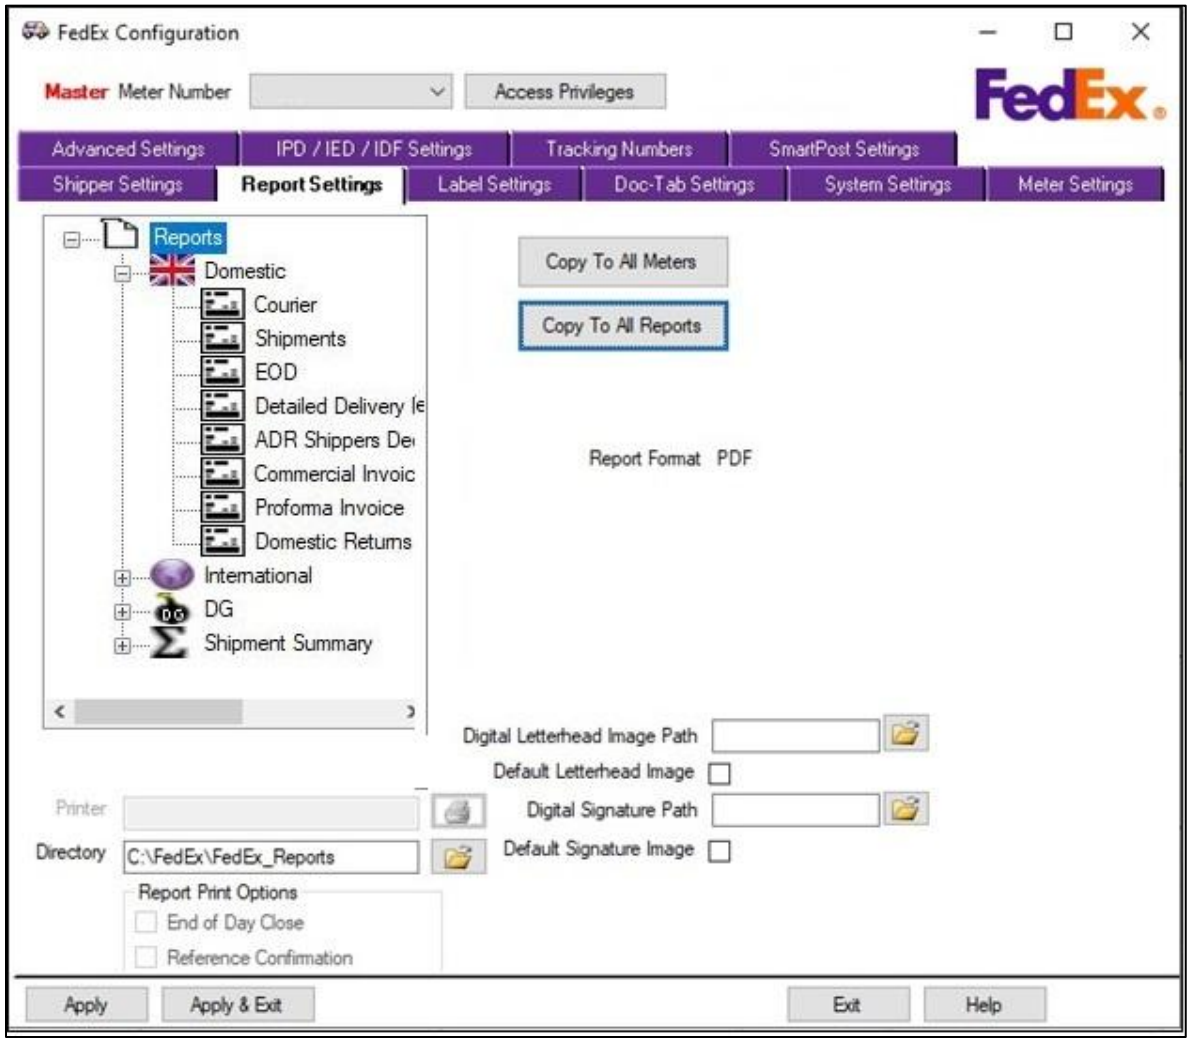
Figure 33: Report Settings - Certificate Of Origin



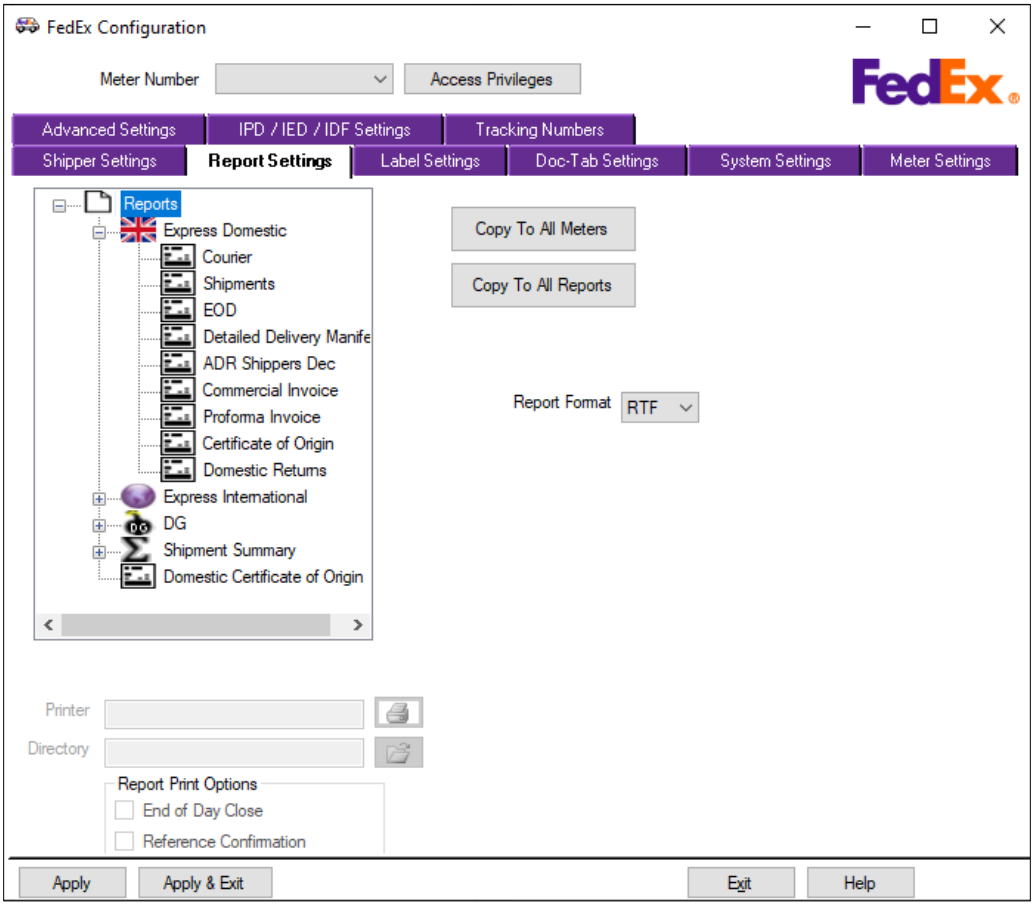
New reports Commercial Invoice and Proforma Invoice are added into Report list under Report Settings tab in FedEx Configuration screen.

Figure 34: Report Settings screen



A new option **Certificate of Origin** is available under Great Britain GB meter.

Figure 35: Report Settings screen

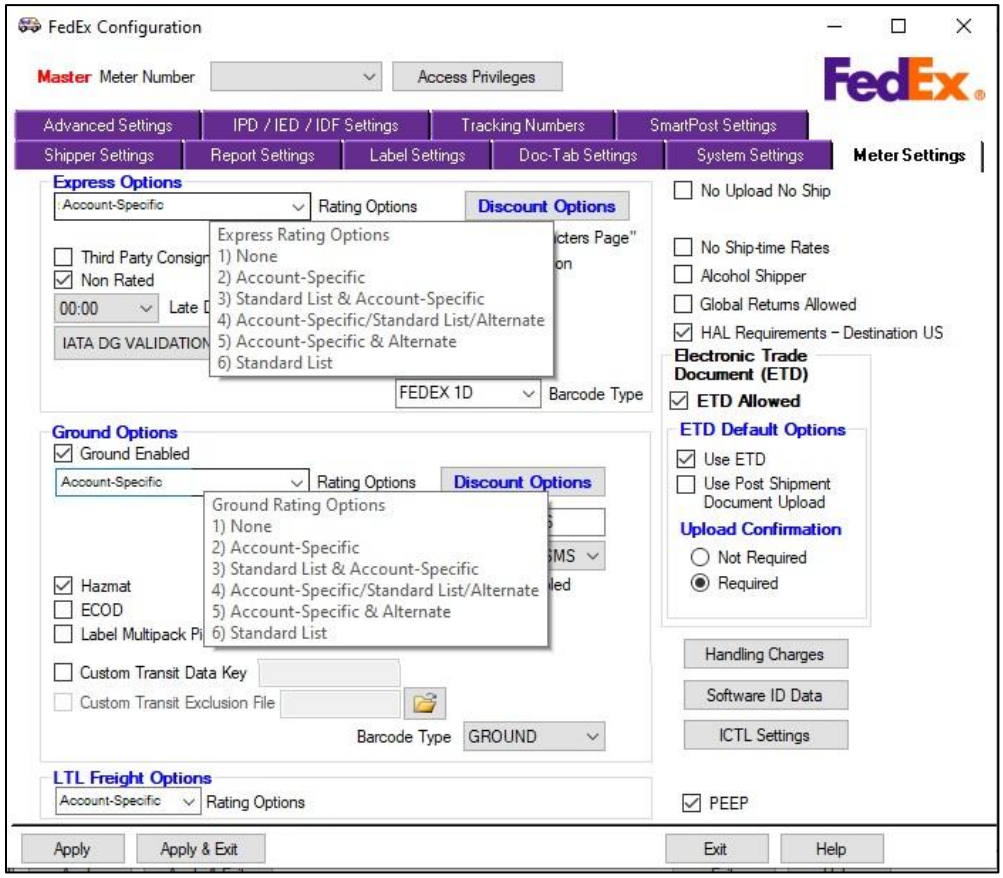


Meter Settings

In Meter Settings tab the Rating Options for Express and Ground are introduced with a new value = Standard List, which in turn returns the Standard List rates in 120 or 125 reply transaction and existing values are modified as shown.

Old name	New name
DISCOUNT	Account-Specific
LIST & DISCOUNT	Standard List & Account-Specific
DISCOUNT/ LIST/ALTERNATE	Account-Specific/Standard List/Alternate
DISCOUNT & ALTERNATE	Account-Specific & Alternate

Figure 36: Meter Settings screen with hover over text



Note: Now you have an option to choose only Standard List Rates in Express and Ground options. 3rd party shippers will not have visibility to discounted rates.

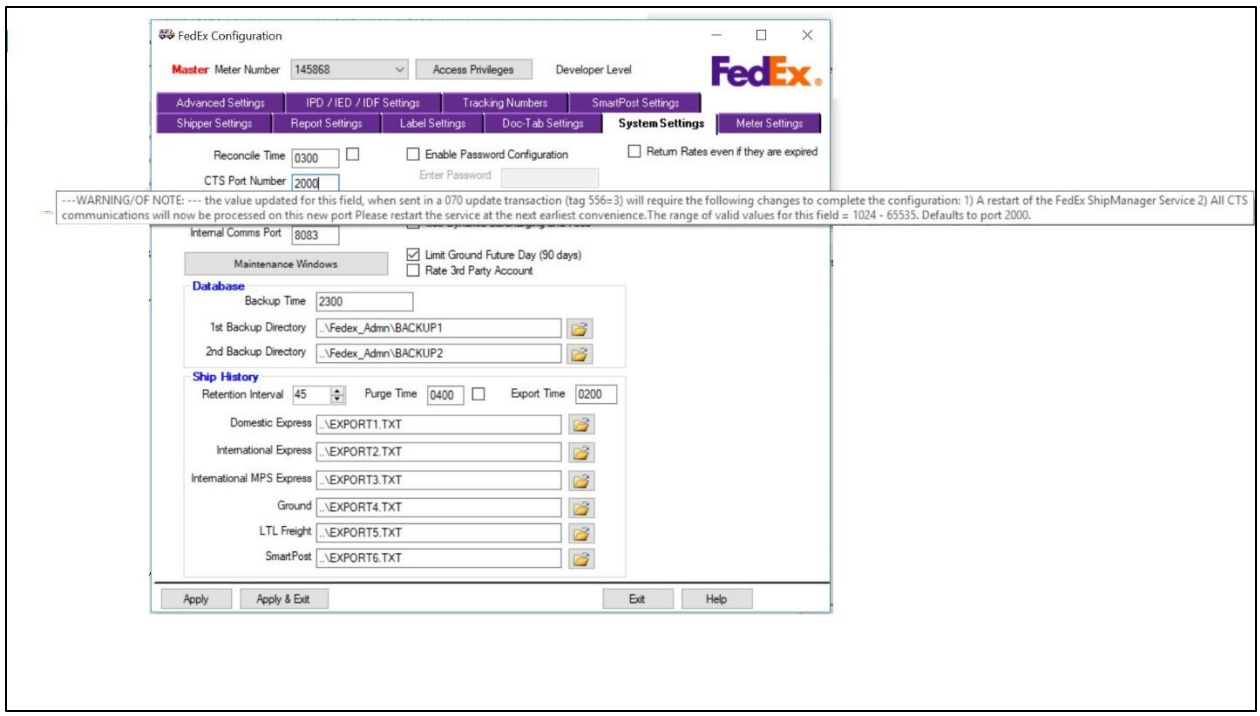
Legacy Airway bill (AWB)

A new option to choose Legacy Airway Bill (AWB) label printing option is added to FedEx Ship Manager Server. This option is added as a default selection for ETD Airway Bill (AWB) available in Meter Settings tab.

System Settings

When you hover over the CTS Port number field in the FXRS Configuration screen on the System Settings tab, hover/Help text is displayed to keep you aware of any value updates and if an additional step is required for the software to recognize the configuration change**.**

Figure 37: System Settings screen



Now rates can be returned individually for FedEx Express and FedEx Ground services even if they are expired.

Figure 38: System Settings screen

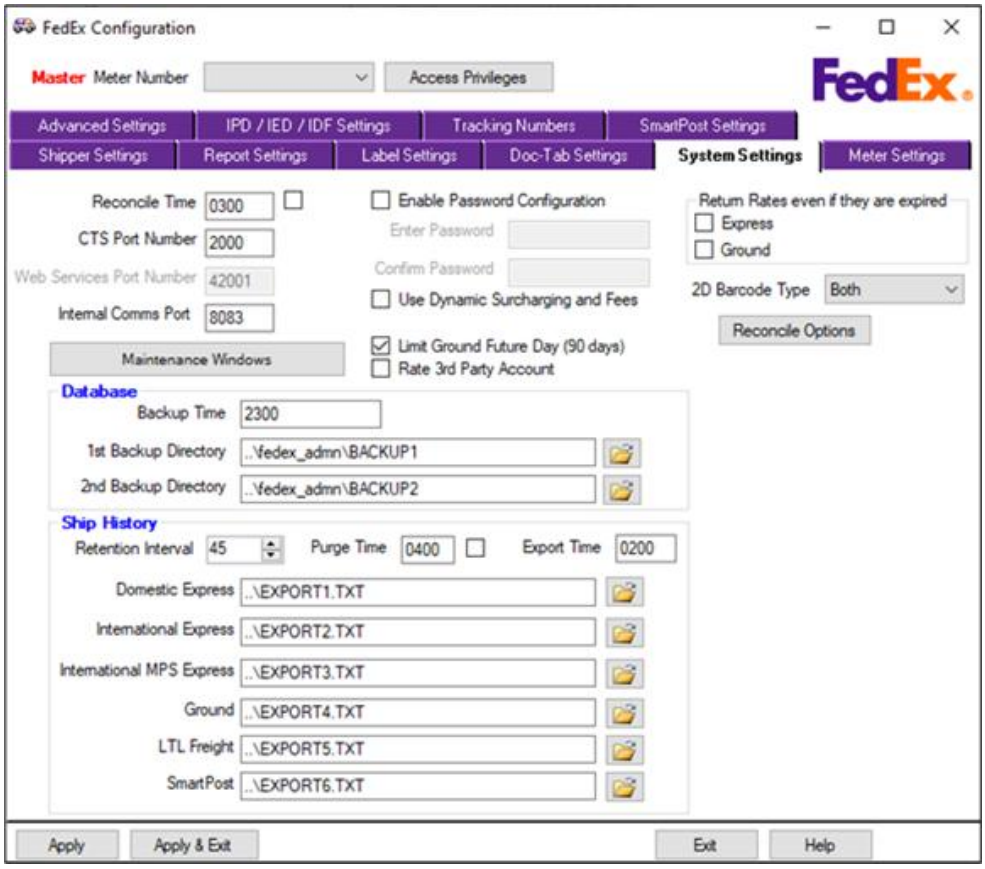


Table 89: System Settings tab fields

Field	Description	User Level	User Level - View	Field Level	Support Level
Return Rates even if they are expired • Express • Ground	Select this box to receive expired rates for FedEx Express and FedEx Ground services separately when the current rates are expired.	Tab not available	Visible and Editable	Visible and Editable	Visible and Editable

New option called **Reconcile Options** is available in System settings tab. It improves your experience to provide rate change control and validation to help prevent unknown rate anomalies and mitigate impact.

Figure 39: System Settings screen

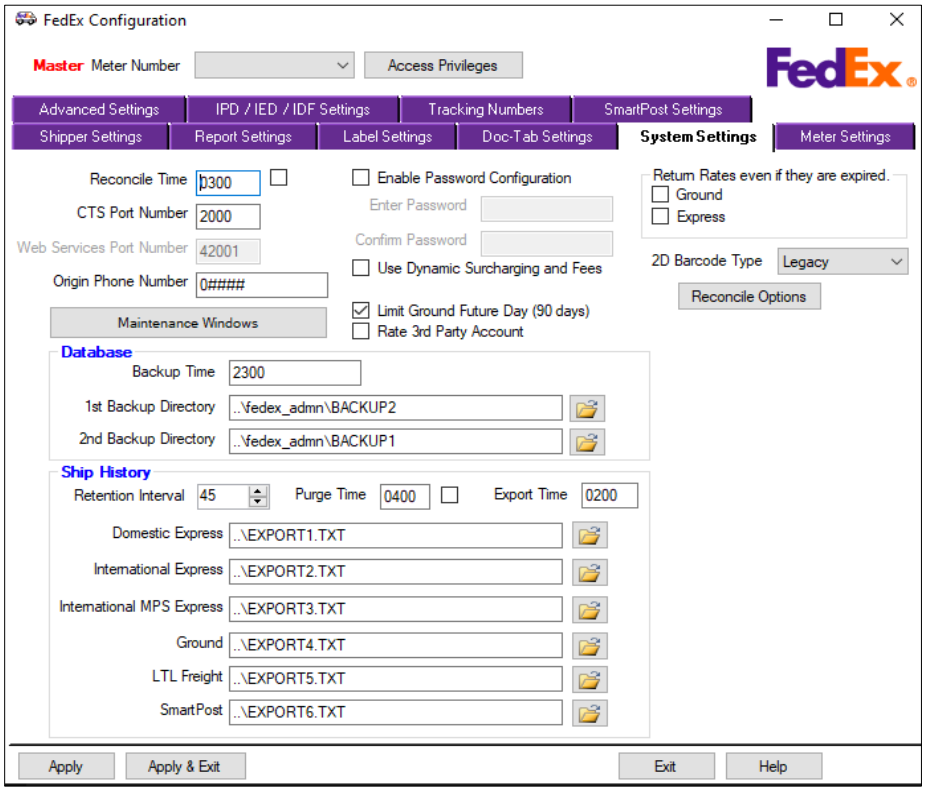

Figure 40: Configurable Reconcile Options

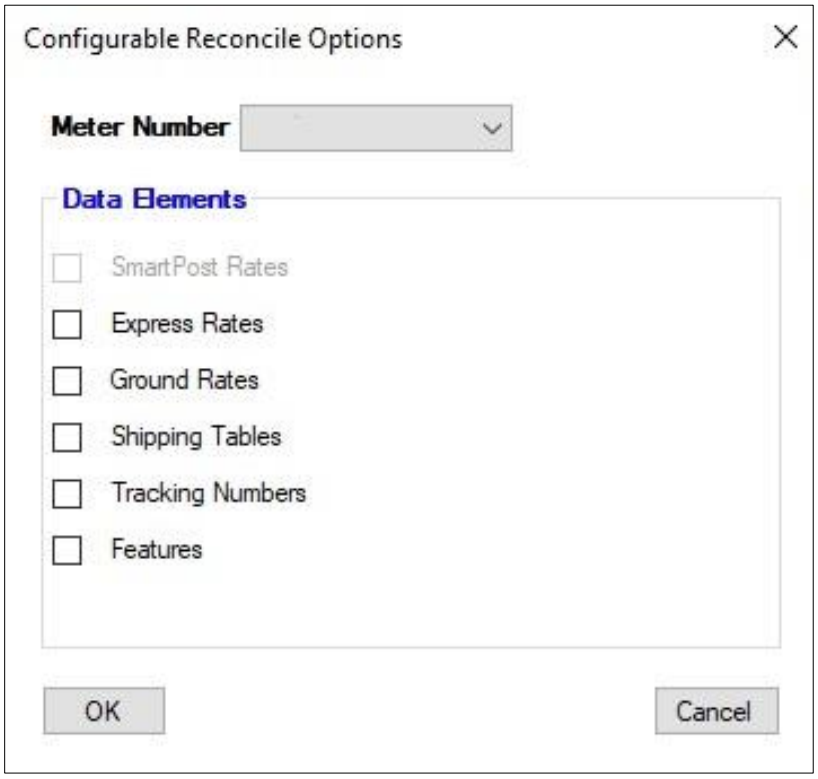
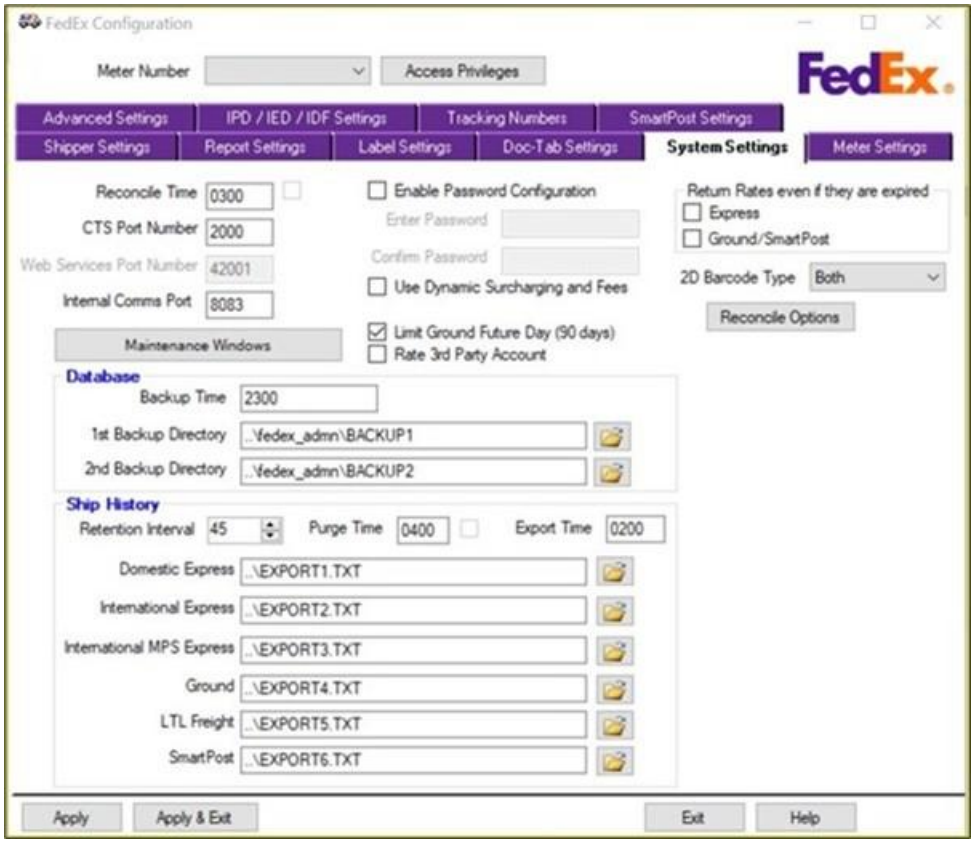


The check box under Return Rates even if they are expired option is renamed to **Ground/SmartPost**.

Figure 41: System Settings screen



The password controls in the FedEx Ship Manager System Settings now displays updated criteria for the password configuration.

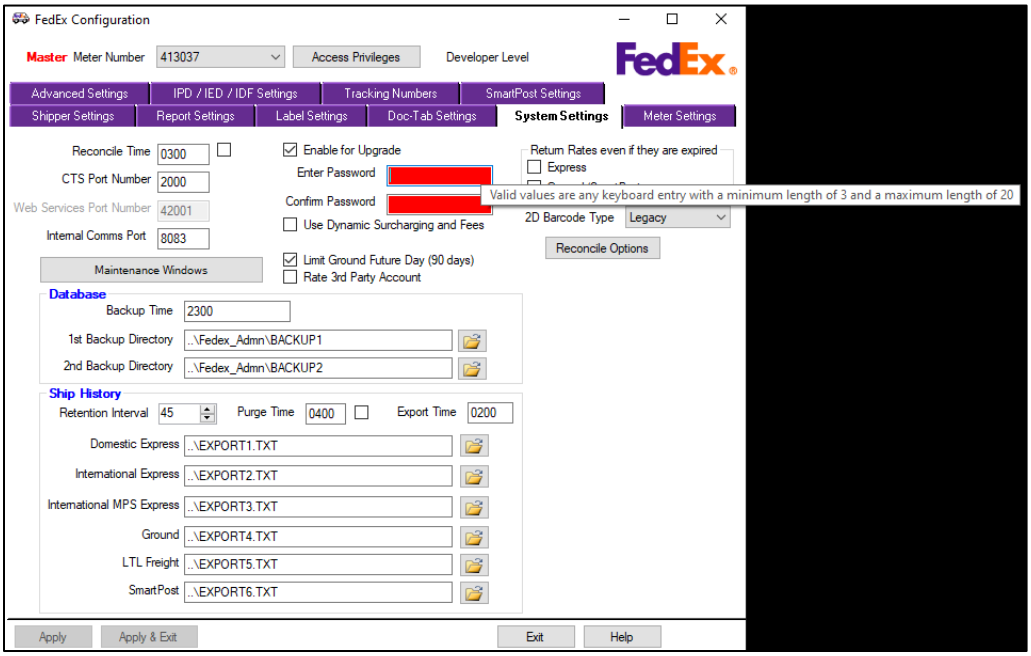
Password must have,

Criteria: **Current**

- Alpha/numeric characters allowed
- Minimum length is 3 and maximum length is 20 characters
- Special characters allowed

The new password criteria is displayed as shown in Figure 42.

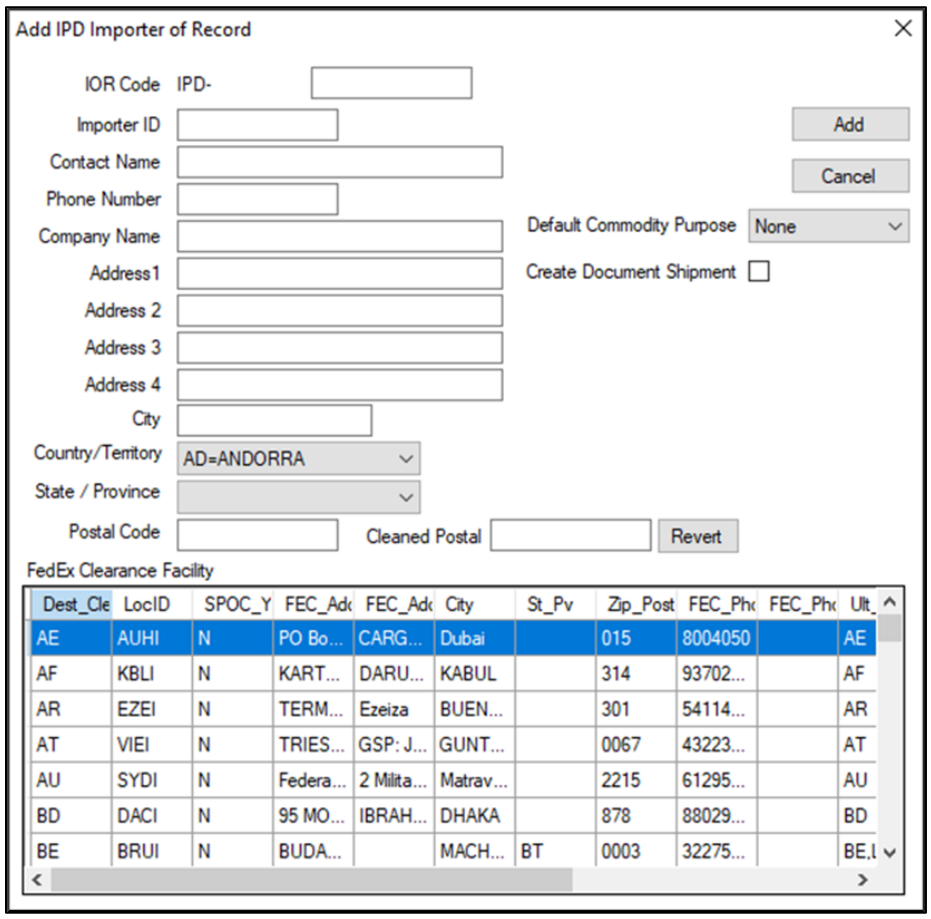
Figure 42: FedEx System Settings tab password criteria



IPD/IED/IDF Settings

When you open Add Importer of Record screen on IPD/IED/IDF Settings, the country/territory drop down list pre-populates the associated state/province code values in the drop-down list for any country having state/provinces.

Figure 43: Add Importer of Record screen



The IPD Importer of Record screen is updated to support Create Document Shipment option. This option allows customization of label printing for a set of clearance documents associated with IPD/IED/IDF shipments.

This tag provides flexibility to update the control transactionally when the FedEx Ship Manager Server config screen is not in use. The tag value details are as follows:

Enabled (checked in the IPD Importer of Record) Create Document Shipment ☑

- continues to generate (save/print) that clearance document label type
- requires a backup set of documents to continue to be printed & placed in the FedEx envelope

Disabled (unchecked in IPD Importer of Record) Create Document Shipment ☐

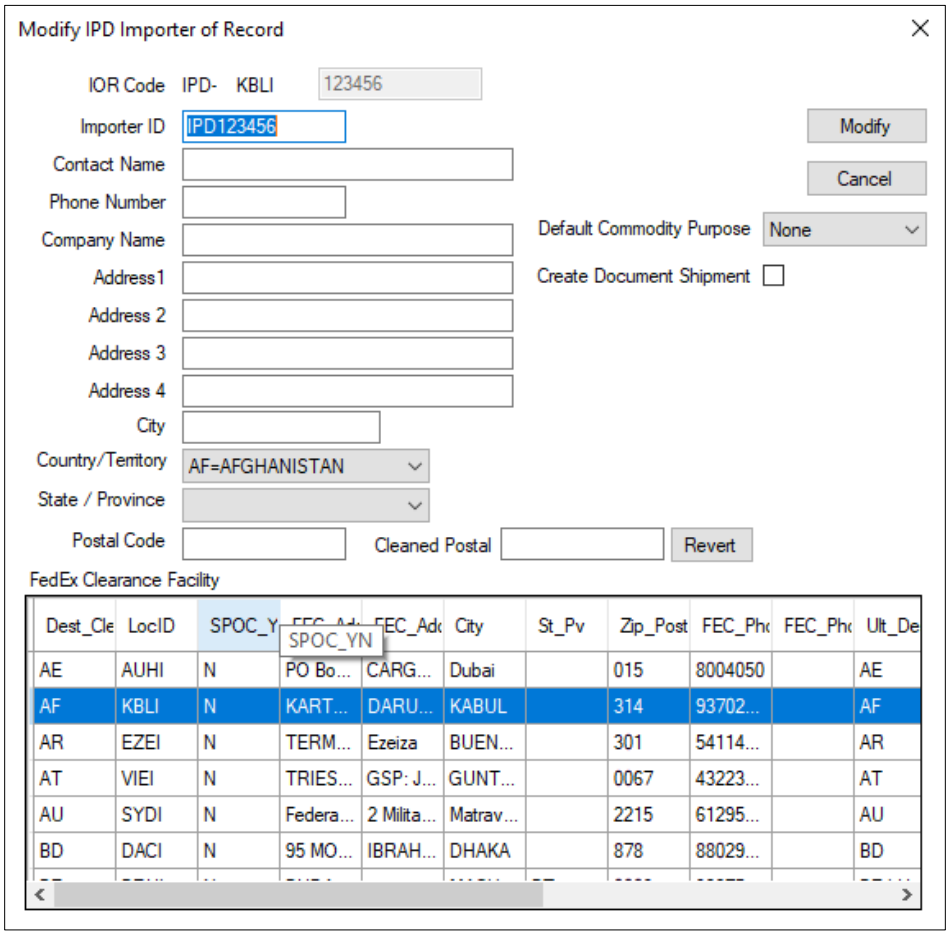
- will no longer generate the clearance document label type no longer requires the backup set of documents.

The IP/IED/IDF settings tab in FedEx Ship Manager Server Configuration screen is available with enhanced User Interface and matrix display, in addition to below change in FedEx Clearance Facility default rows in Modify IPD Importer of Record screen.

Automatic selection of FedEx Clearance Facility default rows.

Horizontal row navigation and row name pop-ups to facilitate ease of access to FedEx Clearance Facility details.

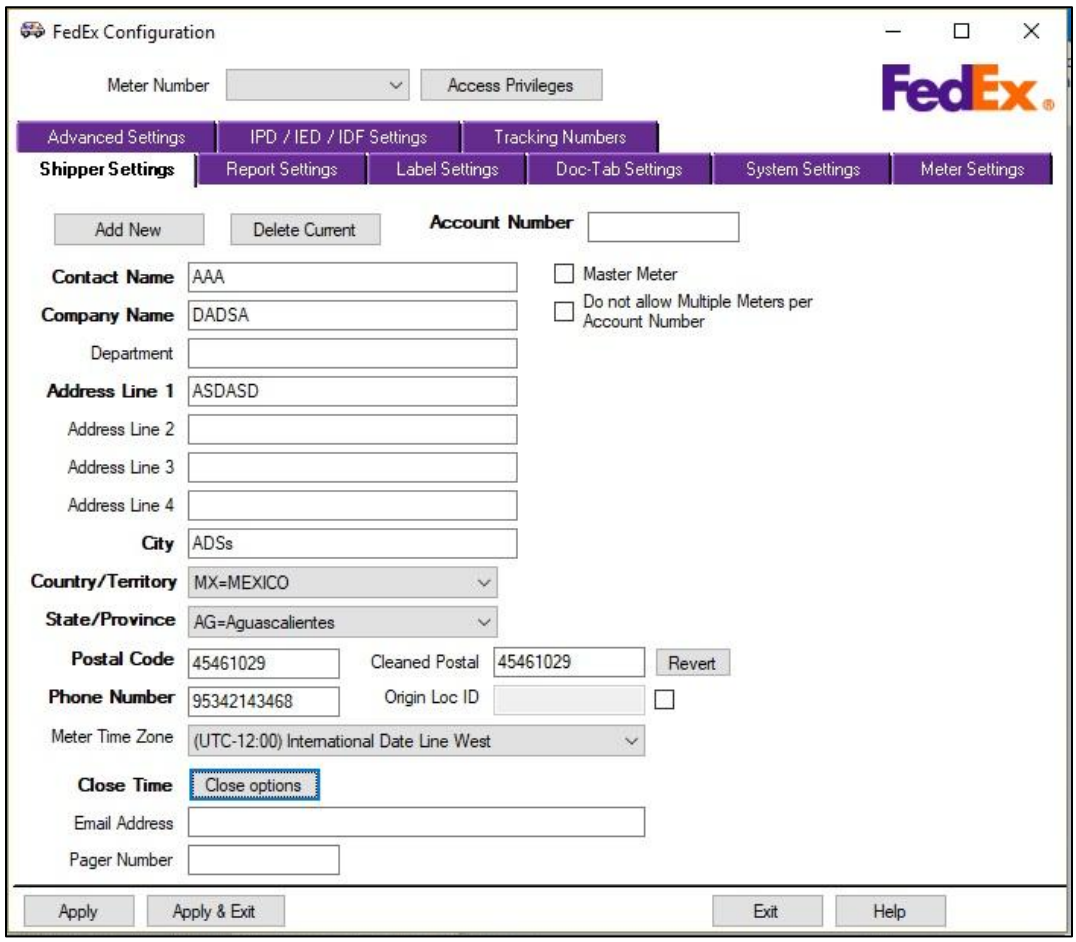
Figure 44: Add IPD Importer of Record Screen



Shipper Settings

When you navigate to the Shipper Settings tab on FedEx Configuration, the country/territory drop down list pre-populates the associated state/province code values in the drop-down list for any country having state/provinces.

Figure 45: Shipper Settings screen



The Postal Code field on Add Meter tab is no longer mandatory to add new meter in the FedEx Configuration for non-postal aware countries.

Figure 46: Shipper Settings screen after adding new meter for non-postal aware countries

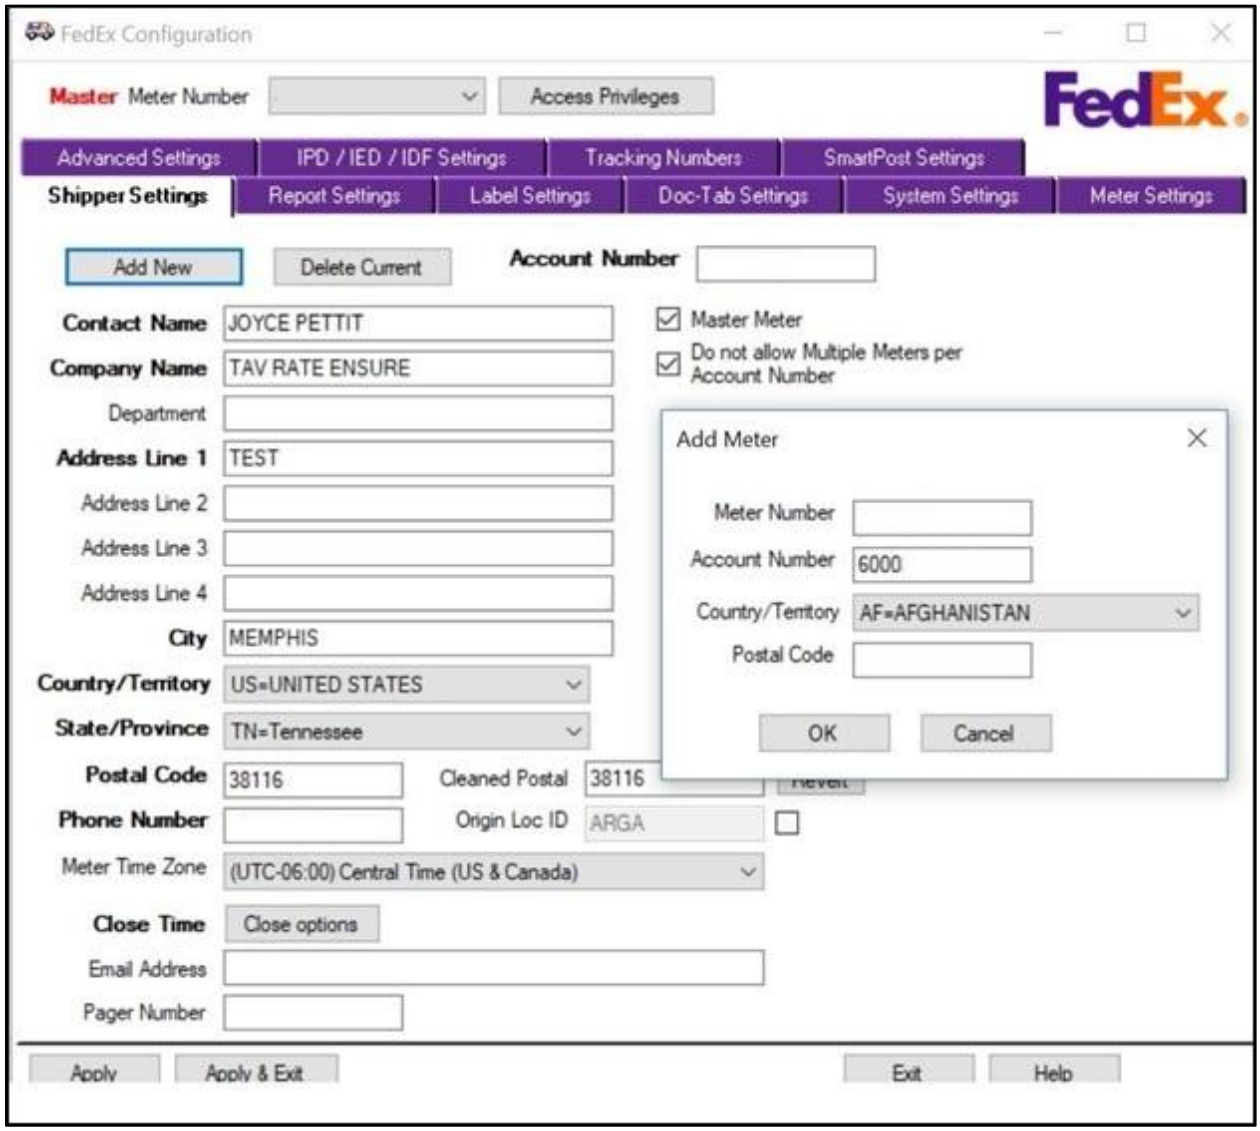


Figure 47: After adding new meter for non-postal aware countries screen

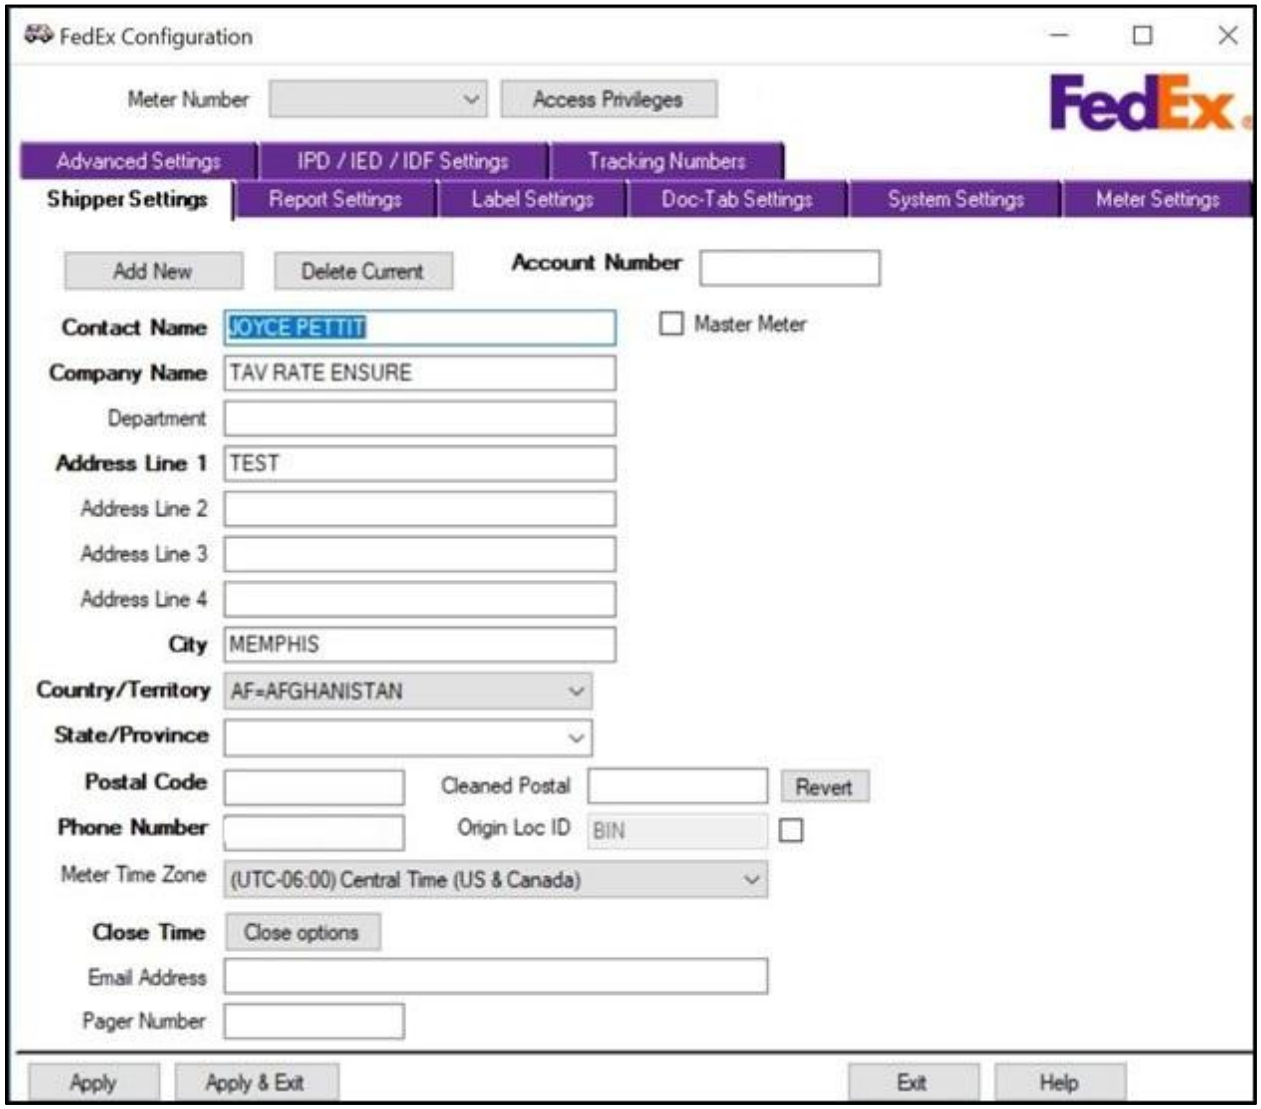
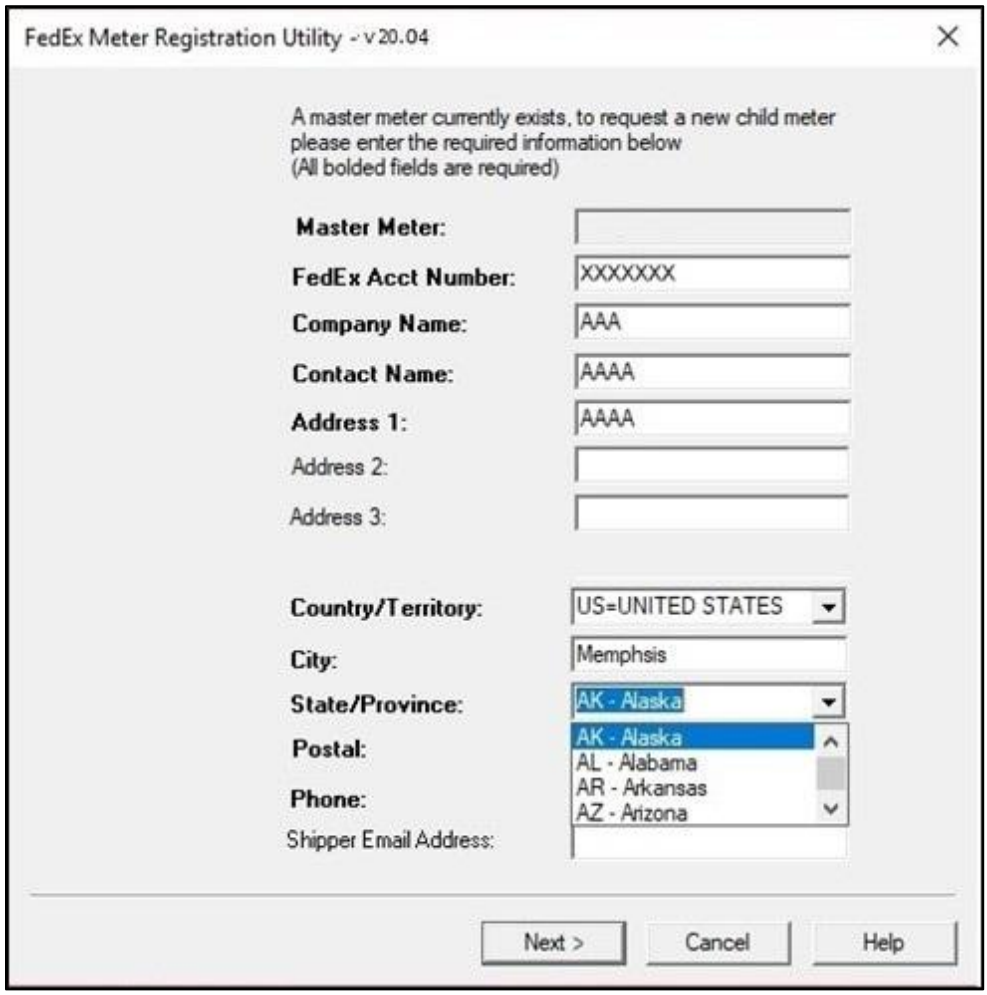


Meter Registration Utility

When you open the Meter Registration Utility, the country/territory drop down list pre-populates the associated state/province code values in the drop-down list for any country having state/provinces.

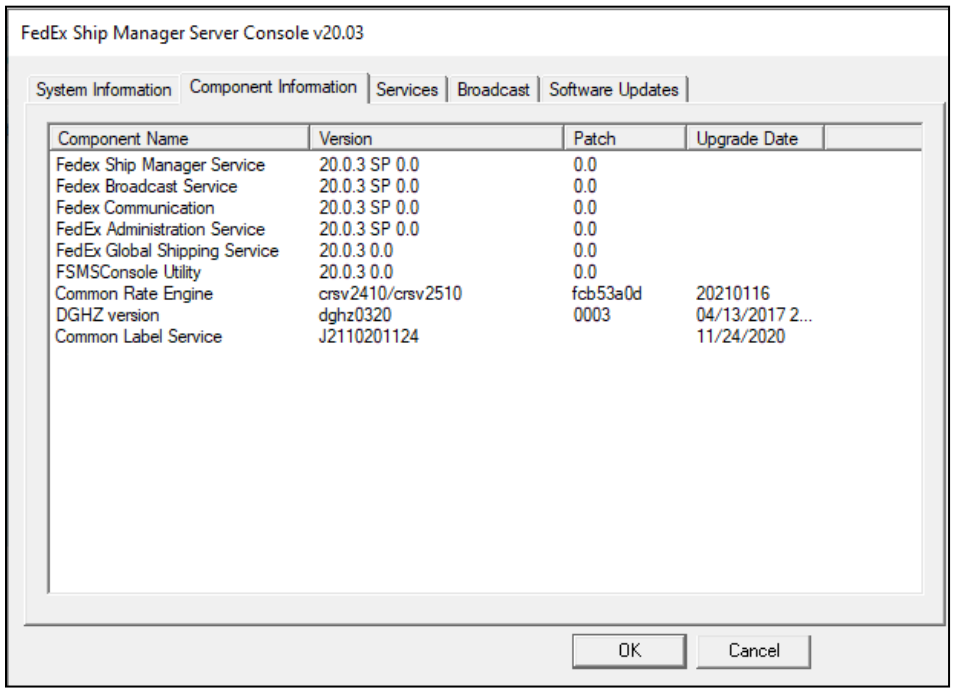
Figure 48: Meter Registration Utility



FedEx Ship Manager Server Console

Now the Component Information tab on **FedEx Ship Manager Server Console** displays correct version of the rating engine.

Figure 49: FSMS Console screen



Backup & Restore utility tab

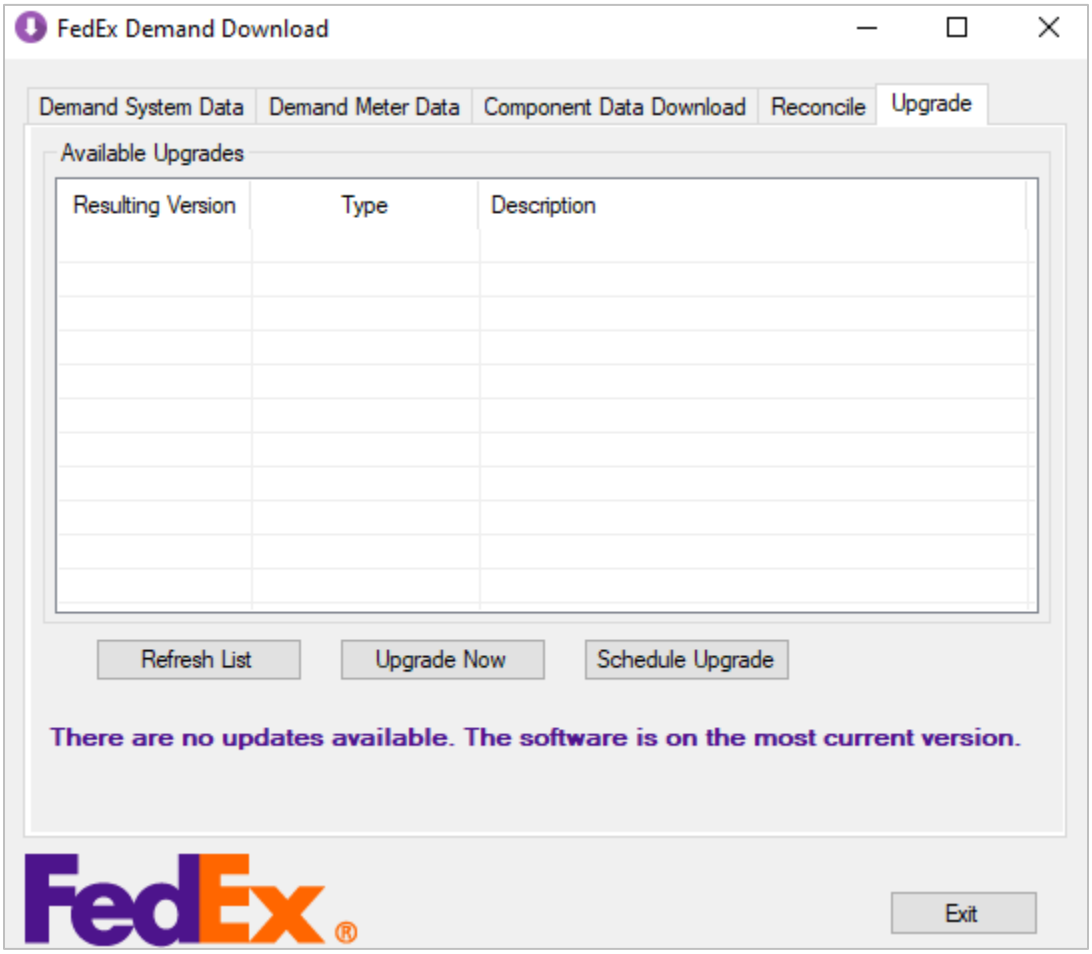
The Database option for Backup now includes Configure reconcile details, available for Backup and restore.

Demand download utility tab

An upgrade option is available during the installation of FedEx Ship Manager Server. This option is enabled with a pop-up display utility to choose upgrade requirements at the end of an installation. Utility functions can be managed in FedEx Ship manager Settings Tab.

Installation steps now involve an option to choose a required upgrade for FedEx Ship Manager Server. A new utility tab, Upgrade is added in Demand download screen to display the upgrade options.

Figure 50: FedEx Demand Download upgrade option

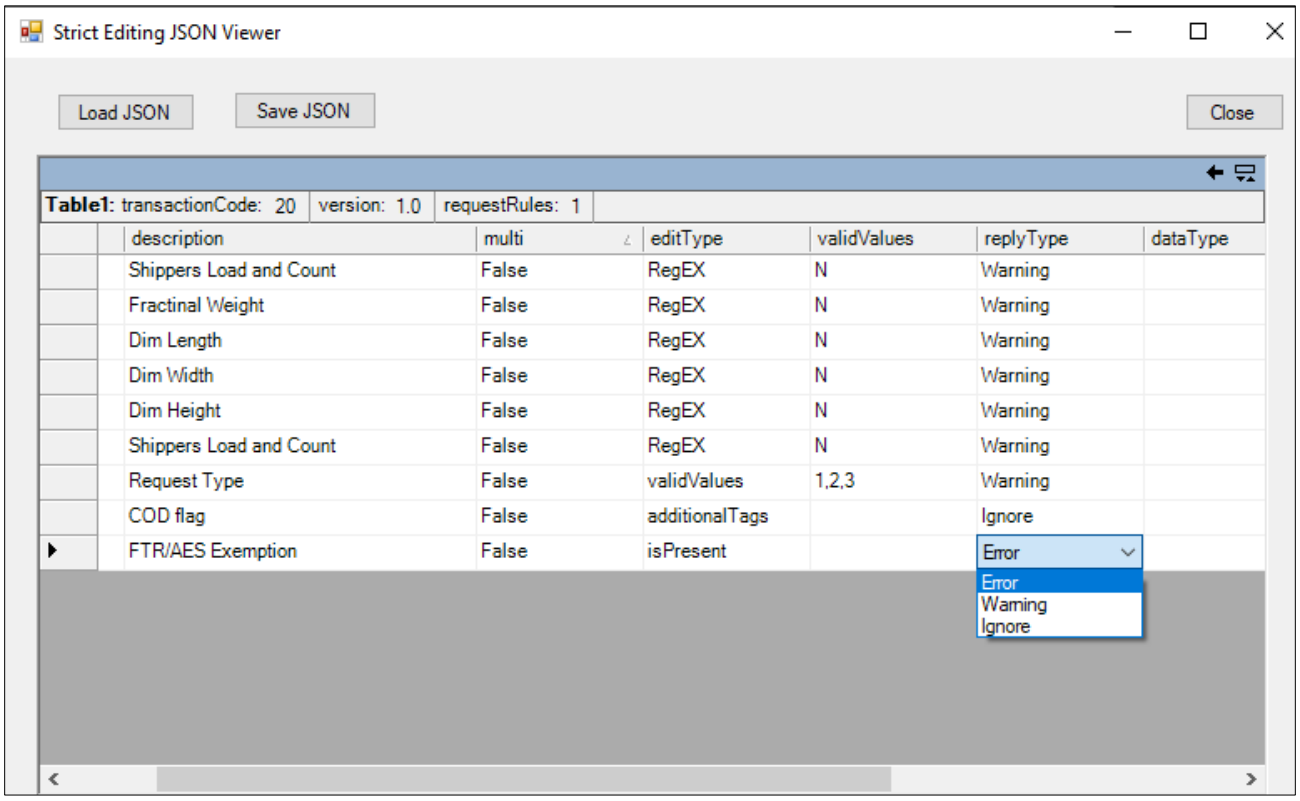


Use FedEx Demand Download utility TBD tab to choose software upgrade requirement.

Strict Editing

Option to display an appropriate success message for non-US export Shipping transactions is enabled. Now the user can choose to the Reply message type for FTR/AES Exemptions. The options available are as shown in the image below:

Figure 51: Strict Editing for FTR/AES Exemption



International Shipment – US

The International Shipments type are updated with weight limits criteria. The shipment is allowed if total gross weight of the shipment is less than net weight of the package.

Pre-Installation steps update

Installing .Net Framework

Ensure .Net Framework Version 4.8 and above is installed in your system before the FedEx Ship Manager®Server installation. Otherwise, the following error message is displayed.

“FedEx Ship Manager®Server requires that your system has the .Net Framework version 4.8 installed. Please install the required .Net Framework then run the Installer. Your system has not been modified.”

Internal Web Services communications

Internal Communications Port checkbox

A new "Internal Comms Port" field is added in FSMS Configuration System Settings screen to change the port (defaults port is 8083) used for internal web service communications between FedEx Open Ship Service and the FedEx Common Services Service.

Note:

- *Once you update the port the FedEx Common Services service and the FedEx Openship Service must be restarted for the changes to reflect.*
- *On the System Settings screen, the Apply and Apply & Exit buttons are disabled when either invalid values or no value is entered in the Internal Comms Port. To enable these buttons, a valid value must be entered.*

Figure 52: System Settings screen

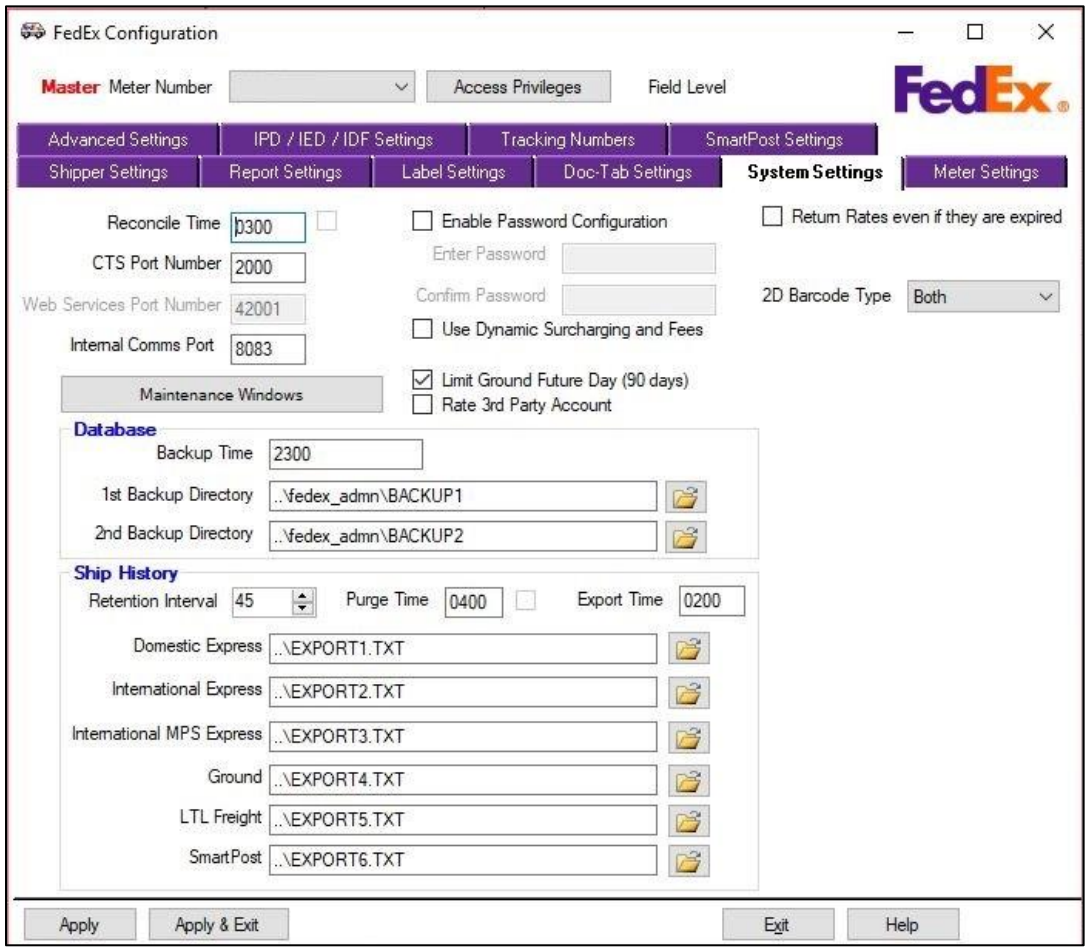


Table 90: System Settings tab fields

Field	Description	User Level	User Level -View	Field Level	Support Level
Internal Comms Port	Enables you to change the port (defaults port is 8083) used for internal web service communications between FedEx Open Ship Service and the FedEx Common Services Service. Once you update the port the FedEx Common Services service and the FedEx Openship Service must be restarted for the changes to reflect.	Visible	Visible	Visible and Editable	Visible and Editable

Internal Comms Port tag

A new field Internal Comms Port is added. The details of this field are explained in the following table.

Table 91: Internal Comms Port

Field ID	Field Name	Update	Affected Transaction
617	Internal Comms Port	New Field	070/170 Meter Query or Configuration Transaction
	Description Use this tag to set and retrieve internal Comms port. *Note:* *The range of the tag is min= 1024 to max= 65535. If the value exceeds the maximum value, then an error message is displayed.*		
	Type: N	Minimum Length: 4	Maximum Length: 5
	Multiple Occurrence: N	Input/Output: I/O	Carrier: NA
	Valid Values: Any port number for example 8083 **Default Value: 8083** **Optionality:** Optional **Shipment vs. Piece vs. Commodity Level:** NA		

Error codes and error messages

Following is the list of newly added error codes and error messages.

Table 92: List of new error codes and messages

Error Code	Error Messages
2944	The content received in tag #618 = 'F' is an invalid value. Please edit the value and retry the transaction.
5507	---WARNING--- The value updated for this field, when sent in a 070 update transaction (tag 556=3) will require the following changes to complete the configuration: 1) a restart of the FedEx Ship Manager Service 2) All CTS communications will now be processed on this new port. Please restart the service at the next earliest convenience. The range of valid values for this field = 1024 - 65535. Defaults to port 2000.
5508	The value entered for this port number is outside of the valid range of ports {0}. Please re-enter a value & retry the transaction.
7987	The value entered for this port number is outside of the valid range of ports {0}. Please re-enter a value & retry the transaction.

Version 20.05

Log4j Security Update

FedEx Ship Manager® Server is now safer from Log4j vulnerability. Upgrade to the latest version of the software for enhanced security. The upgrades are available manually with .exe file and through a delta upgrade.

Additional Handling Surcharge Revisions

FedEx surcharges are revised for U.S. Domestic Express and Ground Package services. The Additional Handling Surcharges (AHS) are now calculated as per your package conditions such as packaging, weight, and dimension. These Surcharges are based on shipment zones.

The shipment transactions related to US Domestic Express and Ground Package services returns Surcharges for the following Additional Handling Surcharge types (AHS):

- Additional Handling – Weight
- Additional Handling – Packaging
- Additional Handling – Dimension

Applicable transactions are **020 Rate Quote, 020 Rate /Route Combo, 025 Rate all Services, 020 Shipment.**
Refer List Surcharges and Fees 2022 for more details.

Delivery Area Surcharge Revisions

A Delivery Area Surcharge is applicable for shipments with selected Zip codes within the contiguous U.S. Refer FedEx Delivery Area Surcharge for list of applicable Zip codes.

Rate Revisions

Express and Ground Services

FedEx shipping rates are revised for FedEx Express and Ground Services. The rate changes include:

- Rate and surcharge revisions based on shipment zone.
- Fuel Surcharge changes for FedEx Express® (domestic package and freight services), FedEx Ground®, and FedEx Freight® shipments.
- Additional Handling Surcharge changes for FedEx Express®, FedEx Ground®, FedEx Ground® Economy, and FedEx Freight® based on Package.
- Delivery Area Surcharge revisions for FedEx Express and FedEx Ground® Services.

Refer FedEx Standard List Rates 2022 for list of shipment rate updates.

*Note: For further assistance regarding current automation solution, contact Technical Support team at **1.877.339.2774** or reach out to their sales professional.*

Tier Level Rate Support

International Out of Delivery Area (ODA) and Out of Pickup Area (OPA) Surcharges are revised for International Express Freight and Parcel services. Surcharges are now divided based on postal codes, and the rates are chosen based on zip codes for Out of Delivery and Out of Pickup Areas.

Tier level rates are applicable for the following FedEx Services:

- International Priority (IP)
- International Express (IE)
- International Freight (IF)
- International Priority® Freight (IPF)
- International Express® Freight (IEF)
- FedEx International Priority® Express (2A)
- FedEx International Priority® (2P)
- FedEx International Connect Plus™ (FICP)
- FedEx Regional Economy® (RE)
- FedEx Regional Economy® Freight (REF)

Shipment Regulations for Dangerous Goods (DG)

This version of FedEx Ship Manager® Server provides Address Correction, Extended Area and Remote Area services. This helps you cope with the latest regulations from the International Air Transport Association (IATA). These services are offered with additional fee known as Additional Handling Surcharge (AHS).

Requirements have been revised for some Dangerous Goods (DG) shipments. Refer to Regulatory Updates for Dangerous Goods | FedEx for more information.

Shippers may obtain additional information and assistance via:

- The FedEx Dangerous Goods/Hazardous Materials Hotline at **1.800.463.3339** (say "dangerous goods"). Outside the U.S., call **1.901.375.6806**.

Version 20.06

Additional tags

New Tags **674, 675, 676, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688** are updated for 170 Meter Query request reply to transaction.

Configurable Reconcile Line-Item Flag

Table 94: Configurable Reconcile Line-Item Flag

Field ID	Field Name	Update	Affected Transaction
640	Configurable Reconcile Line-Item Flag	New Field	070 Meter Query or Configuration Request/170 Meter Query or Configuration Reply
	Description This tag represents a single (or all) line-item(s) in configurable reconcile. This tag will be used along with tag # 639 – Configurable Reconcile Line-Item Code. This tag value is modified for one (or any combination) of the line-items when tag #639 is present in the transaction. This tag can take on two different formats: 1. a single code number for a specific line-item 2. a multi-occurrence tag for representing one or more (or all) line-items		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: Y	**Input/Output:** I/O	**Carrier:** NA
	Valid Values: ○ Y = Perform a reconcile for the line-item ○ N = No reconcile for the line-item will be performed *Note: Based on Meter capability, the line-item is inapplicable and will default to the value "N" (ex: Ground® Economy is US-centric and hence any meter that is outside of a US origin will default for Ground® Economy Rates = N / disabled)* **Default Value:** N Optionality: Conditional Required = To return all relevant information for a configured meter. Optional = To perform any updates using the 070-meter update transaction. Level: NA

Default Value: N

Optionality: Optional

Required = To return all relevant information for a configured meter.

Optional = To perform any updates using the 070-meter update transaction.

Level: NA

New tags are updated for 070/170 Meter Query transactions. These new tags are displayed in meter information list along with other tags.
The details are as follows:

- Tag 720 - Enable Ship Manager Console Purge Capability
- Tag 721 - Ship Manager Console Retention Period

Enable Ship Manager Console Purge Capability

Table 113: Enable Ship Manager Console Purge Capability

Field ID	Field Name	Update	Affected Transaction
720	Enable Ship Manager Console Purge Capability	New Field	070 Meter Query Request/170 Meter Query Reply
	Description This tag provides the ability to enable/disable the Purge capability for capturing the log values in the Ship Manager Console to an appropriate log file. This tag is a “parent” for associated tag #721 - Ship Manager Console Retention Period.		
	Data Type: A	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence (Y/N): N	**Input/Output:** I/O	**Carrier:** NA
	Valid Values: • Y = Enable Ship Manager Console Purge Capability • N = Disable Ship Manager Console Purge Capability **Default Value:** Y Optionality: Optional Required = To return all relevant information for a configured meter. Optional = To perform any updates using the 070-meter update transaction. Level: NA		

Ship Manager Console Retention Period

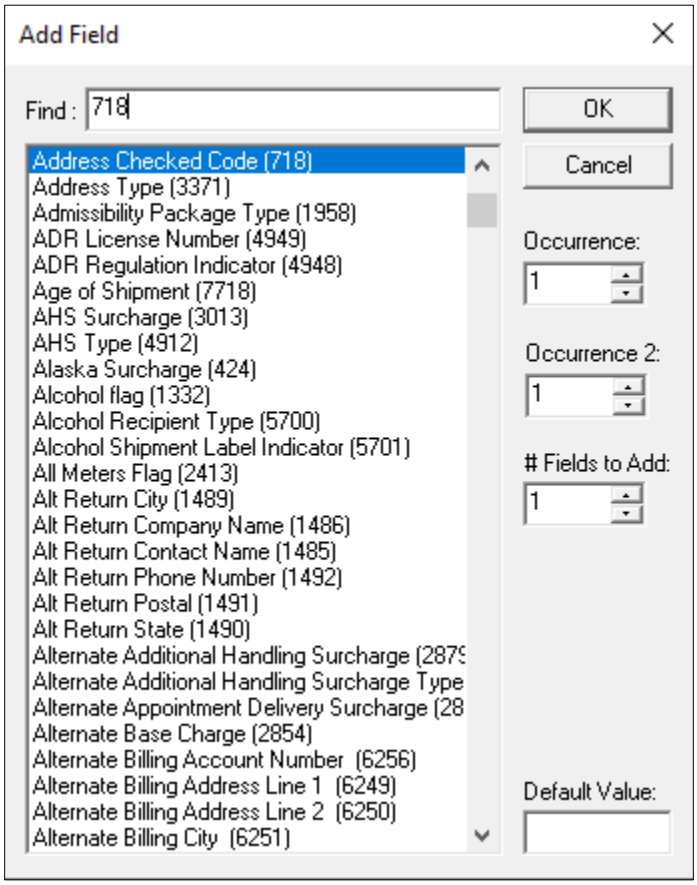
Table 114: Ship Manager Console Retention Period

Field ID	Field Name	Update	Affected Transaction
721	Ship Manager Console Retention Period	New Field	070 Meter Query Request/170 Meter Query Reply
	Description This tag represents the retention period for Ship Manager Console log files. A dependency exists with "parent" tag #720 Enable Ship Manager Console Purge Capability. Based on enablement/disablement of tag #720, the retention interval is enabled/disabled.		
	Data Type: A	**Minimum Length:** 1	**Maximum Length:** 2
	Multiple Occurrence (Y/N): N	**Input/Output:** I/O	**Carrier:** NA
	Valid Values: • 1 = minimum number of days for file retention • 30 = maximum number of days for file retention **Default Value:** 2 Optionality: Optional Required = To return all relevant information for a configured meter. Optional = To perform any updates using the 070-meter update transaction. Level: NA		

Address Checked Code

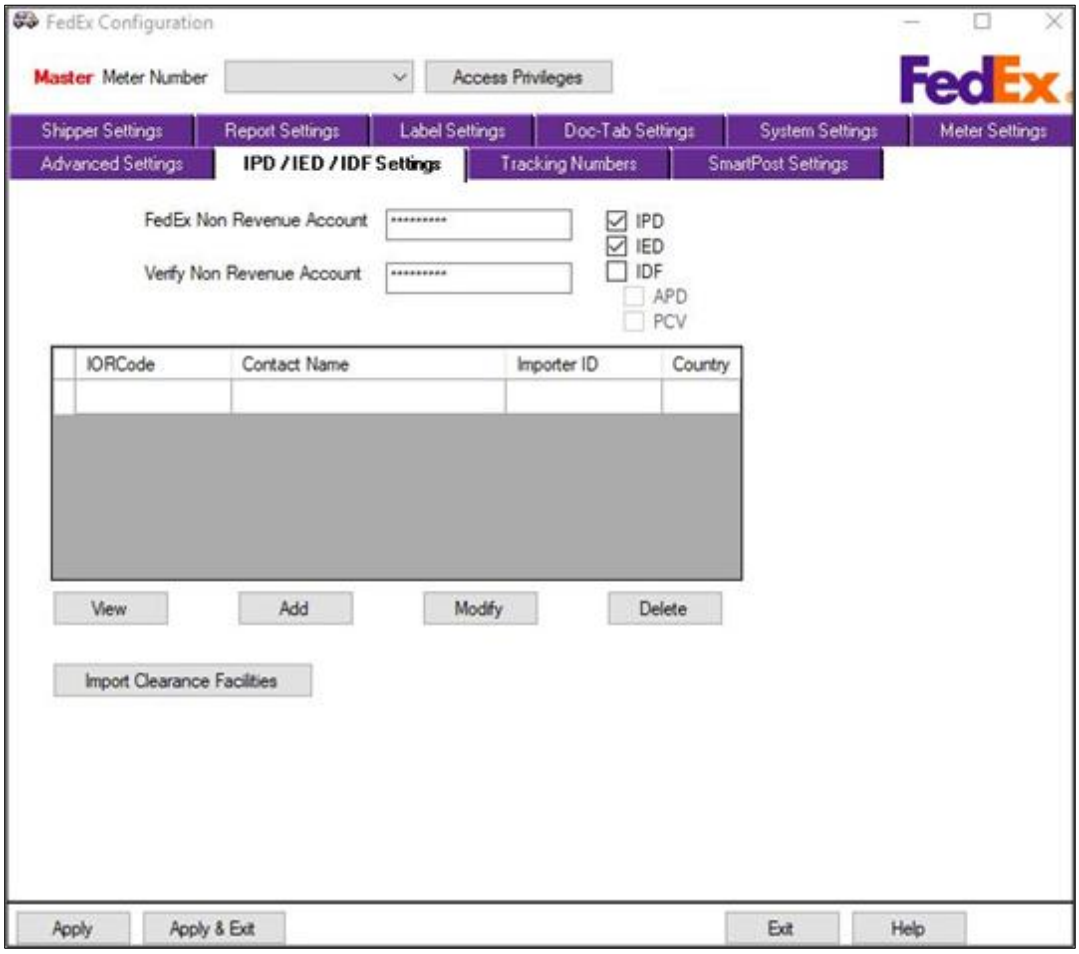
The tag name **Address Checked Code** is assigned to a new tag **718**. This tag is available in Trans Edit for further use.

Figure 53: Tag 718 - Address Checked Code



The values for the tag 1654 – IPD/IED flag are returned in 170 reply and are updated in FedEx Ship Manager Server Config screen IPD/IED/IDF Settings tab. Refer to image below.

Figure 54: IPD/IED/IDF Settings with 1654 tag values



FedEx Ground® Economy

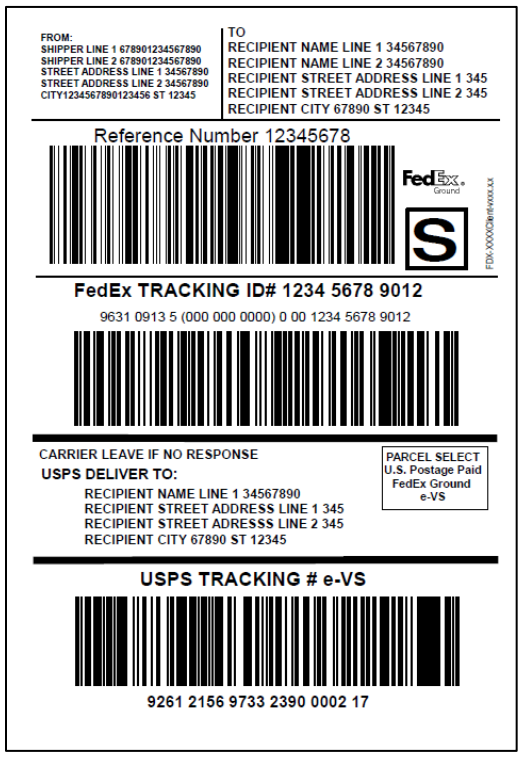
The service name **SmartPost®** is renamed as **FedEx Ground® Economy** and the changes are updated in FedEx Ship Manager® Server documents.

Shipment

The shipping report with updated details are available for FedEx Ground® Economy outbound shipments. The shipment label contains the following details of the shipment report.

1. Tracking number -reference number
2. Alternative Tracking ID – Tracking ID

Figure 55: FedEx Ground Economy Label sample



Global shipment transaction fields for FedEx Ground® Economy labels are updated with the following tags to enable appropriate custom label generation.

Table 115: Global Shipment transaction fields for FedEx Ground® Economy labels

Field ID	Description with sample value
656	Operational Instructions Element No. 10 Example: 123456789012
664	FDX 1D barcode Ex:962409159000000000000794831328440
668	Operational Instructions Element No. 18 Ex: 9621 0916 1 (000 123 4567) 0 00 7949 1291 6634
29	Tracking number
671	Tracking ID type

	– USPS (value 5) Example: 41990100107132226283 – FEDEX (value 2) Example: 123456789012
2418	Delivery confirmation Example: 41990100107132226283

Global shipment transaction for FedEx Ground® Economy Labels is now enabled with pre-assigned tracking numbers to provide successful shipment transaction. The existing **004/140 -Tracking number transaction** fields enable the generation of pre-assigned tracking numbers for successful processing of FedEx Ground® Economy Label.
The following Tracking number types are returned on a successful Global shipment transaction.

- FedEx Ground® Economy Labels are enabled: **18–FedEx Ground® Economy Small Shipper/Big Shipper**
- FedEx Ground® Economy Labels are disabled: **17–FedEx Ground® Economy**

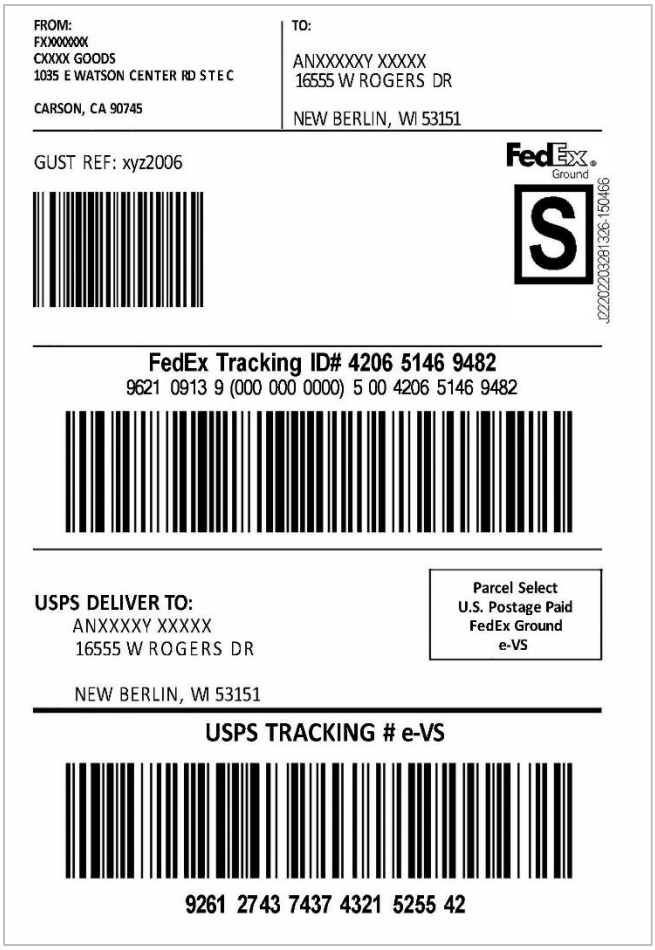
Sample Label – FedEx Tracking number



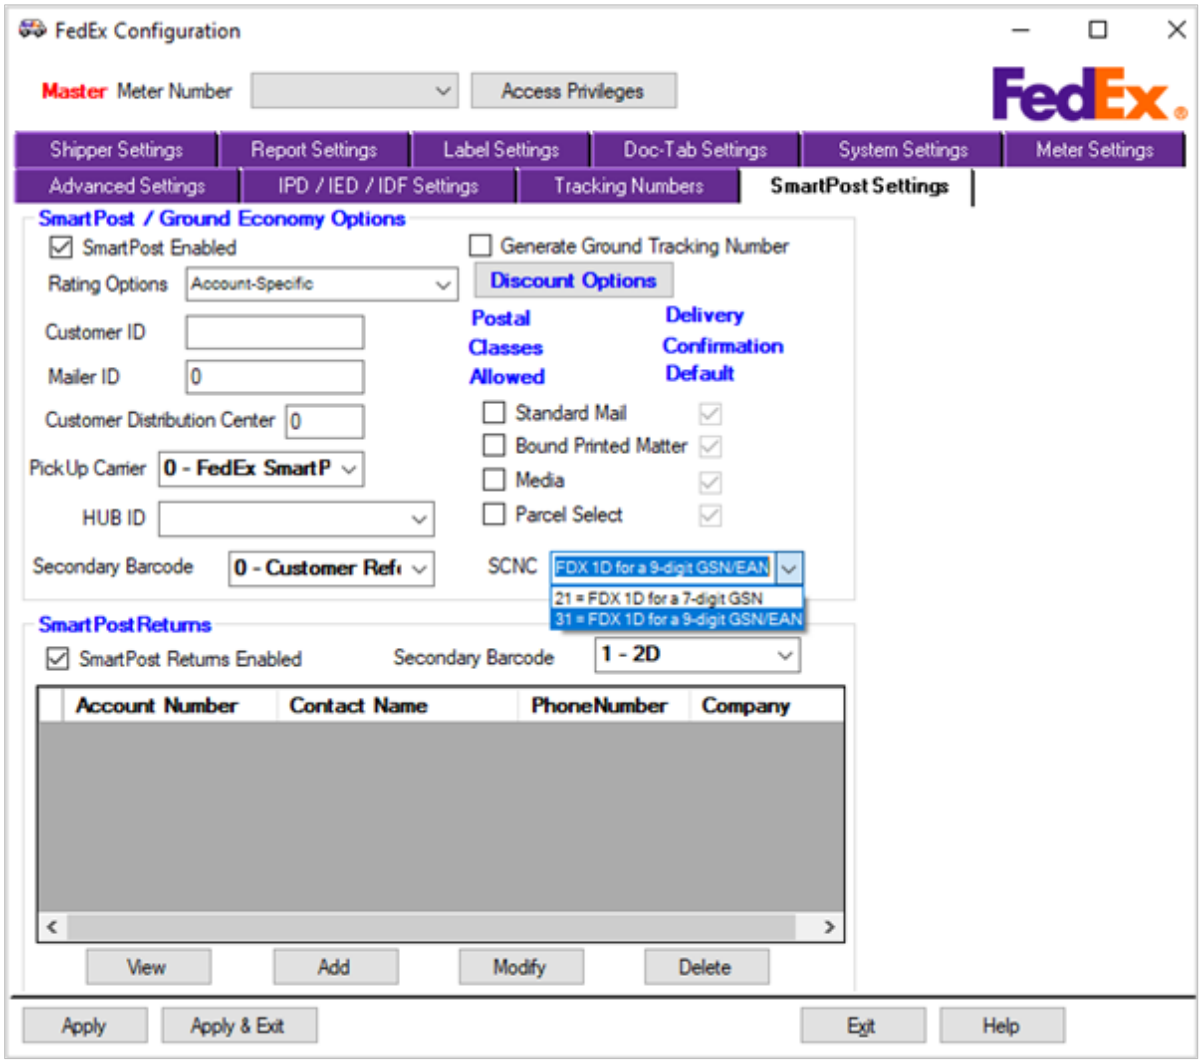
SCNC Field (Standard Carrier Number Code)

The SmartPost tab is now introduced with a new Serial Container Numeric Code (**SCNC)** field for FedEx Ground Economy Label. Criteria with valid values for SCNC field is displayed as a pop up on mouse hover.
This field operates with two values 21 and 31 in accordance with the following criteria:

- **21** = FDX 1D for 7-digit GSN
- **31** = FDX 1D for a 9-digit GSN/EAN

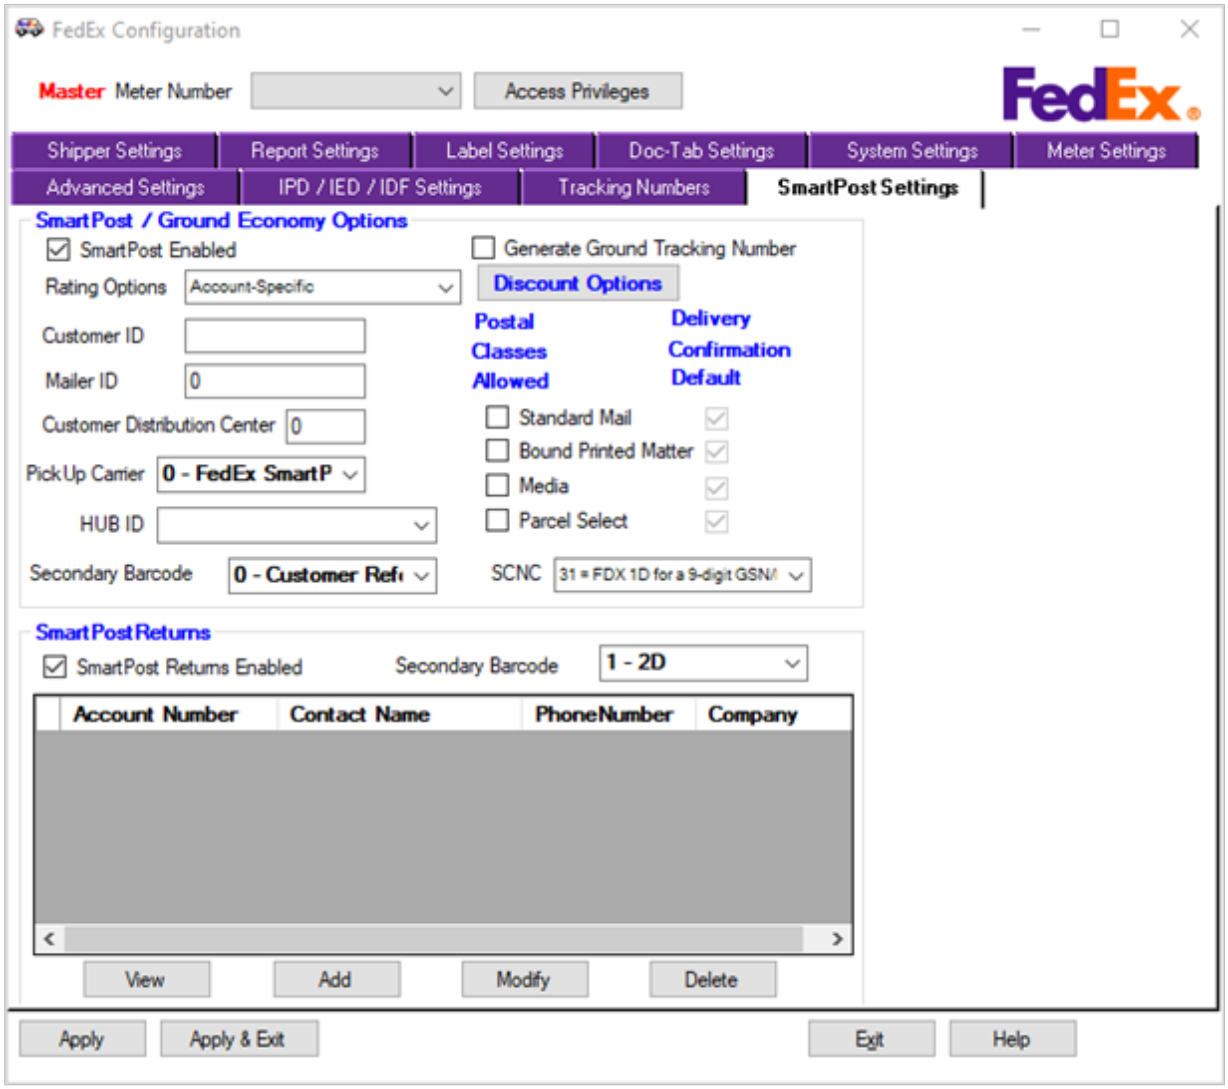
Refer the image below.

Figure 56: Criteria for SCNC field



The value selected for the SCNC (Standard Carrier Number Code) field value is displayed on reopening the SmartPost Settings tab. The field retains and displays the value selected by User. Refer the image below.

Figure 57: SCNC fields



The SCNC field displays a default read-only value for a 7-digit /9-digit GSN/EAN account meter. The respective values are as follows-

- 31 = for a 9-digit GSN/EAN account number
- 21 = for a 7-digit GSN/EAN account number

Refer the below image.

Figure 58: SCNC default value for a 9-digit GSN/EAN account number

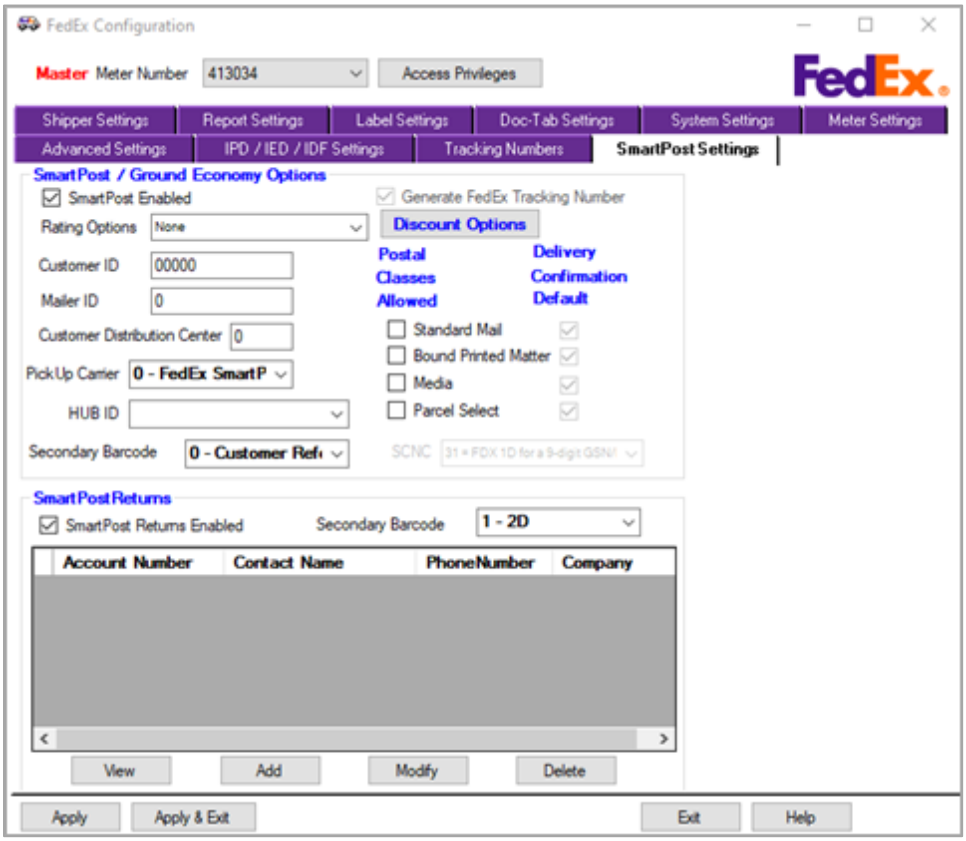


Figure 59: SCNC default value for a 7-digit GSN/EAN account number

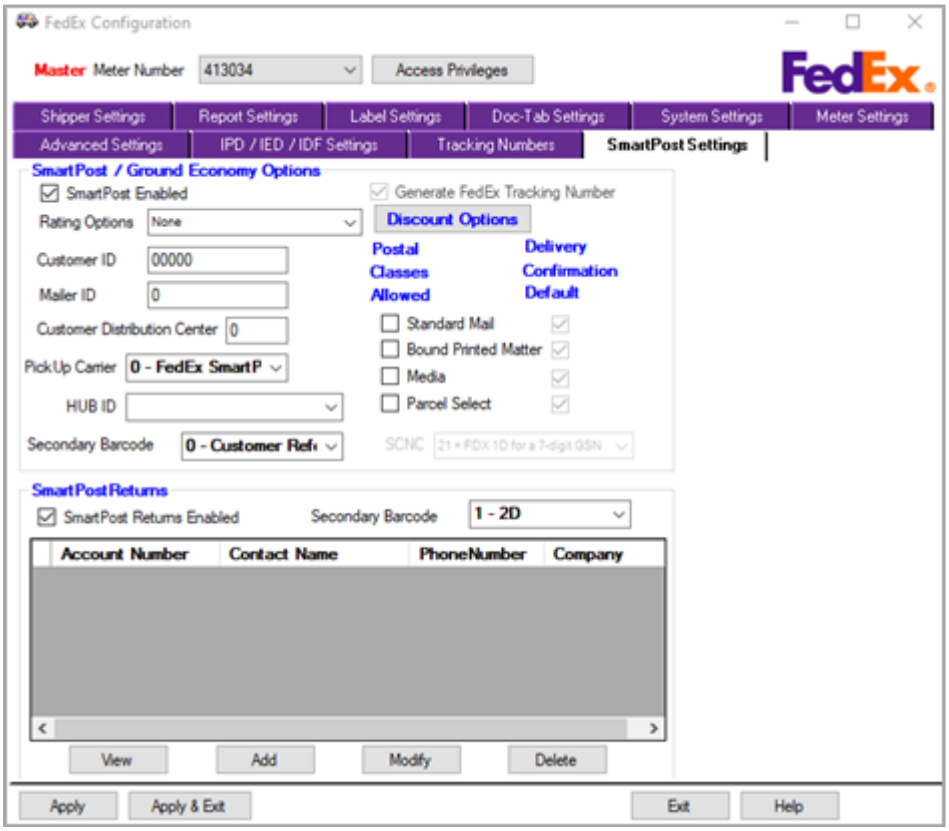


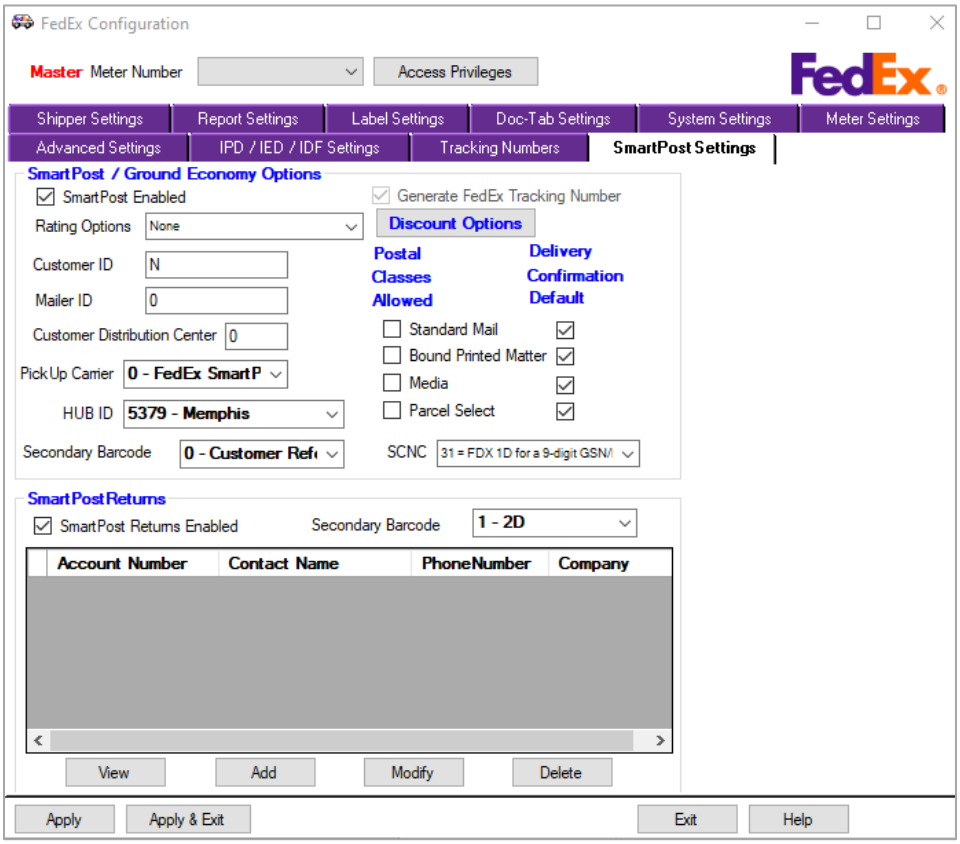
FedEx Ship Manager Server functionality

Once the privilege level password is entered, the current tab is retained in focus and the additional tabs are displayed based on the privilege level. In case the user does not have the access to certain tab, the focus redirects to Shipper Settings tab/Home screen.

Generate FedEx Tracking number

The option **Generate Ground Tracking Number** is renamed to **Generate FedEx Tracking number**.

Figure 60: SmartPost Settings tab - Generate FedEx Tracking Number



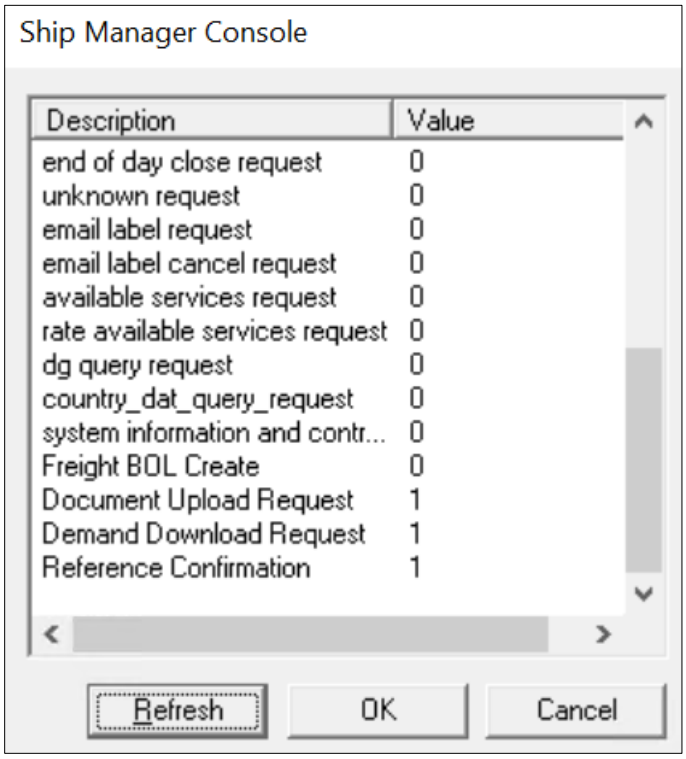
Ship Manager Console

The FedEx Ship Manager console is upgraded, and the following line items are added.

- Document Upload Request
- Demand Download Request
- Reference Confirmation

The values reset to null with the use of Reset button.

Figure 61: Ship Manager Console



The Obsolete fields are removed from the list of transactions available in Ship Manger Console. List of excluded fields are as follows:

Table 116: Ship Manager Console – Obsolete fields

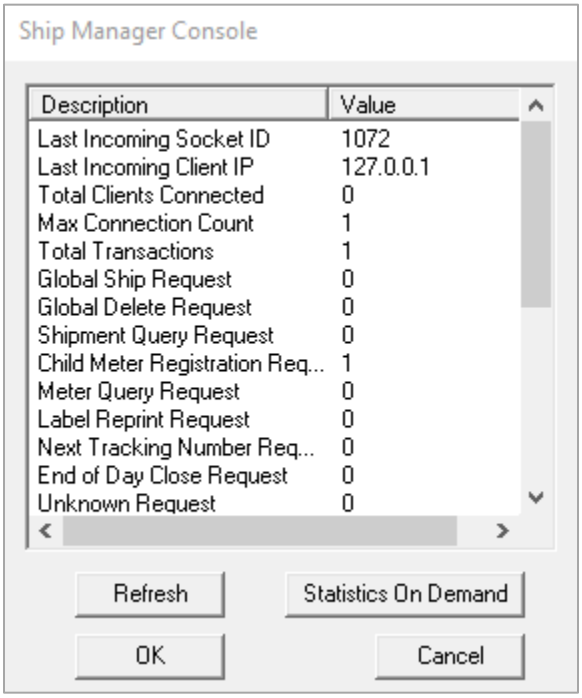
Description	Field ID
Dispatch request	200
API pass through tracking request	403
Dropoff locator request	410
Address verification request	044
Ground call tag request	045
Ground call tag cancel	415
Express call tag request	046
Express call tag cancel	047
Global tracking	404
SPOD (Shipment Proof of Delivery)	405
Shipment updates	420
Tracking request	042

Tracking request expanded	043

Statistics On Demand

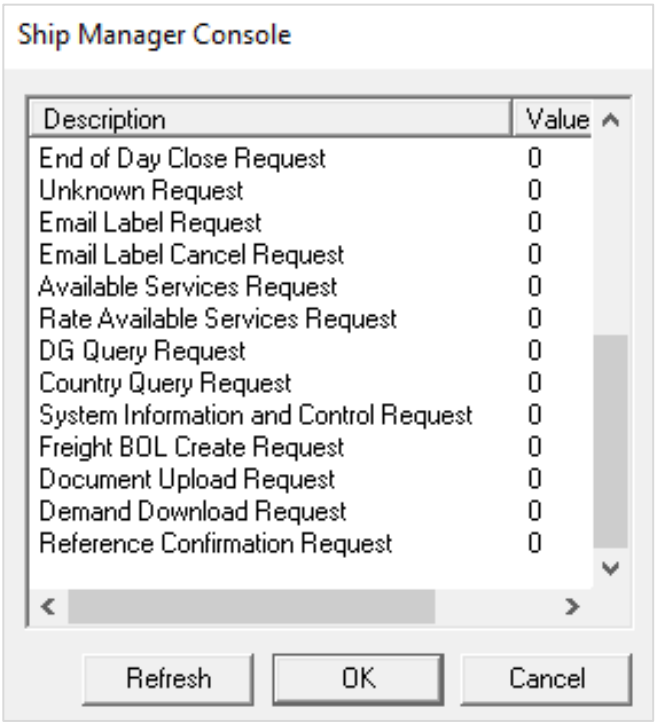
The FedEx Ship Manager® Server Ship Manager Console Utility is upgraded with new option known as **Statistics On Demand** to enable shipment log capture on demand with single click. The new button is represented as shown in below image.

Figure 62: Ship Manager Console



Ship Manager Console Utility is updated with new look and feel. The line-item descriptions are updated to display proper case. Refer the below image.

Figure 63: Ship Manager Console



Purge capability

The Ship Manager Console is upgraded with Purge capability and retention period days. Ship Manager Console automatically purges the log files when the retention period exceeds the preset maximum limit.
A checkbox control and options to set Retention Period is introduced in **Advance Settings** tab of FedEx Ship Manager® Server config screen. Refer the below image.

Figure 64: Advance Settings

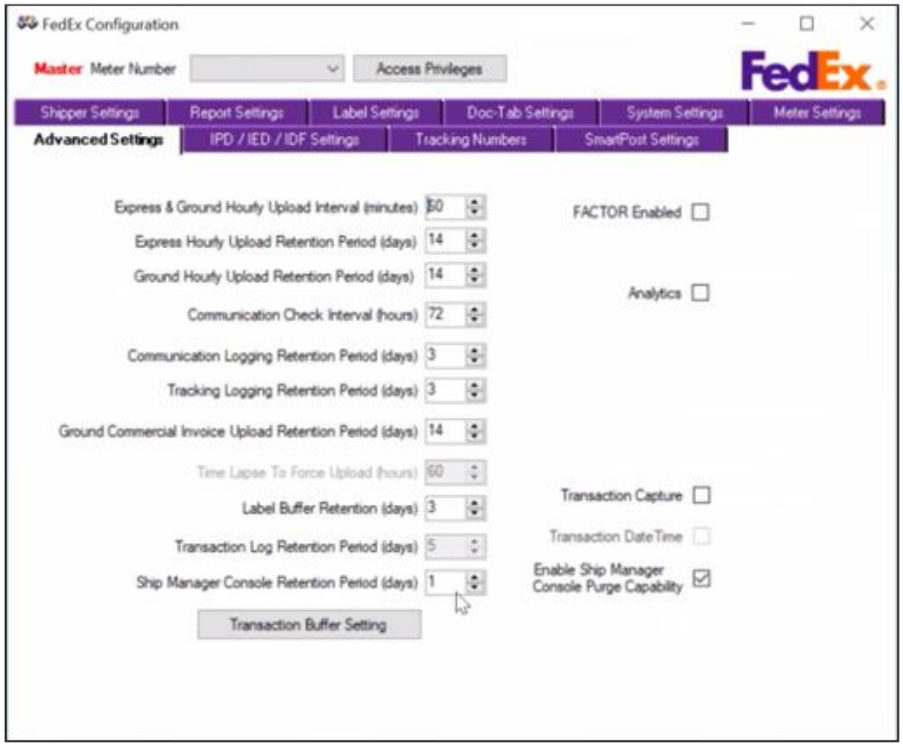


Table 117: Advance Settings - Purge time for Ship Manager Console

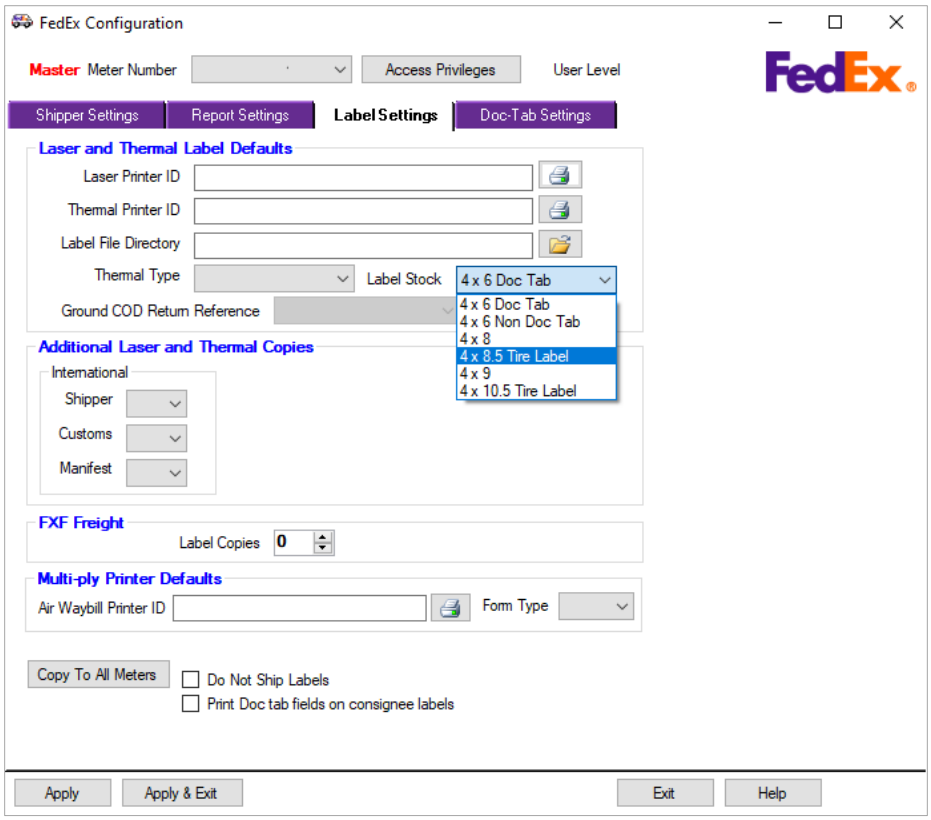
Option	Description	Usage
Enable Ship Manager Console Capability	Checkbox Enables/Disables Purge capabilities for Ship Manager Console logs	Use the option to enable purge capability and retention period days.
Ship Manager Console Retention Period (days)	Field with value range (1-30 days) Option to set required retention period days for shipment log purge time	Use the option to set desired purge time to reset Ship Manager Console logs. *Note: Default retention period is 7 days.*

Tire Loss and Prevention

Tire shipment labels are more convenient with additional label stock options. FedEx Ship Manager® Server provides additional options to customize Tire labels for shipment. Available Thermal label stocks are as follows:

- 4×8.5 Tire Label – Eltron/Zebra 4" x 8.5" label graphic
- 4×10.5 Tire Label - Eltron/Zebra 4" x 10.5" label graphic

Figure 65: Label Stock options



Tire Label shipment transaction

A successful Tire Label shipment returns required Tire Labels.
To perform a Tire Label shipment in Label generation tool, follow the below steps:

1. Process a 020 shipment with service Type = 01 (International Priority) with Tag#187, and values - 588/599/688/699.
2. Use 4" x 8.5/4 x 10.5" Fanfold stock in supported Zebra/Eltron Printer to print the labels.
3. When the Shipment process is successful, the required Label is generated. Verify the Label Service Portal for the same.

The following details are displayed for a successful generation of shipment label:

- When a successful Tire Label shipment is performed, a tracking number(tag #29) is displayed in 120 reply transaction.
- 120 Reply contains tag#188 with Label buffer details.
- Buffer Label is generated in FedEx Label buffer Folder and label is printed on Fanfold stocks.

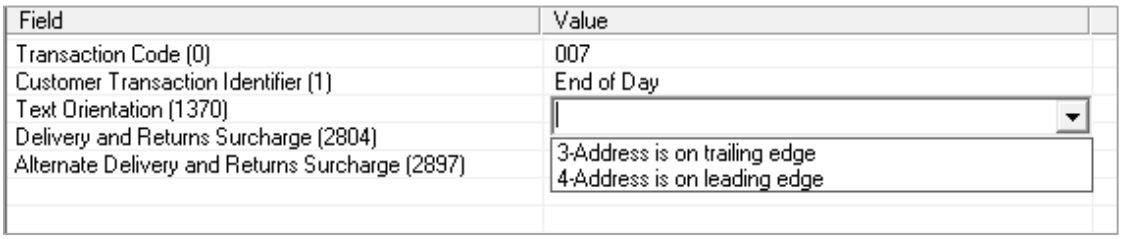
- The Label Service logs is generated with below details:
    - CLS Tag 2972= “9” for 4x8.5(Zebra/Eltron)
    - CLS Tag 2972= “10” for 4x10.5(Zebra/Eltron)

Text Orientation for labels

The tag name **1370-DocTab Orientation** is updated to **1370-Text Orientation** with following values. The New Text Orientation tag is applicable for Label Text Orientation and not just for Doc Tab Label Orientation.

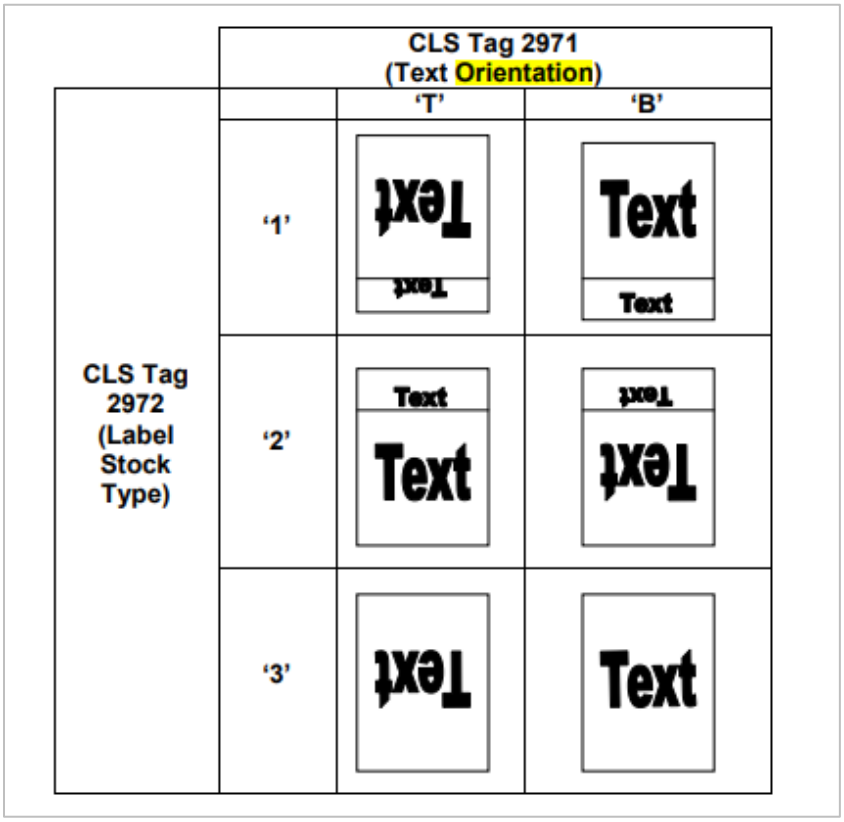
- 3-Address is on trailing edge
- 4-Address is on trailing edge

Figure 66: TransEdit field 1370 - Text Orientation



The tag1370 works along with the default tag 2971 – CLS Text Orientation, tag 2972 – CLS Label Stock Type, and 2973 – CLS Doc Tab Layout. The image below shows how the thermal label text is printed based on Label Stock types and Text Orientation.

Figure 67: Text Orientation and Label Stock type



Tag values are returned with respect to the Doc Tab Layout configuration:

Available values in tag 2973 – CLS Doc Tab Layout are-

- **0** - The Configurable Doc Tab Labels screen is displayed.
- **N** – The standard Doc Tab containing standard Tracking number and Service is displayed.
- **None** – The Doc Tab Label configuration is not displayed.

Note:

- *The Text Orientation tag is applicable for Label Services including Doc Tab Labels.*
- *The following combinations are not recommended due to hardware limitations*
    - *Orientation B – Stock Type 1*
    - *Orientation T – Stock Type 2*
    - *Orientation B – Stock Type 3*

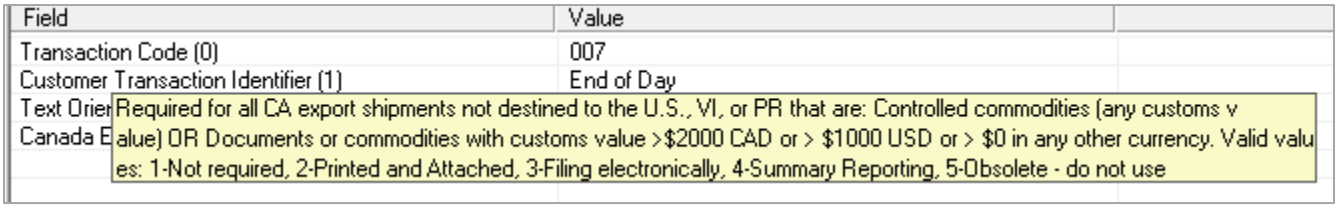
Canada Export Declaration Filing

The field name for **tag 1651** is updated to **Canada Export Declaration Filing**. The field is updated and displays a pop-up description content in TransEdit Utility.

The naming convention is mandated by Canada Customs. Refer the below image.
Updated field name: **1651 – Canada Export Declaration Filing Options**.

For latest Export Statement Data/Canada Customs details, refer the updated link: https://www.cbsa-asfc.gc.ca/export/ndr-adr-eng.html

Figure 68: TransEdit field - 1651



Express Domestic Shipments

Express Domestic shipments are now available for Belgium, Netherlands, and Luxembourg.

User Experience enhancements

Demand Download

Upgrade Tab in FedEx Demand Download screen is authenticated using FedEx Ship Manager Server Configuration screen.

Note: The Password field appears red to indicate mismatched entry.

The Component Data Download tab is now displayed by default in Demand Download Utility and does not require manual configuration. Refer the image below.

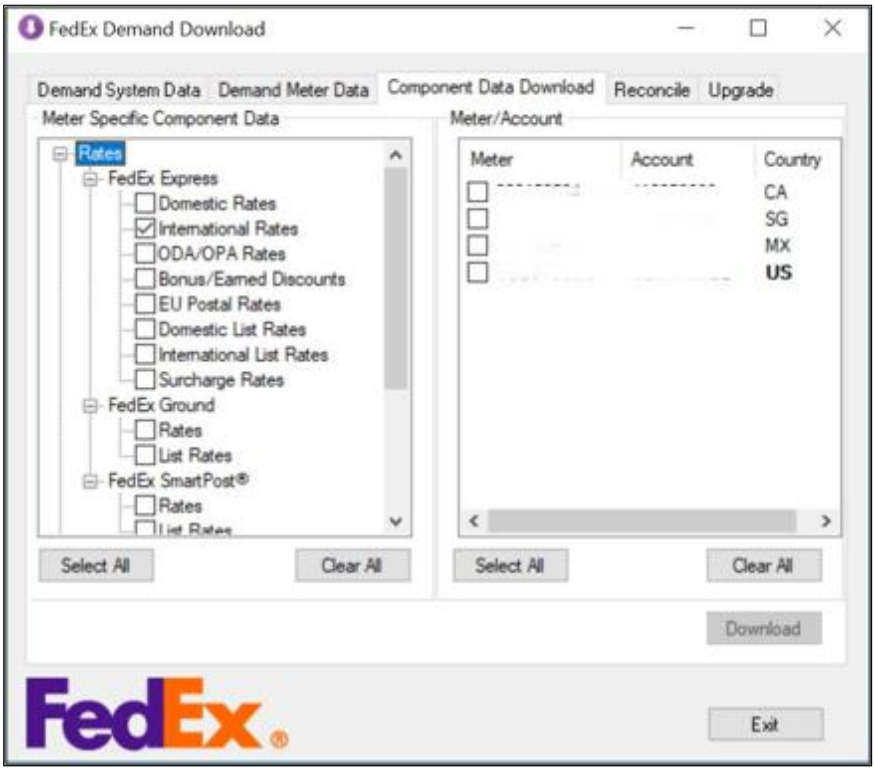


Figure 69: Component Data Download tab

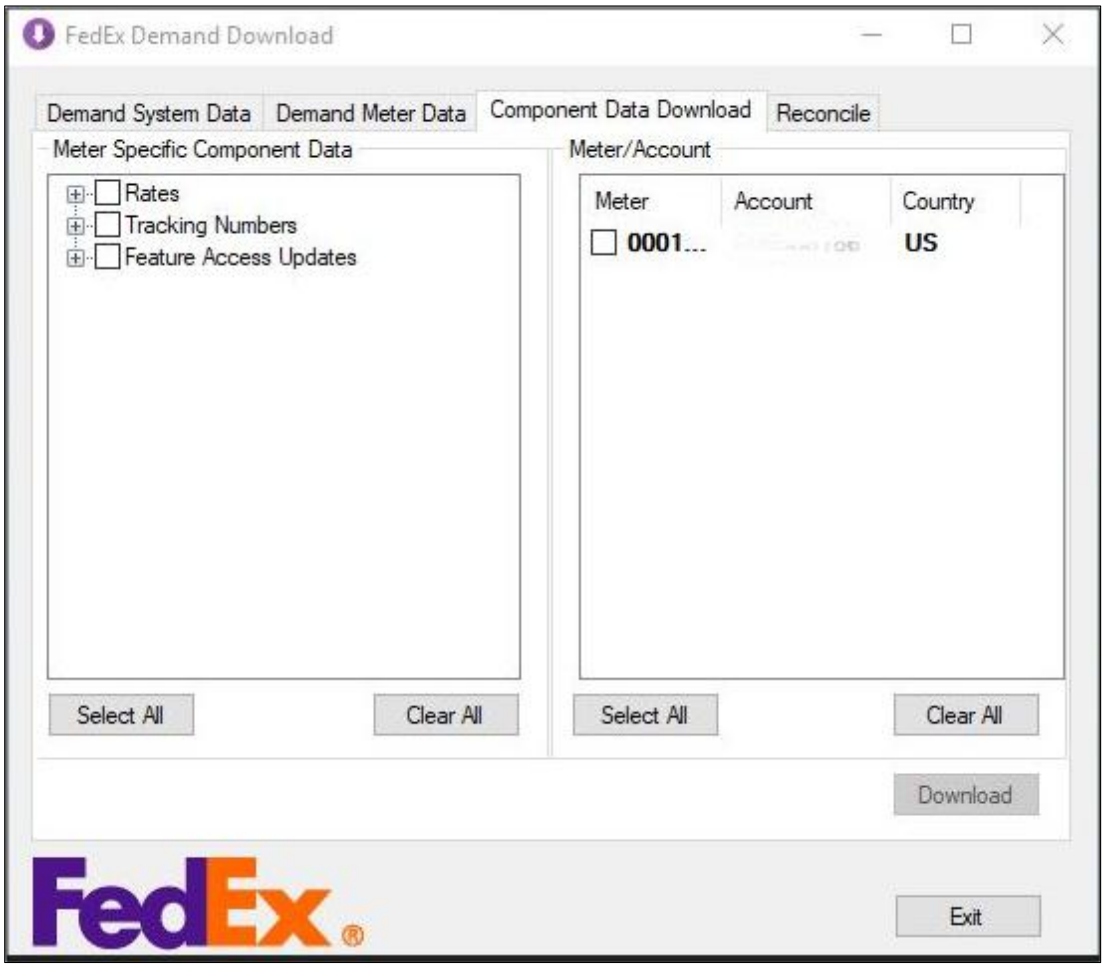
Component Data Download

A new tab called **Component Data Download** is added in Demand Download Utility. The tab for component data download allows to download single (or multiple) specific component(s) for a single (or multiple) meter(s).

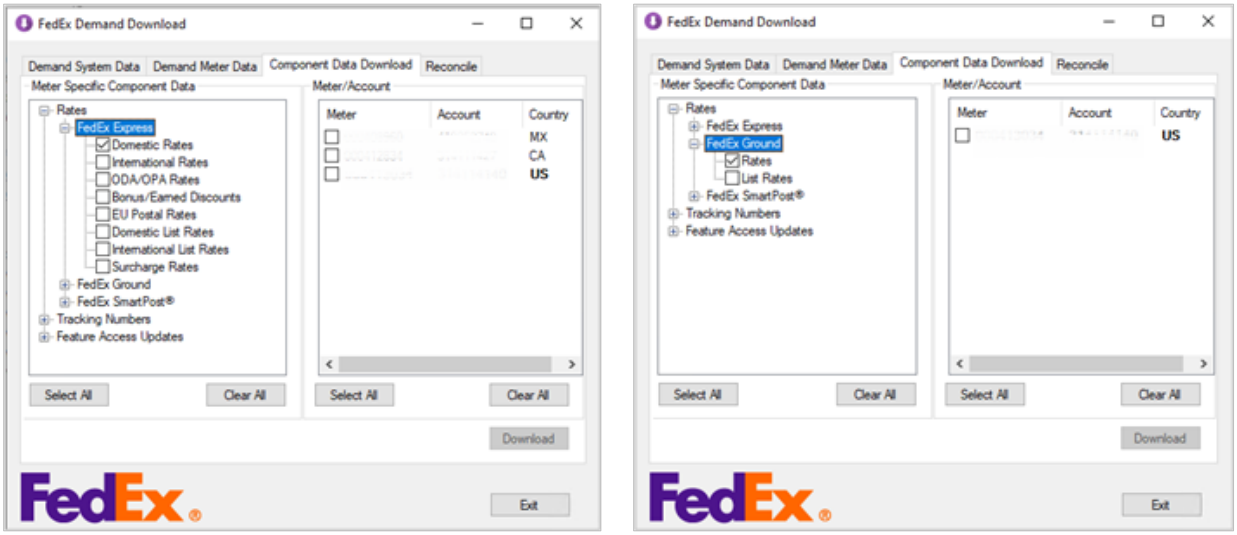
Once a component is selected (from the left-hand side), the meter(s) which is (are) capable of performing that component (or multiple) capability will be displayed and are candidates to be downloaded.

Figure 70: FedEx Demand Download



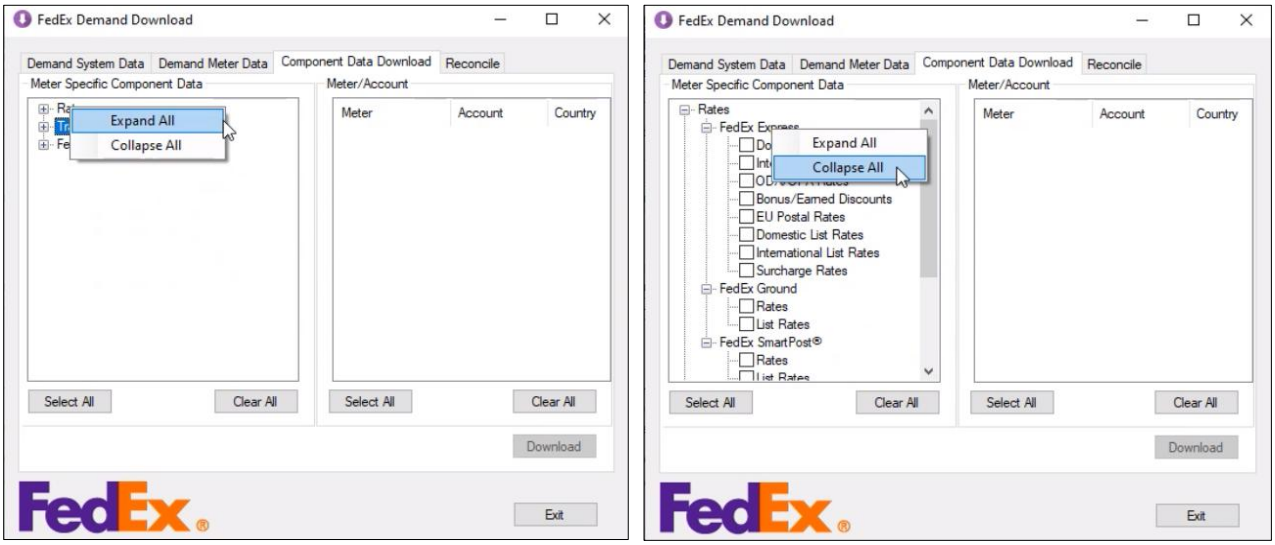
The Express and Ground Rate components are visible in Demand Download -component Data Download tab. A checkbox is displayed for the applicable meters (US, CA, and MX) under **Meter Specific Component Data** section. Refer below images

Figure 71: Component Data Download – Express Rates



The Component Data Download tab is enabled with Expand and Collapse option. All available options can now be Expanded/Collapsed with a single right-click option, **Expand All** and **Collapse All**. Refer the image below.

Figure 72: Expand/collapse option



The Component Data Download tab is enabled with an option to Select/Deselect all meters at once.
Right-click **Meter/Account** pane to **Select all** or **De-select all** meters. Refer the image below.
This reduces effort in manual selection of multiple meters.

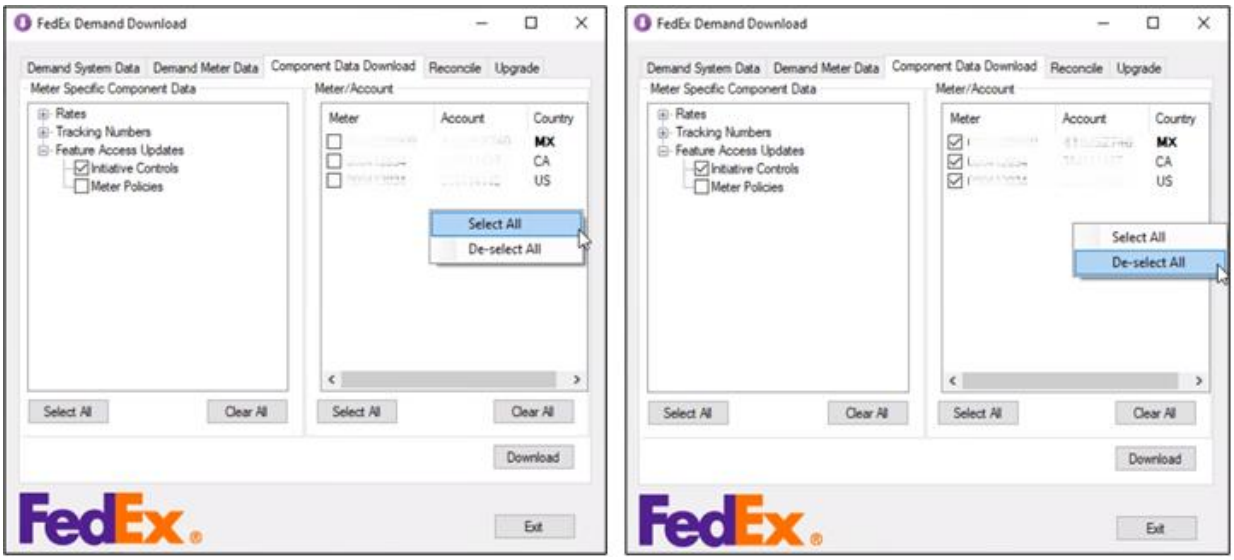


Figure 73: Component Data Download fields

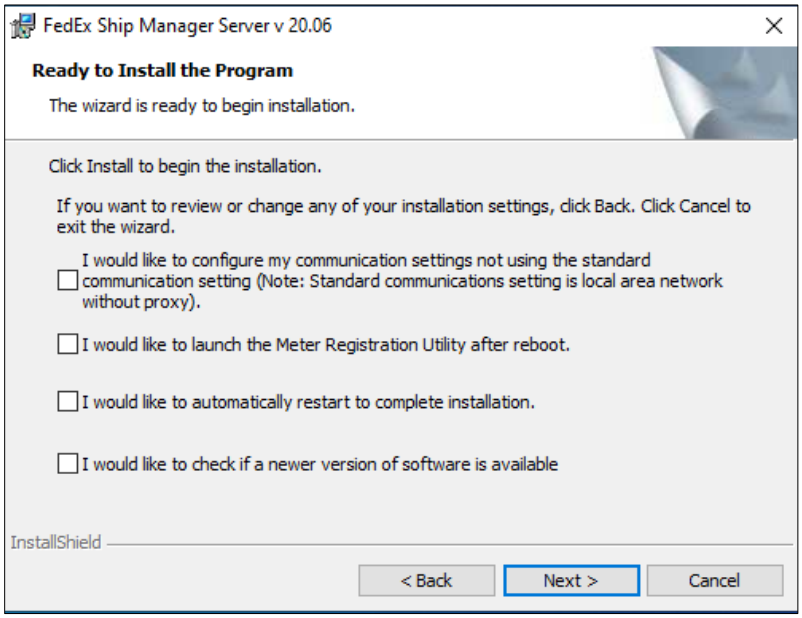
Upgrade Utility tab

Installation

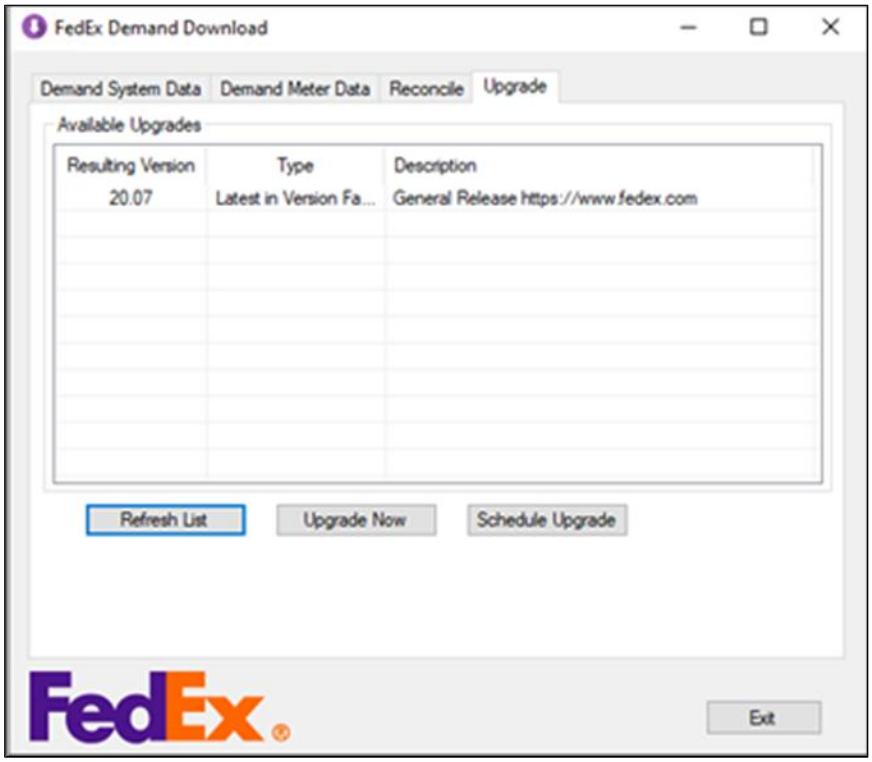
During the installation of FedEx Ship Manager® Server, a window with the option to use Upgrade tab is displayed as shown in image below.

Figure 74: FedEx Ship Manager Server Installation



If the user selects the option **I would like to check if a newer version of software is available**, Demand Download Utility with Upgrade tab is displayed with available upgrade option. Refer the image below.

Figure 75: Demand Download Utility after Installation

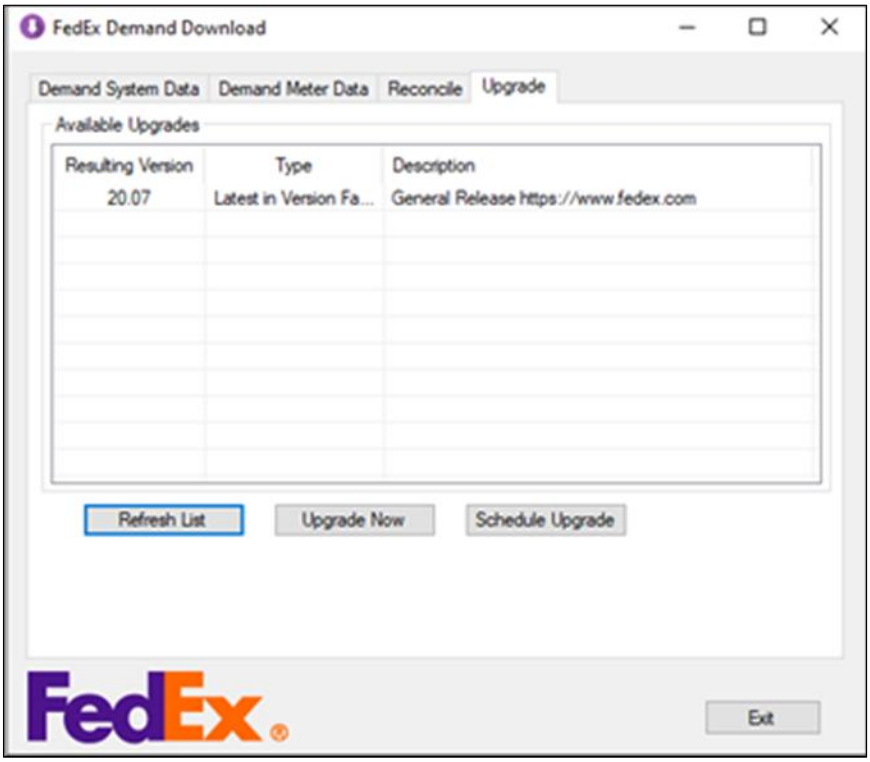


Functionality

The **Upgrade Tab** provides options to Check for latest upgrades, Upgrade instantly or to schedule a required upgrade. There are three options associated with the functionality,

1. The **Refresh List** button - This allows the user to recheck the policy grid for latest changes.
2. The **Upgrade Now** button – This provides upgrade functionality from the list of available upgrades. Selecting this option will display a popup, with the message **Authorization to Perform an Upgrade**. If no upgrade has been selected, then an error popup message box will be enabled.
3. The **Schedule Upgrade** button – This enables a scheduled upgrade. Selecting this option will display a popup, with the message Authorization **to Schedule an Upgrade**. If no upgrade has been selected, then an error popup message box will be enabled.

Figure 76: Upgrade Utility Tab



Authorize Upgrade option

The option to Upgrade or Schedule Upgrade requires authorization to proceed with to ensure secured upgrades. The **Authorization to Perform an Upgrade** screen displays below details.
Perform an Upgrade – provides details on chosen upgrade **From** (lower version) and **to** (applicable higher version) versions.
Upgrade Description – provides details on features included in the upgrade.

Figure 77: Authorization to Perform an Upgrade

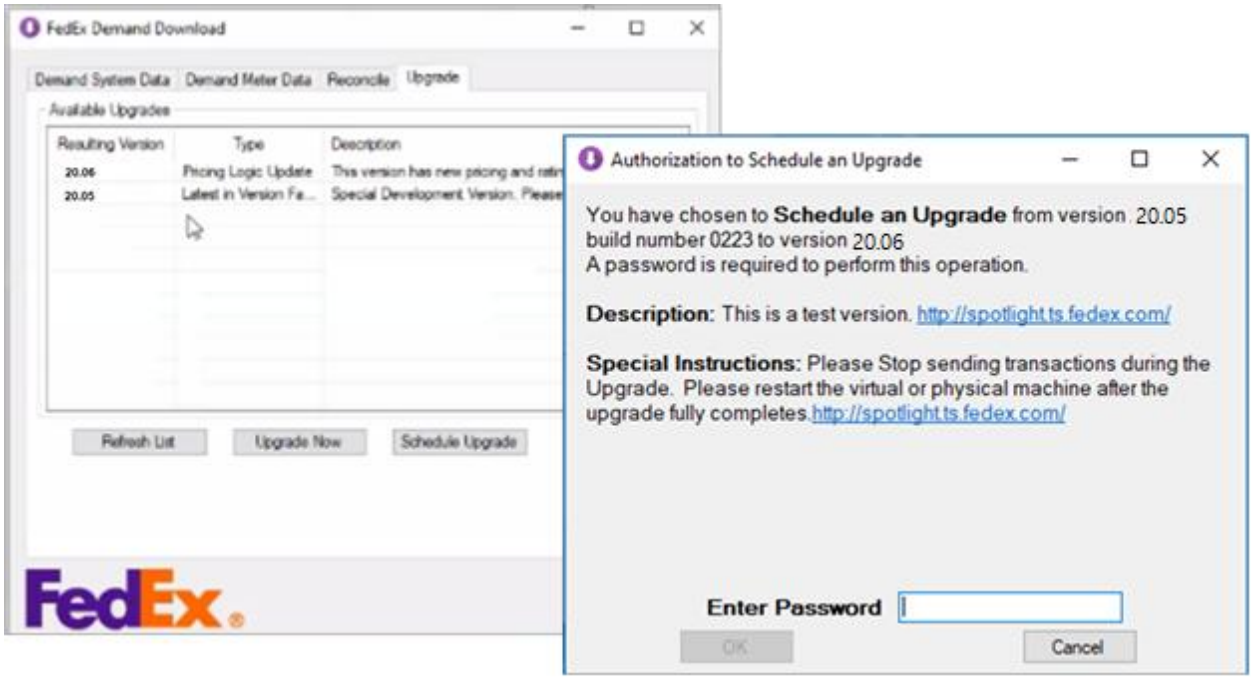
Special Instructions - provides instructions on upgrade dos and don'ts.
To Authorize Upgrade,

1. Select **Upgrade Now** or **Schedule Upgrade** option
2. **Authorization to Perform an Upgrade** screen is displayed.
3. Enter Password in the **enter Password** field.
4. Select **OK** to initiate upgrade or select **Cancel** to return to previous step.

Note: The OK button is displayed only when a password is entered.

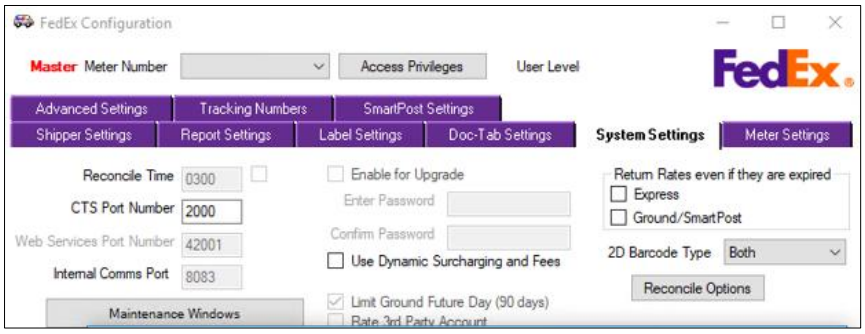
The Upgrade Tab displays provides URLs that contains complete upgrade details. The URL is available in **Authorization to Schedule an Upgrade** screen when **Upgrade Now** or **Schedule Upgrade** option is selected.

Figure 78: Upgrade



The option **Enable for Upgrade** in FedEx Ship Manager Server Config screen allows Upgrade Utility is accessibility with password authentication and in turn prevents any accidental upgrades.

Note: This option is not applicable for field level or higher users, Refer to image below.



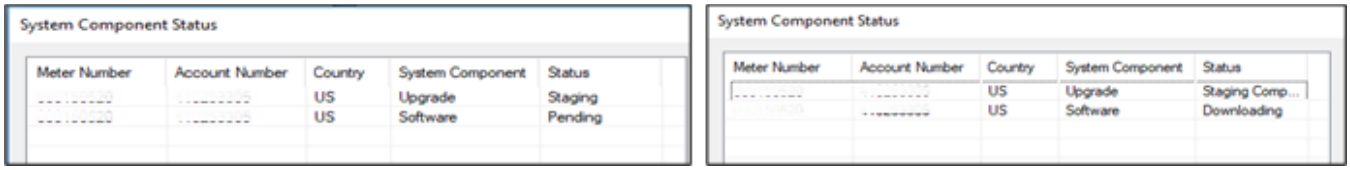
Upgrade Now option

The Upgrade Now option initiates upgrade on authorization. To Upgrade,

1. Click **Upgrade Now** option in **Upgrade Tab**.
2. **Authorize Upgrade** screen is displayed.
3. Enter password to authorize, and then click **OK** to initiate upgrade.

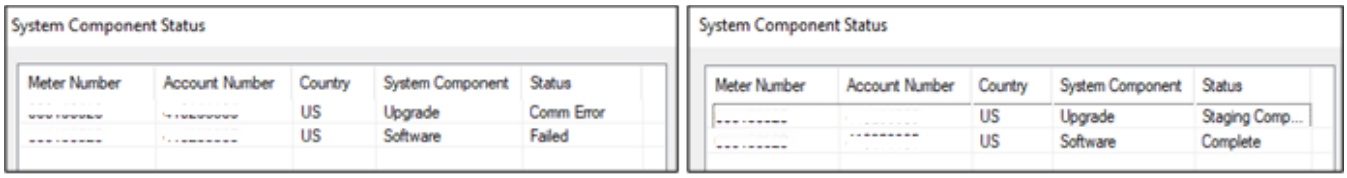
A screen with component upgrade status is displayed. The system component status displays two entries. First entry is Staging, followed by Staging Complete or Staging Failed or Comm Error.

Figure 79: Upgrade Now – Staging, Staging Complete and Pending Status



a. Second entry displays status **Pending** followed by **Complete** or **Failed** or **Comm Error.**

Figure 80: Upgrade Now – Failed, Complete and Comm Error



Successful staging will download and perform the upgrade similarly using **Demand System Data** tab by selecting **Software** checkbox.

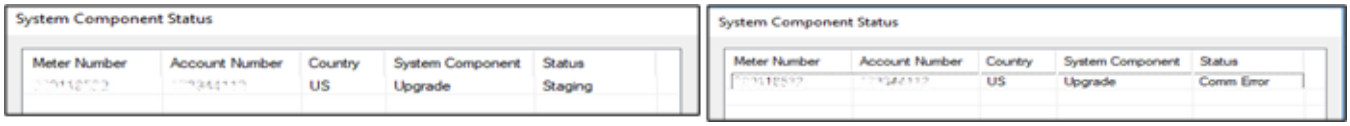
Schedule Upgrade option

The Schedule Upgrade option initiates upgrade on authorization. To Upgrade,

1. Click **Scheduled Upgrade** option in **Upgrade Tab**.
2. **Authorize Upgrade** screen is displayed.
3. Enter password to authorize, and then click **OK** to initiate upgrade.

A screen with component upgrade status is displayed. The system component status displays a single-entry **Staging** followed by **Staging Complete** or **Comm Error**. Successful staging will download and perform the upgrade during scheduled maintenance window(s).

Figure 81: Schedule Upgrade Status – Staging and Comm Error

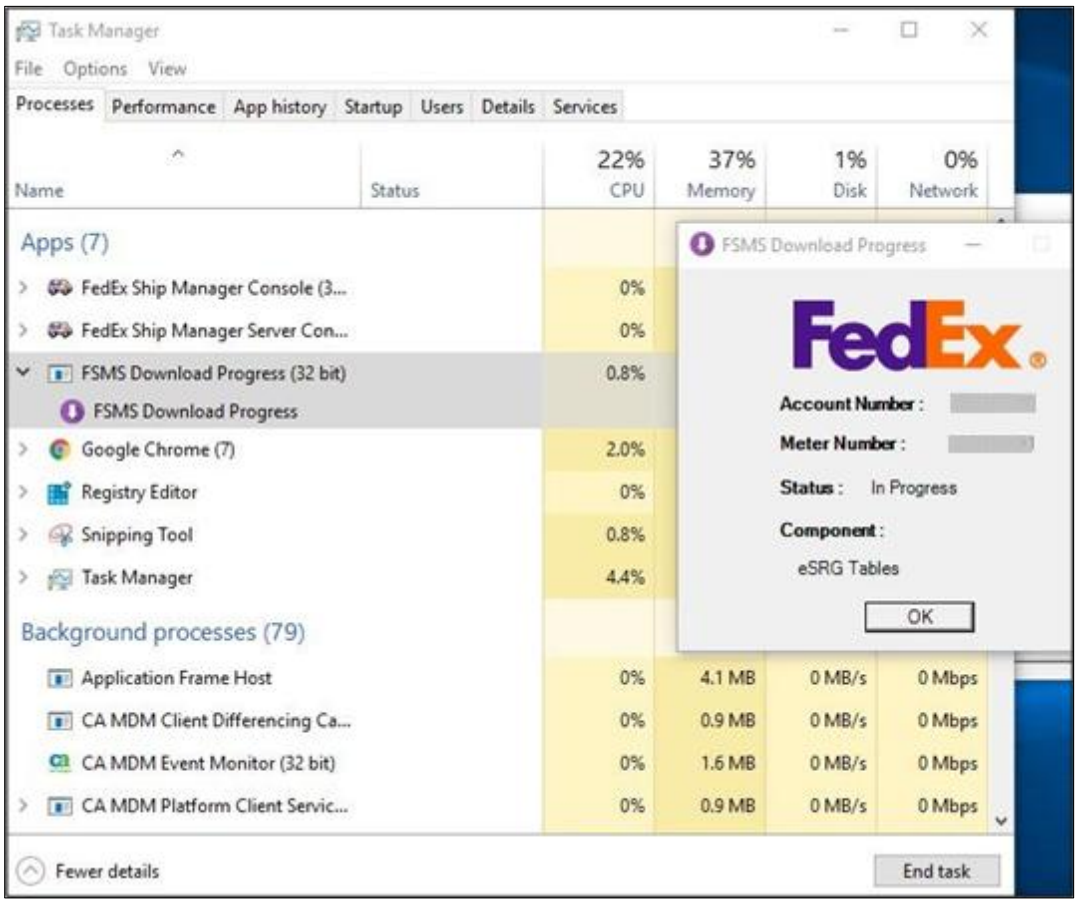


*Note: Once the staging tis complete, the upgrade can also be performed using **Demand System Data** tab by selecting **Software** checkbox.*

Download Progress Indicator

The Download Progress for FedEx Ship Manager Server Utility is displayed in Windows Task Manager. Refer to image below.

Figure 82: FSMS Download Progress Indicator



The display name of FedEx Ship Manager Server utilities in Windows Task Manager are modified to respective Service names. The Services are displayed in Task Manager as application currently in use as shown in below image. Similar functionality is available for other FedEx Ship Manager Server utilities. Few are shown in images below.

Figure 83: FSMS ACU Meter Registration Task Manager View

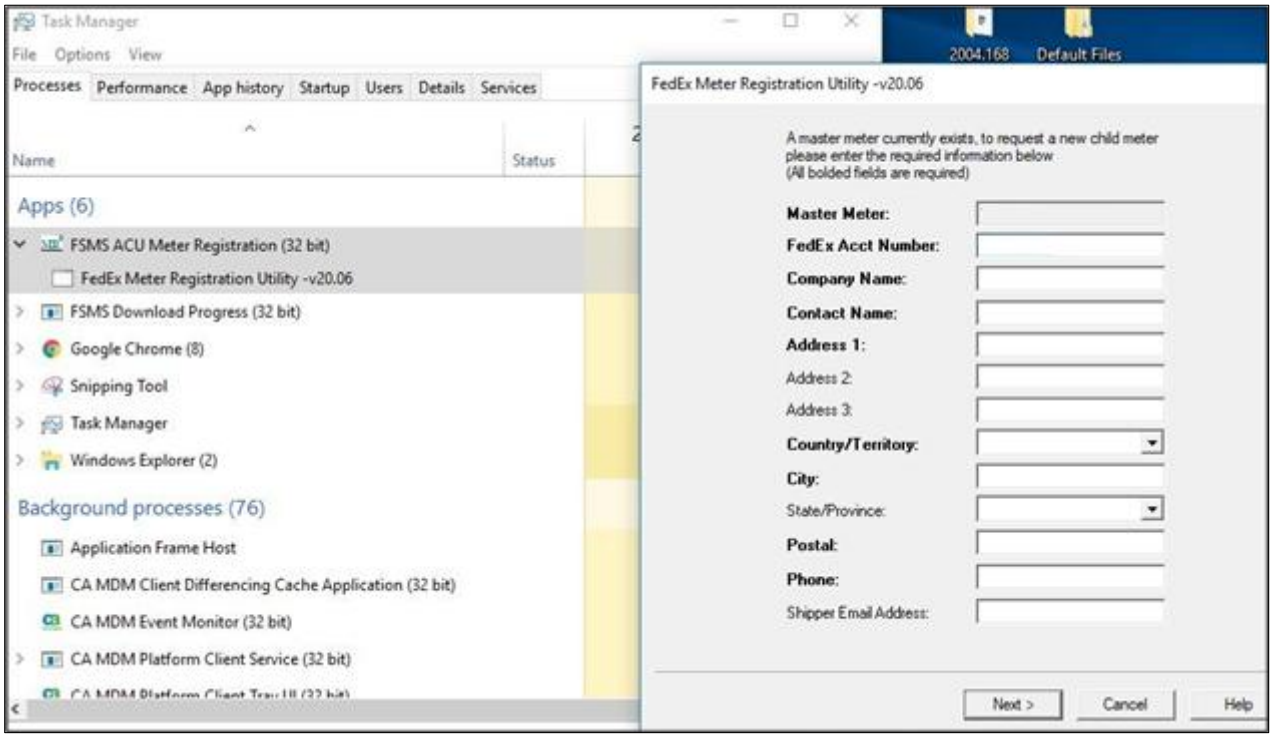


Figure 84: FSMS Comm Log Viewer

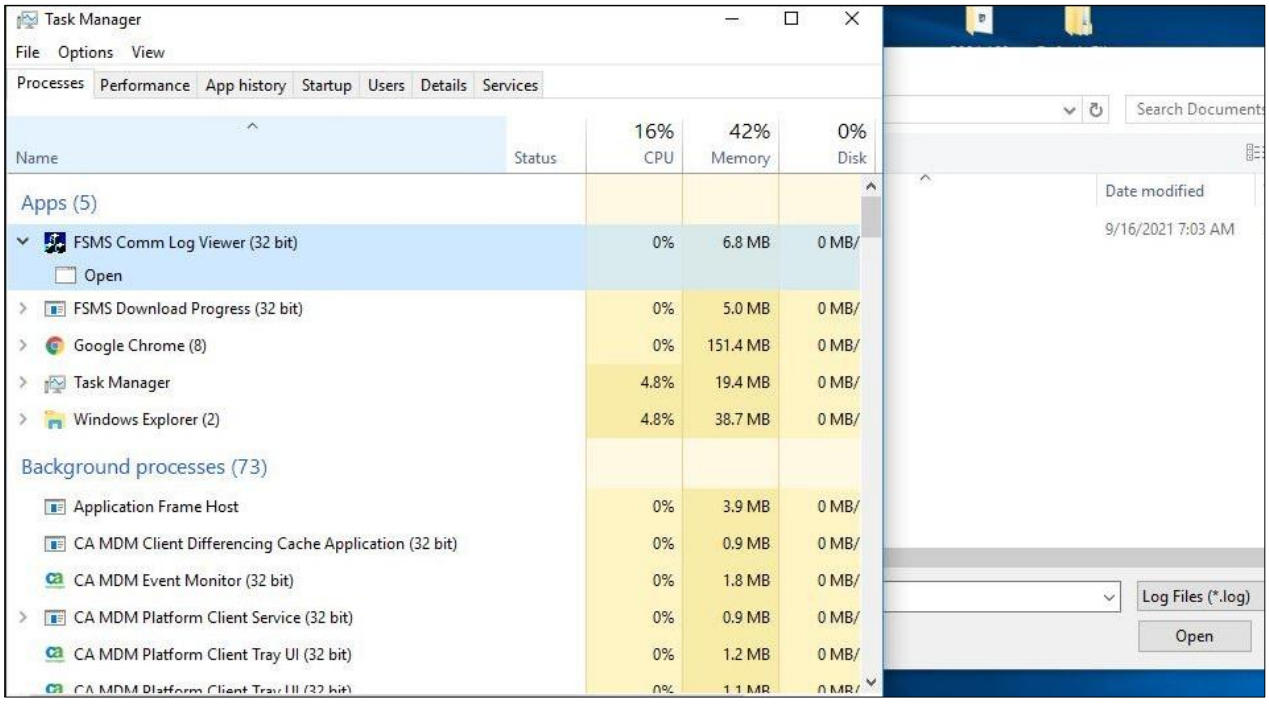

Figure 85: FedEx Ship Manager Config

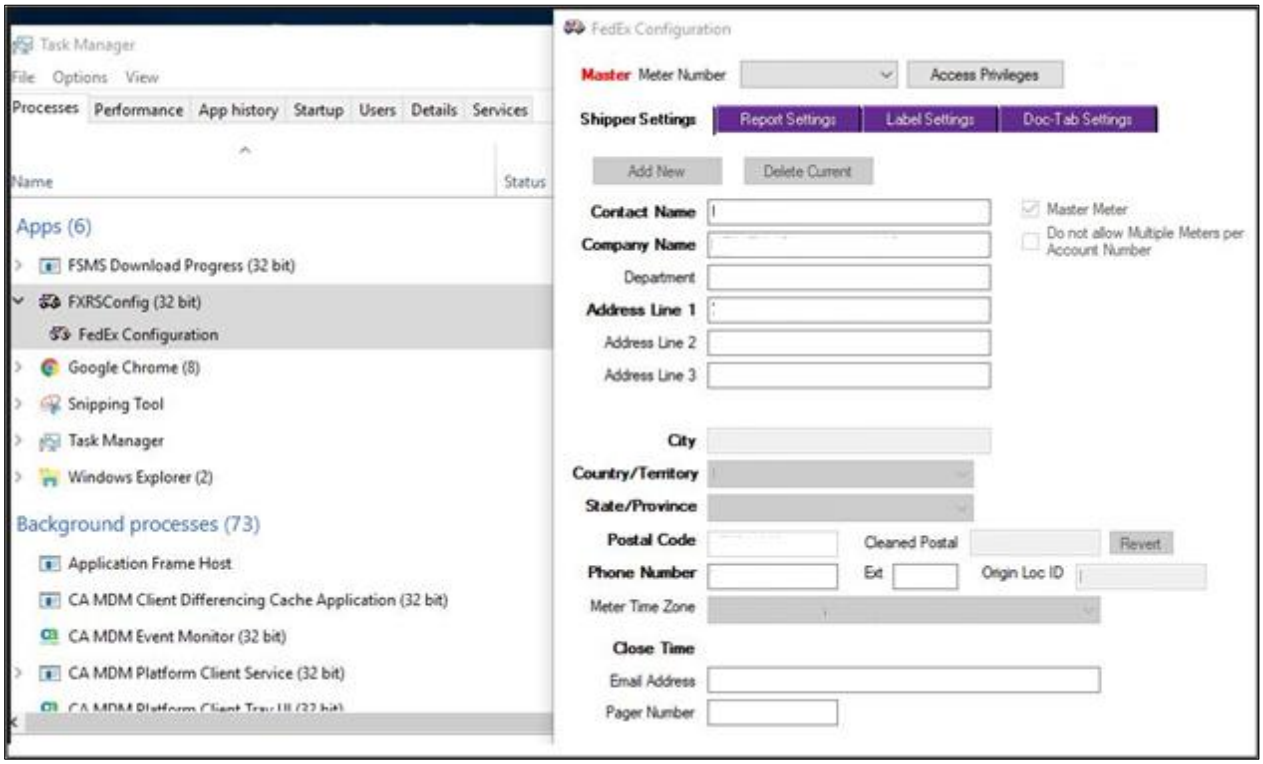
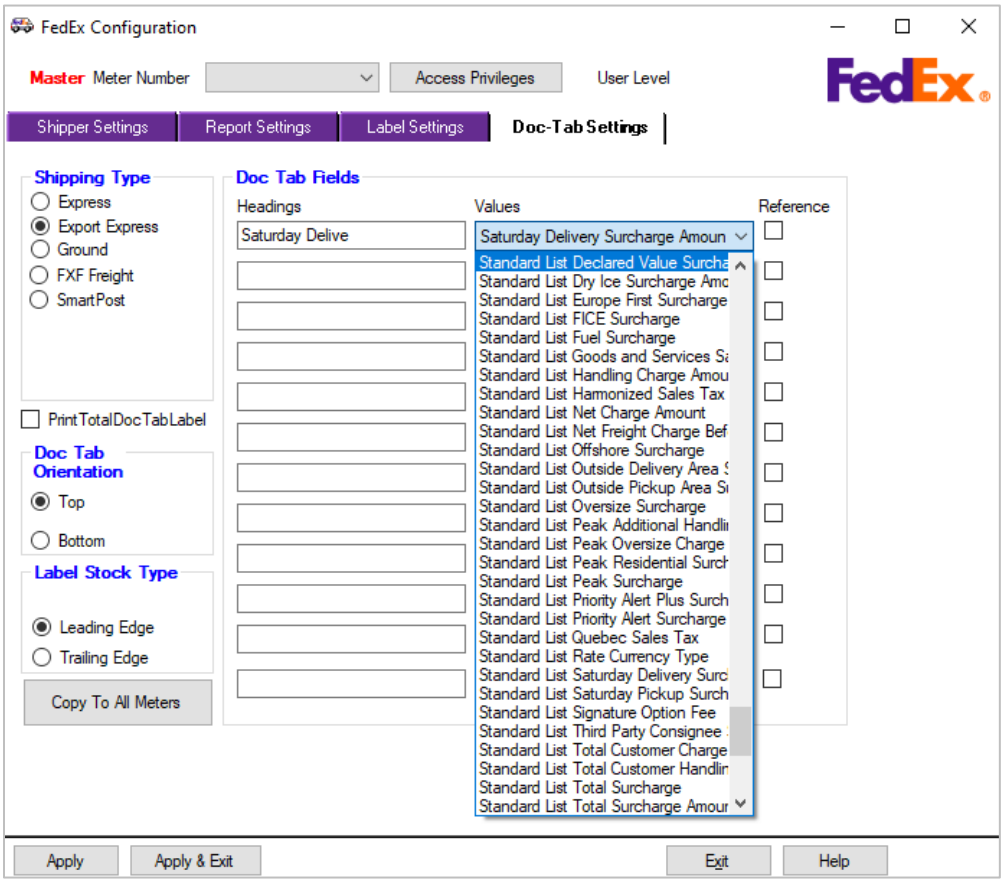


Doc -Tab Settings

The drop-down value names in Doc Tab Settings screen are updated with revised field names. The values earlier indicated the name ‘List’, and now the value names are updated to ‘Standard List’. Refer to the image below.

Figure 86: Doc-Tab Field Values



Meter Settings tab

The **Add SmartPost® Returns** window in **SmartPost® tab** and **ICTL Settings** in **Meter Settings tab** is now upgraded with better placement of details. Refer to below image.

Figure 87: Add SmartPost® Returns

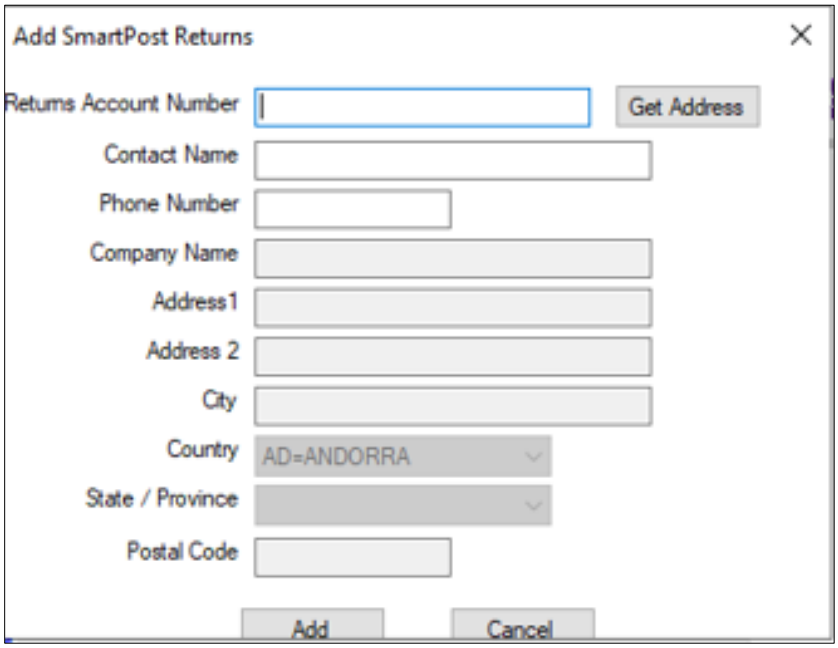


Figure 88: ICTL Settings

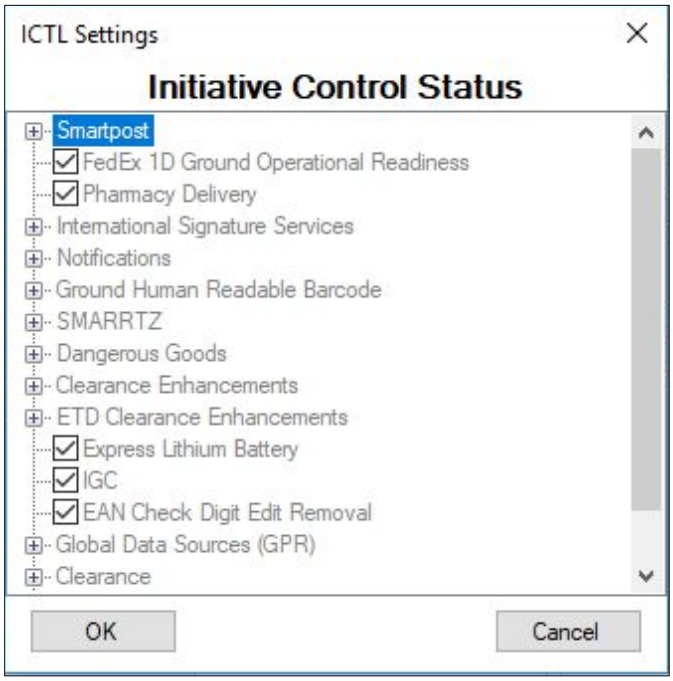
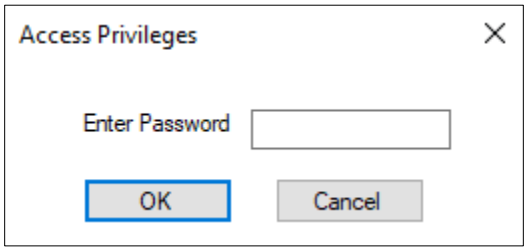


The display of OK button in **Access Privileges** window in FedEx Ship Manager Server Configuration is updated.

Figure 89: Access Privileges Window



The Trans Editor Utility **About** screen is updated with latest copyrights and brand name.

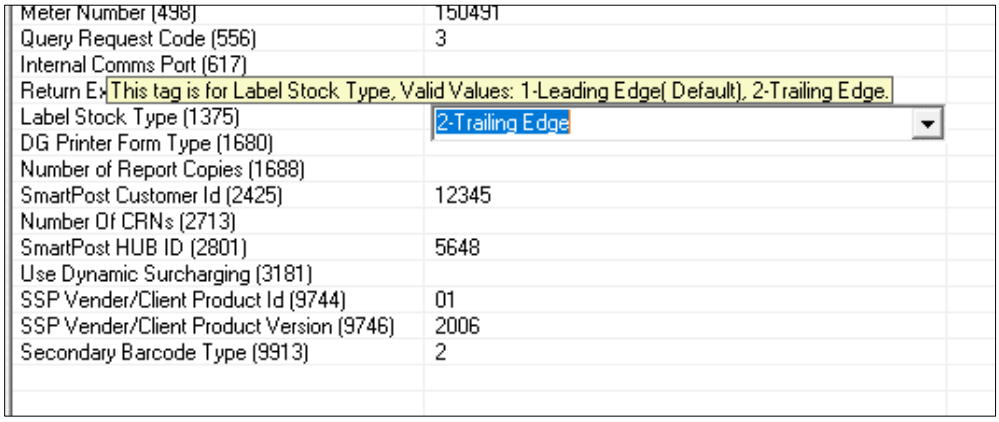
Figure 90: FedEx Transaction Editor Utility

The below tags are available for manual update using Trans Edit Utility and the selected value reflects in FedEx Ship Manager Config screen. Here is the list of tags added in TransEdit.

- 1375 -Label Stock Orientation
- 1680 -DG Printer Form Type
- 1688 -Number of Report Copies
- 2713 -Number of CRN's
- 617 -Internal Comm Port
- 3181-Use Dynamic Surcharging and Fees
- 629 -Return Rates Even If They Are Expired

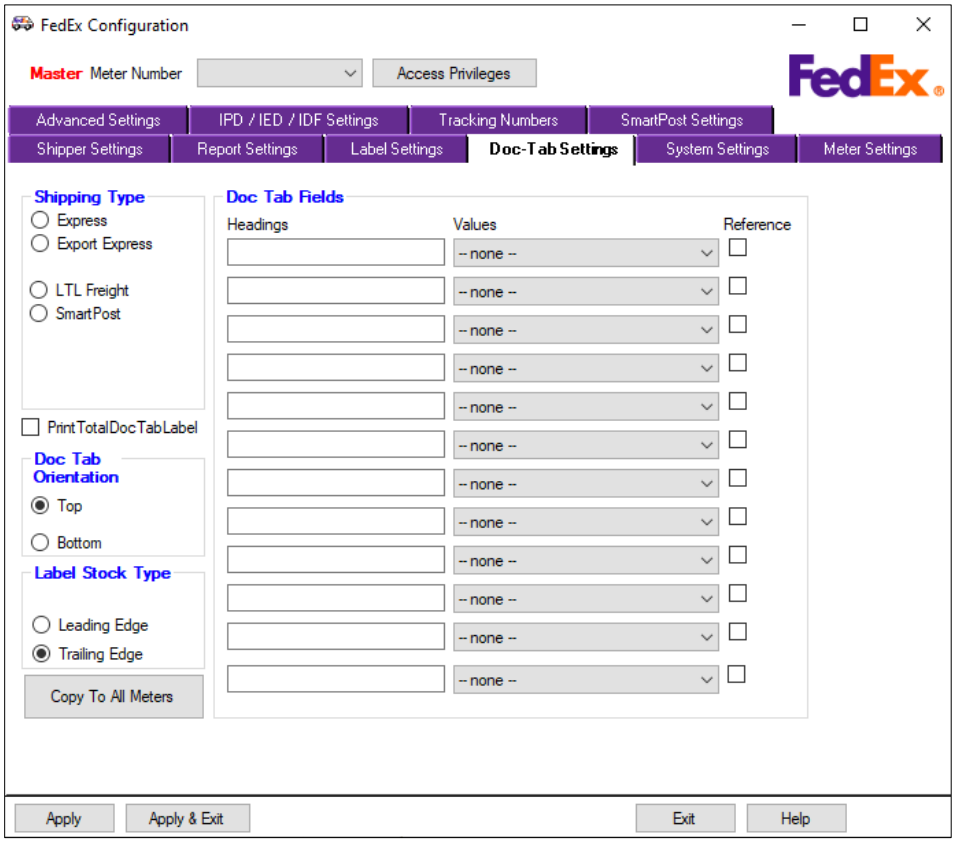
Sample for manual update of tag 1375 – Label Stock Orientation. The value 2-Trailing Edge is selected as Label Stock Type, and the transaction is performed. Refer to the image below.

Figure 91: Trans Editor manual tag updates



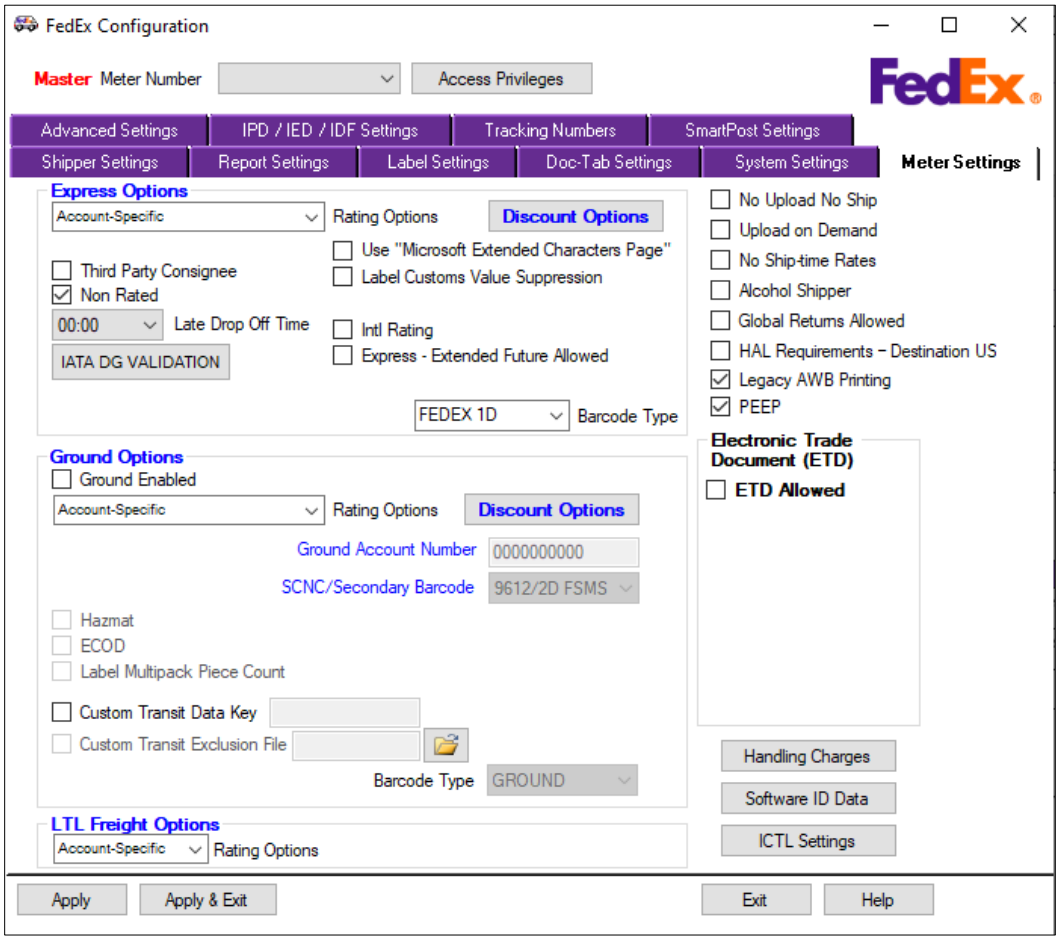
The value reflects in FedEx Ship Manager Config screen – **Doc-Tab Settings** tab for the Label Stock Type options.

Figure 92: FedEx Ship Manager, Doc-Tab Settings



The field, previously named **ExpExtFutureAllowed** is updated to **Express - Extended Future Allowed** in FedEx Ship Manager Server config screen, Meter Settings tab.

Figure 93: Meter Settings Tab Field Name Update



Brand name corrections

The Information message for Electronic Trade Documents in Meter Settings tab now displays correct brand name. Refer to image below.

Figure 94: Electronic Trade Documents information

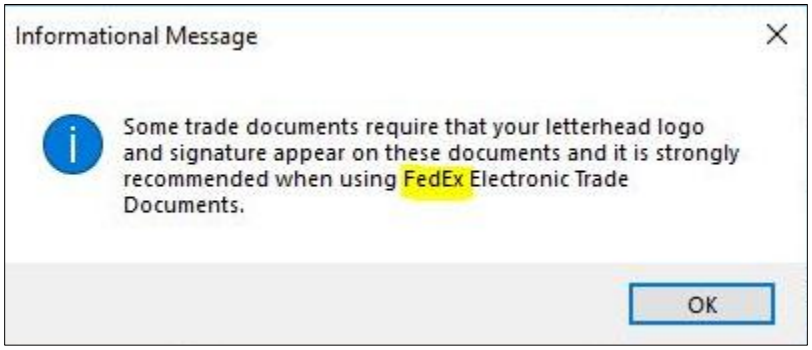


Figure 95: Electronic Trade Documents Terms and Conditions

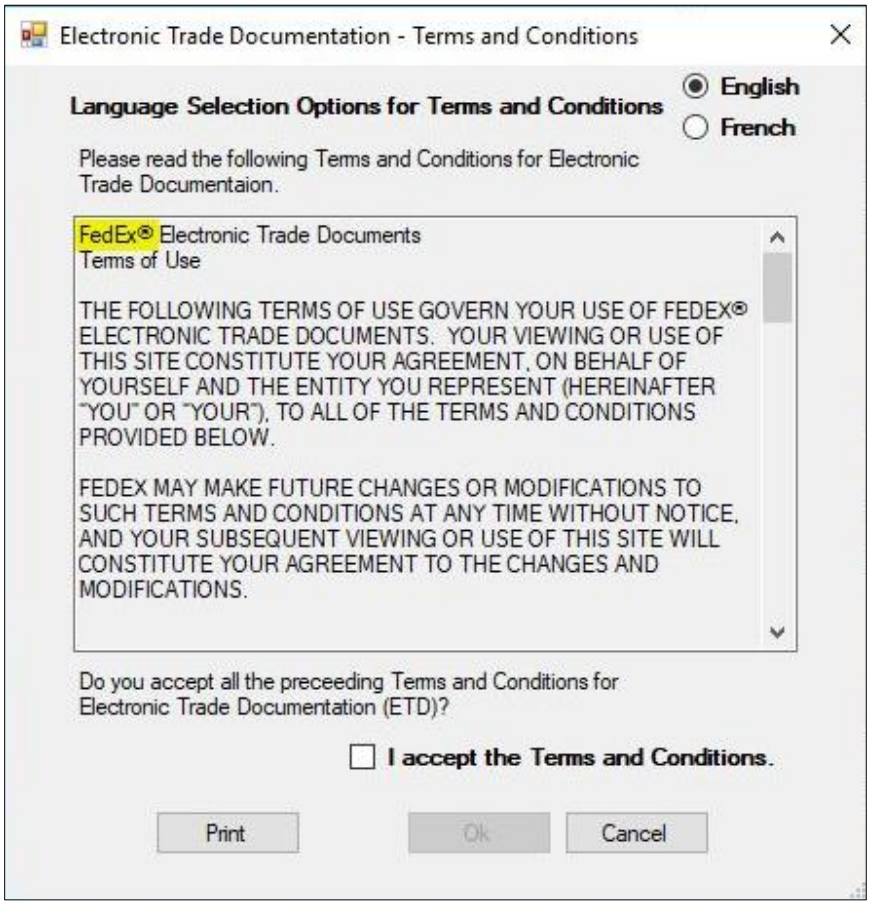
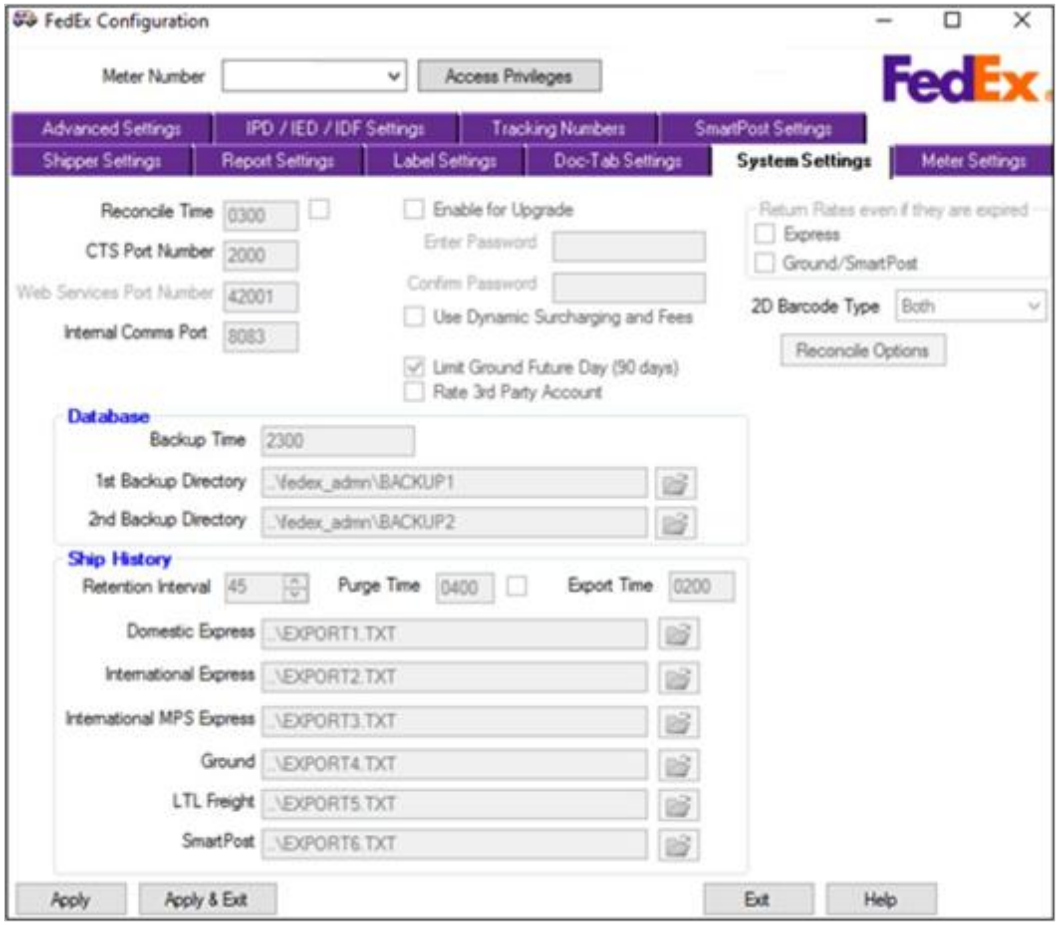


Child Meter configuration

When a Child meter is selected in FedEx Ship Manager Server Config screen, the Settings tab fields are disabled. Refer the image below. The tab fields are activated when the child meter is set as Master meter.

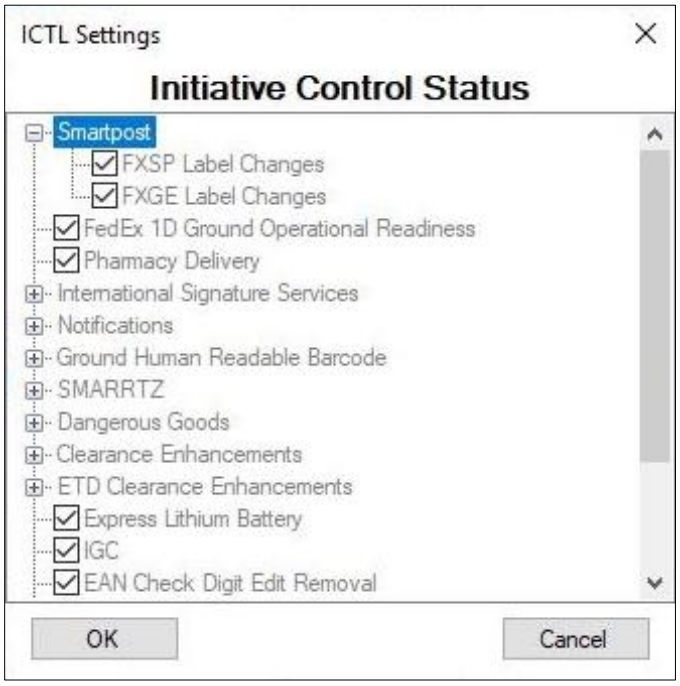
Figure 96: System Settings tab for Child Meter



ICTL Settings

The SmartPost ICTL Settings is now available for FedEx Ground Economy Label Changes. Refer the image below.

Figure 97: ICTL Settings

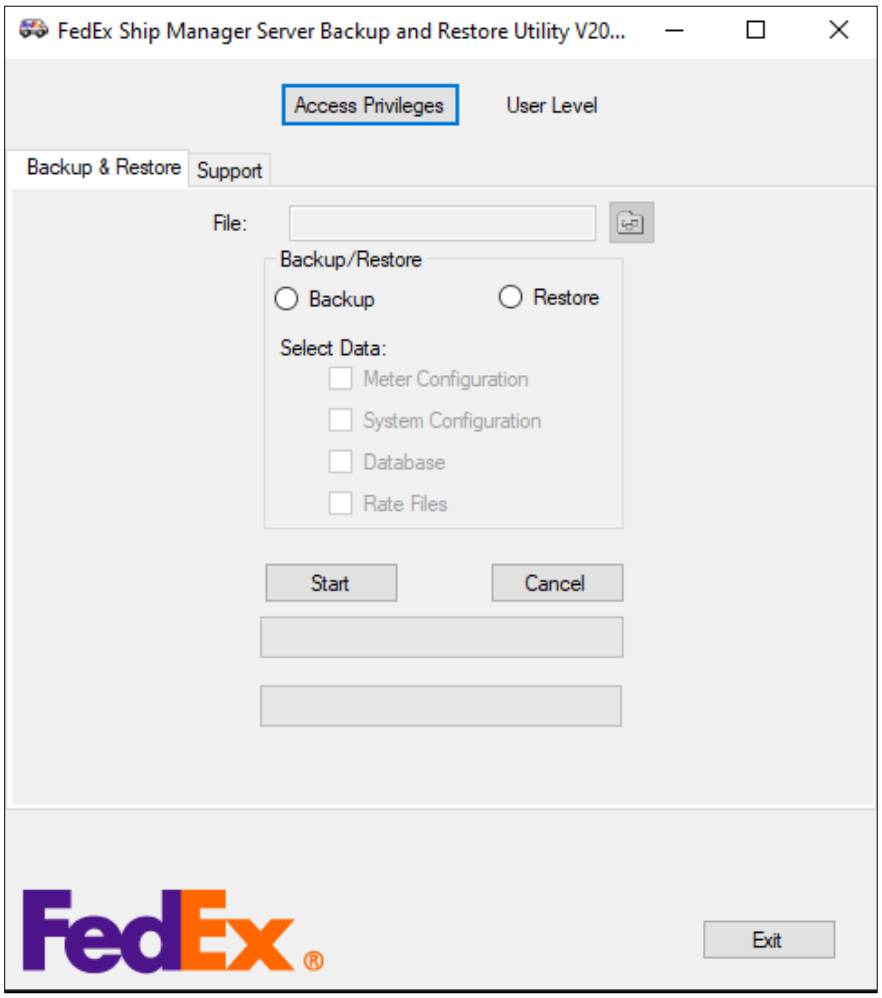


The SmartPost legacy label can now be generated by disabling **FedEx SmartPost®** Label Changes option checkbox in ICTL Settings under Meter Settings tab of FedEx Ship Manager® Server config screen.

Backup and Restore Utility

FedEx Ship Manager Server Backup and Restore Utility screen is facilitated with an Exit button to quit app in case of inadvertently launched session.

Figure 98: Backup and Restore Utility



Database Backup Directory

The tag functions for the tag 1379 - Database Backup Directory is updated.
When a 070 Meter Query Transaction is performed for tag 556 -Process Code Request with tag1379 - Database Backup Directory,

Then following values are displayed in respective Reply transaction, with respect to the directory path mentioned in tag 1379.

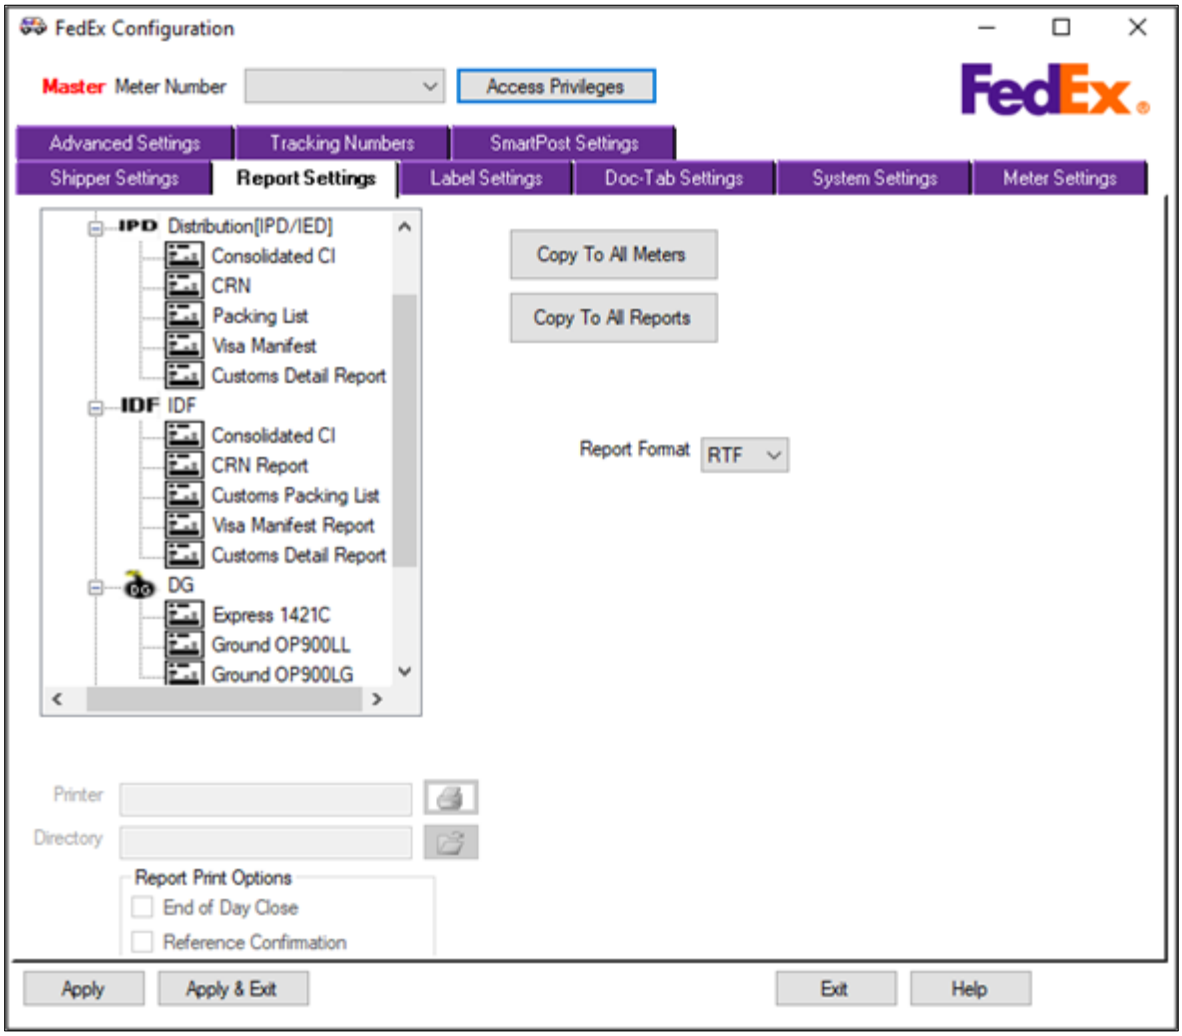
- When tag 1379 is included in the transaction,
    - and the directory path is not empty, it maps to a unique tag value and ignores duplicate values.
    - The tag 1379 will map to given primary path/1st backup directory on the FedEx Ship Manager® Server config screen.
- When the multi-occurrence tag 1379-2 is included in the transaction,
    - The tag 1379 will map to given secondary path/2nd backup directory on the FedEx Ship Manager® Server config screen.

Report Settings

IDF report name updates

The redundant term IDF is removed from the drop-down list for IDF Reports in report Settings tab. Refer to the image below.

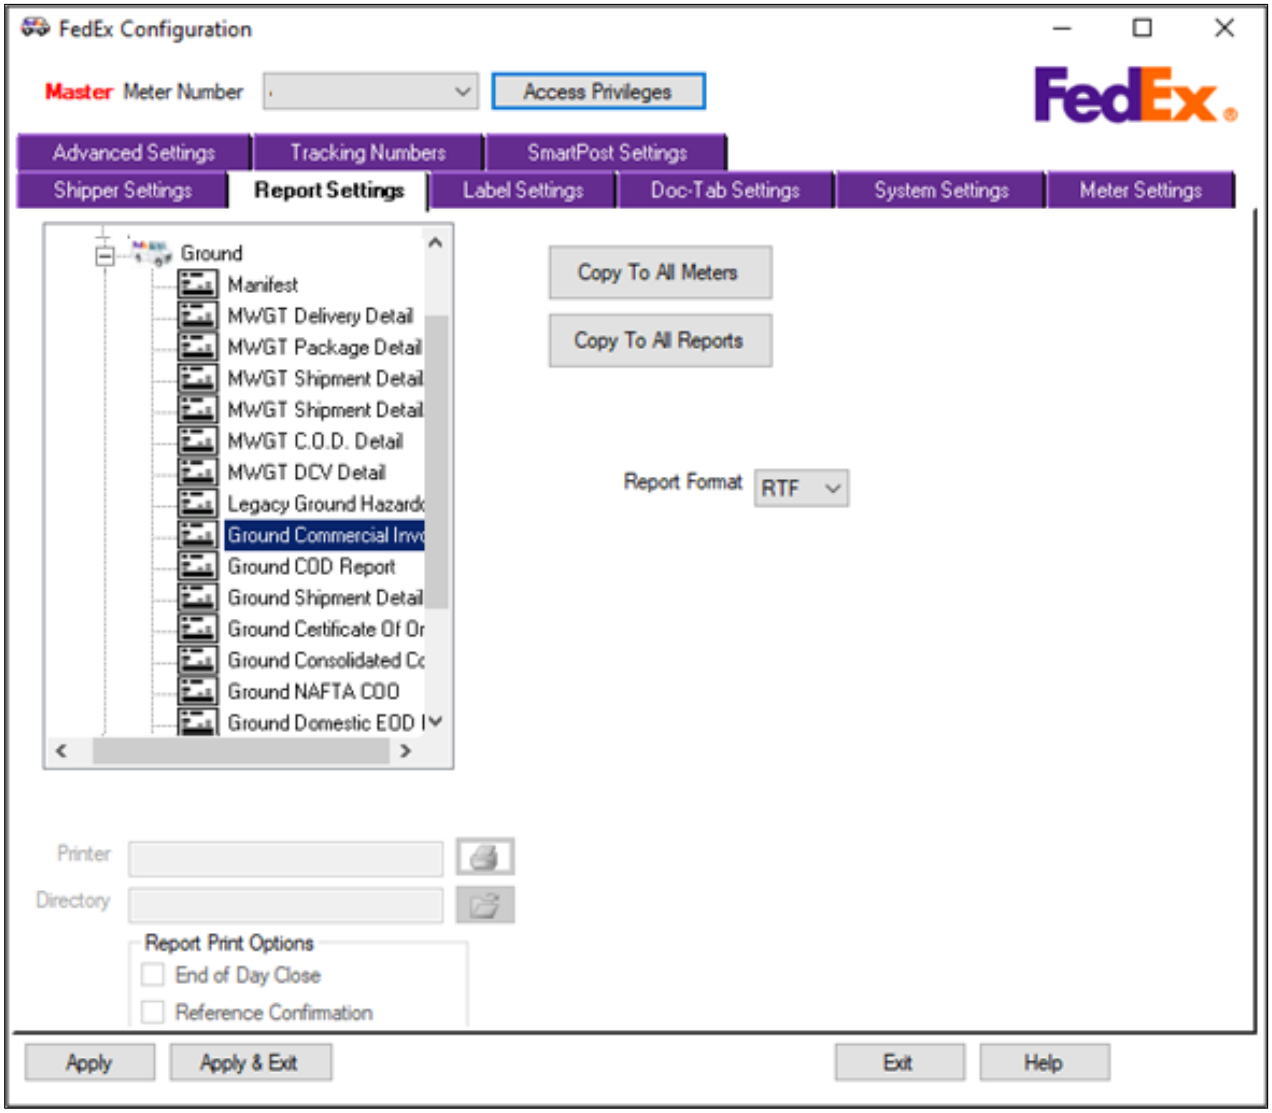
Figure 99: Report Settings, IDF reports



Ground report name updates

The redundant term IDF is removed from the drop-down list for IDF Reports in report Settings tab. Refer to the image below.

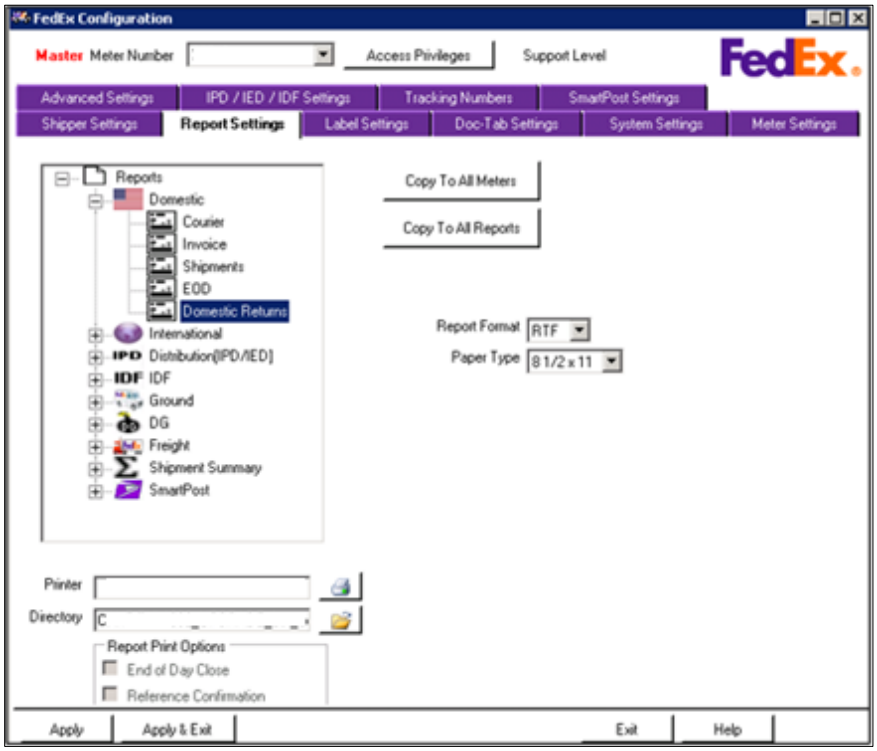
Figure 100: Ground Reports



Report Directory

The Directory field in Report Settings tab is now cleared every time the Apply button is clicked. This cleans out default path displayed, and the path is visible only when a report is selected from the list of Reports. Refer to below image.

Figure 101: Report Settings

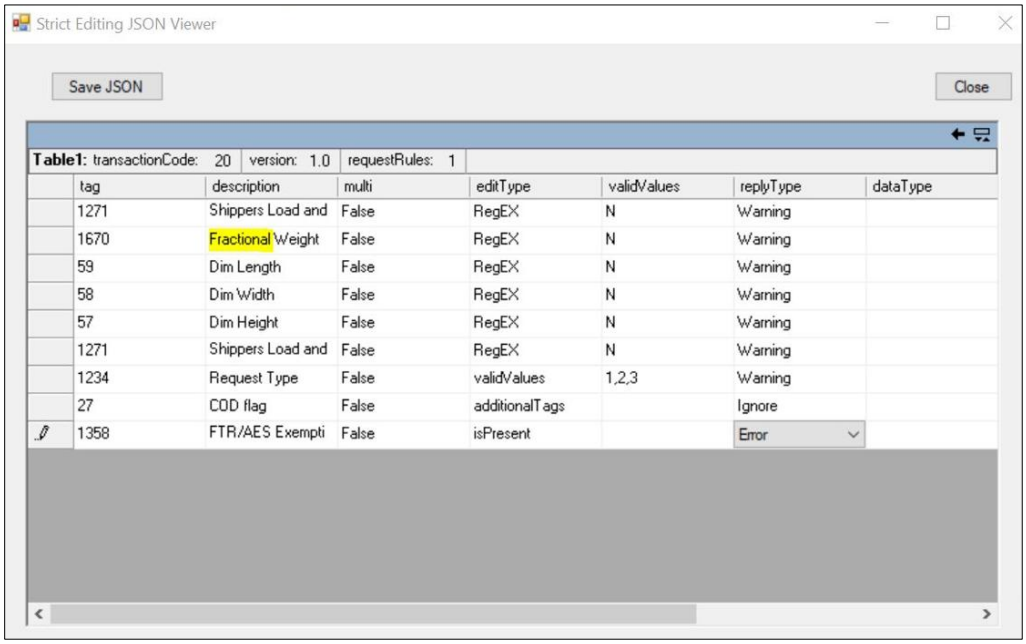


Strict Editing Utility

Tag name corrections

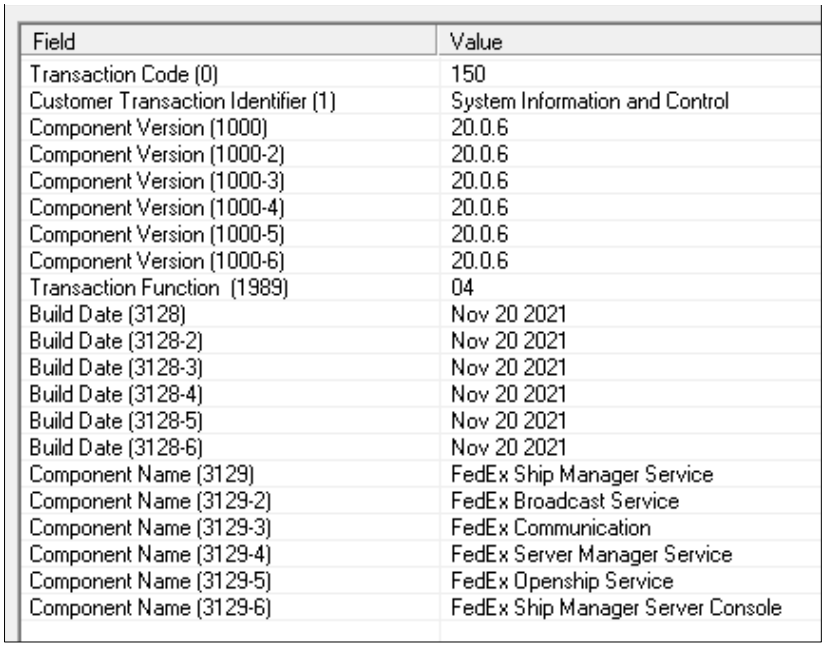
The misspelled name tag name for the tag 1670 Fractional Weight is corrected.
Refer to the image below.

Figure 102: tag name corrections



The reply transactions of 150 – Service Types and Special Services are version number and build date. Refer the image below.

Figure 103: 150 Service Types and Special Services transaction



Field	Value

Component Name (3129-2)	FedEx Broadcast Service
Component Name (3129-3)	FedEx Communication
Component Name (3129-4)	FedEx Server Manager Service
Component Name (3129-5)	FedEx Openship Service
Component Name (3129-6)	FedEx Ship Manager Server Console

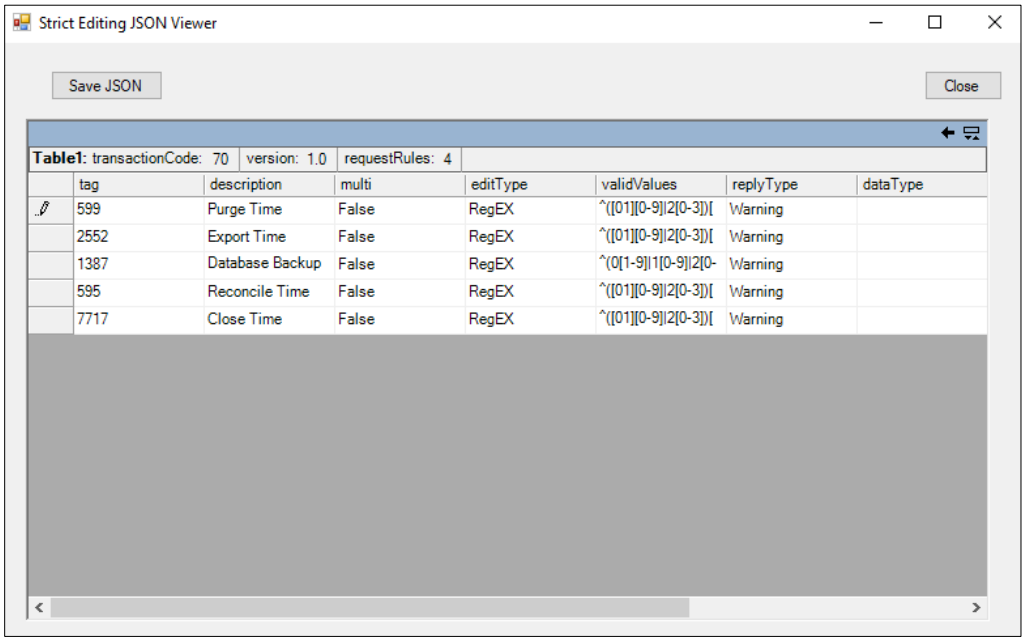
Time Fields

Strict Editing Utility is configured to provide the ability to preset required notification (ERROR/WARNING/IGNORE) for tags associated with validation of time fields. Preset notification type for tags **599 – purge time**, **3025 – Close Option time, 2552-export time**, **1387-database backup time**, **595-reconcile time** is returned appropriately during a 070/170 transaction. The notification messages ERROR/WARNING/IGNORE are as follows.

Table 118: Strict Editing time fields notification messages

Tag name	Notification type	Message
599 – Purge time	Warning	Purge Time should not be updated
3025 – Close Option time	Warning	Close Option Time should not be updated
2552- Export time	Warning	Export Time should not be updated
1387- Database backup time	Warning	Database backup Time should not be updated
595- Reconcile time	Warning	Invalid reconcile Time should not be updated

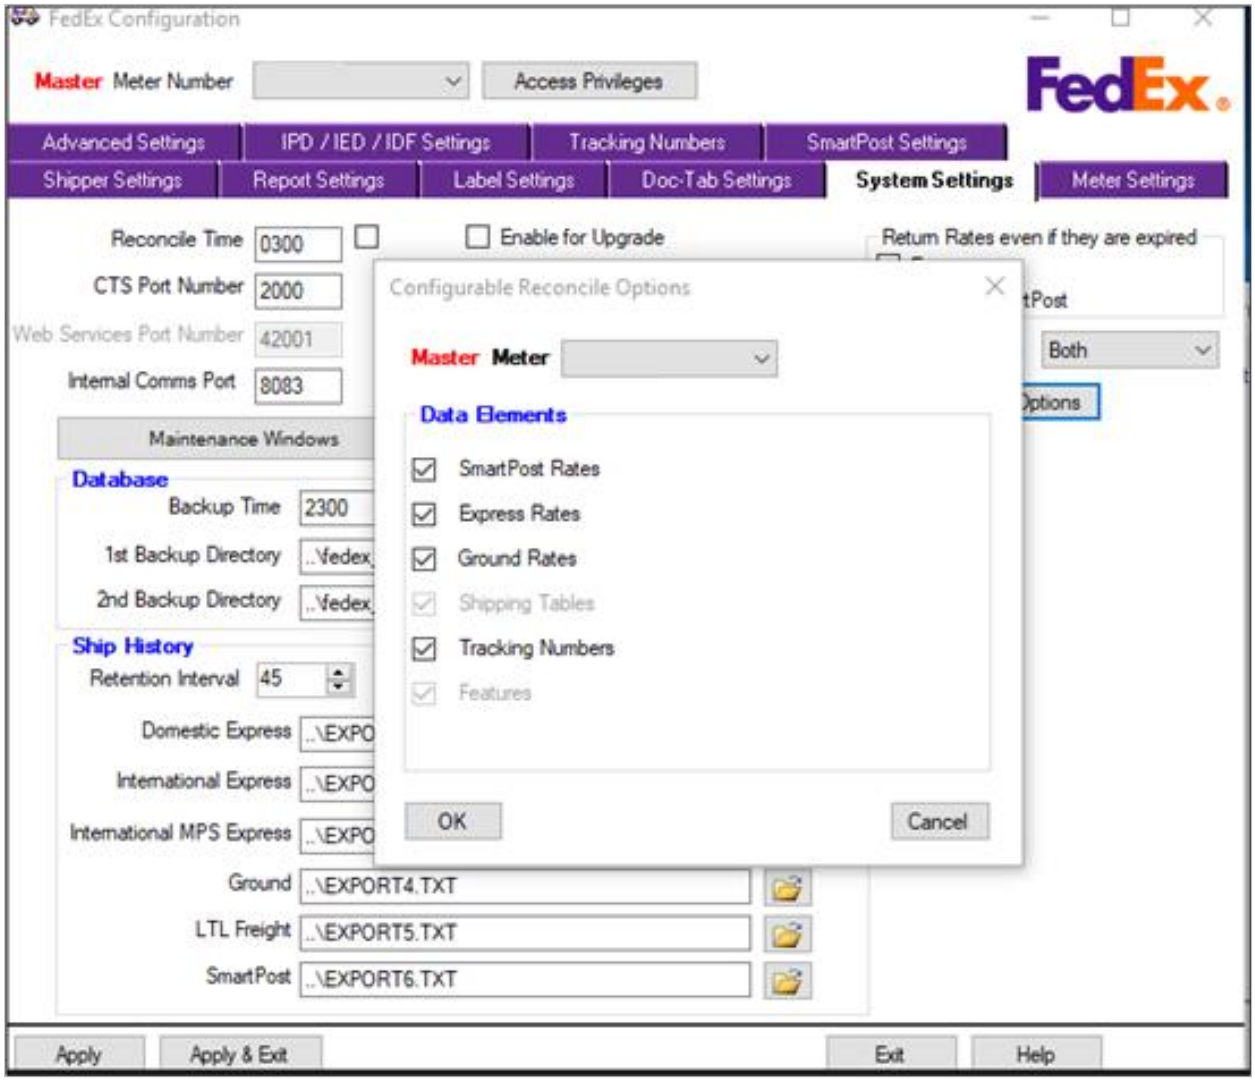
Figure 104: Strict Editing Utility - time fields



Configure Reconcile Options

The Configure Reconcile Options screen in System Settings is upgraded with new look and feel. The tab now indicates the Master keyword in red for Master meters as other FedEx Ship Manager Server main screens. Refer to the following image.

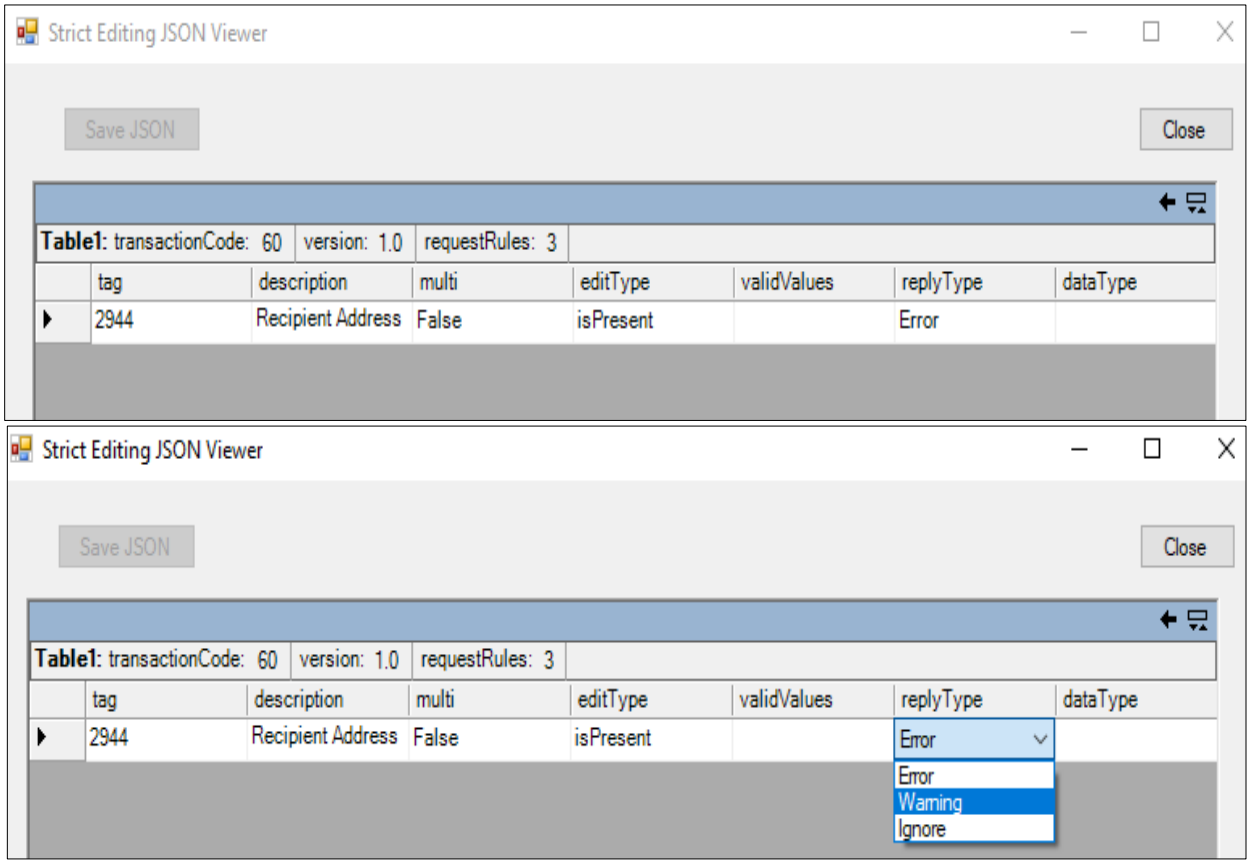
Figure 105: Configure Reconcile options



Recipient Address

The transaction 060 LTL, tag **2944 – Recipient Address** is included in the list of Strict Editing Utility. Required notification message (ERROR/WARNING/IGNORE) can be set for the tag in the Utility. The 060 LTL transaction now returns appropriate error message for tag 2944.

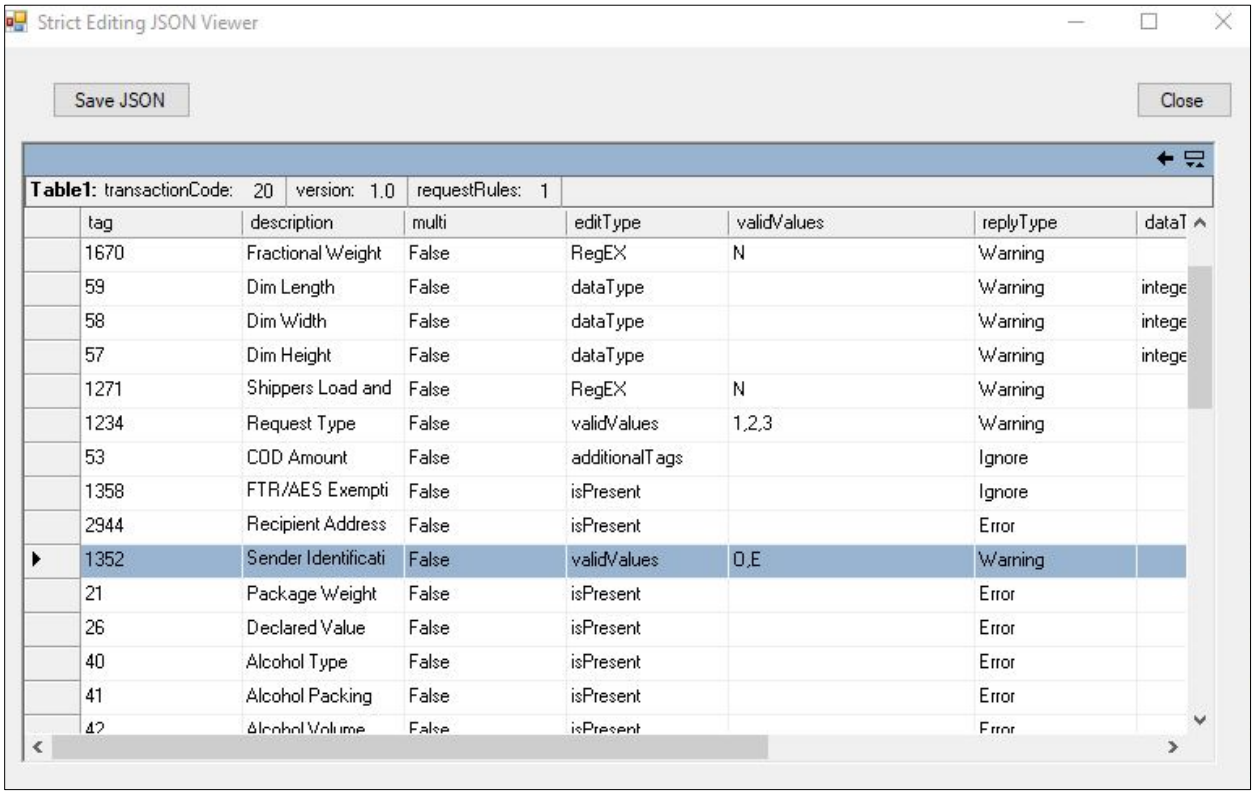
Figure 106: Strict Editing Utility



Sender Identification

The tag 1352 – Sender Identification type displays required values in Strict Editing Utility under the transaction code 20. The Obsolete values are excluded from the list. Refer to the image below.

Figure 107: Strict Editing, tag 1352



tag	description	multi	editType	validValues	replyType	dataT
1670	Fractional Weight	False	RegEX	N	Warning	
59	Dim Length	False	dataType		Warning	intege
58	Dim Width	False	dataType		Warning	intege
57	Dim Height	False	dataType		Warning	intege
1271	Shippers Load and	False	RegEX	N	Warning	
1234	Request Type	False	validValues	1,2,3	Warning	
53	COD Amount	False	additionalTags		Ignore	
1358	FTR/AES Exempti	False	isPresent		Ignore	
2944	Recipient Address	False	isPresent		Error	
1352	Sender Identificati	False	validValues	0,E	Warning	
21	Package Weight	False	isPresent		Error	
26	Declared Value	False	isPresent		Error	
40	Alcohol Type	False	isPresent		Error	
41	Alcohol Packing	False	isPresent		Error	
42	Alcohol Volume	False	isPresent		Error	

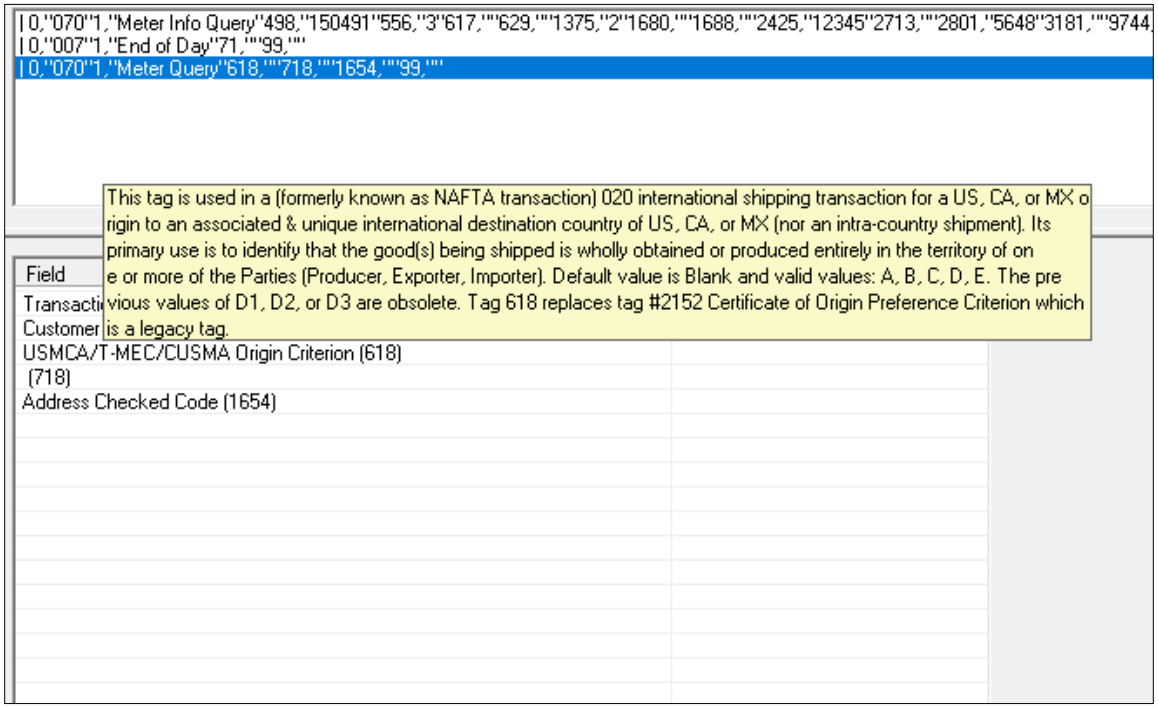
The usage of the obsolete value **S** for the tag**1352 - Sender Identification Type** returns the appropriate error/warning messages. Sample error and warning messages are as follows:

1. Error - *Tag # 1352 - Sender Identification type contains an invalid value. Please refer to the Transaction Coding Reference (TCR) for the valid values.*
2. *Warning - A Commercial Invoice or Proforma Invoice is required for the shipment. Please ensure the required trade document is provided before the cutoff time to aid in avoiding clearance delays.*

Origin Criteria Validation

The tag 618 is available in Strict Editing Utility to modify notification settings for Origin Criteria Validation. The values for the tag can be verified during the transaction in Trans Edit. Refer to the image below.

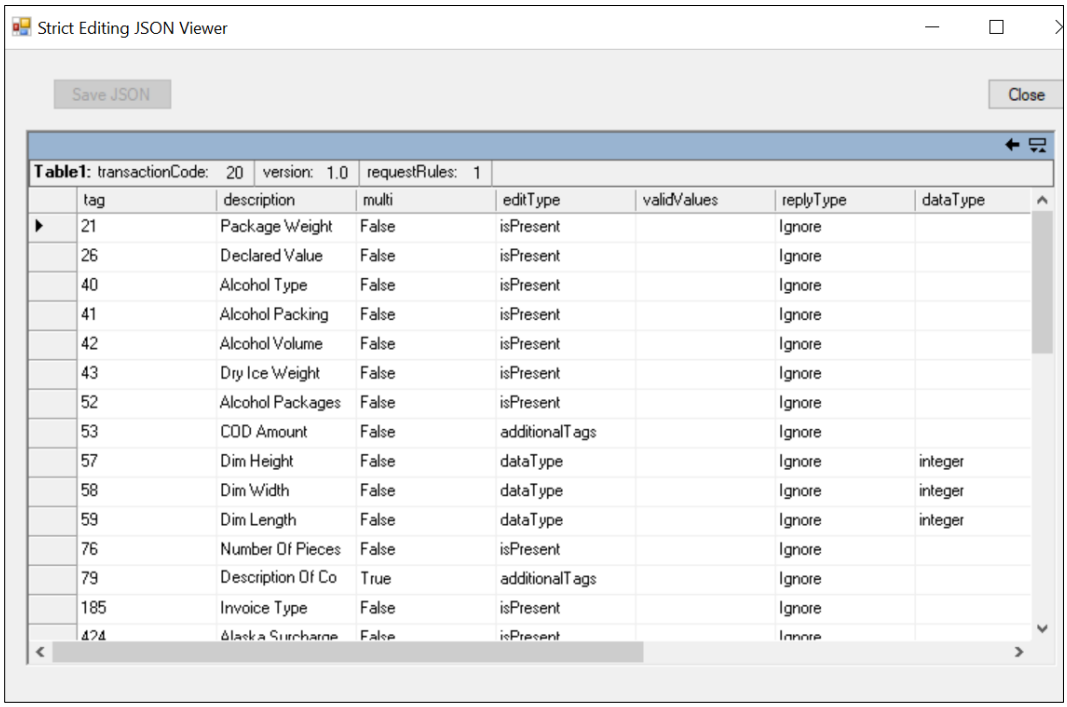
Figure 108: Tag 618 available in Trans Edit



Tag column Sorting

The tag numbers in tag column of Strict Editing Utility are sorted in ascending order to enhance ease of accessibility. Refer the image below.

Figure 109: Strict Editing



tag	description	multi	editType	validValues	replyType	dataType
21	Package Weight	False	isPresent		Ignore	
26	Declared Value	False	isPresent		Ignore	
40	Alcohol Type	False	isPresent		Ignore	
41	Alcohol Packing	False	isPresent		Ignore	
42	Alcohol Volume	False	isPresent		Ignore	
43	Dry Ice Weight	False	isPresent		Ignore	
52	Alcohol Packages	False	isPresent		Ignore	
53	COD Amount	False	additionalTags		Ignore	
57	Dim Height	False	dataType		Ignore	integer
58	Dim Width	False	dataType		Ignore	integer
59	Dim Length	False	dataType		Ignore	integer
76	Number Of Pieces	False	isPresent		Ignore	
79	Description Of Co	True	additionalTags		Ignore	
185	Invoice Type	False	isPresent		Ignore	
424	Alaska Surcharge	False	isPresent		Ignore	

Shipper Settings tab

The FedEx Ship Manager Server screen access privilege displays an error when attempting to login with incorrect or invalid password. Refer to the image below.

Figure 110: Access Privilege error message for incorrect password

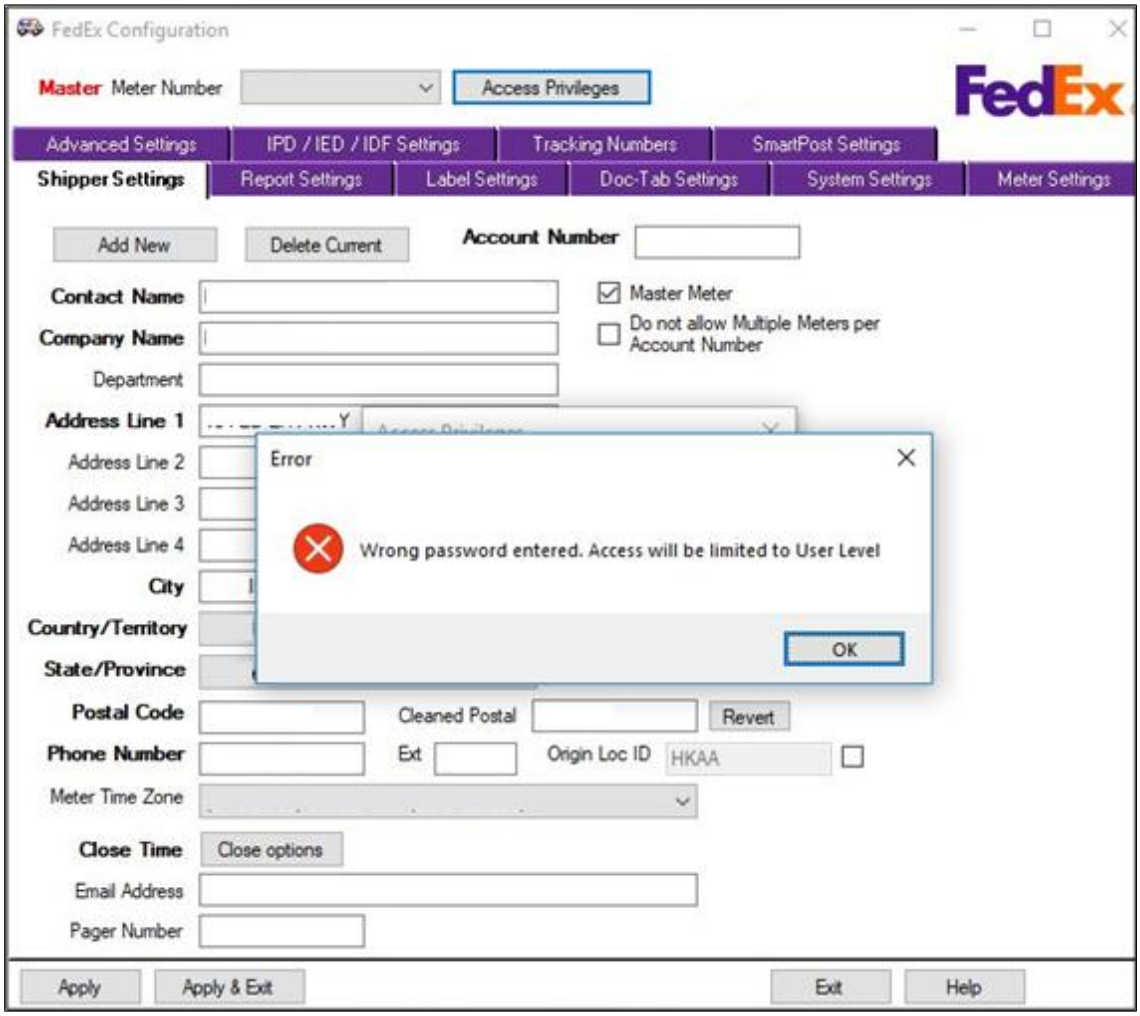


Figure 111: Access Privilege error message for invalid password

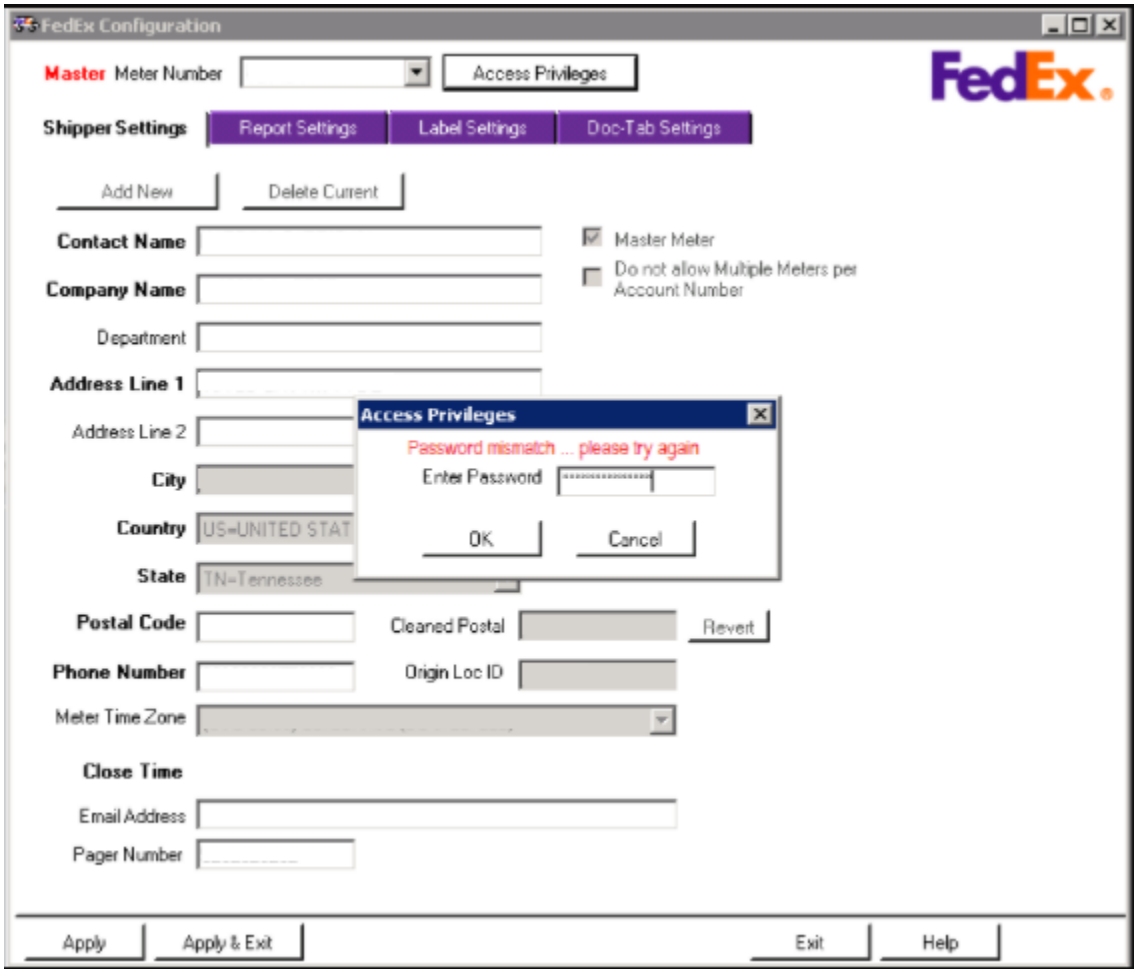
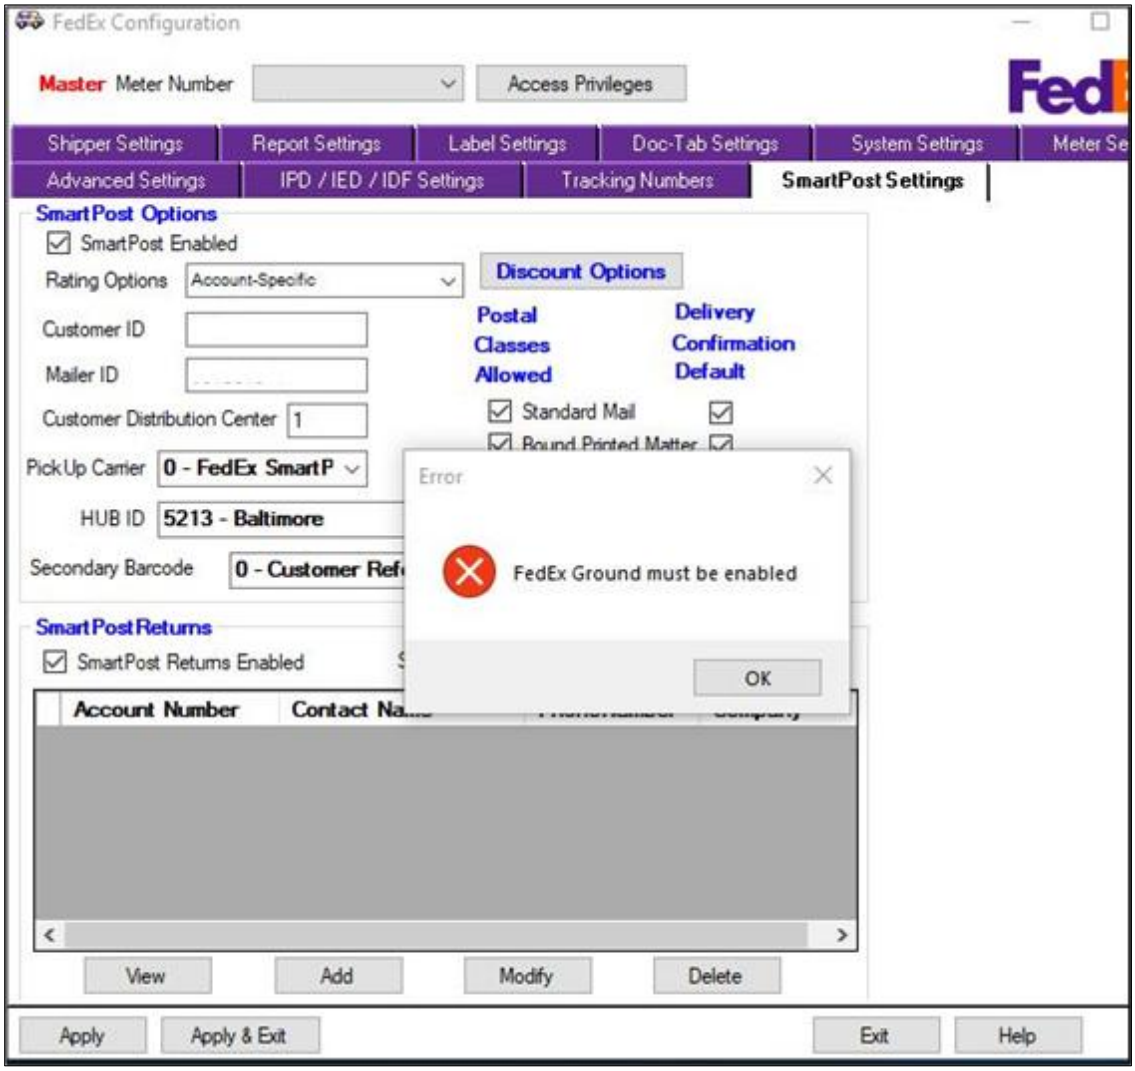


SmartPost® Settings tab

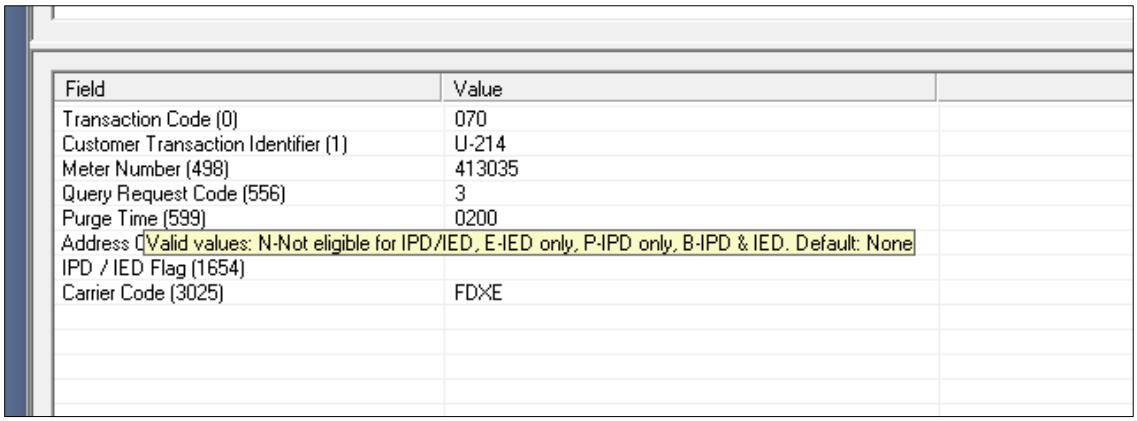
The Error message in SmartPost® Settings tab for disabled ground shipment now displays correct brand name. Refer to the following image.

Figure 112: FedEx Ship Manager SmartPost Settings



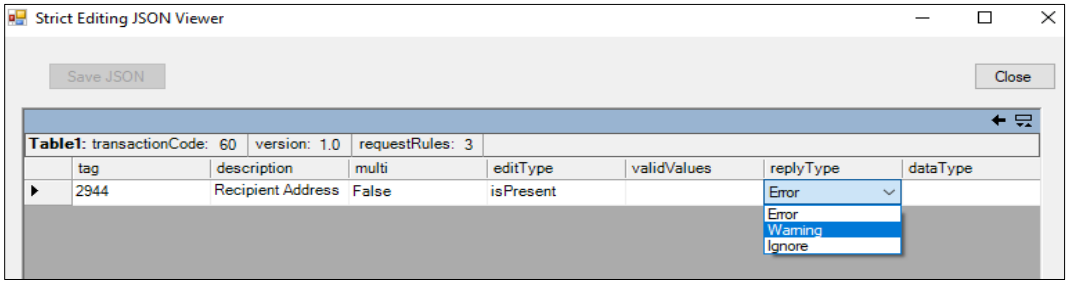
The tag name for the tag 1654 is modified to IPD/IED Flag in Trans Edit Utility. Refer to the image below.

Figure 113: 1654 - IPD/IED Flag



The reply transactions of 150 – Service Types and Special Services are up to date and return the correct version number and build date. Refer to the image below.

Figure 114: 150 Service Types and Special Services transaction



System Settings tab

The updates for latest FedEx Ship Manager® Server System Settings tab screen are as follows.

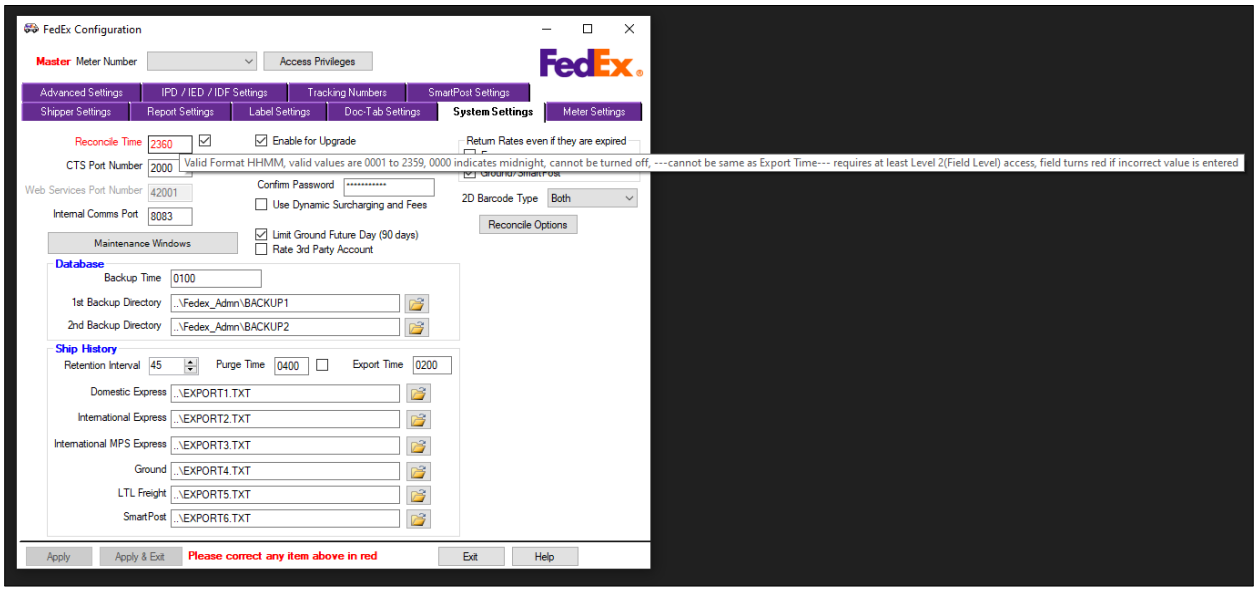
Reconcile Time

Pointing to Reconcile Time option displays a pop up with data criteria indicating the time range and format to use for Reconcile Time option. The criteria are as follows:

- Valid format is HHMM
- Valid values are 0001 to 2359
- 0000 indicates midnight
- Cannot be equal to Export Time
- Cannot be turned off
- Requires at least Level 2 (Field Level) access
- Field turns red if incorrect value is entered

When an Out-of-range time is entered in Reconcile Time option and the checkbox is selected, the FedEx Ship Manager® Server Settings tab highlights the option in red and displays an error message '*Please correct any item above in red*' as shown in image below.

Figure 115: System Settings tab- Reconcile Time



Purge Time

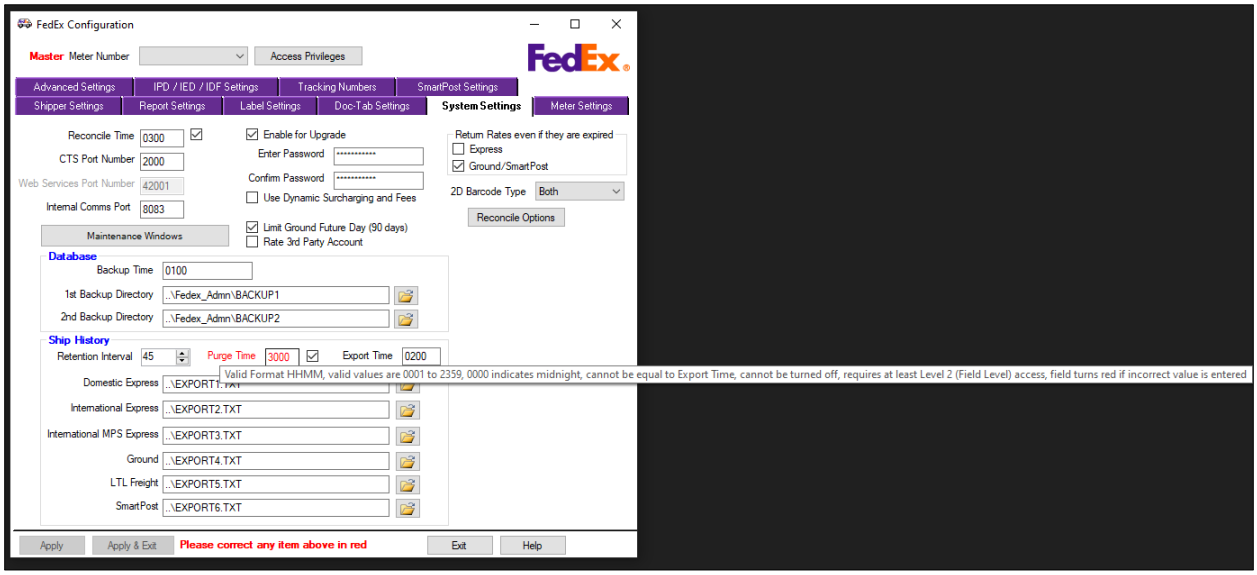
Pointing to Purge Time option displays a pop up with data criteria indicating the time range and format to use for Purge Time option. The criteria are as follows:

- Valid format is HHMM
- Valid values are 0001 to 2359
- 0000 indicates midnight

- Cannot be equal to Export Time
- Cannot be turned off
- Requires at least Level 2 (Field Level) access
- Field turns red if incorrect value is entered

When an Out-of-range time is entered in Purge Time option box and the checkbox is selected, the FedEx Ship Manager® Server Settings tab highlights the option in red and displays an error message '*Please correct any item above in red*' as shown in image below.

Figure 116: System Settings tab- Purge Time



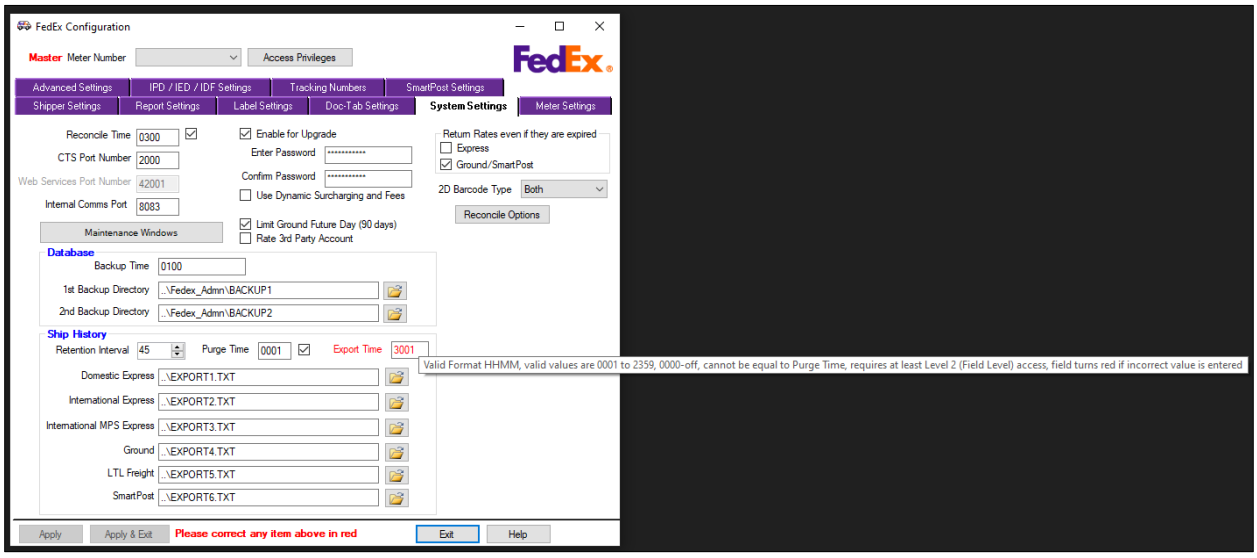
Export Time

Pointing to Export Time option displays a pop up with data criteria indicating the time range and format to use for Export Time option. The criteria are as follows:

- Valid format is HHMM
- Valid values are 0001 to 2359
- 0000-off
- Cannot be equal to Purge Time
- Requires at least Level 2 (Field Level) access
- Field turns red if incorrect value is entered

When an Out-of-range time is entered in Export Time option and the Apply button is clicked, the FedEx Ship Manager® Server Settings tab highlights the option in red and displays an error message '*Please correct any item above in red*' as shown in image below.

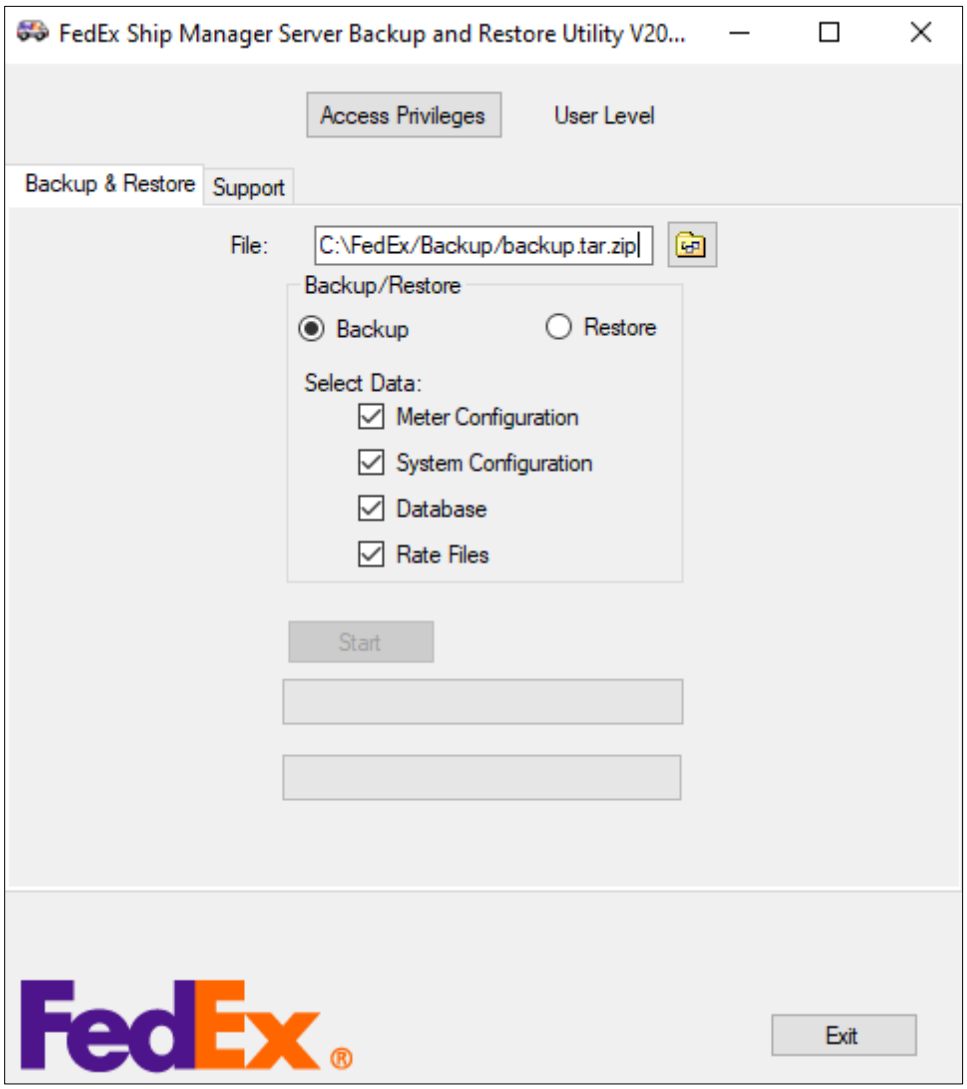
Figure 117: System Settings tab- Export Time



Backup and Restore Utility

The **Cancel** button in the Backup and Restore Utility is removed.

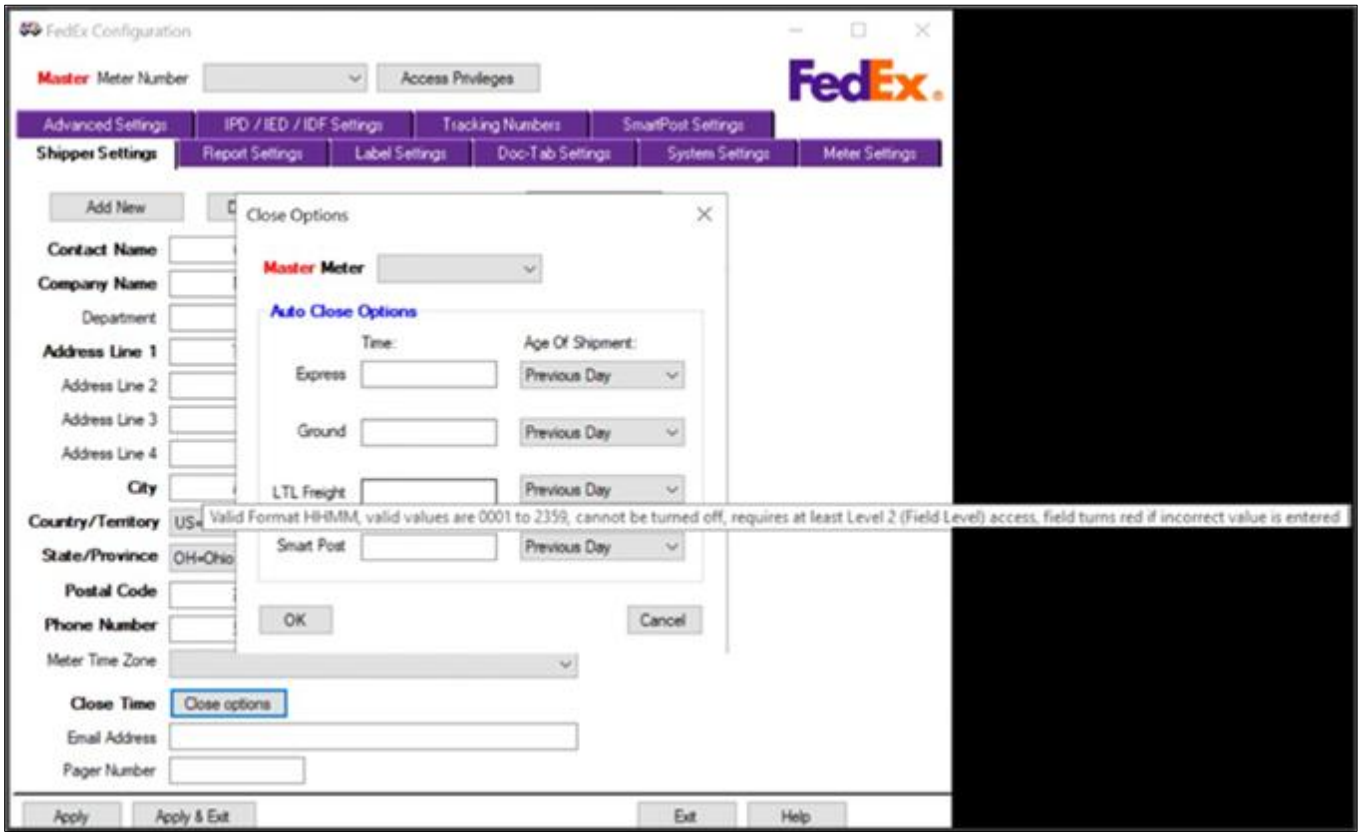
Figure 118: Backup and Restore Utility



The Shipper Settings Close Options screen displays a pop up on mouse hover, with criteria for the Auto close Options entry. The pop-up is displayed as shown in image below. The criteria are as follows:

- Valid format is HHMM.
- Valid values range from 0001 – 2359.
- Cannot be turned off
- Requires at least Field Level 2 access
- Field is highlighted in RED when any invalid value is entered, and a warning message is displayed.

Figure 119: Close option



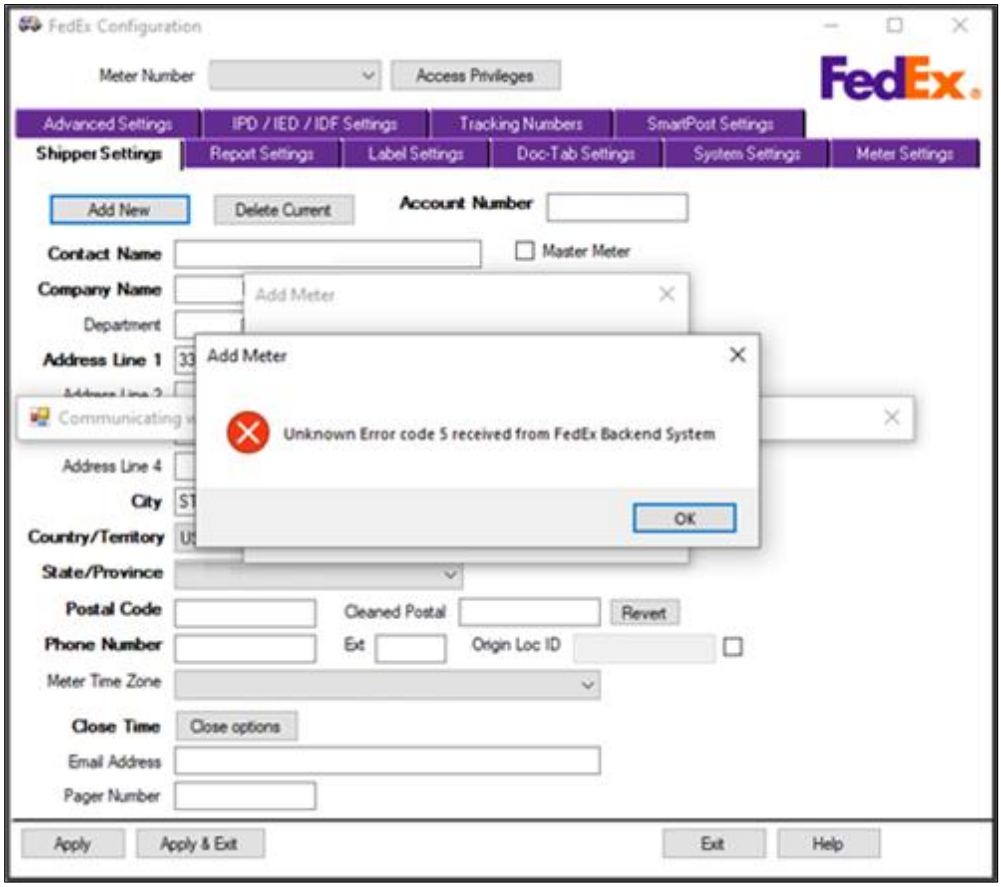
Service/Brand name updates and corrections

Brand name corrections

Correct brand name is displayed in the error message during the configuration of child meter form existing parent meter.

1. Open FedEx Ship Manager Server Configuration application with Access Privileges
2. Select Shipper Settings and add a new child meter
3. The error message is displayed with correct brand name ‘FedEx’. Refer to below image.

Figure 120: FedEx Brand name corrections for the Error Messages



Fixes

Child Meter configuration fixes

During a configuration of a child meter with 070 Transaction, the System Settings tab retains the update capability without affecting the below fields in System Settings tab.

- CTS Port Number
- Ship History
    - Retention Interval
    - Domestic Express
    - International Express
    - International MPS Express
    - Ground
    - Freight LTL
    - Smart Post
- Return Rates even if they are expired
    - Express
    - Ground/ Ground® Economy

Steps to Verify:

1. Process 070 update meter query with Tag#498 for a child meter
2. Verify 170 reply. The transaction ignores fields with tag values which are mapped (to any field on the system settings tab for that child meter).

Version 20.07

Label Enhancements and Decouple Logic

To comply with current regulations, all the references of Country field is now termed as Country/Territory on reports and labels.

The below report/label ***country*** field is modified as follows:

FedEx One Rate®

FedEx Ship Manager® Server now offers FedEx One Rate® service. FedEx One Rate, a flat rate pricing option, is available for qualifying FedEx Express® U.S. shipments in FedEx Express® packaging. FedEx One Rate pricing is an alternative to FedEx® Standard List Rates, account-specific rates, or FedEx® Retail Rates. To know more, refer Service_Guide_2023.pdf

Tag 1273 is included to obtain packaging types for FedEx One Rate®. FedEx One Rate® Packaging type is as follows:

Table 130: FedEx One Rate Packaging types

Package Type	Packaging Type (tag 1273)
FedEx® Extra Large Box	43
FedEx® Pak	02
FedEx® Small Box	13
FedEx® Medium Box	23
FedEx® Large Box	33
FedEx® Envelope	06
FedEx® Tube	04

When the ***731- Express Rate pricing option*** field is used in a shipment or rating transaction, the following Rate quote values are displayed, as per the following criteria:

- Value 'Y' – One Rate quote is displayed.
- Value 'N ' – Account specific rate quote is displayed.

Sample transactions:

The following updates are applicable for FedEx Ground Economy shipment:

- The FedEx Ground Economy Routing Reply transaction returns the field **664** (FedEx 1D barcode), field **2418** (USPS Del Con barcode) and field **4927** (USPS tracking number).

FedEx International Connect Plus™

A new FedEx International Connect Plus is a contractual service in select markets which offers shipping options with varying prices which are less expensive and similar to FedEx International Economy service. It also provides you faster and convenient deliveries.

Feature details

- The FedEx International Connect Plus packages are typically delivered in 2–5 business-days with EOD (End of Day) delivery commitment or it may take one extra day in comparison to the delivery commitment of FedEx International Economy.
- This service applies same product restrictions as International Economy except no Money Back Guarantee.

Following are the benefits associated with this service:

- Speed at the right cost
- Single pick up
- Consolidated invoice
- Control of package delivery
- Serving major e-commerce markets
- Reliable tracking via FedEx tracking channels
- Access to retail networks

FedEx International Services (including U.S. Export)	Code
FedEx International Connect Plus™	EC

FedEx International Priority® Express (2A)

This is a new international Mid-day timed commitment delivery service. An international parcel express time-definite, customs-cleared, door-to-door (DTD) service. Delivery is typically in 1 - 3 business days, backed up by the FedEx Money-Back Guarantee (MBG).

This service enhances FedEx's value proposition by offering next-day delivery to the US from more. European origins.

Features & benefits

- Fast and reliable delivery
- Delivery typically occurs in 1 to 3 business days
- Shipment delivery standard is by noon, in 2 business days to dozens of cities
- Overnight delivery from major cities in Europe, Middle East, Asia, Mexico, and South America to many U.S. cities
- Package weight up to 68 kilograms or 150 pounds
- More control over delivery commitment
- Flexibility for recipients to manage inbound volume arrival
- Greater choice of timed options for international express parcel services

To request this service, send ServiceType value as ***FEDEX_INTERNATIONAL_PRIORITY_EXPRESS***.

Note:

- *Exact time of delivery for the day is dependent on destination country.*
- *Service availability and exact delivery time depend on enablement, origin, and destination postal codes. Terms and Conditions apply. Contact your FedEx support representative for enablement and more information.*

Label identification

'**IP EXP'** is displayed on label when FedEx International Priority Express service is selected.

Figure 135: Label for FedEx International Priority Express.

FedEx International Priority® (2P)

This is new international End of the day timed commitment delivery service. This service enhances FedEx's value proposition by offering next-day delivery to the US from more European origins.

Features & benefits

- Reliable delivery
- More control over delivery commitment
- Flexibility for recipients to manage inbound volume arrival
- Greater choice of timed options for international express parcel services
- Next day 4:30 p.m. delivery to majority of US key business centers available from EuroOne origins in number of European markets
- Late bundled pickup time for parcel shipments to the US and elsewhere
- Improved Europe to US Value Proposition

To request this service, send serviceType value as **FEDEX_INTERNATIONAL_PRIORITY**.

Labels

'**IP EOD'** is displayed on label when FedEx International Priority service is selected.

Figure 136: Label for FedEx International Priority

FedEx Regional Economy®

FedEx Regional Economy is Europe intra-regional quality service which provides end of the day delivery, with price similar to ground shipping charges. This service is available in select European countries.

Features & benefits

- Provides delivery typically in 3 to 4 business days for Europe destinations.
- Available in 22 European countries as both origins and destinations.
- Offers Door-to-door service and day definite delivery commitment.
- Service days are Monday through Friday, with Saturday delivery available to regions where Saturday is a regular business day.
- FedEx International Saturday is applicable based on region.
- Not applicable for diesel-based fuel surcharge, different DIM factor of 4000, no Money back guarantee, no FedEx branded packaging and no manual/paper AWB.

To request this service, send serviceType value as **FEDEX_REGIONAL_ECONOMY**.

Labels

'**RGNL ECONOMY'** is displayed on label when FedEx Regional Economy service is selected.

FedEx Regional Economy® Freight

FedEx Regional Economy® Freight is an intra-regional parcel freight service available in select Europe regions.

Features & benefits

Provides time-definite service, typically within 5 business days, with flexible pickup and delivery options.

- Service days are Monday through Friday, with Saturday delivery available to countries where Saturday is a regular business day.
- End of the Day delivery commitment based on location.
- The following special services are allowed (depending on destination location):
    - FedEx International Broker
    - Hold at Location

  - Dangerous Goods
  - Dry Ice Shipments.
- Business Rules applicable for FedEx Regional Economy® Freight Service:
  - Service days are Monday through Friday, with Saturday delivery available to regions where Saturday is a regular business day.
  - FedEx International Saturday is applicable based on region.
  - Not applicable for diesel-based fuel surcharge, different DIM factor of 4000, no MBG, no FedEx branded packaging and no manual/paper AWB.

To request this service, send serviceType value as **FEDEX_REGIONAL_ECONOMY_FREIGHT**.

Labels

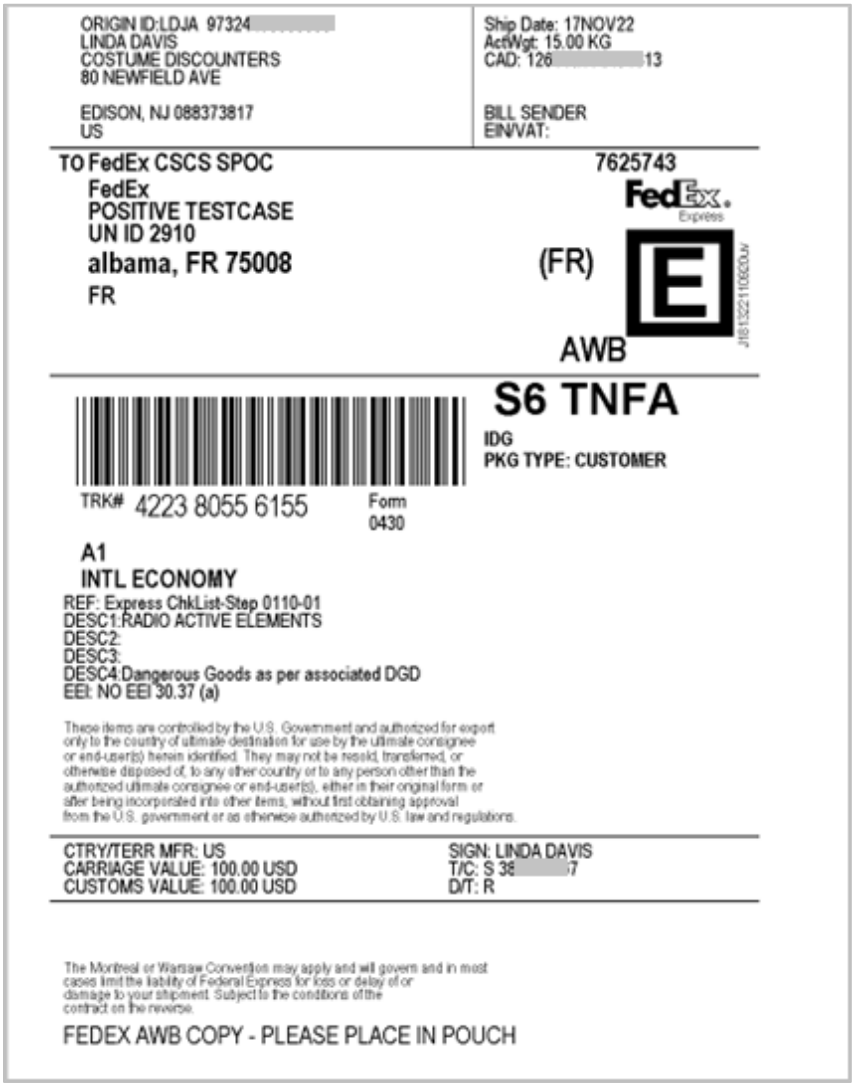
'**RGNL ECON FRT**' is displayed on label when FedEx Regional Economy Freight service is selected.

> *Note: The service availability and exact delivery time depend on enablement, origin, and destination postal codes. Terms and Conditions apply. Contact your FedEx support representative for enablement and more information.*

DG statement update for Airway Bill

The Air Waybill (AWB) for Dangerous Goods (DG) is presented with revised DG statement '*Dangerous Goods as per associated DGD*'. Refer below image.

Figure 137: DG statement change on AWB – 2007



New Currency type additions

The new currency types for Cambodian currency Riel, Jordan Dinar, and Nigerian currency Naira are included as valid currency values.

The updates to currency values are as follows:

Region	Currency type	Currency value
Cambodia	Riel	KHR
Nigeria	Naira	NGN
Jordan	Dinar	JOD

Shipment updates

- The latest shipment updates for Nigeria now allows Pick-up options for the shipment transactions processed from Nigeria origin. The Pick-up request is created for Nigerian shipments and are successfully processed as a shipment request.
- The tag 526- FORM ID is excluded from 004/104 Tracking number Reply transaction.

EETT License number implementation

The Greece shipment labels are displays the EETT statement ***'GENERAL LICENSE OF POST SERVICES, E.E.T.T., AM: 99-110'***.

The criteria for outbound shipments are as follows:

- The EETT statement will display on all Greek outbound shipments, including international, intra-country, and returns.
- This statement will not display on any Greek inbound shipments, including returns inbound to Greece.
- The label EETT statement text is static hence, no entry fields are required on the automation platforms.

The criteria for outbound return shipments are as follows:

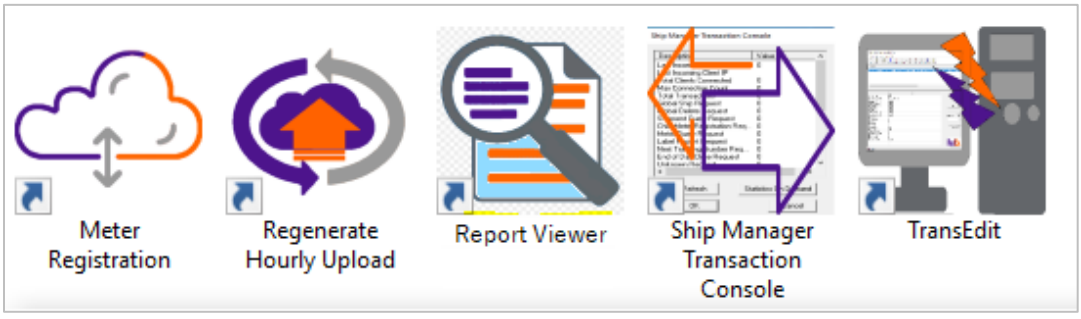
- The EETT license number is shipper driven, if the origin location of shipper is Greece, the EETT statement is displayed on the label. In the case of Greek payer and shipper located in another country, the EETT is not be displayed on the label.
- If an outbound shipment is sent from Greece to another country requires EETT license statement and the return shipment to Greece from that same country does not require EETT license statement.
- If the outbound shipment and the return will both originate in Greece, both labels require the EETT statement.
- If any outbound shipment not sent from Greece includes a return label to Greece (the return label has a Greek recipient address, but not a Greek sender), the return label does not require the EETT statement because the return sender does not reside in Greece.
- If the original shipment was inbounded to Greece, but the return shipment address is a location within Greece (so not returning to the country of origin), this shipment should be considered a “domestic” shipment (a return with an importer in Greece that will become the new point of return), so this shipment requires the EETT statement on the label.

Figure 138: Sample EETT license label

New look

FedEx Ship Manager® Server utility shortcut icons are presented with latest look. Refer the below images.

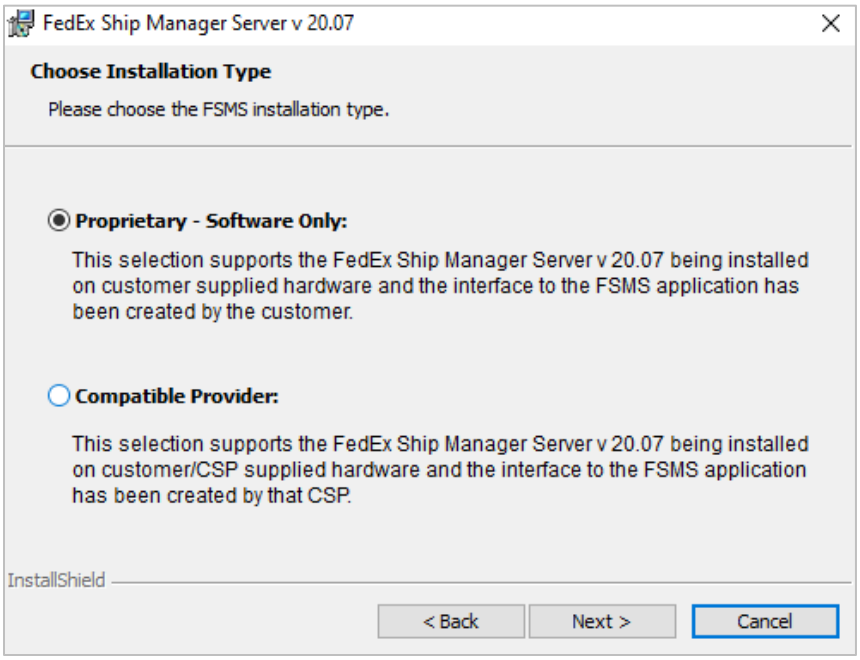
Figure 139: FedEx Ship Manager® Server utility shortcuts



FedEx Ship Manager® Server Installation

The installation type, ***Proprietary hardware*** is excluded from the selection list and no longer available as an installation type. The latest options for FedEx Ship Manager Server installation types are as shown in below image.

Figure 140: Choose Installation type



Tag Updates and sample transactions

New tags, applicable sample transactions, updated label fields, and updated tag details are as follows.

FedEx Ground® Economy single and Muti piece shipments

Sample transaction for FedEx Ground® Economy single and Muti piece shipments.

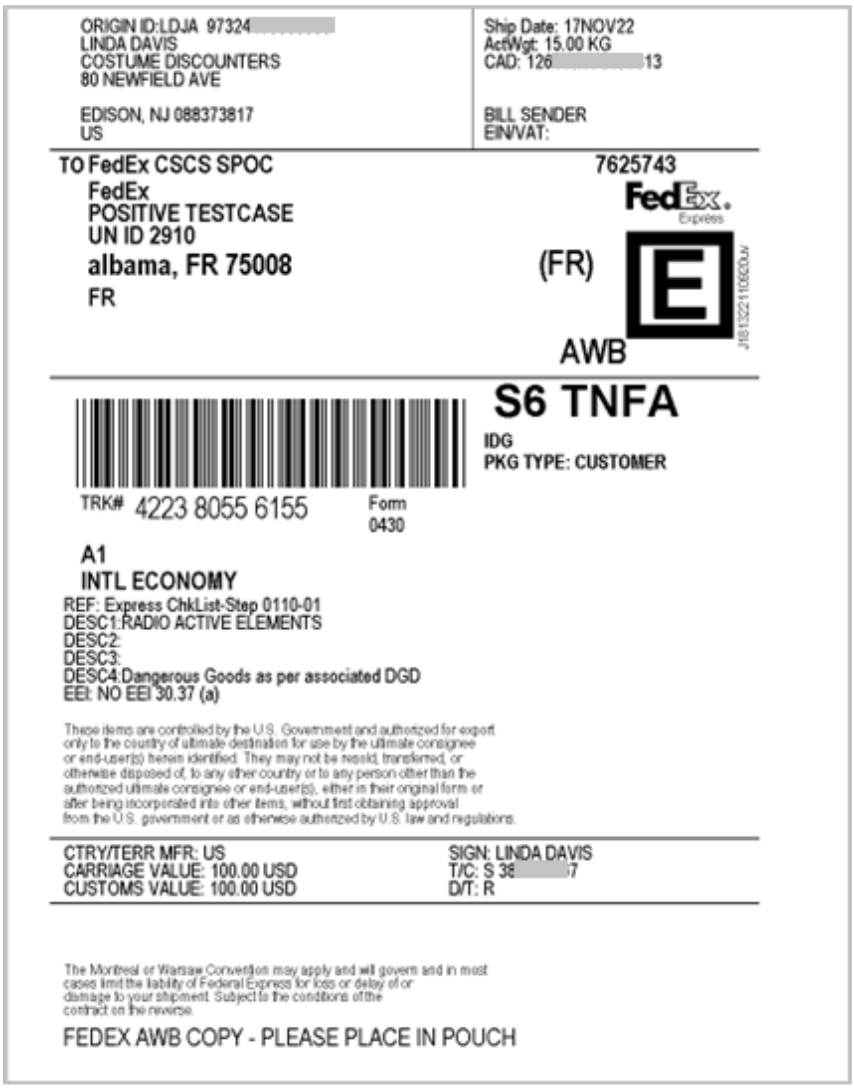
Note: For the 664 tag to return in create transaction, the tag#1222[Preset tracking number] needs to be added in the request transaction.

Air Waybill (AWB) for Dangerous Goods (DG)

The Air Waybill (AWB) for Dangerous Goods (DG) is presented with revised DG statement '*Dangerous Goods as per associated DGD*'. Refer below image.

Figure 141: DG statement change on AWB – v2007



Doc Tab Shipping type

The tag 1619 and 1620 are updated as follows.

Tag/field id	Old Tag name	New Tag name	Description
1619	Doc Tab Type	Doc Tab Shipping Type	This tag (formerly known as doc-Tab Type) has been renamed to associate the intention of the tag more accurately as well as to make it more visually understood with the section in the FedEx Ship Manager® Server config screen on the DocTab Settings tab. It indicates the associated “OPCO” (or shipping type) wanted so that the appropriate content from other fields on this tab will be printed on the DocTab section of a label. It is used as an “index” that will then be used to apply any other DocTab tags to be updated for that “OPCO”/shipping type
1620	Doc Tab Position	DocTab Heading Position	Indicates the position to print the DocTab heading.

Dynamic Surcharge related tags

New fields are introduced to provide details on surcharge levels and description for surcharges applicable for the shipments. These fields are available for Shipment, Rate Quote and configuration transactions.

The fields provide Surcharge description details displayed for successful shipment transactions. The new field details are as follows.

Return Dynamic Surcharge Description Flag

Table 131: Return Dynamic Surcharge Description Flag

<table>
<tr><th>Field ID</th><th>Field Name</th><th>Update</th><th>Affected Transaction</th></tr>
<tr><td rowspan="6">7785</td><td>Return Dynamic Surcharge Description Flag</td><td>New Field</td><td>020 shipment query transaction</td></tr>
<tr><td colspan="3">Description
The purpose of this tag is to allow the customer to
• Receive a surcharge description in a shipment, rating, or transaction reply
• Enable/Disable the Return Dynamic Surcharge Description field in the configuration screen by using the 070-meter update transaction.
The enablement/disablement is associated with the field called Return Dynamic Surcharge Description. When it is enabled, a surcharge description will be returned in the shipment or rating reply transaction.

Note: The surcharge description will be returned in tag # 7786 Dynamic Surcharge Description.

This tag is a child tag to tag # 3181 – Use Dynamic Surcharging and Fees (its respective field is found in the System Settings tab). When the Use Dynamic Surcharging and Fees field is
• enabled, this field can be enabled/disabled
• disabled, this field will be in read-only mode
An advantage of this enablement can allow a customer to receive that surcharge description without needing to do a lookup for the description in the TCR (or any kind of matrix the customer may have created to cross-reference the code to a description). The tag displays the surcharge description for the code(s) found in tag 1945/1947 or both.</td></tr>
<tr><td>Type: A (Alphabet)</td><td>Minimum Length: 1</td><td>Maximum Length: 1</td></tr>
<tr><td>Multiple Occurrence: No</td><td>Input/Output: I/O</td><td>Carrier: all</td></tr>
<tr><td>Default Value: Y</td><td>Optionality: Optional</td><td>Level: Shipment</td></tr>
<tr><td colspan="3">Service Impacted: Shipping, Rate Quote, Configuration</td></tr>
</table>

Dynamic Surcharge Description

Table 132: Dynamic Surcharge Description

Field ID	Field Name	Update	Affected Transaction
7786	Dynamic Surcharge Description	New Field	020 shipment query transaction
	Description The purpose of this tag is to allow the customer to receive a description of a dynamic surcharge transactionally. This tag is provided in a ship or rate reply transaction when the ***Use Dynamic Surcharging and Fees*** option is enabled in the FedEx Ship Manager® Server configuration screen (available in the System Settings tab). It is a multi-occurrence and output only tag.		
	Type: A (Alphabet)	**Minimum Length:** 1	**Maximum Length:** 255
	Multiple Occurrence: Yes	**Input/Output:** O	**Carrier:** all
	Default Value: NA	**Optionality**: Optional	**Level**: Shipment
	Service Impacted: Shipping, Rate Quote		

Standard LIST Dynamic Surcharge Description

Table 133: Standard LIST Dynamic Surcharge Description

Field ID	Field Name	Update	Affected Transaction
7787	Standard LIST Dynamic Surcharge Description	New Field	020 shipment query transaction
	Description The purpose of this tag is to allow the customer to receive a description of the *LIST dynamic surcharge* in transactions. This tag is included in shipping or rating reply transactions when the ***Use Dynamic Surcharging and Fees*** option is enabled in the FedEx Ship Manager® Server configuration screen (found in the System Settings tab). It will display the description with respect to the details as per tag 1945 – List Dynamic Surcharge and/or Fees code.		
	Type: A (Alphabet)	**Minimum Length:** 1	**Maximum Length:** 255
	Multiple Occurrence: Yes	**Input/Output:** O	**Carrier:** FDXE, FDXG
	Default Value: NA	**Optionality**: Optional	**Level**: Shipment
	Service Impacted: Shipping, Rate Quote		

ALTERNATE Dynamic Surcharge Description

Table 134: ALTERNATE Dynamic Surcharge Description

Field ID	Field Name	Update	Affected Transaction
7788	ALTERNATE Dynamic Surcharge Description	New Field	020 shipment query transaction
	Description The purpose of this tag is to allow the customer to receive a description of the *LIST dynamic surcharge* in transactions. This tag is included in shipping or rating reply transactions when the ***Use Dynamic Surcharging and Fees*** option is enabled in the FedEx Ship Manager® Server configuration screen (found in the System Settings tab). It will display the description with respect to the details as per tag 2848 – Alternate Dynamic Surcharge and/or Fees Code.		
	Type: A (Alphabet)	**Minimum Length:** 1	**Maximum Length:** 255
	Multiple Occurrence: Yes	**Input/Output:** O	**Carrier:** FDXE, FDXG
	Default Value: NA	**Optionality**: Optional	**Level**: Shipment
	Service Impacted: Shipping, Rate Quote		

ODA/OPA tag updates

The field and tag name related to Surcharges are revised in latest FedEx Ship Manager® Server software. The details are as follows.

Old naming convention	New naming convention
Outside Delivery Area Surcharge	**Out of** Delivery Area Surcharge
Outside Pickup Area (OPA) Surcharge	**Out of** Pickup Area **(OPA)** Surcharge
tag 423 - Out of Delivery Area Surcharge	tag 423 - **Out of** Delivery Area **(ODA)** Surcharge
tag 493 - Outside Pickup Area (OPA) Surcharge	tag 493 – **Out of** Pickup Area **(OPA)** Surcharge
tag 1518 - List Out of Delivery Area Surcharge	tag 1518 - List **Out of** Delivery Area **(ODA)** Surcharge
tag 1100 - ODA Flag	tag 1100 - **Out of** Delivery Area **(ODA)** Flag
tag 2867 - Alternate Outside Pickup Area (OPA) Surcharge	tag 2867 - Alternate **Out of** Pickup Area **(OPA)** Surcharge

Memory /Common Heap Allocation for Common Services

The Meter query reply transaction now includes a new field ***726 - Memory /Common Heap Allocation for Common Services*** to allocate memory for FedEx Ship Manager® Server common services. The new field details are as follows.

Table 135: Memory Allocation for Common Services

Field ID	Field Name	Update	Affected Transaction
726	Memory Allocation for Common Services	New Field	070 Meter query transaction
	Description This tag is used to allocate memory for FSMS/FXRS common services and is considered a maximum value. The tag will be used as an update to a 070-meter update transaction as well as a list meter information transaction. It is displayed in 170-meter query reply transaction. The values are represented in Megabytes.		
	Type: N (Numeric)	**Minimum Length:** 1	**Maximum Length:** 5
	Multiple Occurrence: No	**Input/Output:** I/O	**Carrier:** all
	Default Value: NA	**Optionality**: Optional	**Level**: NA
	Service Impacted: Configuration		

Label Logging Retention Period (days)

A new tag to display the Label Logging Retention Period in days is provided in Meter Query transaction. The details for the tag ***728 - Label Logging Retention Period (days)*** is given below.

Table 136: Label Logging Retention Period (days)

Field ID	Field Name	Update	Affected Transaction
728	Label Logging Retention Period (days)	New Field	070 Meter query transaction
	Description This tag represents the retention period of the Label logging log files. The log files are used for troubleshooting & will be available based upon the maximum value allotted for the Label logging retention period days. The log files are purged when number of days exceeds the preset maximum value. **Valid values (1-15)** 1- Minimum number of retention period days 15 - Maximum number of retention period days		
	Type: N (Numerical)	**Minimum Length:** 1	**Maximum Length:** 2
	Multiple Occurrence: No	**Input/Output:** I/O	**Carrier:** All
	Default Value: 1	**Optionality**: NA	**Level**: Configuration
	Service Impacted: Query		

Trust the Harmonized Code Provided

Table 137: Trust the Harmonized Code Provided

Field ID	Field Name	Update	Affected Transaction
727	Trust the Harmonized Code Provided	New Field	070 Meter query transaction
	Description This tag is utilized in transactions to verify the harmonized code value linked to the commodity description. The tag offers list meter information when used in Meter Query transactions and enables/disables the associated control in the FedEx Ship Manager® Server configuration. **Valid values:** NA		
	Type: A (Alphabet)	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: No	**Input/Output:** I/O	**Carrier:** FDXE
	Default Value: NA	**Optionality**: NA	**Level**: Shipment/ Commodity
	Service Impacted: Shipping/Configuration		

The shipment transaction reply displays a warning message – "*The Harmonized Code does not match the Harmonized Code description provided. Please confirm the Harmonized Code*". If the given Harmonized code is not a match for the commodity.

Express Rate pricing option

A New tag ***731- Express Rate pricing option***, is added under shipping transactions. This tag displays the pricing type for FedEx OneRate®. The details are given in the below table.

Table 138: Provide me a pricing option

Field ID	Field Name	Update	Affected Transaction
731	Express Rate pricing option	New Field	020 global shipment transaction
	Description This tag is used to display the price type in a shipping or rating transaction including FedEx OneRate®. If FedEx FedEx One Rate® values are not applicable, the account specific rate is displayed. *Note: A shipment or rating transaction displays OneRate rate quote, when the rate quote value is "yes" and account specific rate quote, when the rate quote value is "no".* **Valid values** 0 – FedEx Standard Rate 1 – FedEx One Rate		
	Type: N (Numeric)	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: N	**Input/Output:** I	**Carrier:** FDXE
	Default Value: 0 (Zero)	**Optionality**: NA	**Level**: Shipment
	Service Impacted: Shipping, Rate Quote		

Print Total Doc Tab Label Flag

A new tag to display the total Doc Tab label flag is provided in Meter Query transaction. The details for the tag *730 - Print Total Doc Tab Label Flag* is given below.

Table 139: Print Total Doc Tab Label Flag

<table>
<tr><th>Field ID</th><th>Field Name</th><th>Update</th><th>Affected Transaction</th></tr>
<tr><td rowspan="6">730</td><td>Print Total Doc Tab Label Flag</td><td>New Field</td><td>020 global shipment transaction</td></tr>
<tr><td colspan="3">Description
This tag is associated with the Print Total Doc Tab Label field displayed in the FedEx Ship Manger® Server configuration screen on the Doc Tab Settings tab. It is used in a 070-meter update transaction to appropriately enable/disable Print Total Doc Tab Label field. The details are displayed in 170 reply transaction with meter update, or list-meter information type.
Valid values
Y – Print the total doc tab label
N – Do not print the total doc tab label</td></tr>

</table>

User Experience Enhancements

FedEx Ship Manager® Server Configuration screen and Utility screen updates are as follows:

Meter Settings tab

FedEx Express®, FedEx Ground® and FedEx SmartPost®/ Ground® Economy meter configuration has additional choices in the Rate Discount Options section. The user can now select any of the following Rating options to be returned in the reply transaction:

- Account Specific Rate
- Standard List Rate
- Custom Discount Rate

The Standard Rate Reply drop-down displays the options as shown in image below.

Figure 142: Standard Rate Reply - Express Options

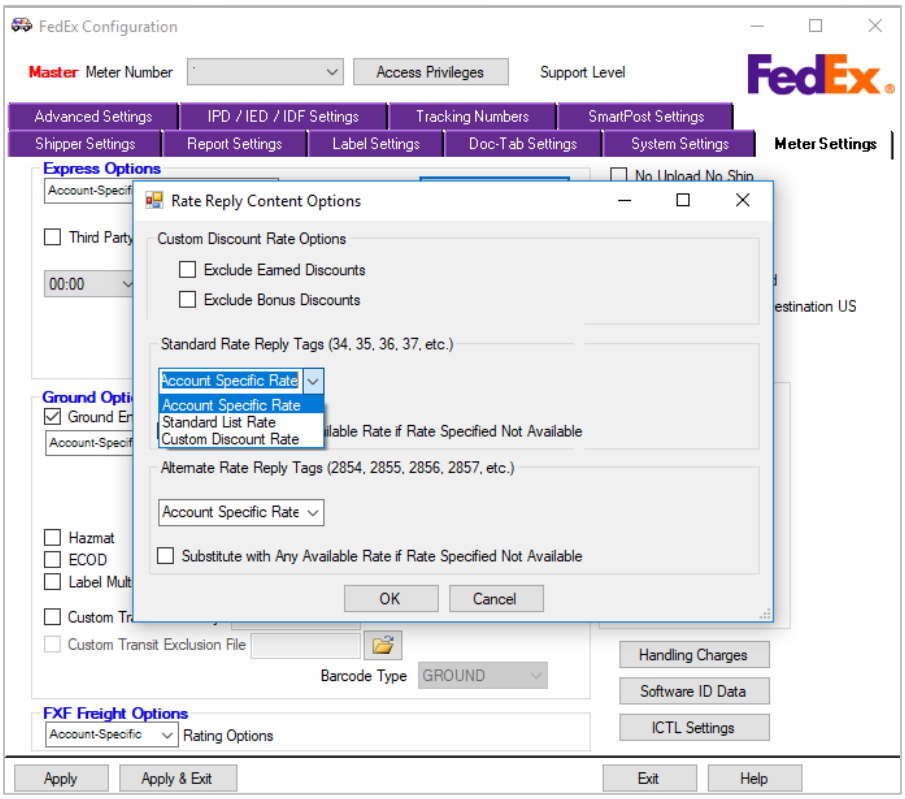

Figure 143: Standard Rate Reply – Ground Options

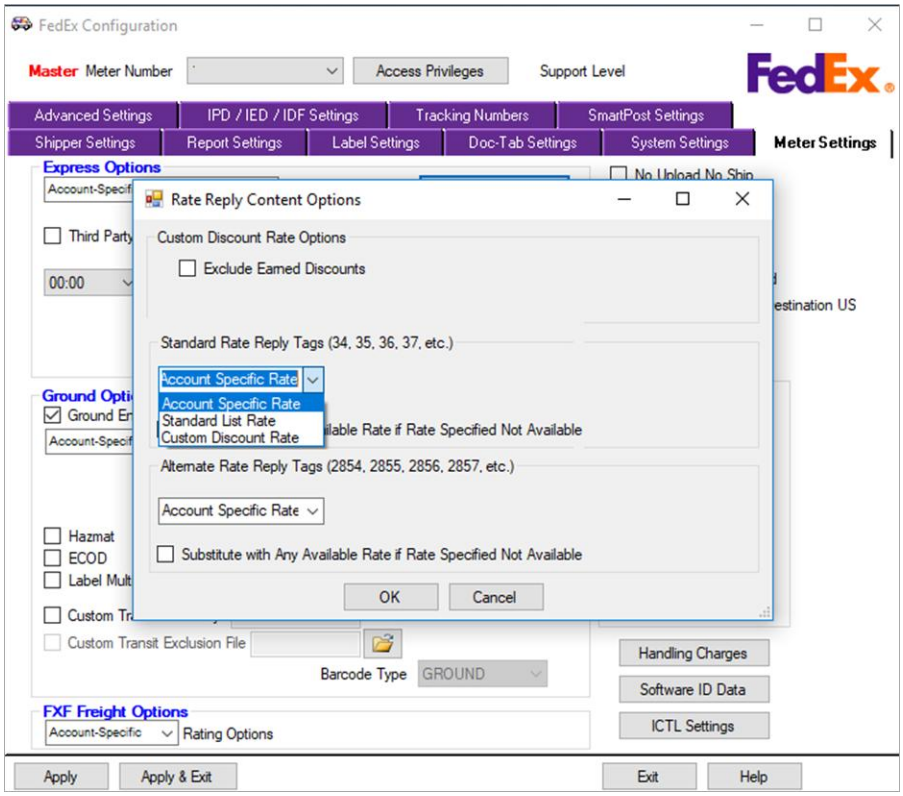

Figure 144: Standard Rate Reply - SmartPost®/Ground® Economy Options

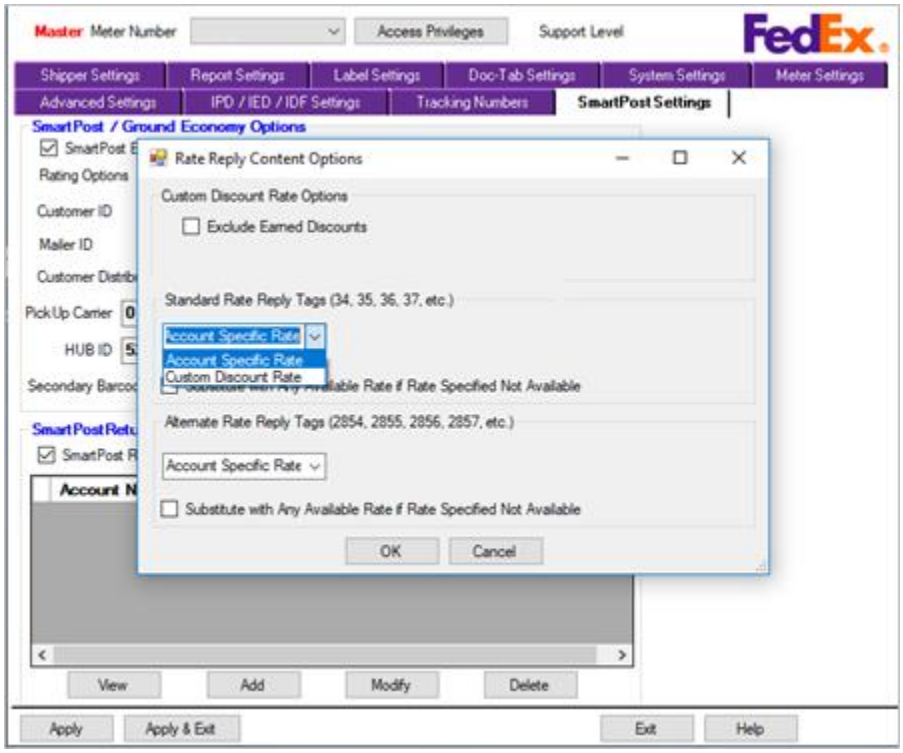

In case the selected Rating option is unavailable, A New function, an automatic rating option is provided. The checkbox ***Substitute with any available rate if rate specified not available*** can be enabled/disabled as required. Refer the below image.

Figure 145: Rate Reply Content Option -FedEx Express

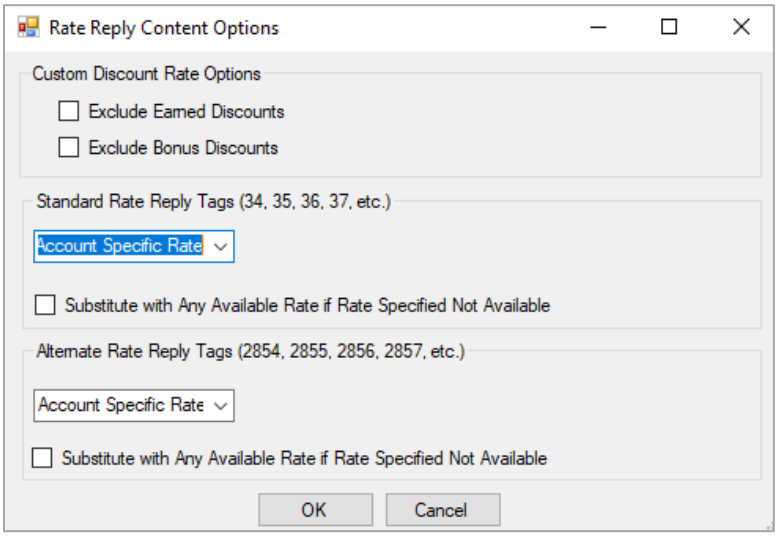

Figure 146: Rate Reply Content Options - FedEx Ground

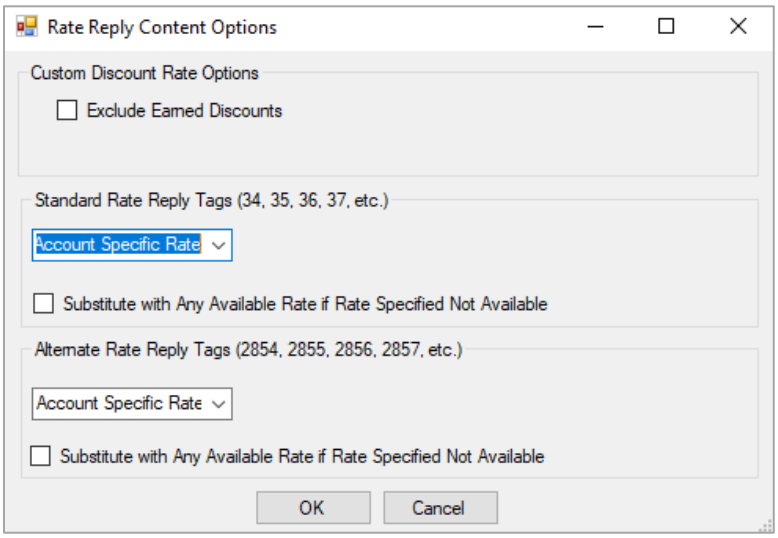
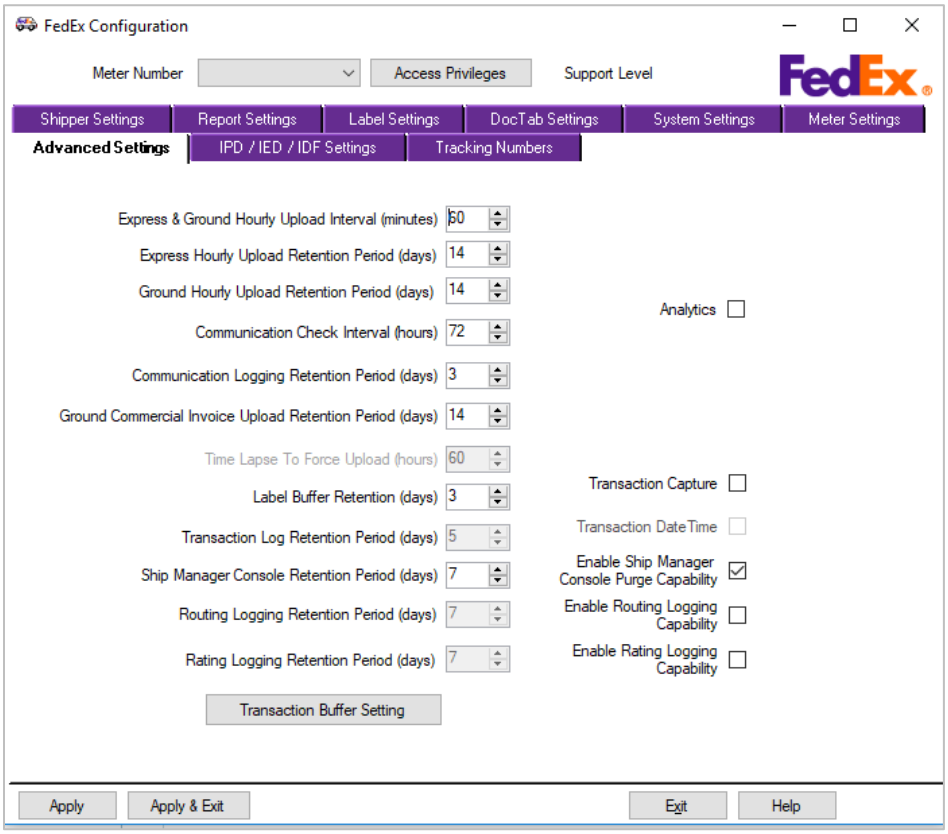


Advanced Settings tab

Updates related to Advanced Settings tab are as follows.

The Tracking logging Retention Period (days) option in Advanced Settings tab is inactive. Refer the below image.

Figure 147: Advanced Settings tab



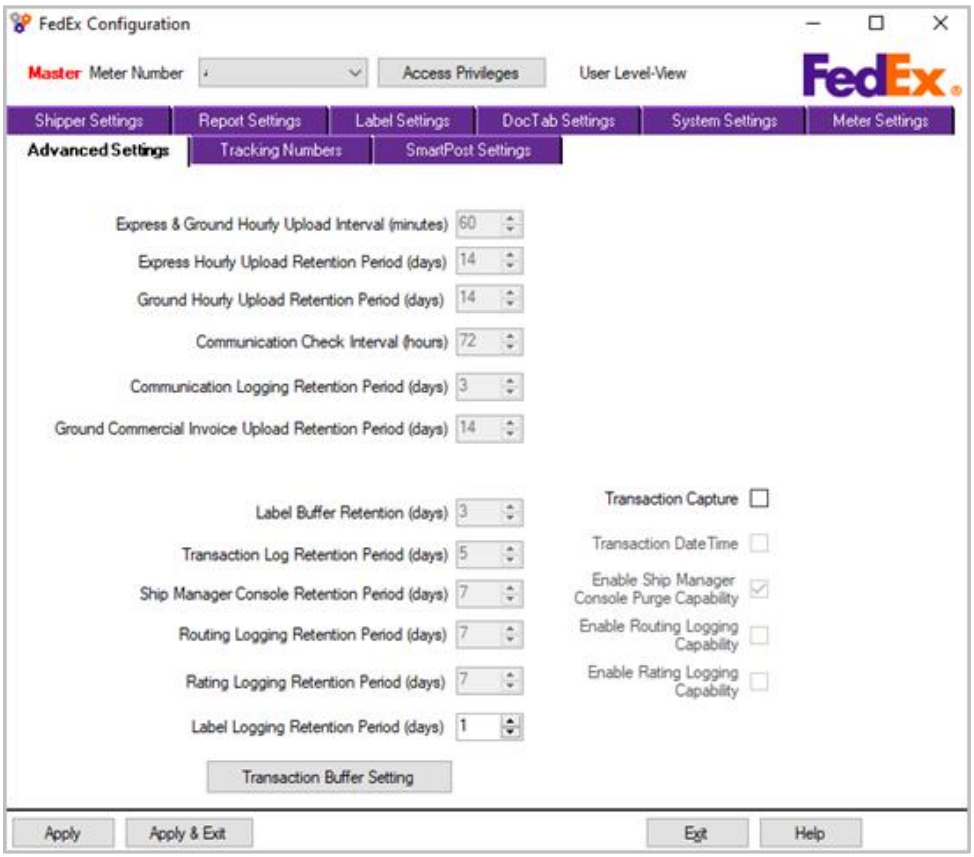
Label Logging Retention Period

A new option to set retention period days for Label log file is provided in ***Advanced Settings*** tab. The option offers number of days to set for log file retention. Refer the below image.
The ***Label Logging Retention Period (days)*** allows to set the number of days to retain Label log files and the value set is saved until next modified. The details to set the value is as follows:

- Default/Minimum value: 1 day
- Maximum value: 15 days

A new tag to display the Label Logging Retention Period in days is provided in Meter Query transaction. Follow the link to know more about the tag ***728 - Label Logging Retention Period (days)***.

Figure 148: Advanced Settings tab



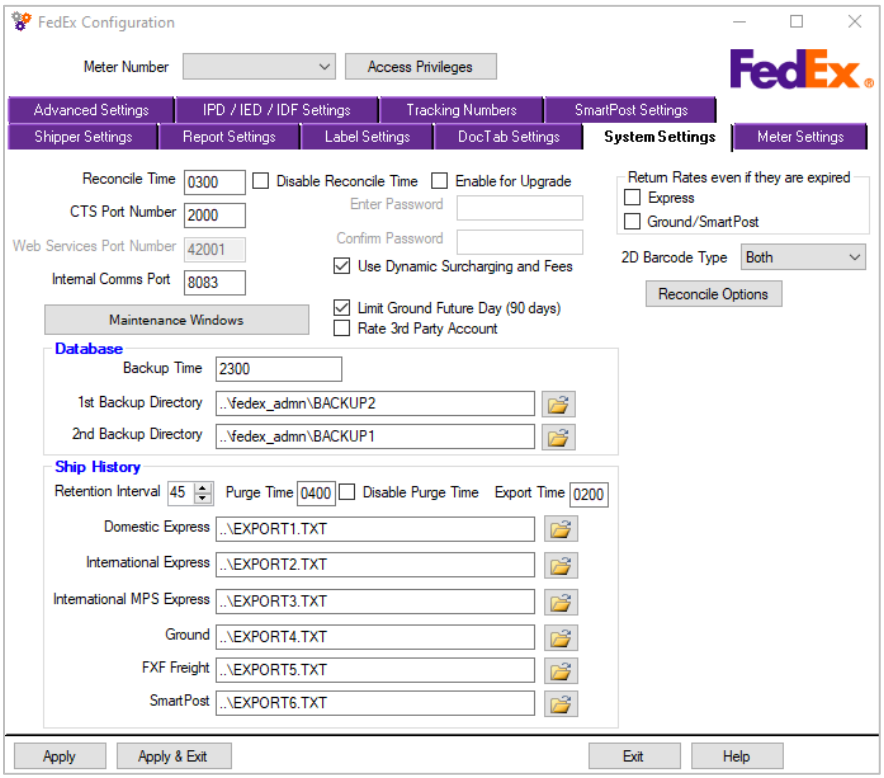
System Settings tab

Updates related to System Settings tab are as follows.

Dynamic Surcharge Fees

The checkbox, ***Use Dynamic Surcharging and Fees*** in system Settings tab is active by default. This provides applicable surcharge descriptions and fees for shipments instantly. The feature can be enabled or disabled in system Settings tab.

Figure 149: System Settings tab



The surcharge details are returned in global shipment transaction based on the selection of ***Use Dynamic Surcharging and Fees*** option in ***System Settings*** tab.
The reply displays the multi-occurrences of below tags when ***Use Dynamic Surcharging and Fees*** option is selected.

- 1945 - Standard List Dynamic Surcharge and/or Fees Code
- 1946 - Standard List Dynamic Surcharge and/or Fees Value
- 1947 - Dynamic Surcharge and/or Fees Code
- 1948 - Dynamic Surcharge and/or Fees Value
- 2848 - Alternate Dynamic Surcharge and/or Fees Code
- 2849 - Alternate Dynamic Surcharge and/or Fees Value

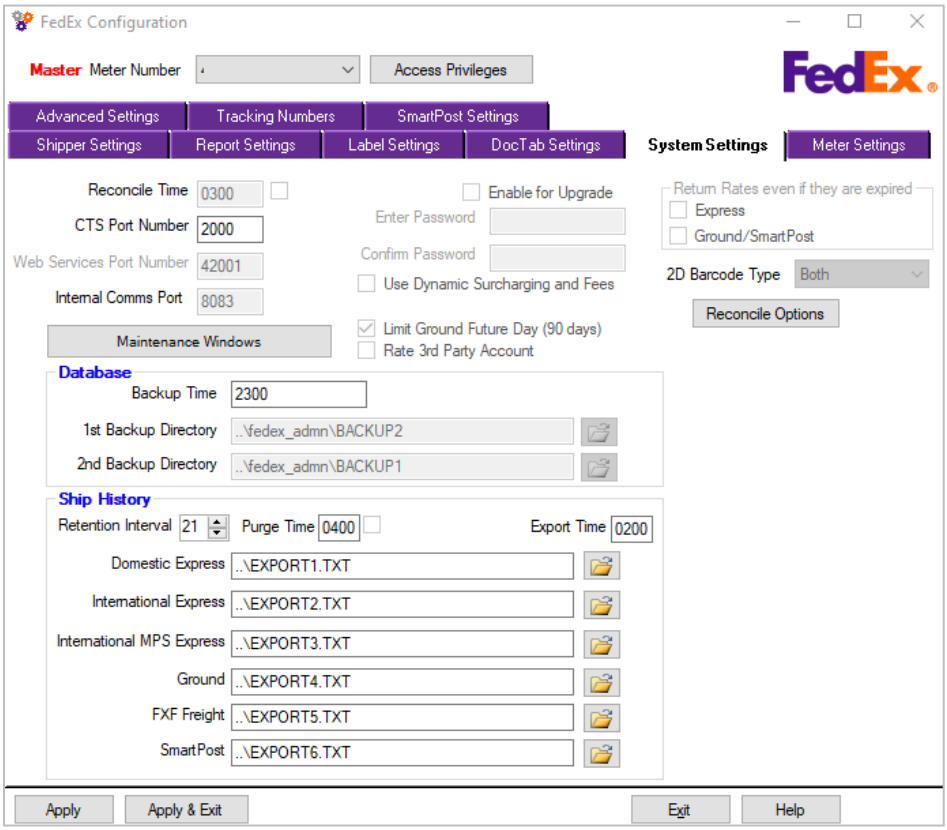
Ship History

The ***Ship History Retention Interval*** default value is updated to 21 days; The files older than 21 days will be purged. Reduction of time frame for internal log file provides additional disk space for smooth performance of the application. Refer the below image.

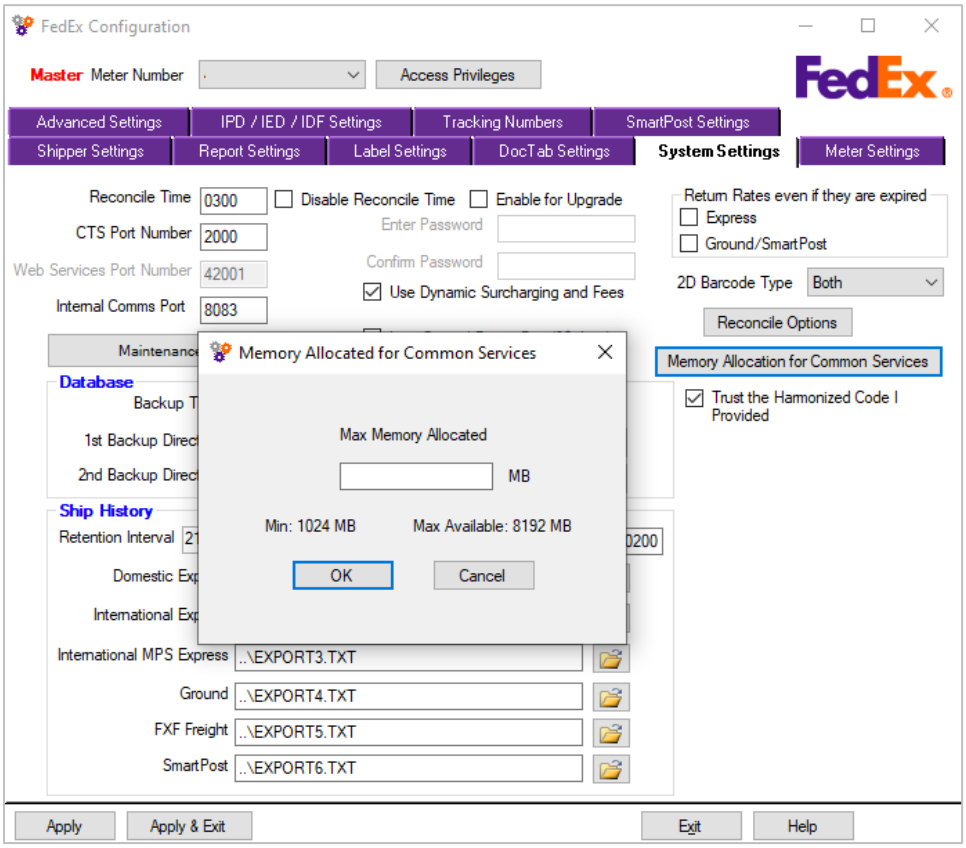
Figure 150: System Settings tab – Ship History



Memory Allocation services

A new option to allocate memory for common services is provided in ***System Settings tab***. Refer the below image.

Figure 151: Memory allocated for Common Services



The ***Memory Allocated for Common Services*** option enables to allocate memory in Megabytes(MB). The memory entry allows only numeric data.

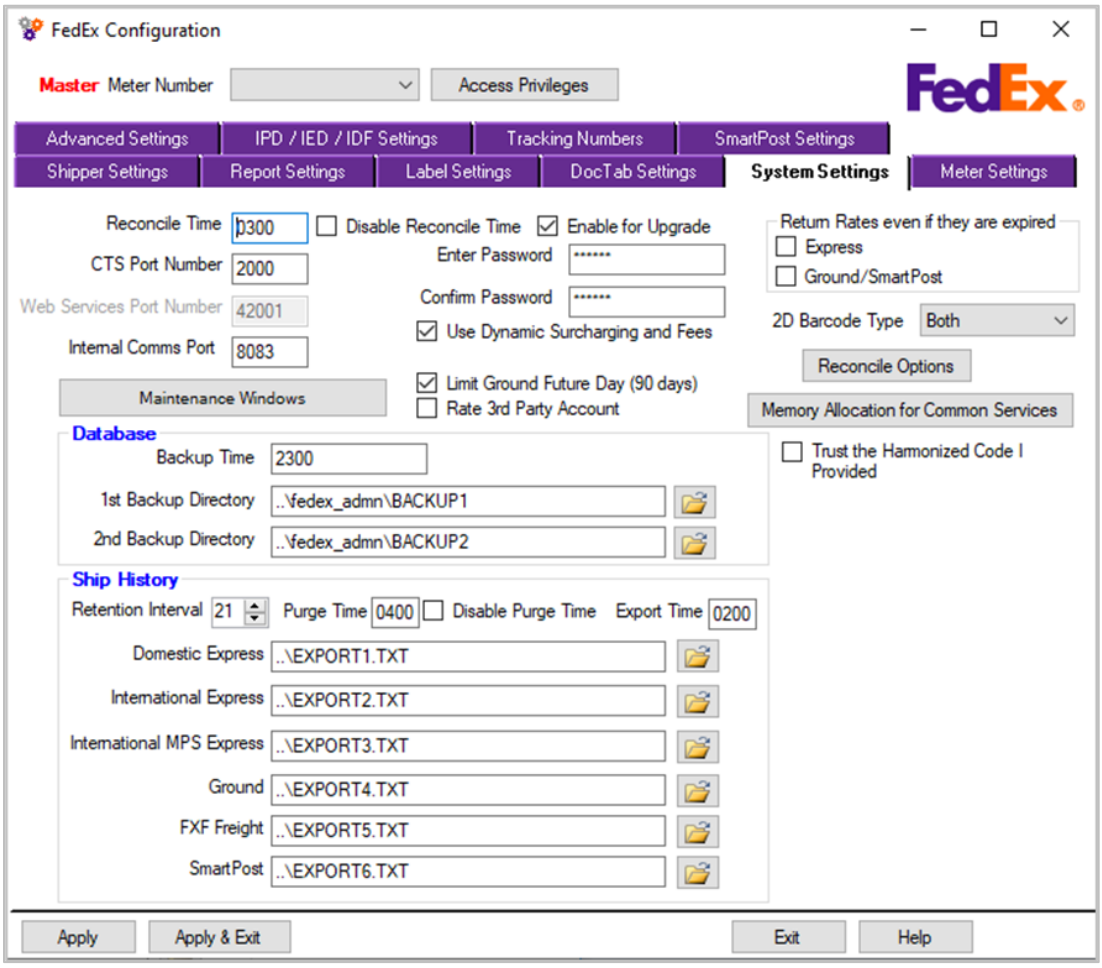
Note:

- *The modifications to memory allocations are effective after system restart.*
- *This is applicable for Master meters only.*

Trust the Harmonized Code

An option to enable/disable Harmonized code validation is provided in ***System Settings tab***. The option is disabled by default, use the ***Trust the Harmonized Code I provided*** checkbox to enable/disable validation. Refer the below image.

Figure 152: System Settings tab - Harmonized Code

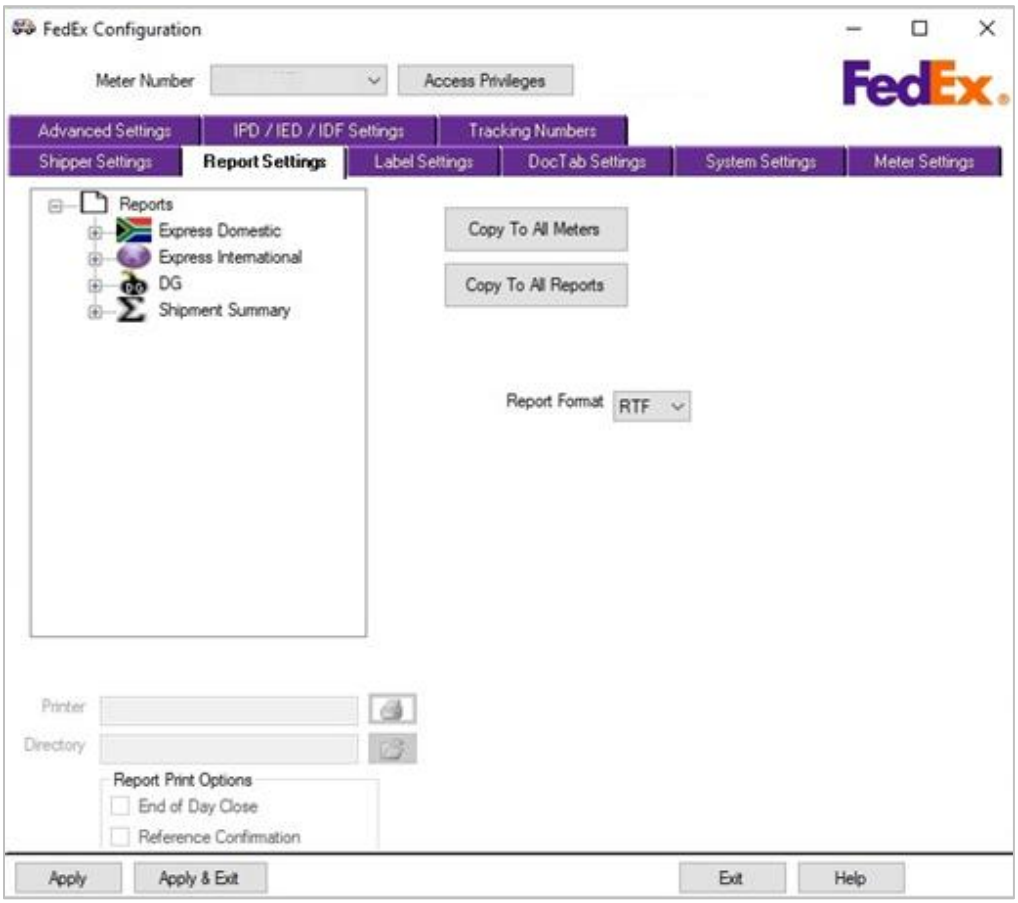


A new tag to support the Harmonized code validation is added to Meter Query transaction. Follow the link to know more about the tag ***727- Trust the Harmonized Code Provided***.

Report Settings tab

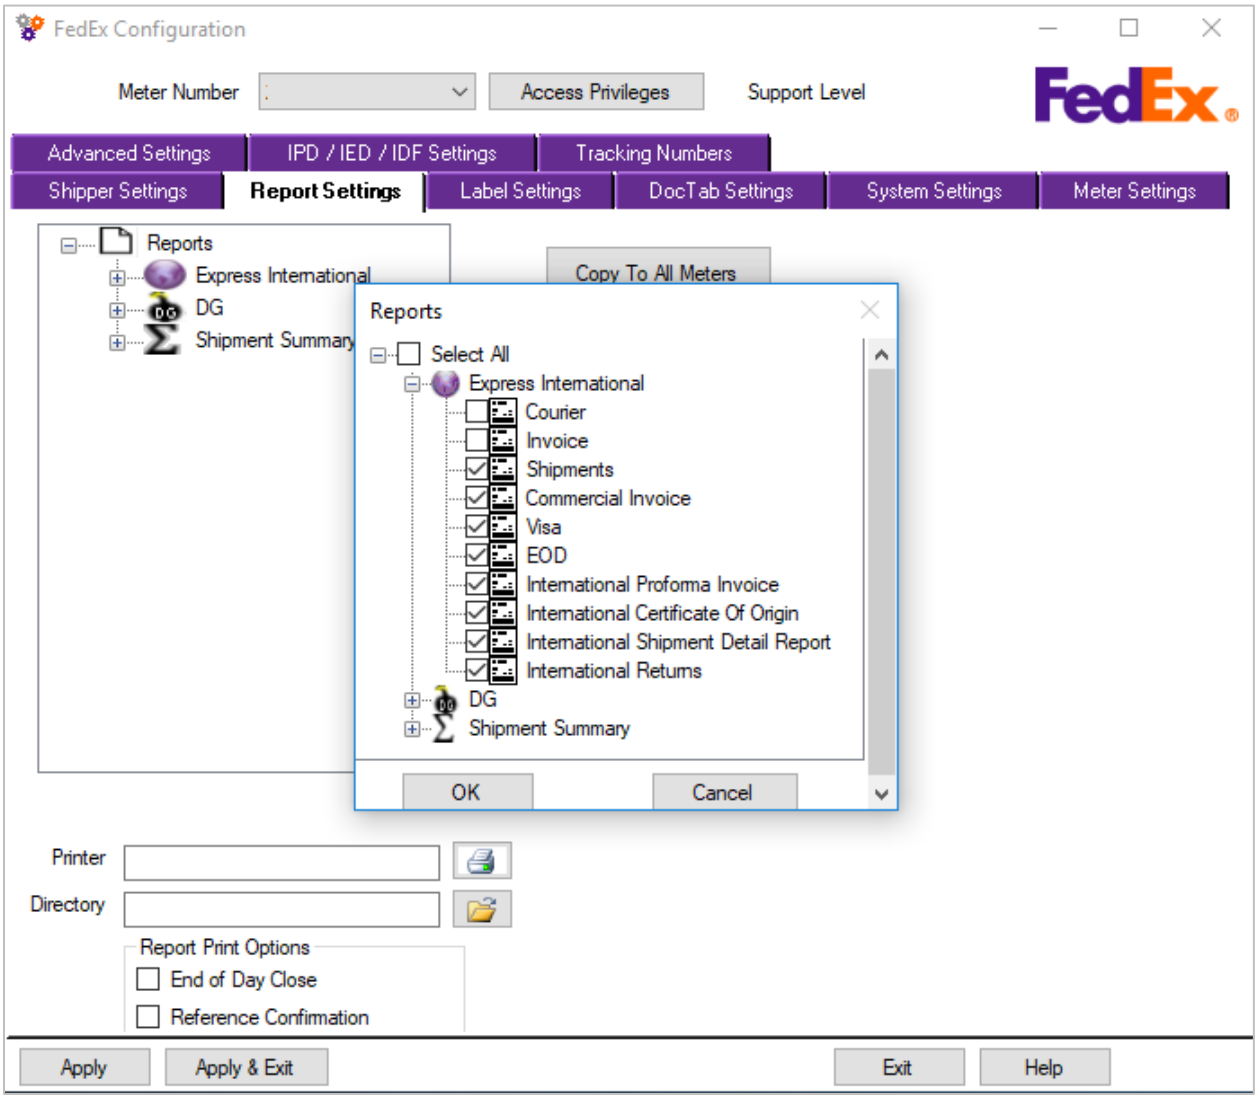
FedEx Ship Manager® Server – Report Setting tab now displays South Africa (ZA) flag for ZA meters/accounts. Refer the image below.

Figure 153: Report Settings tab



The Report Settings tab in FedEx Ship Manager® Server displays the domestic shipping country flag for Asia Pacific (APAC), Latin America and Caribbean regions (LAC), European Union (EU), and Middle East Asia and Indian sub-continent(MEISA) regions.

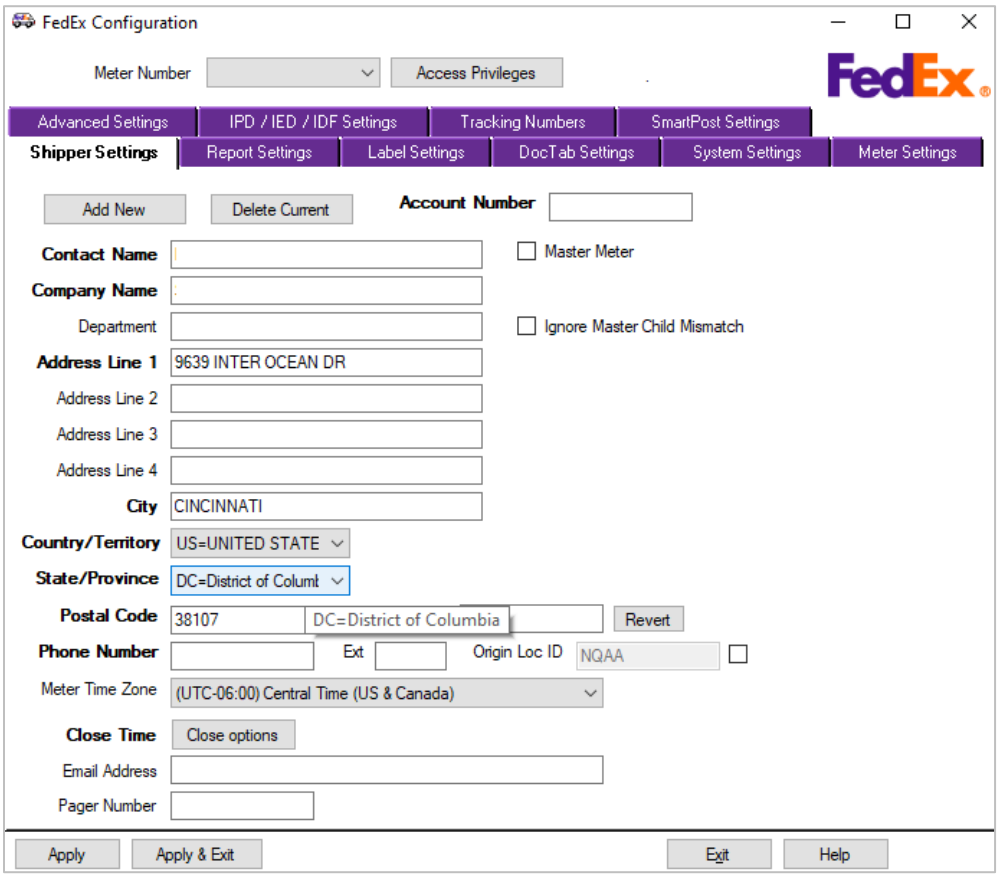
Figure 154: Report Settings tab flag for domestic shipping



Shipper Setting tab

The State/Province drop-down in FedEx Ship Manager® Server Shipper Settings tab is updated to display full description for every value selected. Refer below image.

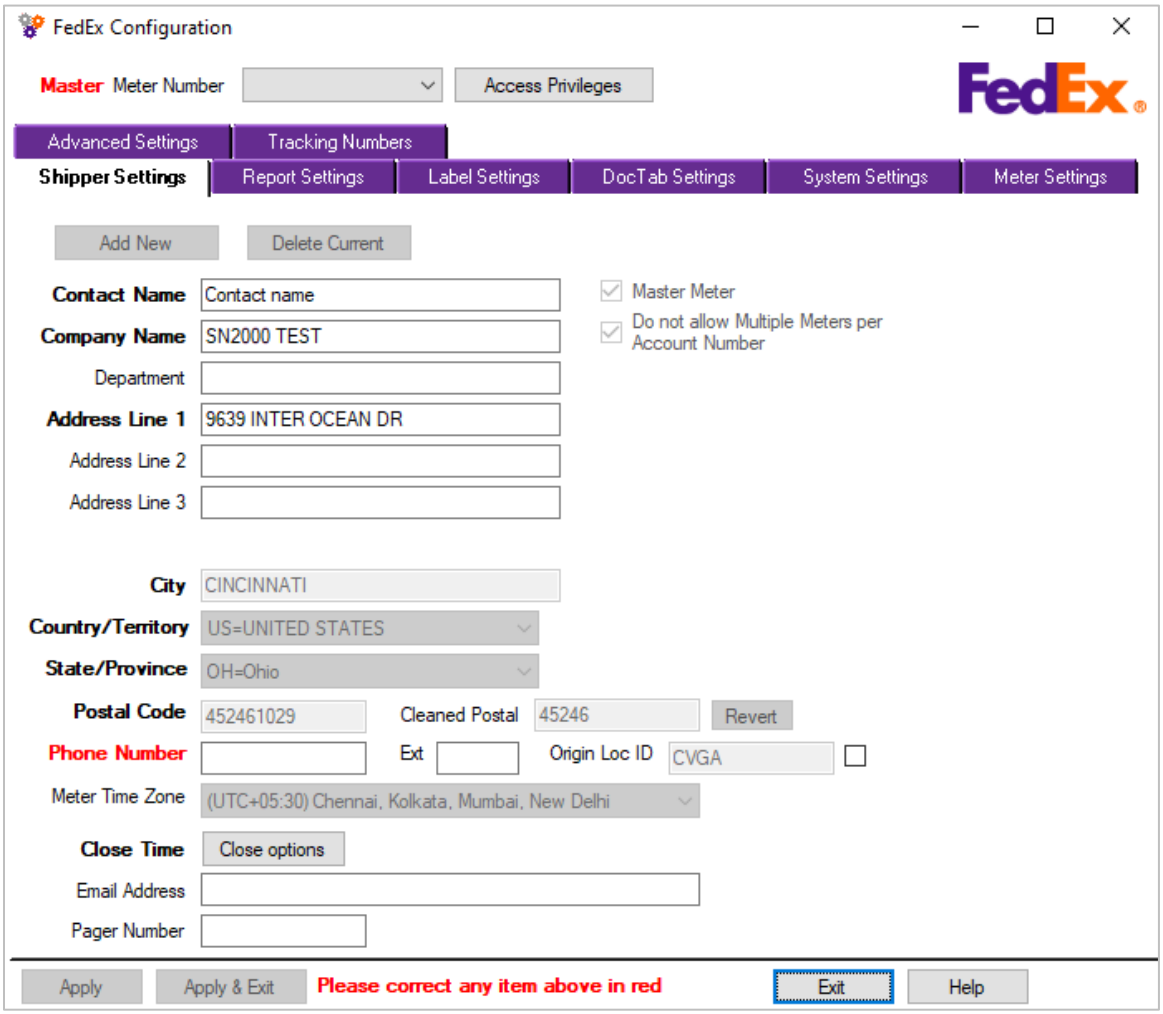
Figure 155: Shipper Settings tab



Mandatory Phone number field

The ***Phone Number*** field in ***Shipper Settings*** tab is mandatory for the shipper detail updates. Updates without a phone number displays a warning message '*Please correct any item above in red'* and the field name is displayed in red, ***Apply*** or ***Apply and Exit*** buttons are inactive until the required fields are filled. Refer the below image.

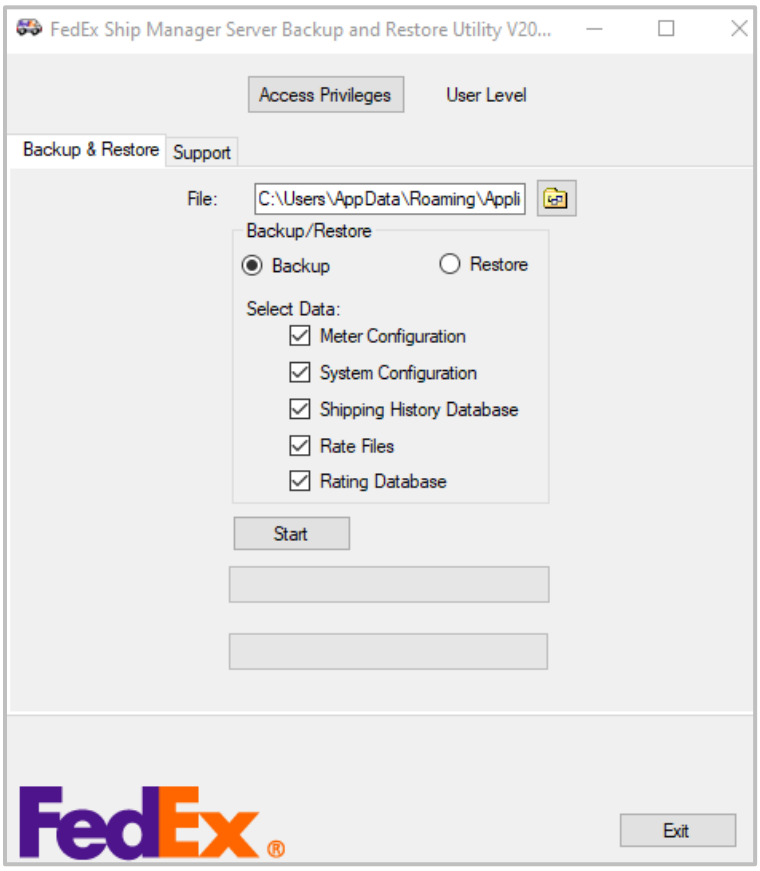
Figure 156: Shipper Settings tab - Phone number field



Backup Restore Utility Settings tab

A new option named Shipping History Database is added in Backup and Restore Utility. This option can be enabled/disabled based on user's requirement. Refer the below image. Shipping History Database option enables the backup of shipping history database. The backup includes all domestic, international, Ground® Economy and other shipment related records. Rating Database option enables the backup of new rate files.

Figure 157: Backup and Restore Utility

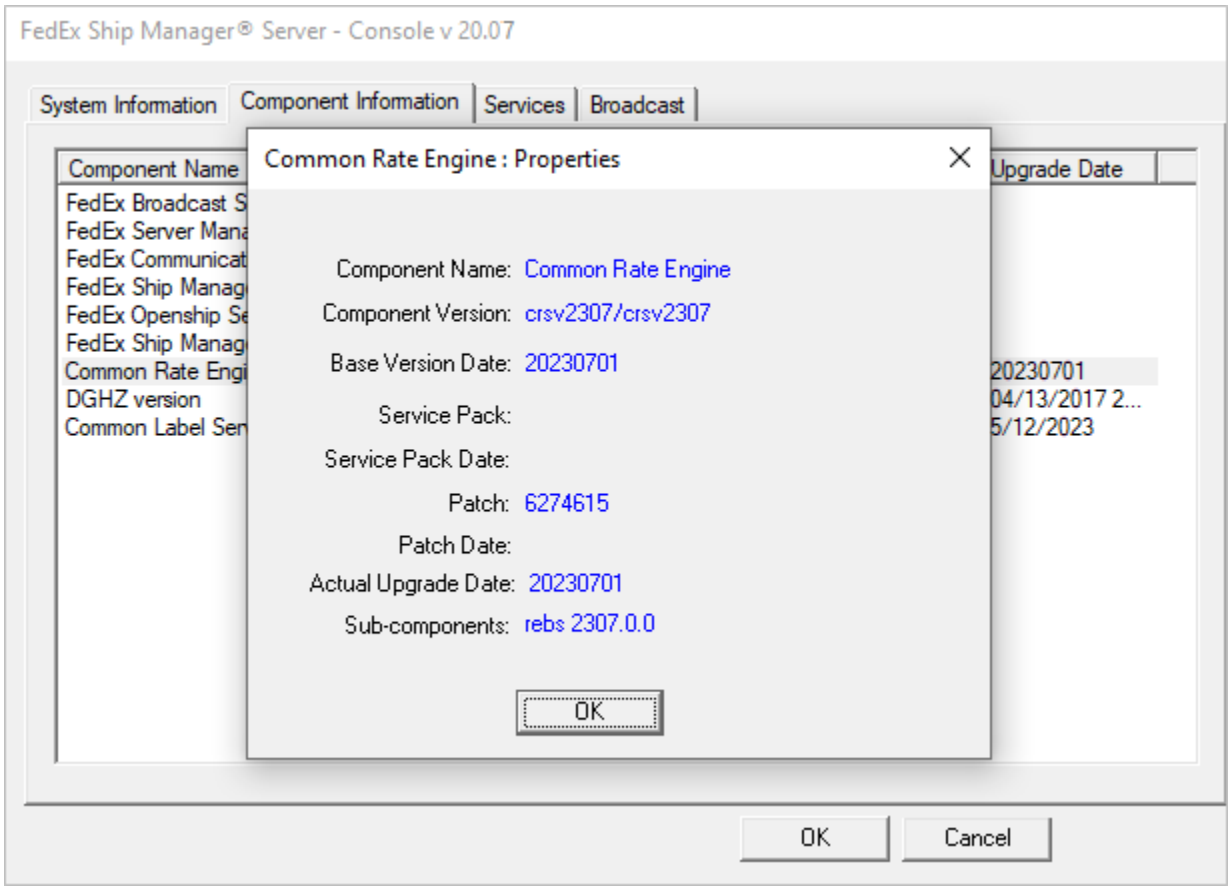


The Backup and Restore functionality now include the meter configuration and additional system data for the backup such as policy grid details. To include policy grid detail in the backup, select **Meter configuration** and **System configuration** checkbox from the available backup options as shown in above image.

FedEx Ship Manager Console Utility

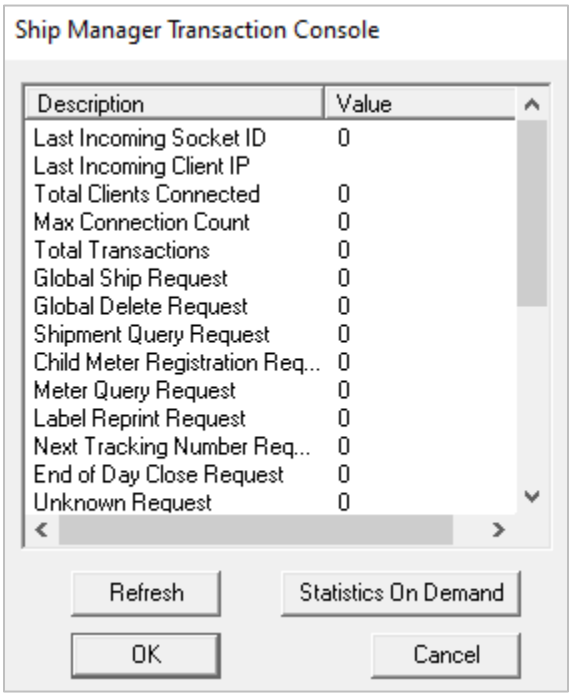
The FedEx Ship Manager® Console Utility displays an additional line-item (sub-component) and value when reviewing the properties of the Common Rate Engine. Refer to the below image.

Figure 158: Common Rate Engine properties



The FedEx utility previously known as ***Ship Manager Console***, is renamed to ***Ship Manager Transaction Console*****.** This modification avoids confusions with a pop-up window with same name in FedEx Ship Manager® Server application. Refer the below image.

Figure 159: Ship Manager Transaction Console



Report Viewer Utility

Version and copyright details are updated in FedEx Ship Manager® Report Viewer utility.

Figure 160: Report Viewer Utility

Version 20.08

Express Domestic shipment Enhancements

Express Domestic intra-country shipment services now include Belgium, Netherlands, Luxembourg (BENELUX countries), Spain, Germany, Great Britain, Czech Republic, Hungary, Romania and Malaysia, Thailand, Switzerland, Denmark, Sweden, France, and United Kingdom (UK).

Shipment updates

The supported service and packaging types options are as follows:

Service type
FedEx First® (D1)
FedEx Priority® Express (D2)
FedEx Priority® (D3)
FedEx Economy® (D4)
FedEx Priority Express Freight® (D5)
FedEx Priority Freight® (D6)
FedEx Economy Freight® (D7)

Package types
Pak
Box
Tube
Envelope
Small Box

A successful shipment transaction displays package type and services in reply transaction and the same will be printed on the shipment label.

Additionally, the transaction returns rate, package, and service type details on Express Domestic shipment label along with appropriate weight indicator for the shipment type.

Enhancements include the following in shipment reply transactions for extended countries/territories.

- Rate, package, service type details – Reply transaction displays rate, package, and service type details for the shipment.
- Local currency type is displayed for the shipments – Reply transaction displays local currency type for the shipment.
- Maximum declared limit for selected service type - The reply transaction displays an error message when the maximum service value limit exceeds.
- Domestic surcharges for applicable shipments – Reply transaction displays applicable domestic surcharges for the shipments.
- Bonus weight envelope enables – Express Domestic extended countries/territories have bonus weight envelope options enabled for the shipments.
- Additional Handling charges (AHS) based on packages.

Express Domestic sample transactions:

FedEx Surround® Monitoring and Intervention (MI) Health Care Indicator (HCID)

A dedicated shipment option for Monitoring and Intervention (MI) and Health Care Indicator (HCID) are introduced to enable customer to know the details of time-sensitive and critical shipments.

The shipment transaction with the tag ***5400 – Add Service option*** provides the following details for any Health Care enabled account.

Table 140: MI Special Services

Special Service name	FedEx Service Option Code	MI value for tag	Description
FedEx Surround® Elite	MI1	M1	Helps to monitor shipments, mitigate risk, and provide intervention support to protect healthcare shipments. *Note: MI labels MI1, MI2, MI3 are applicable for 1D and 2D Barcodes. MI1 is currently unavailable for all customers/regions.*
FedEx Surround® Premium	MI2	M2	
FedEx Surround® Preferred	MI3	M3	
FedEx Surround® Select	MI4	M4

Note: Double quote character --- " --- is disallowed, Reverse apostrophe / tick character --- ‘ --- can be used in place of the standard apostrophe character ' (when the apostrophe character is included in a transaction, it is re-mapped to the reverse apostrophe / tick character).

FedEx Express® and FedEx Ground shipment Reports

FedEx Express and Ground shipment Reports now will have the chosen service names on shipment reports.

Export Accompanying Document (EAD) number for Germany shipment

An Export Accompanying Document (EAD) is required for a German Export shipment exceeding 1000 Euros.
An option to enable/disable Export Accompanying Document (EAD) for Germany outbound shipments is provided in *System Settings* tab. The checkbox ***Germany EAD Required*** enables/disables the EAD, if shipment is Germany outbound shipment.
Refer *Chapter 3System Settings tab.*

International MPS Shipment

The Multi-piece international shipments are not bundled during rating when an end of the Day/ close shipment is processed.

Refer to the following transaction sample.

Dynamic Surcharge

New Dynamic Surcharge codes are added to dynamic surcharging field tags, details are given below.

New codes	Surcharge Description
241	Toll - Germany Only
242	Multi Piece Shipment
243	High Density
244	Enhanced Security
245	Single Piece
246	Receiver Pay (bill consignee)
694	OVERWEIGHT
800	OTHER SURCHARGE

Additional Handling Surcharge

Additional Handling surcharge (AHS) Packaging options for rate/route or shipping transaction with tag # 3018. Non-Standard Container includes the following surcharges:

- AHS Dims
- AHS Weight
- Non-Standard Packaging
- Oversize
- AHS Freight

The tag 3018 –Non-Standard Container Flag included in package level shipment is applicable at Master level account only. Child level will inherit the Non-Standard Container Flag only at shipment level. Any related child packages will not inherit the options. Refer the below sample transactions.

Sample 1: Additional Handling Surcharge – Package Dimension

Tag updates and Sample transactions

Renamed tags

The below set of tags are renamed, and the details are in the below table.

tag #	Old Name	New Name
650	Tracking Number Tag	Operational Element No. 2 - Tracking Number Tag
651	Form Code	Operational Element No. 3 - Form Code
652	Master Tag and Number	Operational Element No. 4 - Master Tag and Number
653	FXE Routing Code	Operational Element No. 5 - FXE Routing Code
654	FXE Facility Sort Code	Operational Element No. 6 - FXE Facility Sort Code
655	Piece Count	Operational Element No. 9 - Piece Count
656	Tracking Number	Operational Element No. 10 - Tracking Number
657	Master Form Code	Operational Element No. 11 - Master Form Code
658	Planned Service Level	Operational Element No. 12 - Planned Service Level
659	Product Name	Operational Element No. 13 - Product Name
660	Special Handling Acronyms	Operational Element No. 14 - Special Handling Acronyms
661	Destination Postal Code	Operational Element No. 15 - Destination Postal Code
662	Destination State-Country	Operational Element No. 16 - Destination State-Country
663	Destination Airport	Operational Element No. 17 - Destination Airport
2551	Transaction Log Retention Period	Transaction Log Retention Period (days).

Memory Allocation for Common Services -Tag 726

Description for the tag *726 – Memory Allocation for Common Services* is updated. The details are given in the below table.

“This tag is used to allocate memory for Common Services FedEx Ship Manager® Server and is considered a maximum value. This tag is used as a reply tag in 070/170 Query transaction or update or to list meter information. The value for this tag is represented in megabytes, for example in a transaction: 726,"1024" = 1024 MB.”

Express Rate Pricing Option - Tag 731

Details for the tag 731 – Express Rate Pricing Option is updated.

Figure 163: tag 731

Tag characteristic	Old value	New value
Field Level	Package	Shipment
Multi-occurrence	"yes"	"no"

004/140 Tracking number transaction

During a 004/140 – Tracking number Request/Reply transaction, an error message is displayed for SmartPost Delivery confirmation, when current range of tracking numbers are exhausted or unavailable.
Sample transactions:

Table 145: 004/140 transaction sample

Request	Reply

Enable Label Logging capability – Tag 732

A new tag 732 – Enable Label Logging capability is provided to enable or disable the Label logging capability.

Figure 164: Tag 732 - Enable Label Logging capability

Field ID	Field Name	Update	Affected Transaction
732	Enable Label Logging capability	New Field	020 Global shipment transaction
	Description This tag will represent the enablement / disablement for capturing a label transaction to an appropriate log file for a shipment. The tag is used in either a 070-list meter information, or as a parent for a sister tag #729 Label Logging Retention Period (days). **Valid values** N – Do not generate label logging file Y – Generate label logging file		
	Type: A (Alphabet)	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: No	**Input/Output:** I/O	**Carrier:** FDXE, FDXG, FDXS
	Default Value: N	**Optionality**: Optional	**Level**: NA
	Service Impacted: Shipping		

050 - Service Types and Special Services request transaction

- The ***050 - Service Types and Special Services request transaction*** now returns updated details when the tag #1989 function is included. The values for the tag 1989 - 4 ("Versioning") / 5 ("Available Software Updates") / 6 ("Update Software Now") and tag 497-Master meter number is displayed in150- reply transaction.
- The 170 – Meter Query reply transaction now displays tag 497-master meter and tag 498- meter number in the list of meter information.

Note: The master meter number is displayed for transactions performed with both master and child meter.

- An Error message '*Shipper Account Number cannot be found in the system'* is displayed when an invalid or non-configured meter is used in the 050/150 Service types and Special services transaction.

Allow Intra-country Shipping Flag - Tag 735

A new tag, ***735- Allow Intra-country Shipping Flag*** is included in Meter Query Transactions. This tag indicates the applicable intra-country shipment when a Meter Query request is processed for selected meter. The details are as follows:

Table 147: Allow Intra-country Shipping Flag

Field ID	Field Name	Update	Affected Transaction
735	Allow Intra-country Shipping Flag	New Field	080/185 Country Query Request/Reply transaction
	Description This tag is used to indicate the allowance of intra- country shipping. It is an output only tag included in 185 – Country Query Reply transaction. **Valid values** Y = intra-country shipping is allowed N = intra-country shipping is not allowed		
	Type: A (Alphabet)	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: No	**Input/Output:** O	**Carrier:** FDXE, FDXG
	Default Value: N	**Optionality**: Required	**Level**: Shipment
	Service Impacted: Country Query		

085/185 Country Query transaction

When transaction is processed, the following information is displayed in the reply transaction.

- Tag 69, Carriage Value
- Tag 1266, Saturday Delivery Flag
- Tag 1267, Saturday Pickup Flag
- Tag 190, Document Shipment Flag
- Tag 1933, Commercial Invoice Language Code
- Tag 1934, Customs Documentation Requirements
- Tag 1949, Transportation Pay Type
- Tag 1950, Duty/Tax Pay Type
- Tag 1952, SED Required Country
- Tag 1953, Minimum DCV
- Tag 1955, Country Alias Flag

- Tag 5790, Letterhead / Signature Required

Tag in 085 reply transaction	Values in 185 reply transaction
Tag 117 with Sender Country Code as empty	• Tag 50, Recipient Country • Tag 735, Allow Intra-country Shipping Flag • Tag 1324, Recipient Country Description • Tag 1954, Ship to Country Flag • Tag 1955, Country Alas Flag
Tag 117 with Sender Country Code, has a valid country code	• Tag 50, Recipient Country • Tag 735, Allow Intra-country Shipping Flag • Tag 1324, Recipient Country Description • Tag 1951, Postal Aware Country • Tag 1954, Ship to Country Flag

Sample Transactions:

The tag **735- Allow Intra-country Shipping Flag** displays Y if domestic shipment is applicable and N if domestic is not applicable for a country.

Trust the Harmonized Code – Tag 727

A tag, ***727- Trust the Harmonized Code Provided*** is now available to use in 020 Shipping for Express and Ground international transactions. This tag when processed in shipping transactions ignores validation of user provided Harmonized code.

The tag can be used in following transactions:

- Rate only
- Route only
- Time in transit
- Rate and route
- Pre-validation

Sample Transactions:

Disable Backup Time flag – Tag 736

A new tag, ***736- Disable Backup Time flag*** is included in Meter Query/List Meter Information Transaction. This tag indicates the status of ***Disable Backup time*** option (enabled/disabled). The details are as follows:

Table 148: Disable Backup Time flag

Field ID	Field Name	Update	Affected Transaction
736	Disable Backup Time flag	New Field	070/170 Meter Query/List Meter Request/Reply transaction
	Description This tag is used in a 070-meter update transaction to appropriately toggle the database backup functionality. When the value is Y, the current backup database functionality is enabled. When the value is N, the current backup database functionality is disabled. The associated control in the FedEx Ship Manager® Server Configuration screen is available in System Settings tab. **Valid values** Y = disable backup functionality will be turned on N = disable backup functionality will be turned off		
	Type: A (Alphabet)	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: No	**Input/Output:** O	**Carrier:** NA
	Default Value: N	**Optionality**: Optional	**Level**: NA
	Service Impacted: NA		

The tag ***736 – Disable Backup time flag*** is displayed in List Meter Information Reply transaction.

Note: The option is available for Parent Meter/Master Meter only.

Operational Element No. 24 – Tag 734

A new tag # 743 - Operational Element No. 24 is included in shipment transactions to indicate Monitoring invention (MI) and Healthcare Identifier (HCID) fields in the shipment label. The details are as follows:

Field ID	Field Name	Update	Affected Transaction
743	Operational Element No. 24	New tag values added	020 global shipment/Routing transaction
	Description • Operational Element No. 24 field indicates the content of operational element 24— Monitoring and Intervention / Healthcare ID code. *Note: This tag is input to label generation module and output to customers at shipping time.*		
	Type: AN	**Minimum Length:** 9	**Maximum Length:** 18
	Multiple Occurrence: Y	**Input/Output:** I/O	**Carrier:** FDXE
	Valid Values: NA **Default Value:** NA **Optionality**: Optional **Level:** Piece		

FedEx Ground® Economy transaction updates

The FedEx Ground® Economy shipment service now generates barcodes that displays the following fields.

- Planned delivery day (tag # 194 Delivery Day)
- Planned deliver by date (tag # 409 Deliver by Date)
- Planned deliver by time (tag#2450 Deliver by Date)
- Days in Transit (tag# 3058 Time in Transit)

Tag Enhancements - 622, 1284, 2237, 2244, 2247, 2259, 2258 , 2563

New tags **622, 1284, 2237, 2244, 2247, 2259, 2258 , 2563** are added to the 070/170 Meter Query transaction. The tag details are as follows:

Table 150: CTS Port Number

Field ID	Field Name	Update	Affected Transaction
622	CTS Port Number	Existing Field	070 Shipment Meter Query transaction Request and Reply
	Description This tag is used to modify or retrieve the port number during the client transaction. *Note: This port currently is inactive for the listening of an incoming transaction. Any port already in use may pose a conflict, and it is suggested to use another port number. We recommend port 1000 or higher, as a lower bound value implies that the minimum length should be 4 digits, rather than 1.* **Valid values** 1 – 65535		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 5
	Multiple Occurrence: No	**Input/Output:** I/O	**Carrier:** FDXE, FDXE, FDXS
	Default Value: 2000	**Optionality**: Required	**Level**: NA
	Service Impacted: Configuration		

Table 151: Transaction Buffer Setting

Field ID	Field Name	Update	Affected Transaction
1284	Transaction Buffer Setting	New Field	070/170 Meter Query transactions
	Description This tag is used to get the transaction buffer size for an in/out transaction and to represent the number of bytes for that buffer. Valid values 10000 - Small 100000 - Medium 300000 - Large 1000000 - Extra Large ####### - Custom (when ####### from 10000 up to 3000000)

2247	Ground Hourly Upload Retention Period (days)	New Field	070/170 Meter Query transactions
	Description This tag is used to modify or retrieve the value for the FedEx Ground hourly upload retention period days for the shipment files previously transmitted & represented as the number of days. **Valid values** Minimum = 7 Maximum = 99		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 2
	Multiple Occurrence: No	**Input/Output:** I/O	**Carrier:** All
	Default Value: 14	**Optionality**: Optional	**Level**: NA
	Service Impacted: Configuration		

Batch Processing tags – 740, 741, and 742

New Tags are added for shipment Batch Processing functionality. The details are as follows:

- 740 Enable Batch Processing Flag
- 741 Batch Processing Interval (in milliseconds)
- 742 Batch Processing Folder

Table 155: Tag 740 - Enable Batch Processing Flag

Field ID	Field Name	Update	Affected Transaction

740	Enable Batch Processing Flag	New Field	070-meter query/update fields
	Description The tag is used in 070 Meter Update transaction to turn on/off the Batch Processing function found in FSMS Configuration screen>Advance Settings tab. The value of the batch processing control will be returned in a 170 reply for meter update & list meter information transaction types. The update for a transaction is applicable only for the parent meter number. This tag will have multiple child tags - 741 Batch Processing Interval (in milliseconds) and 742 Batch Processing Folder. These three tags should be used in conjunction with each other during the meter update transaction.		
	Type: A	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: N	**Input/Output:** I/O	**Carrier:** NA
	Valid Values: • Y = Enable batch processing • N = Disable batch processing **Default Value:** N Optionality: Conditionally Required Level: NA		

Table 156: Batch Processing Interval (in milliseconds)

Field ID	Field Name	Update	Affected Transaction
741	Batch Processing Interval (in milliseconds)	New Field	070-meter query/update fields
	Description This tag allows the user to modify the interval of time used to where input transactions reside for the feature called batch processing. The tag is used in 070 Meter Update transaction to turn on/off the Batch Processing function found in FSMS Configuration screen>Advance Settings tab. The value of the batch processing control will be returned in a 170 reply for meter update & list meter information transaction types. The update for a transaction is applicable only for the parent meter number. This tag is dependent upon two other tags: 740 – Enable Batch Processing Flag and 742 – Batch Processing Folder. These three tags should be used in conjunction with each other during the meter update transaction. A trailing backslash for the path must be included such as C:\BatchProcessing\.		
	Type: A	**Minimum Length:** 1	**Maximum Length:** 5

	Multiple Occurrence: N	**Input/Output:** I/O	**Carrier:** NA
	Valid Values: values range from 0 to 10000 milliseconds. **Default Value:** 500 **Optionality**: Optional This tag is an optional tag for a 070-transaction type. Specifically required when performing a meter Update, the tag needs to be used in conjunction with its parent tag # 740 – Enable Batch Processing Flag **Level**: NA		

Table 157: Batch Processing Folder

Field ID	Field Name	Update	Affected Transaction
742	Batch Processing Folder	New Field	070-meter query/update fields
	Description This tag allows the user to modify the folder location for batch processing. When batch processing is enabled, FSMS will process any .IN file in the folder. A corresponding .OUT file per .IN file is saved in the folder. The tag and its value can be sent via a 070 Meter Update transaction to appropriately set the value for the associated control found in the FSMS Configuration screen>Advance Settings tab. The value of the batch processing folder control is displayed in a 170 reply for both meter update & list meter information transaction types. The update for a transaction is only applicable against the parent meter number. This tag is dependent on tags: 740 – Enable Batch Processing Flag and 741 – Interval (in seconds). These three tags should be used in conjunction with each other during the meter update transaction. A trailing backslash for the path must be included such as C:\BatchProcessing\.		
	Type: A	**Minimum Length:** 1	**Maximum Length:** 255
	Multiple Occurrence: N	**Input/Output:** I/O	**Carrier:** NA
	Valid Values: any valid folder path up to 255 characters (ex: C:\BatchProcessing\). **Default Value:** 0 **Optionality**: Conditionally Required This tag is optional for 070-transaction. Specifically required when performing a meter Update, the tag needs to be used in conjunction with its parent tag # 740 – Enable Batch Processing Flag **Level**: NA		

Lithium Batteries/cell Sub Special Services - Tag 7801

New values are added to the tag 7801 - Lithium Batteries/cell Sub Special Services, the details are given in the table below.

Table 158: Tag 7801 values update

Field ID	Field Name	Update	Affected Transaction
7801	Lithium Batteries/Cells Sub Special Services	New tag values added	070 meter query/update fields
	Description Lithium Batteries/Cells Sub Special Services field allows to specify the type(s) of small quantities or low watt hours Section II Lithium Batteries/Cells contained in the package. There are 6 sub special service types of lithium batteries and cells. *Note: Second level of multiple occurrences need to be used in case of single-shot multiple piece transaction. For example: 7801-1-1 (7801-<package index>-<tag 7801 occurrence>)*		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: N	**Input/Output:** I/O	**Carrier:** FDXS
	Valid Values: • 1 - Ion Packed with Equipment (UN3481, PI966) • 2 - Ion Contained in Equipment (UN3481, PI967) • 3 - Metal Packed with Equipment (UN3091, PI969) • 4 - Metal Contained in Equipment (UN3091, PI970) • 5 - Ion Standalone (UN3480 with SP188) • 6 - Metal Standalone (UN3090 with SP188) **Default Value:** NA **Optionality**: Optional **Level:** Piece		

Table 159: Hourly Upload Retention Period (days)

Field ID	Field Name	Update	Affected Transaction
2259	Hourly Upload Retention Period (days)	New Field	070/170 Meter Query transactions
	Description This tag is used to modify or retrieve the value of the hourly upload retention period days for the shipments, that was previously transmitted and expressed in dates. **Valid values** Minimum = 7 Maximum = 14		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 2
	Multiple Occurrence: No	**Input/Output:** I/O	**Carrier:** All
	Default Value: 14	**Optionality**: Optional	**Level**: NA
	Service Impacted: Configuration		

Table 160: Express & Ground Hourly Upload Interval (minutes)

Field ID	Field Name	Update	Affected Transaction
2258	Express & Ground Hourly Upload Interval (minutes)	New Field	070/170 Meter Query transactions
	Description This tag is used to modify and retrieve the hourly upload interval of FedEx Express® and FedEx Ground Intraday shipments that are expressed in minutes between each download. **Valid values** Minimum = 10 Maximum = 120		
	Type: N	**Minimum Length:** 2	**Maximum Length:** 3
	Multiple Occurrence: No	**Input/Output:** I/O	**Carrier:** All
	Default Value: 10	**Optionality**: Optional	**Level**: NA
	Service Impacted: Configuration		

Table 161: Communication Logging Retention Period (days)

Field ID	Field Name	Update	Affected Transaction
2253	Communication Logging Retention Period (days)	New Field	070/170 Meter Query transactions
	Description This tag is used to modify or retrieve the value for communication log files retention period days for the shipments. **Valid values** Minimum = 1 Maximum = 7		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: No	**Input/Output:** I/O	**Carrier:** All
	Default Value: 3	**Optionality**: Optional	**Level**: NA
	Service Impacted: Configuration		

Table 162: Label Buffer Retention (days)

Field ID	Field Name	Update	Affected Transaction
2563	Label Buffer Retention (days)	New Field	070/170 Meter Query transactions
	Description This tag is used to represent and retrieve the value set for the number of days FedEx generated label buffers to be saved, before being purged (deleted/removed) from the saved folder. **Valid values** Minimum = 1 Maximum = 3		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: No	**Input/Output:** I/O	**Carrier:** All
	Default Value: 14	**Optionality**: Optional	**Level**: NA
	Service Impacted: Configuration		

Bill 3rd Party Payment type

When a FedEx Ground® or Home Delivery transaction contains the bill 3rd party or bill recipient payment type and if the account number used in the transaction is not configured in the software, then an error or warning message will be displayed.

The rate and ship transactions display an error/warning message for below criteria;

- When the transaction contains the bill 3rd party or bill recipient payment type
- When the account number used in the transaction is not configured in the software

The transactions samples for FedEx Express® and FedEx Ground® shipments are as follows:

The informational tags 557/558/559 are used in the below sample.

Table 163: Sample transactions for 3rd Party payment type

Payment type	Service type	Reply transaction sample
Bill 3rd Party	Any FedEx Express®	No error or warning message.
Bill 3rd Party	FedEx Ground®	Warning message. ... 557,"02" 558,"5038" 559,"**Payer Account Number is not configured**". ...
Bill 3rd Party	FedEx Ground® Economy	Error message ... 560,"**com.fedex.rate.RatingException: Account Number is missing or invalid"** ...
Bill 3rd Party	Home Delivery	Warning message ... 557,"02" 558,"5038" 559,"**Payer Account Number is not configured**". ...
Bill Recipient	Any FDXE	No error or warning message.
Bill Recipient	GROUND	Warning message ... 557,"02" 558,"5038" 559,"**Payer Account Number is not configured**". ...

HS Code error message update

The Harmonized Search error message format is updated as the following.

'The Harmonized code provided (######) for [commodity_line_item] does not match the derived Harmonized code (######) for the description provided [commodity_description_here]'

Sample transactions for select/clear ***Trust the Harmonized code I provided*** checkbox in *System Settings tab.*

Label Format Value/Printer Type Indicator – Tag 187

The tag *187 – Label Format Value/Printer Type Indicator* includes new values for MI & HCID Thermal Label printing options. The details are as follows:

label type	code at shipment time
Thermal - for ELTRON	899
Thermal - for ZEBRA	888

New tags are added to 070/170 reply transactions. The details are as follows:

The tags 738 and 739 is displayed in 170 reply when used with the tag 556 – process request code.

Product Key Expiration Date - tag 738

Table 166: 738 - Product Key Expiration Date

Field ID	Field Name	Update	Affected Transaction

738	Product Key Expiration Date	New Field	150/170-meter query/update fields
	Description The tag is used to provide the customer with the expiration date of an existing product key. The tag is an output only tag and the value will be returned in a 150 Versioning, or 170 list meter information reply transaction type. The format is to be MMDDYYYY.		
	Type: N	**Minimum Length:** 8	**Maximum Length:** 8
	Multiple Occurrence: N	**Input/Output:** O	**Carrier:** NA
	Valid Value: Format is MMDDYYYY. **Default Value:** NA **Level**: NA		

Link to the Development Resource Center (DRC) to view version availability – tag 739

Table 167: 739 - Link to Developer Resource Center (DRC) to view availability

Field ID	Field Name	Update	Affected Transaction
739	Link to Developer Resource Center (DRC) to view availability	New Field	150/170-meter query/update fields
	Description This tag is used to provide the customer with a link to an existing website which has available versions of software. The customer can review the content of the website and decide on whether to download a version and attempt an upgrade to the latest version. The tag is an output only tag and the value will be returned in a 150 Versioning, or 170 list meter information reply transaction.		
	Type: N	**Minimum Length:** 4	**Maximum Length:** 255
	Multiple Occurrence: N	**Input/Output:** O	**Carrier:** NA
	Valid Values: NA **Default Value:** NA **Level**: NA		

Lithium Batteries/cells Sub Special Services – tag 7801

New values ***Ion Standalone (UN3480)*** and ***Metal Standalone (UN3090)*** are added to the tag 7801 - Lithium Batteries/cells Sub Special Services. The details are given in the table below.

Table 168: 739 - Link to Developer Resource Center (DRC) to view availability

Field ID	Field Name	Update	Affected Transaction
7801	Lithium Batteries/Cells Sub Special Services	New tag values added	070 meter query/update fields
	Description Lithium Batteries/Cells Sub Special Services field allows to specify the type(s) of small quantities or low watt hours Section II Lithium Batteries/Cells contained in the package. There are 4 sub special service types of lithium batteries and cells. *Note: Second level of multiple occurrences need to be used in case of single-shot multiple piece transaction. For example: 7801-1-1 (7801-<package index>-<tag 7801 occurrence>)*		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: N	**Input/Output:** I/O	**Carrier:** FDXS
	Valid Values: • 1 - Ion Packed with Equipment (UN3481, PI966) • 2 - Ion Contained in Equipment (UN3481, PI967) • 3 - Metal Packed with Equipment (UN3091, PI969) • 4 - Metal Contained in Equipment (UN3091, PI970) • 5 - Ion Standalone (UN3480) • 6 - Metal Standalone (UN3090) **Default Value:** NA **Optionality:** Optional **Level**: Piece		

User Experience Enhancements

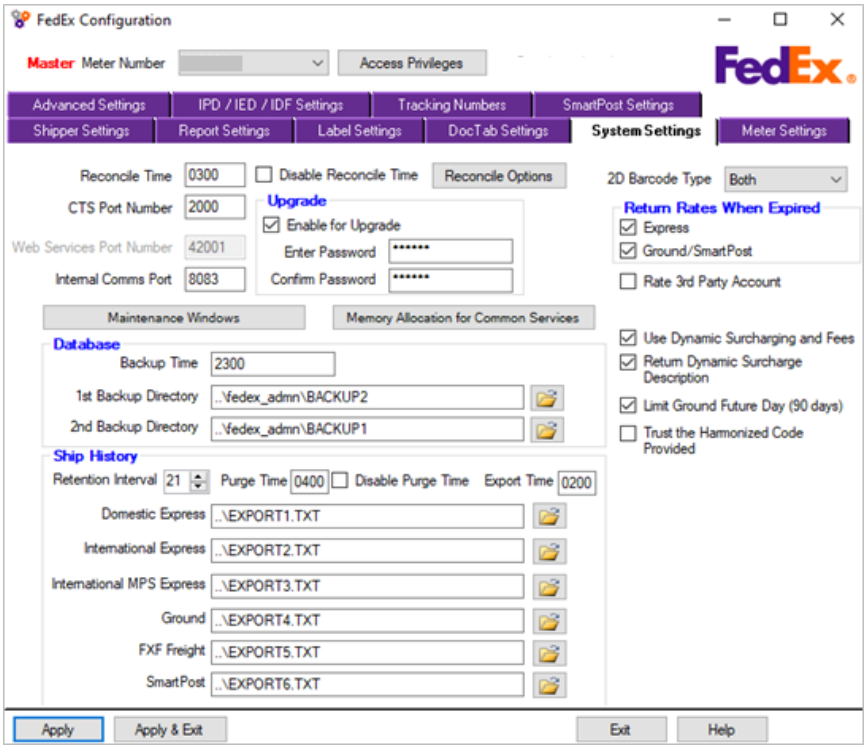
System Settings tab

Following are the enhancements to System Settings tab.

Look and feel update

The fields are rearranged for better visibility and access. Refer the below image.

Figure 165: System Settings tab



Field updates

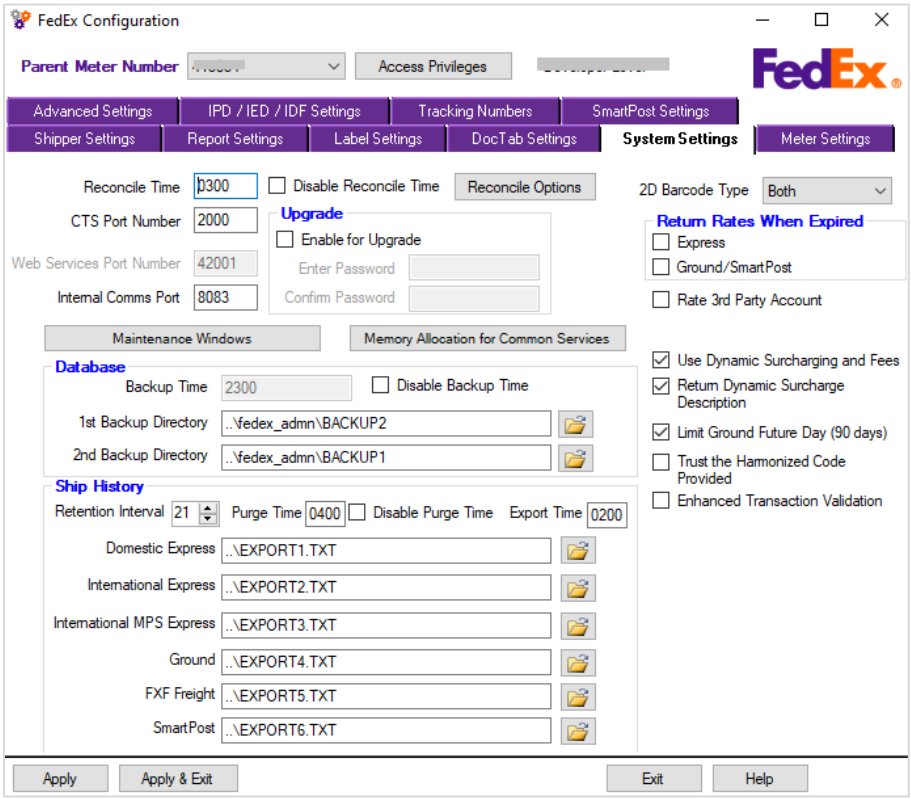
Following are the field updates for System Settings tab. Refer to the image below for updated screen.

- The checkbox option ***Return Rates even if they are expired*** in FedEx Ship Manager® Server configuration screen, System Settings tab is renamed as ***Return Rates When Expired***.
- A new option, ***Return Dynamic Surcharges Description*** is introduced in System Settings tab. This option enables the ability to display the chosen dynamic surcharge description selected for respective shipment.
- A new checkbox, *Disable Backup Time* is introduced in *System Settings tab*. This option enables the ability to Disable/Enable the Database Backup time. Refer the below image.
  Disable Backup Time checkbox works as follows:
  - if selected, the entry field for Database Backup time is enabled.
  - If deselected, the entry field for Database Backup time is disabled.
- The ***System Settings*** tab is introduced with a new checkbox, ***Enhanced Transaction Validation***. This option enables the validation of various transaction scenarios.

The checkbox is disabled by default for clean install versions, upgraded versions carry the settings set by the user, from previous version.

- A checkbox, ***Germany EAD Required*** is provided for Germany meters. This enables/disables the EAD for Germany outbound shipments. The checkbox is visible only for the Germany meters.

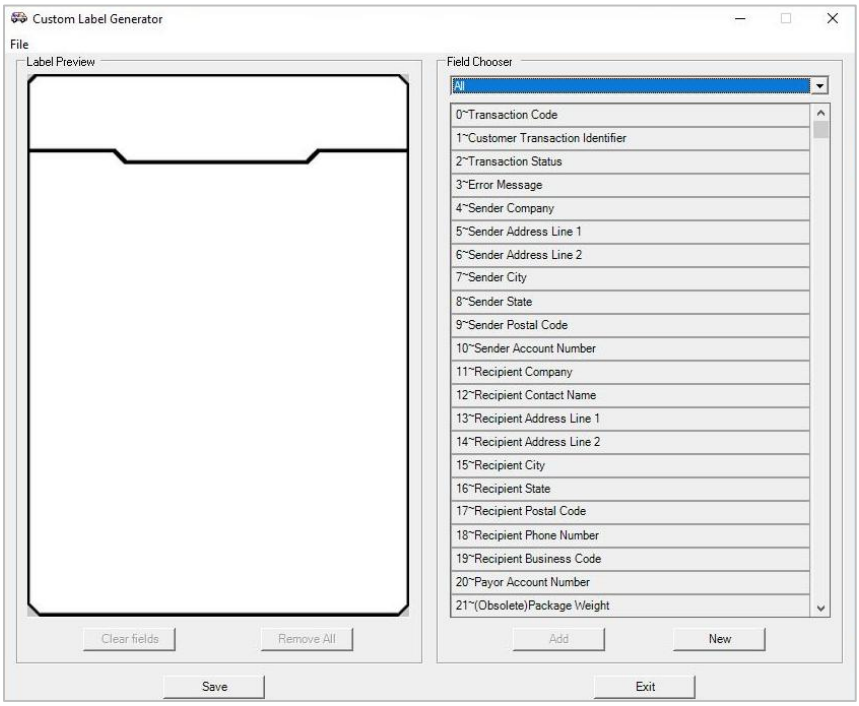
Figure 166: System Settings tab



Custom Label Generator Utility

The Custom Label Generator Utility is updated with latest options. Refer the below image.

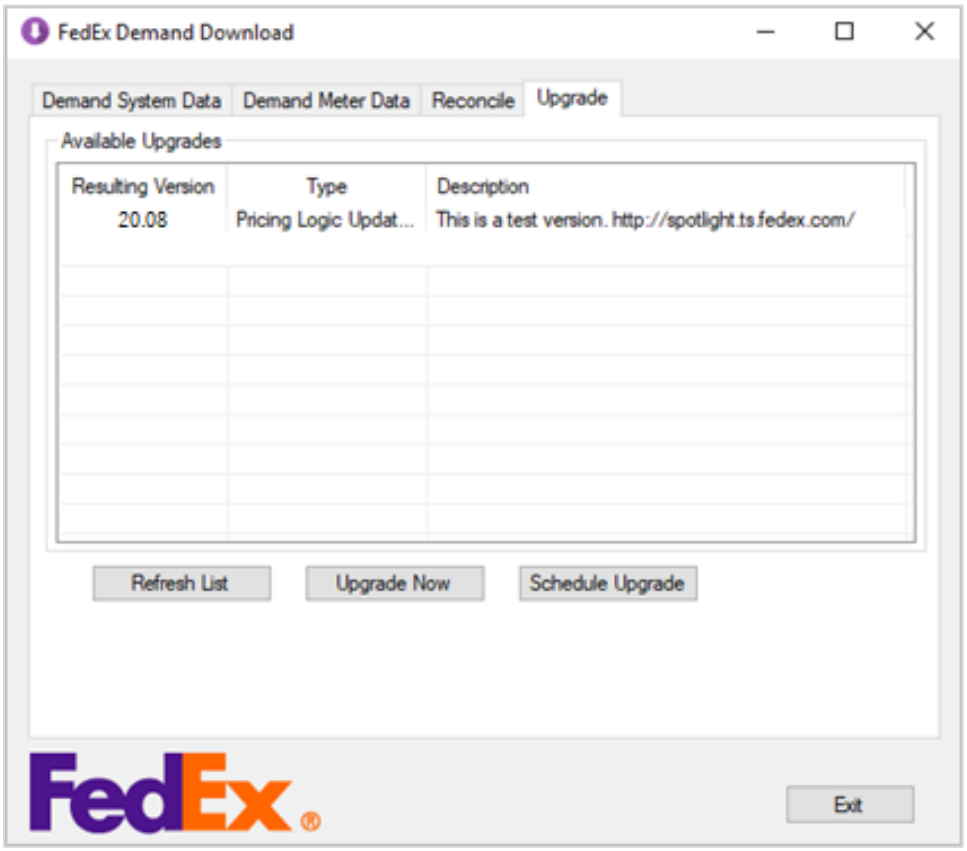
Figure 167: Custom Label Generator Utility



Upgrade Utility tab

A new tab, ***Upgrade Utility tab*** is introduced in ***Demand Download Utility***. This tab displays details about the availability of upgrade version for current FedEx Ship Manager® Server family. Ex: 200x family, 180x family, etc. The ***Upgrade Utility tab*** is displayed after the successful upgrade of FedEx Ship Manager® Server application.

Figure 168: Demand Download Utility – Upgrade tab



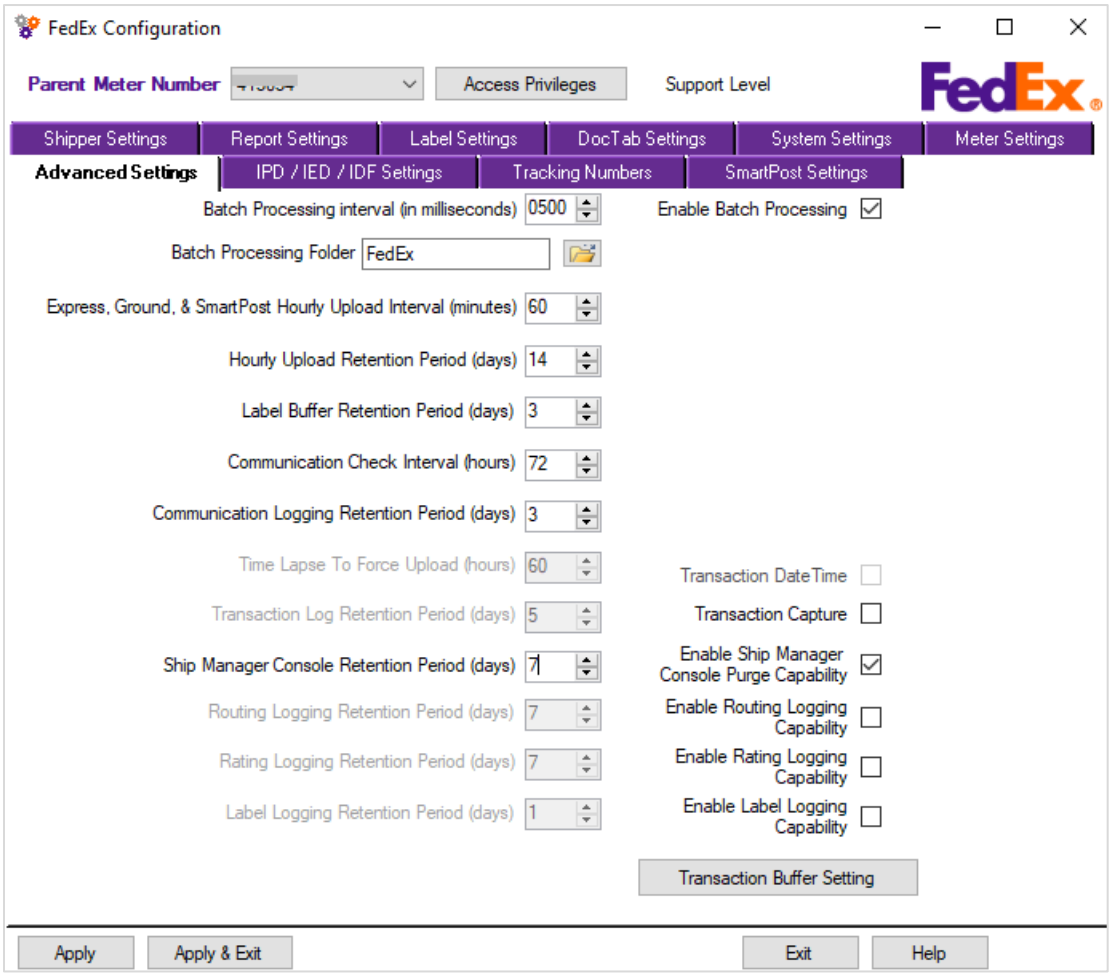
Advanced Settings tab

Following enhancements are included in Advanced Settings tab. Refer to the below image for updated screen.

- The *Advanced Settings* tab introduces new option called ***Enable Label Logging Capability***. This provides access to enable/disable the Label Logs.
- The field, ***Express & Ground Hourly Upload Interval (minutes)*** in ***Advanced Settings tab*** is renamed as ***Express, Ground, & SmartPost Hourly Upload Interval (minutes).***
- The Transaction Log Retention is based on the ***Transaction Log Retention*** check box provided in *Advance Settings* tab. The functionality is explained as follows.
    - Check box selected: Updates & Displays the retention period. The 1st position of tag 2550 is a ***Y***.
    - Check box cleared: Displays the existing value from the authoritative data source. The 1st position of tag 2550 is a ***N***.
- A new checkbox ***Enable Batch Processing*** is available in *Advanced Settings* tab to enable/disable Batch Processing for shipments.
    - Selecting the checkbox allows you to choose an option to store the batch processing files know as ***Batch Processing Folder***. You can select a required path to store the file for future modification requirements, if any. ***Batch Processing interval)in milliseconds)*** indicates the time interval for batch processing. The time interval can be configured as per requirement using batch processing tags. The default value is 500 milliseconds.
    - To choose a path for saving Batch Processing files, select the Batch Processing folder icon, select the required folder, and then click Apply & Exit. An error message ***Please correct any item above in red*** is displayed when the Batch Processing folder path is empty, and the *apply/Apply & Exit* buttons are disabled.

- ***Ground Commercial Invoice Upload Retention Period*** is excluded from the set of options. The control is saved in configmanager.xml path admn\epdi folder.
- ***Express Hourly Upload Retention Period*** is renamed to ***Hourly Upload Retention Period.***

Figure 169: Advanced Settings tab



- A warning message is displayed when a global ship transaction is processed with an account that is not configured in the system. The sample transaction is given below.

New Thermal Label Stock options are provided for Monitoring (MI) & Healthcare Indicator (HCID) shipment requirements. The label stock option *4 x 6.75 Non Doc Tab* is available in Label Settings tab. Refer the image below.

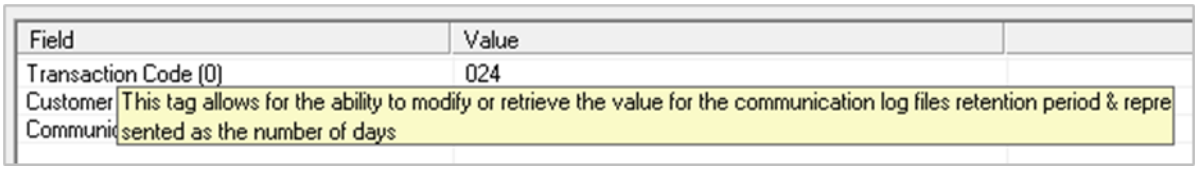
Transaction Editor Utility

- The latest description for the tag ***622 – CTS Port number and tag 2253 - Communication Logging Retention Period (days)*** is updated in transaction Editor Utility. The details are as follows:

Table 170: Tag 622 in Transaction Editor Utility

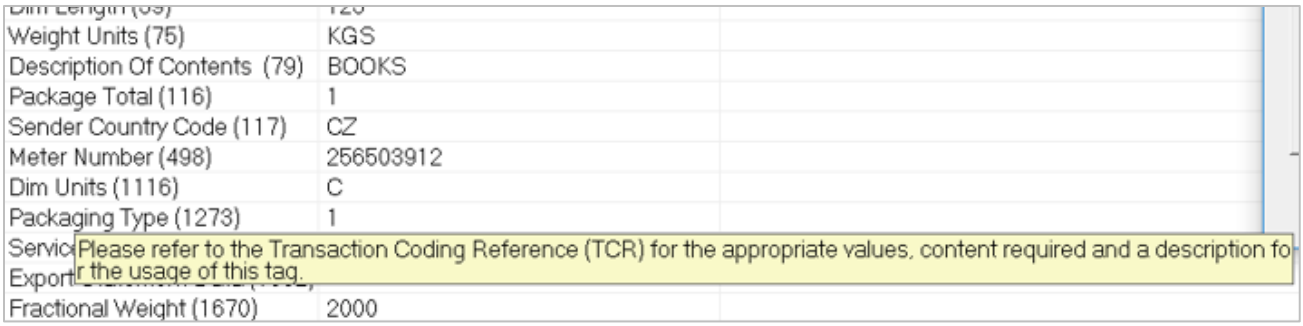
Field	Value
Transaction Code (0)	024
Customer CTS Port	This tag represents the port number for FSMS to receive / respond transactions on a particular port number. it is allowed to be used in a 070 meter update transaction & echoed back in a 170 reply transaction. it will also be returned in a 170 reply transaction when the list meter information value is included in tag 556 - Process Request Code. the valid values are between 1024 - 65535. Default Value = 2000.

Table 171: Tag 2253 - Communication Logging Retention Period (days)



- The bubble help text description for the tag, 1652- Export Statement Data is updated in Transaction Editor as shown in the image below.

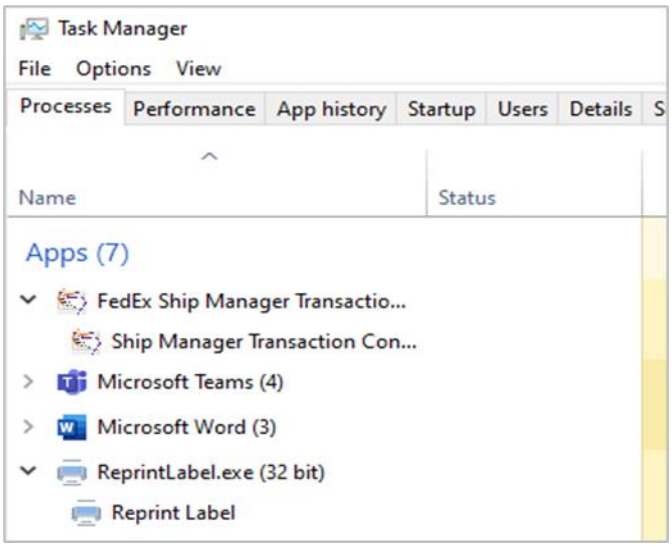
Figure 173: 1652 tag description in TransEdit



Ship Manager Console Utility

The Windows Task Manager icons for ***FSMS Transaction Console Utility and FSMS Label Reprint Utility*** parent and child instances are updated. Refer the image below.

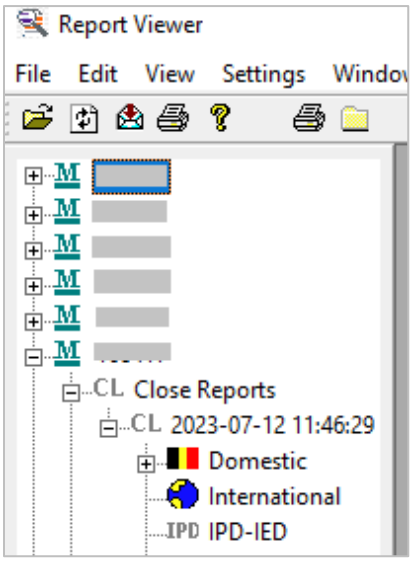
Table 172: Task Manager - Transaction Console Utility



Report Viewer Utility

Report Viewer Utility reflects the country's flag respectively for FedEx Express Domestic shipments. Refer the sample image below.

Figure 174: Sample flag in Report Viewer Utility



FedEx Backup Restore Utility

The *FedEx Backup Restore Utility* file icon is updated. Refer to the image below.

Figure 175: Backup and Restore Utility

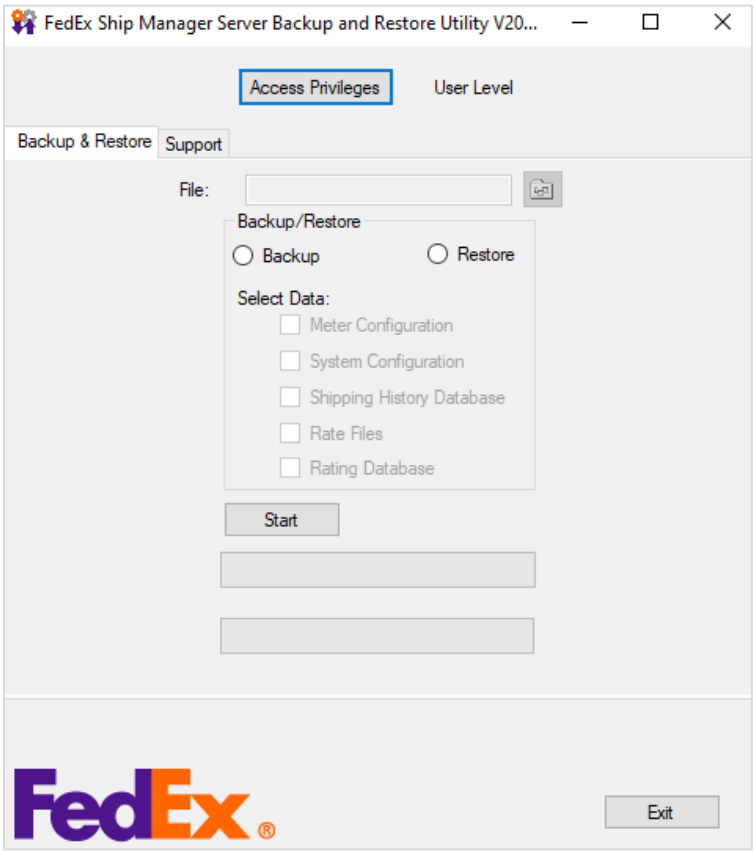


Figure 176: Backup and Restore Utility icon

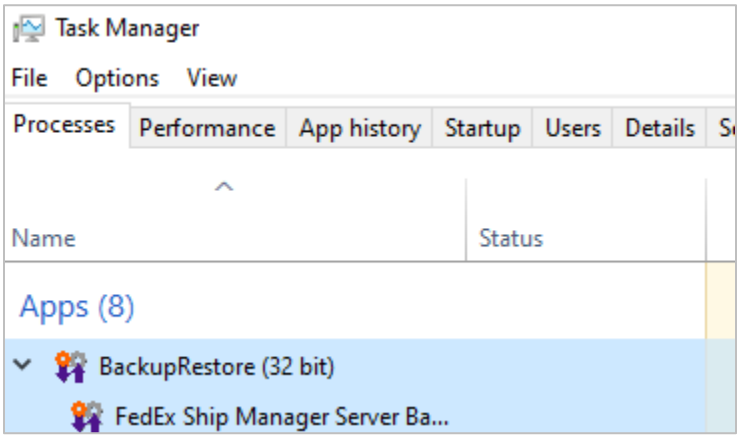
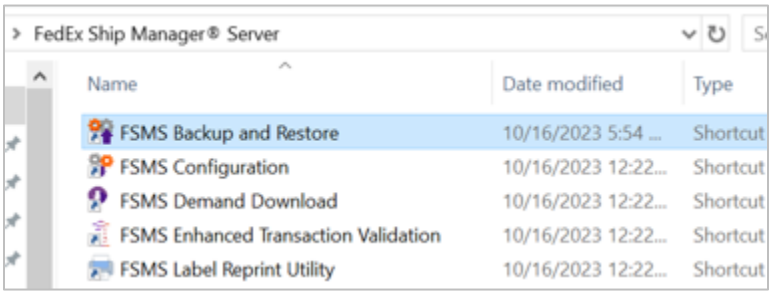


A new desktop shortcut for Backup and Restore Utility is provided after FSMS software installation. Refer to the image below.

Figure 177: FSMS Backup and Restore utility desktop shortcut



SmartPost Settings tab

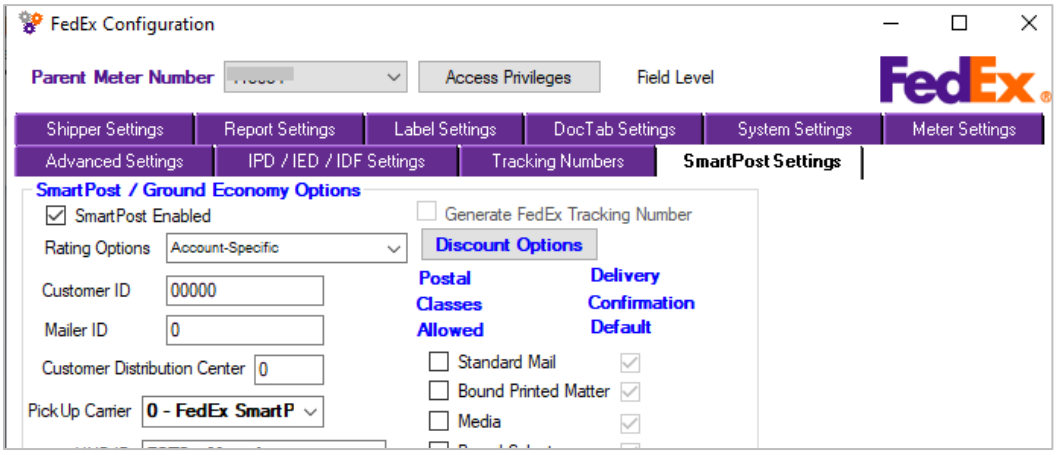
The option ***Generate FedEx Tracking Number*** checkbox in FedEx Ship Manager® Server *SmartPost Settings* tab is defaulted for the associated tracking number for the configured shipping account.

FedEx Ship Manager® Server generates a ground tracking number for small shipper and FedEx Ground Economy Returns shipment. The checkbox ***Generate FedEx Tracking number*** is enabled by default for all FedEx Ground Economy small shippers and returns.

> *Note: If Generate FedEx Ground Tracking number checkbox is selected, Ground tracking number is generated with Ground Economy tracking number, but ground tracking number will be saved. Only Ground Economy tracking number will be uploaded to shipment data.*

The checkbox is automatically enabled/disabled for FedEx Ground® and SmartPost® services based on the configuration downloaded for the account during the installation. Refer to the image below.

Table 173: SmartPost Settings - Generate FedEx Tracking Number checkbox

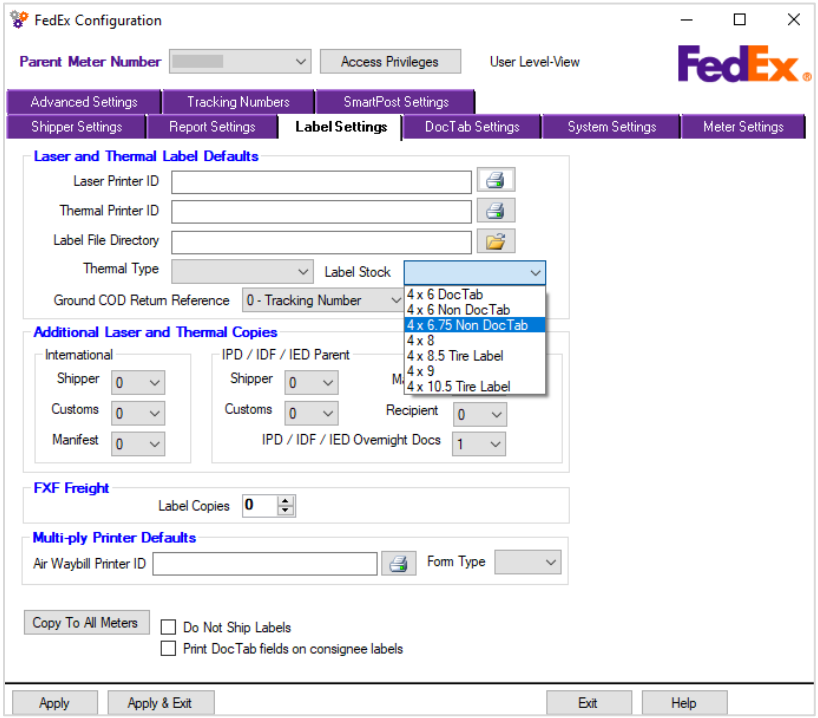


Label Settings tab

New Thermal Label Stock options are provided for MI & HCID shipment requirements. The label stock option ***4 x 6.75 Non Doc Tab*** is available in *Label Settings* tab. Refer the image below.

The label stock option 4 x 6.75 Non Doc Tab is used in tag 187 values **888 - Zebra *4 x 6.75 Non Doc Tab*** and **899 - Eltron *4 x 6.75 Non Doc Tab*** format.

Table 174: New Label stock options



Report Settings tab

The flag for Express Domestic Service is visible in Report Settings tab for the following countries.

- Sweden
- Switzerland
- Denmark
- France
- Thailand

Refer the sample image below for Denmark (DK) countries:

Figure 178: Report Settings Express domestic flag

Version 20.09

Express Domestic shipment Enhancements

Express Domestic intra-country shipment services now include South Africa and Chile.
Refer Shipment updates section for more details.

FedEx DG by Road

FedEx *DG by Road* is an extended FedEx Ground® shipment service, that allows Dangerous Goods shipment via Road. All respective shipments rules are applicable as per FedEx Ground® shipment service in addition to the following:

- Shipper Declaration documents, if any, are required to be created by the shipper.
- Shipment Surcharges are enabled for *Dg by Road* service and are automatically applied for the applicable shipments.
- To use DG by Road package, specify value "A" in the package tag 1900 along with 5400 tag to ship DG including genetically modified organisms (GMO), microorganisms.

The tag *1900 - Dangerous Goods Regulation Indicator* is provided with new value ***A- DG by Road*** to enable *DG by Road* service indicator.
Some 020 transaction service options for the Dangerous Goods shipment are as follows:

OD Pair	Service option on label
ES- ES	RRE/EBB/REQ
GB-GB	GMM
FR-FR	RDS

DG by Road service options are applicable at package level and the same will be uploaded in *PackageLevelServiceOptions* Policy Grid.

The 020 Global and International/intra-country shipment request processed with Tag#5400=97, Tag#1669=Y & Tag#1900=A results in the following:

- Overrides 1669 by 5400. Example: Tag 1669=Y will be replaced by tag 5400=97(DG by Road)
- The label with code 'REQ' is generated.
- The HUF (Hourly Upload File) with DG details and label code/Epic code, offering ID and description is uploaded.

FedEx International Deferred Freight

A global deferred air freight service, ***FedEx Deferred Freight (FDF)*** fills the delivery gap for air freight packages to fulfill end-to-end delivery service. The sub service is applicable for ***FedEx International Freight (IPF)*** and ***FedEx International Economy Freight (IEF)*** shipments. This includes parcel delivery services included with International Freight shipments with no additional value.

- Service name: FedEx Deferred Freight (FDF)
- Service code: F4
- All Business rules applicable under IEF is supported.
- Available parcel options: Door-to-Door, Airport to Airport, Door to Airport, and Airport to Door.
- Service includes U.S domestic and non-U.S. domestic shipments.

Notification of Product Key Expiration

A Notification for Product Key expiration is displayed in FedEx Ship Manager Server Configuration screen. The expiration date is displayed in CCYY-MM-DD format. Example: 2024-07-11 for 11th July 2024.

1. The notification is displayed with the *Version number, build number and the build date* indicating the days left for Product Key expiration in the following screens:
    a. FedEx Ship Manager Console
    b. FedEx Ship Manager Configuration - System Settings tab
    c. FedEx Ship Manager Transaction Console
2. The notification is displayed in red when product key is expired.

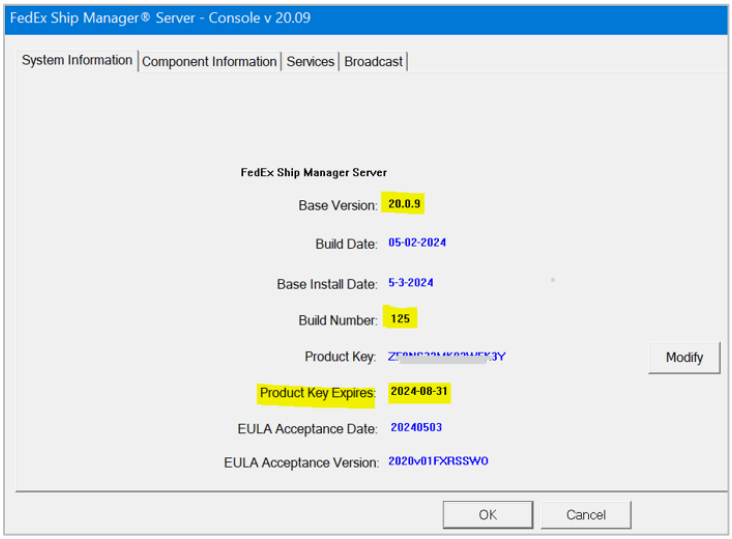
Product Key update:

1. User is required to update Product Key in case of expiration using the *Modify* button provided in FedEx Ship Manager Server Console. Refer to the image below.
2. The successful update of correct product key displays a message for successful update of Product Key and the invalid/incorrect Product Key entry will display error – '*Product key entered is invalid.*' or '*Product key entered is expired.*'

Note: After three unsuccessful attempts, the Modify option is disabled and the option to modify Product Key is no longer available. Reach out to FedEx Support for further help.

3. Once the Product Key update is validated, the message '*Product key has been successfully updated'* is displayed and the new Product Key is visible in **FedEx Ship Manager® server Console** screen.

Figure 179:Produck Key Expiration - FedEx Ship Manager Server Console



The following tags are associated with Product Key expiration:

4. 738 – Product Key Expiration Date: The expiration date is calculated based on value containing the number of days left for product key expiration. This tag value is returned in 150 and 170 transactions.
5. 739 – Link to Development Resource Center (DRC) to view version availability – provides the link to check for available versions to upgrade.

The tag 738 – Product Key Expiration Date is provided in 150 and 170 reply transactions to provide Product Key Expiration information in transactions. The transaction request must contain tag ***1989 –Transaction Function***, with ***value 4 - Versioning***.

The number of days left for Product Key expiration is returned in the format CCYY-MM-DD. The Product Key expiration information is returned in 150/170 reply transaction in tag ***738 – Product Key expiration date***.

Initiative Control updates

To enhance transaction configuration the following Initiative controls in FedEx Ship Manager® Server configuration is updated. The following options are excluded to initiate no code option.

- Pharmacy Delivery
- FedEx Ground Economy Labels
- International Signature Services (ISS) and No Signature Required (ISS.NSR)
- Global Product Rationalization (GPR 1, 2, 3, 4, 4.5)

ICTL Settings options are revised, and latest options are as follows:

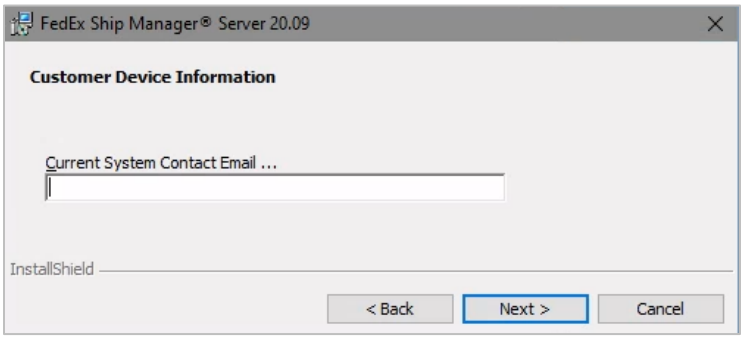
Note: The options are applicable as per the access levels.

ICTL Setting	Control option (checkbox)
Ground Economy	FXGE Label Changes
Notifications	Estimated Delivery Ground Economy Future Date Shipment Upload
Ground Human Readable Barcode	Ground Human Readable Barcode GSNE.MASKING
SMARRTZ	Third Party Billing Third Party Warning
Dangerous Goods	Account controls DG Data Unload Mode – FedEx Express and FedEx Ground
Clearance Enhancements	Commodity Purpose IPD/IED/IDF Customs Details report
ETD Clearance Enhancements	Post Shipment Document Upload
Express Lithium Battery	None.
IGC	None.
EAN Check digit Edit Removal	None.
Clerance	Clearance Prohibits and Waivers Regulatory Workflow Vague Description Workflow Doc/Non-Doc Find International Document
Renewal Data Download	None.
Movement Optimization Override	None
Country on Label	Shipping Label AWB Label ETD Label
Updated Software Data Exchange	None.
Simplified Commodity Shipping for EU	None.

System Contact email

An enhancement to include system email address is added to FedEx Ship Manager Server application during installation time. It is stored and displayed during upgrade, user can modify or choose to retain the system email address if required. Refer to the image below.

Figure 180: System Contact Email Address



Note: A valid format displays a success message – *'The Contact email will be saved'* and an invalid format displays error message – *'Invalid Email Format'*.

A New tag *745 - System Contact Email Address* is introduced for FedEx Ship Manager® Server configuration. The tag details are in the below table.

Table 175: Tag 745 - System Contact Email Address

Field ID	Field Name	Update	Affected Transaction
745	System Contact Email Address	New Field	070-meter query/update fields
	Description The tag contains the Email address value of the Contact person for the specific ***FedEx Ship Manager® Server*** Instance. This tag is associated with the field in ***System Settings tab*** called *System Contact Email Address*. It is used in a 070-meter update/query transaction to update the Contact details of the ***FedEx Ship Manager® Server*** account user. This functionality is only applicable for parent account. System Contact Email Address field is returned in 170-meter update/query transaction.		
	Type: AN (Alphanumeric)	**Minimum Length:** 6	**Maximum Length:** 120
	Multiple Occurrence: N	**Input/Output:** I/O	**Carrier:** NA
	Valid Values: NA **Default Value:** NA Optionality: Conditionally Required Required = To return all relevant information for a configured meter. Optional = To perform any updates via the 070-meter update transaction. Required as new functionality (but still "conditional" only when the list info is required in a 070) for a 170-meter query list information transaction to return information for a configured meter **Level**: NA		

Thermal Label enhancements

New values are updated in *tag -571 Thermal Label Printer/Format Type*. The values are returned in 170 Meter Query reply transaction when the Thermal Label Type is set to Zebra 300dpi. The details are as follows:

Tag 571 values	Associated Thermal printer and Stock types
Zebra 4 x 6 Doc tab 300dpi	193 - Zebra 300 dpi 4 x 6 Doc Tab
Zebra 4 x 6 Non Doc 300dpi	293 - Zebra 300 dpi 4 x 6 non-Doc Tab
Zebra 4 x 8 300 dpi	393 - Zebra300 dpi 4 x 8
Zebra 4 x 9 300 dpi	493 - Zebra 300 dpi 4 x 8
Zebra 4 x 8.5 300 dpi	593 - Zebra 300 dpi 4 x 8.5
Zebra 4 x 10.5 300 dpi	693 – Zebra 300 dpi 4 x 10.5 Tire
Zebra 4 x 6.75 300 dpi	893 – Zebra 300 dpi 4X6.75 HCID

New HCID service option

New HCID Service option is added for Global distribution Practices (GDP), applicable for European Union countries. The details are as follows:

Special Service name	FedEx Service Option Code	Precedence on Label	HCID value for tag	Description
Good Distribution Practices	GDP	1	HZ	Applicable for EU GDP Solutions. *Note: Not applicable for Barcode content.*

Surcharges and Rate Updates

Fuel Surcharge expansion

Fuel Surcharge expansions include surcharges for Dangerous Good Shipment (DG) shipments and an additional fee on Address changes made by the international payers.

Additional Handling Surcharges (AHS)

A Minimum Billable Weight (MBW) of 40lbs is applies to all packages that meet Additional Handling Surcharges (AHS) criteria. The change affects all U.S. and international packages.

The customer configured billable weight is applicable to packages that do not qualify for AHS. Example: If a package weights 20lbs, and meets AHS criteria, the shipper will be charged for the limit of 40lbs instead of 20lbs.

Regulatory Fees

A Custom Border Patrol (CBP) regulatory fee of $1.50 per shipment is applied to all U.S. Import shipments as part of the clearance processing procedure. The fee is calculated and auto applied according to CBP regulatory standards.

Tag updates and Sample transactions

1. The following tags are updated with new naming convention, the details are as follows-

old tag naming convention	updated tag naming convention
9744 - FedEx vendor / client product name	9744 - Client Product Name
9746 - FedEx vendor / client product version	9746 - Client Product Version
1148 - FedEx middleware product name	1148 - Middleware Product Name
1149 - FedEx middleware product version	1149 -Middleware Product Version

2. When both tags, 746 - Fractional Commodity Line-Item Weight tag and tag 77 - Commodity Line Item Weight tag are used together, only the tag 746 is considered.
3. The ***Tag 739 - Link to the Development Resource Center (DRC) to view version availability*** returns an URL to download latest software version when the product key is expired.
   URL - *https://www.fedex.com/en-us/developer/ship-manager-server/process.html#download*.

4. New values are updated in *tag # **187 - Thermal Label Printer/Format Type***. The values are returned in 170 Meter Query reply transaction when the Thermal Label Type is set to Zebra 300dpi. The details are as follows:

   - Valid value: 193 - Zebra 300 dpi - 4 x 6 Doc Tab 300 dpi

Disable export Flag – tag 744

New *tag 744 – Disable export Flag* is added to 070 Meter Query Transaction. The details are given in the table below.

Field ID	Field Name	Update	Affected Transaction
744	Disable export Flag	New Field	070 meter query/update fields
	Description The purpose of this tag is to enable or disable an existing feature in the FSMS software that exports shipping history to text files. It can be used in a 070 meter update transaction to enable or disable export shipment history functionality when a parent meter number is present. When a child meter is included in a 070 meter update transaction, there will be no updates. This tag will be connected with the Disable Export control located on the System Settings tab of the setup screen. It will be returned in the 170 reply transaction for both the meter update and list meter information operations.		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: A	**Input/Output:** I/O	**Carrier:** NA
	Valid Values: • Y = Export Functionality will be turned off		

	• N = Export Functionality will be turned on **Default Value:** N **Optionality**: Optional **Level**: Shipment

Rating/Routing Validation flag – tag 754

Field ID	Field Name	Update	Affected Transaction
754	Rating/Routing Validation flag	New Field	070 meter query/update fields
	Description his tag can be used in a 070 meter list information or update transaction. It can also be used in any 020 rating/routing transaction. For a 070 meter update transaction, the value of this tag will update the FSMS configuration screen, Meter Settings tab for the control called "Rating / Routing Validation". Based upon the value of the control in the configuration screen, at 020 Rating Only, 020 Route / Time-In-Transit only, 020 Rate / Route combination transaction, validation will occur. Those rating/routing transactions can include this tag & will need to be used in conjunction with either tag 1234 – Rate/Route/Time-In-Transit Flag (tag value = 1, or 2, or 3), or tag 541 – OpenShip Flags (position 2 and/or 3 = Y such as: NYYNNNNNN). When this tag is included in a 020 rating/routing transaction, it will override the setting in the config screen. That validation is intended to be used similarly to how tag 184 – PreShip Validation is used.		
	Type: N	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: A	**Input/Output:** I/O	**Carrier:** NA
	Valid Values: • Y – Perform Rating / Routing Validation • N – Do not perform Rating / Routing Validation **Default Value:** N **Optionality**: Optional **Level**: Piece		

Disable export Flag – tag 744

Field ID	Field Name	Update	Affected Transaction
755	Download New / Missing Data Flag	New Field	057 Demand Download transaction
	Description The purpose of this tag is to enable or disable an existing feature in the FSMS software that exports shipping history to text files. It can be used in a 070 meter update transaction to enable or disable export shipment history functionality when a parent meter number is present. When a child meter is included in a 070 meter update transaction, there will be no updates. This tag relates to the Disable Export control located on the System Settings tab of the setup screen. It will be returned in the 170 reply transaction for both the meter update and list meter information operations.		
	Type: AN	**Minimum Length:** 1	**Maximum Length:** 1
	Multiple Occurrence: No	**Input/Output:** I	**Carrier:** All
	Valid Values:		

	• Y = Overrides Demand Download setting (downloads missing values/new components) • N = Continues to download all components (all components including new/old/missed/existing components) **Default Value:** N **Optionality**: Optional **Level**: NA

FTR, XTN, or ITN Entry – tag 1358

Tag value is updated as Maximum 32 characters.

Special Delivery Instructions – tag 3021

The value is updated as Maximum 90 characters and applicable carrier codes revised as FDXE, FHD, and FXFR.

Tag 7651, 7653

The Tag name for 7651 is updated as follows:

Old name	New name
URSA Service Type Name	Service Type Name

The tag value for Packaging Type Name – 7653 is updated to Maximum 30 characters.

Error code update - 4503

The Error condition for the Error code – 4503 is updated as follows:

Code	Message	Error condition
4503	Invalid FedEx Ground Account Number.	When processing a shipping transaction, pre-ship validation for FedEx Ground or Home Delivery (U.S. and Canada only), then for any ground enabled meter, with all zeroes (or may be blank) in the ground account field, FSMS returns this error message.

Shipment updates

The country Honduras, Turkey and Vietnam is now a direct serve country. Applicable accounts can be configured in FedEx Ship Manager® server configuration. The following options are available for the update:

- Direct serve rates and Surcharges are downloaded as per the settings in Demand Download Utility.
- ETD document requirements are available to ensure customs clearance.
- Local Currency is included as currency type in transactions to allow tax regime regulations.

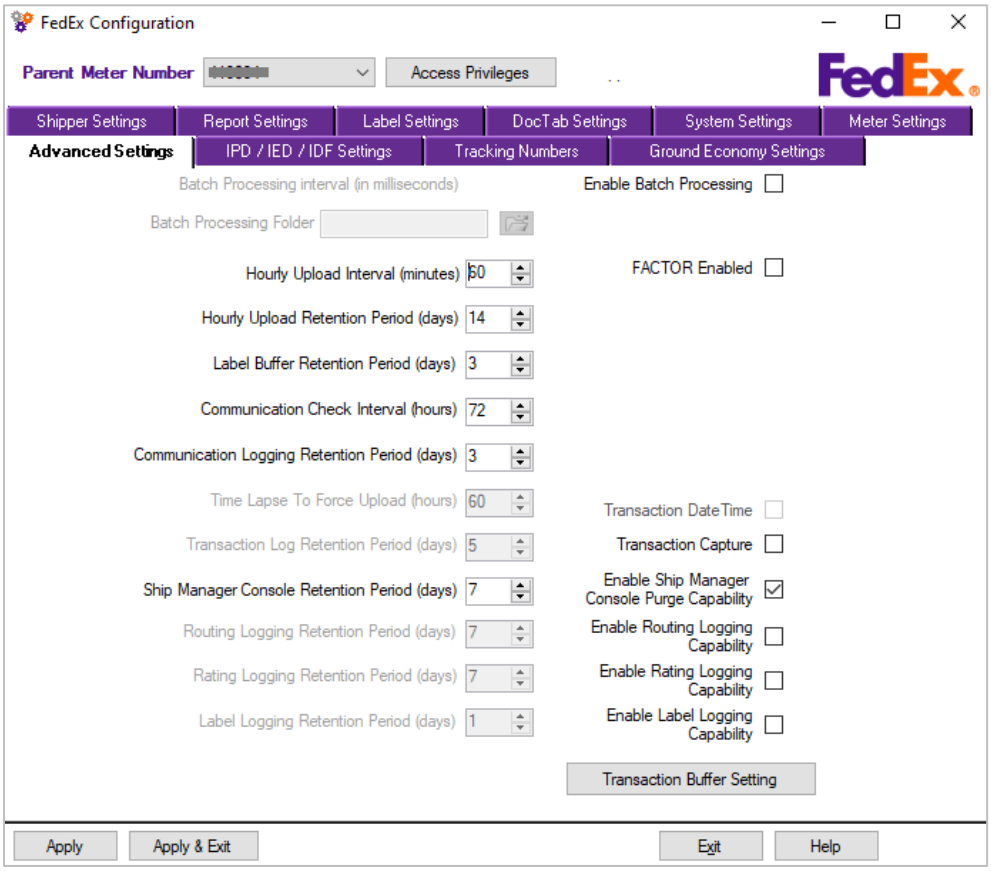
User Experience Enhancements

Advanced Settings tab

The Advanced Settings tab is updated with FACTORS checkbox. This can enable/disable FACTOR for FedEx Ship Manager Server configuration. Refer to the image below.

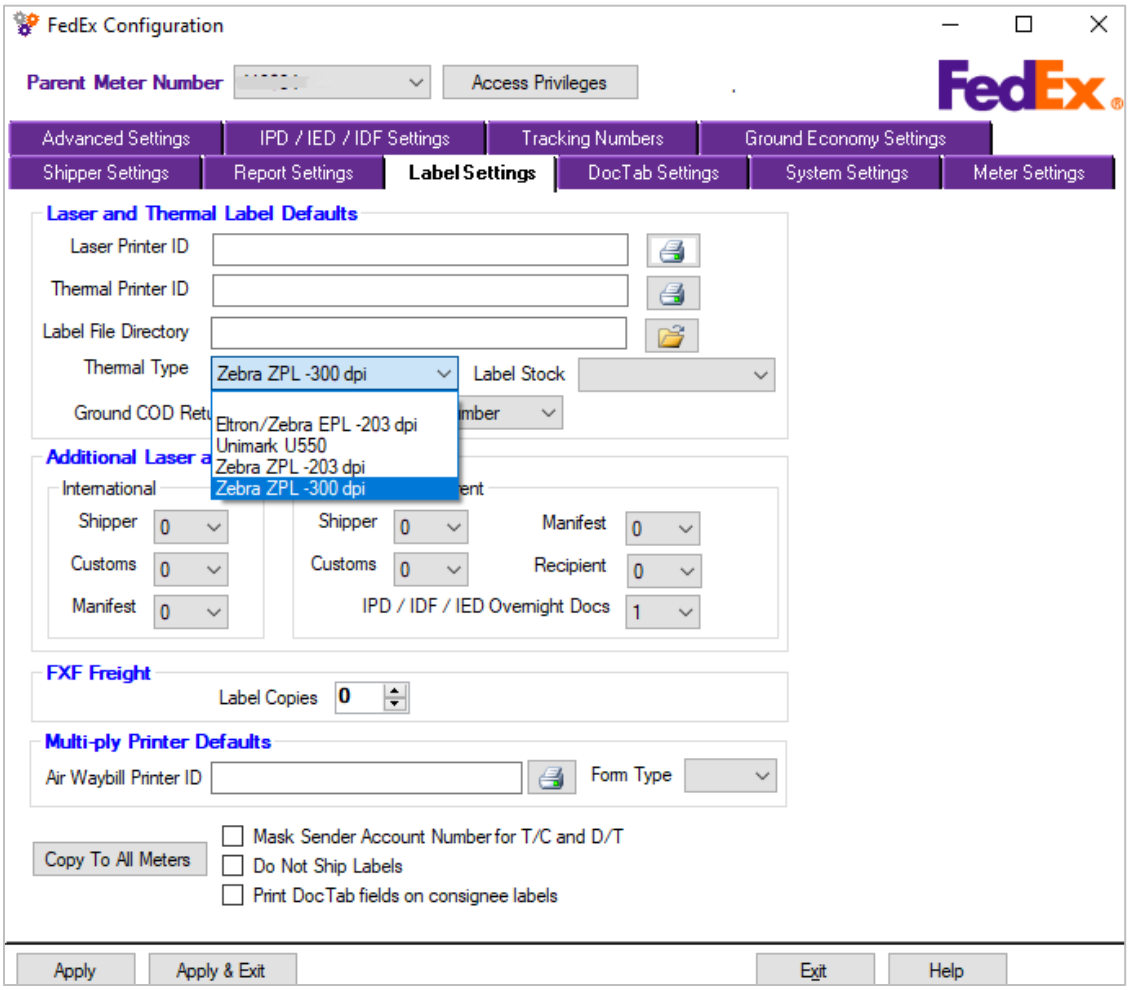
Figure 181: Advanced Settings tab



Label Settings tab

A New Label Type is added to Thermal Label types. Refer to the image and table below for additional details.

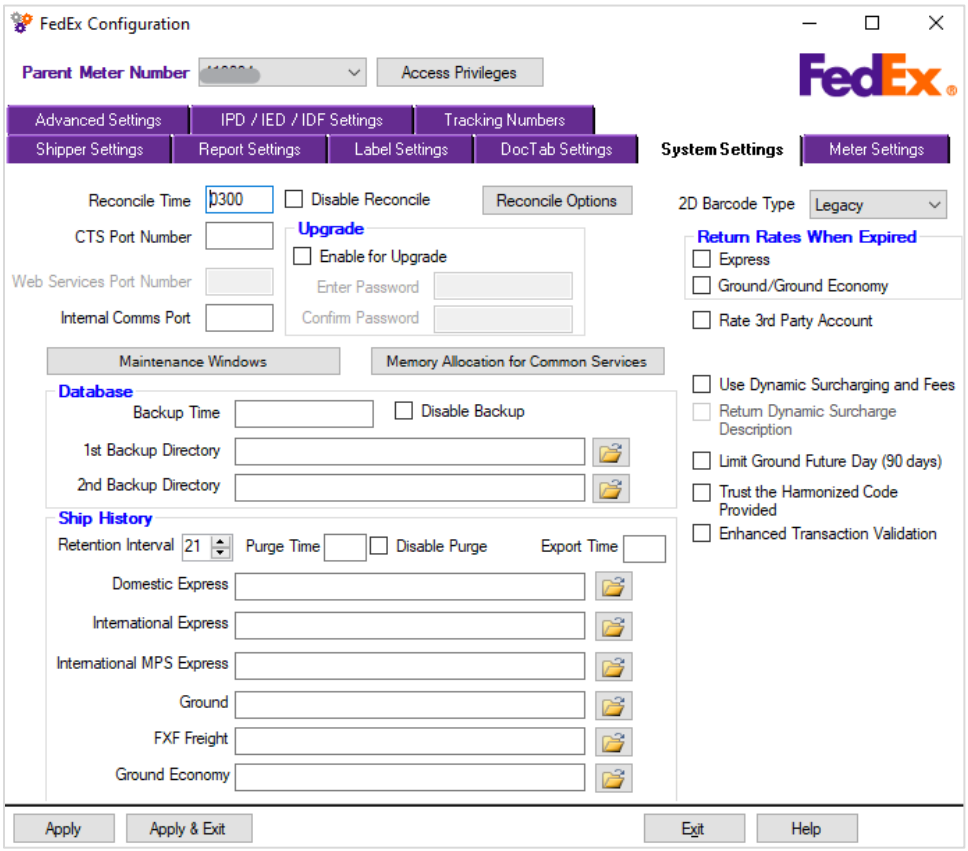
Figure 182: Thermal Label Types



System Settings tab

The ***Disable backup time*** field is renamed to ***Disable Backup***. Refer to the below image.

Figure 183: System Settings tab – Disable Backup



FedEx Ship Manager® Server console utility

FedEx Ship Manager® Server console utility displays updated naming convention for Component Information tab column headers *Patch* is renamed to *Revision*, and *Upgrade Date* is renamed to *Component Update Date*. Refer to the image below.

Figure 184: Ship Manager® Server console utility

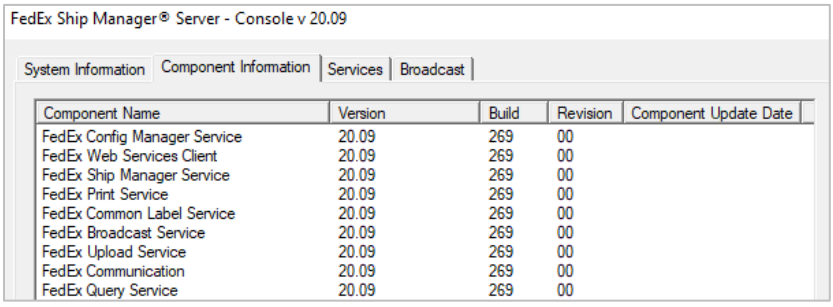


Figure 185: Ship Manager® Server console utility

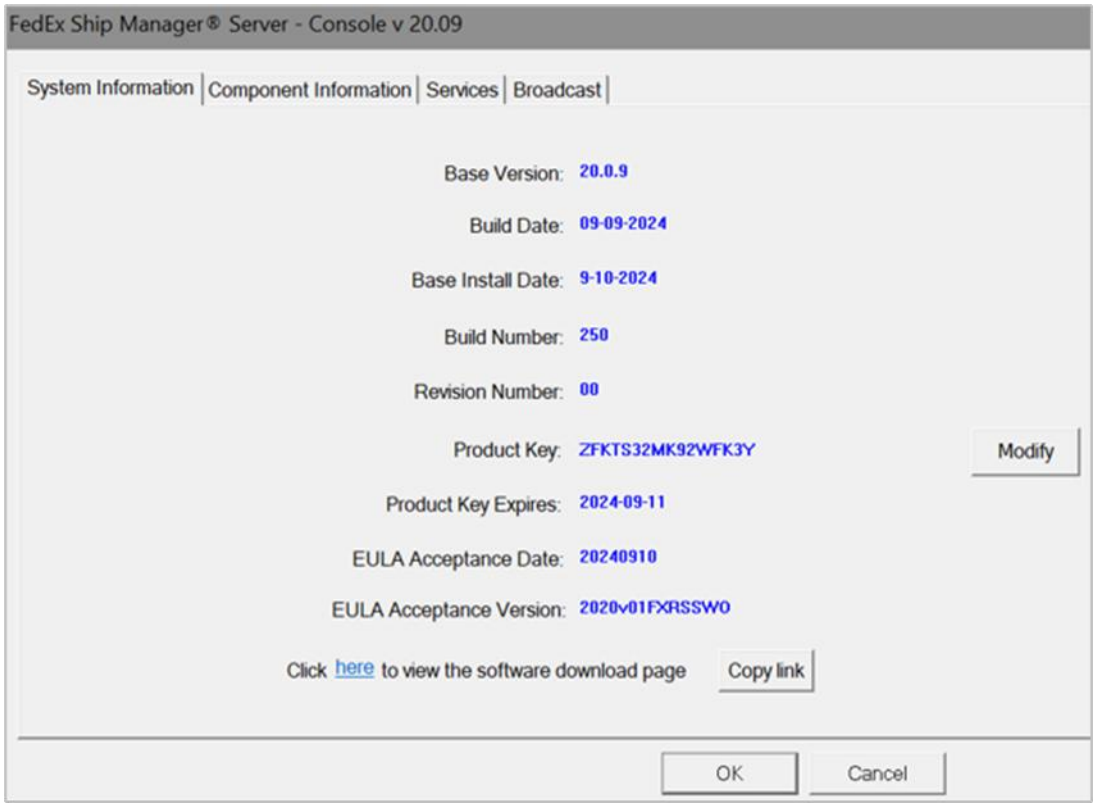


Device Registration Utility

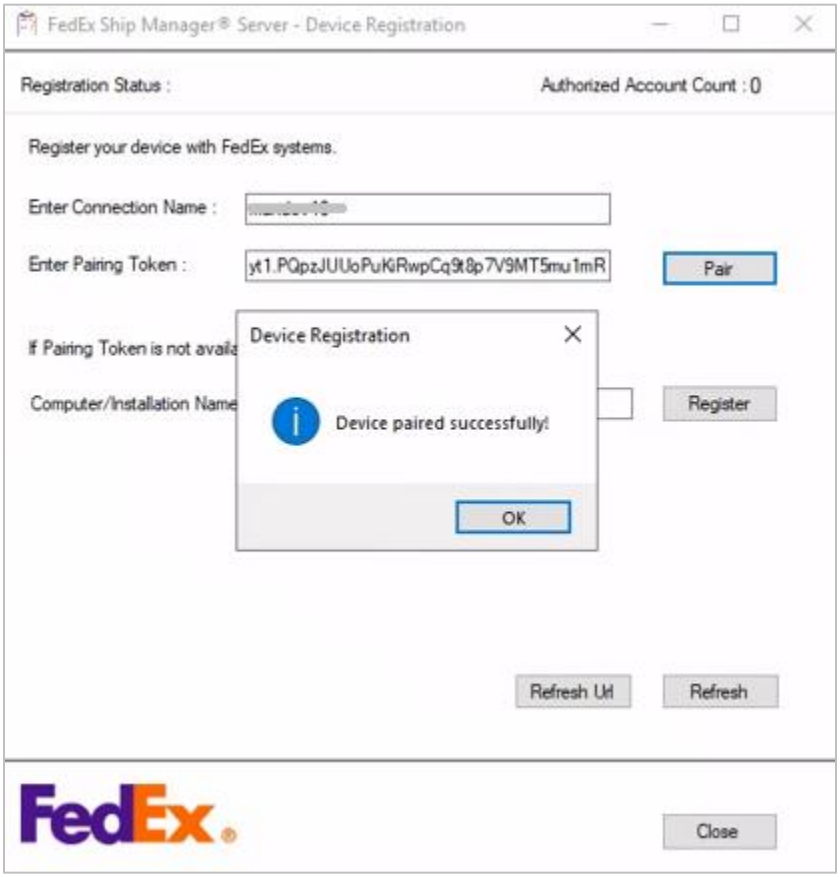
A New utility named ***Device Registration Utility*** is introduced to enable API gateway authentication for user's device. User can register their device for authentication using the following two methods, the details are as follows:

Method 1: Portal Flow
Users can login to SMP portal link and initiate device registration through the portal.
Note: Reach out to FedEx representative for troubleshooting and further assistance.

Steps

1. Click the *Pair* button in ***Device Registration Utility*** to enter SMP portal to register device.

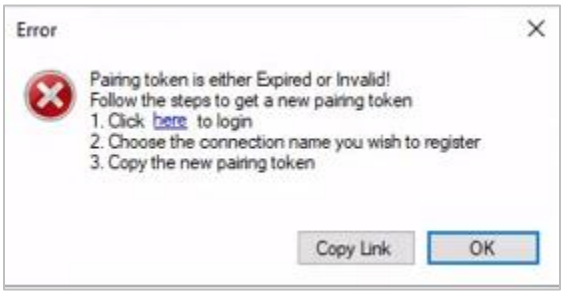
Figure 186: Device Registration - portal flow



2. Follow through the steps in SMP portal and register your device.
3. Click the *Refresh* button in *Device Registration Utility* to verify Registration status.

Successful registration displays **Registration status** as **Registered**. The following error message indicates Expired or Invalid token.

Figure 176: Error/Invalid token message

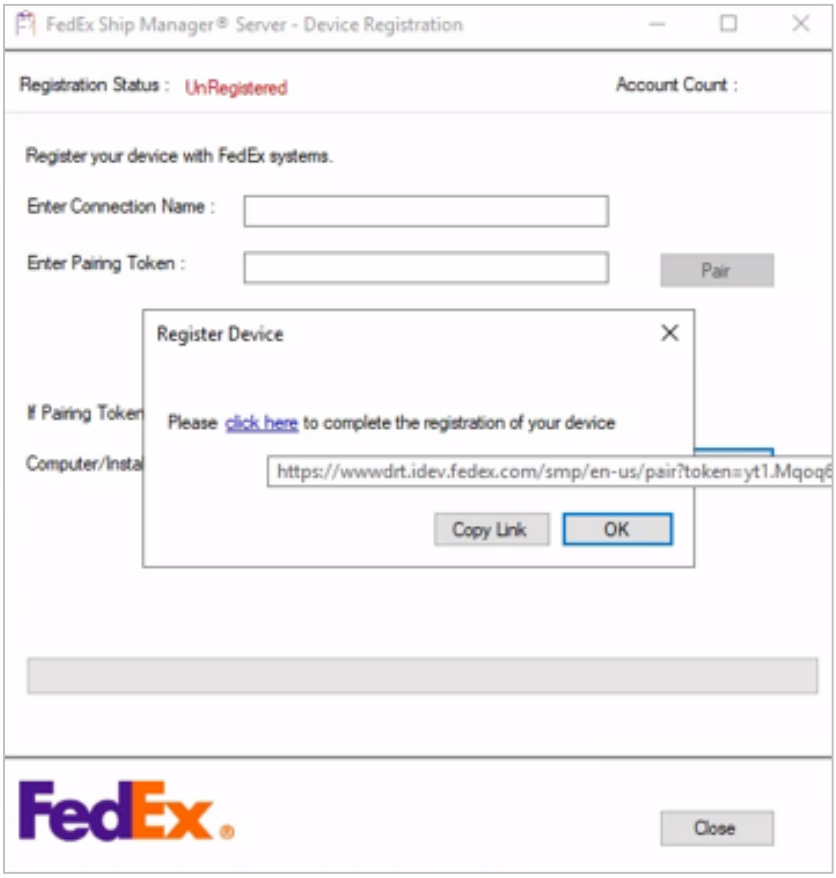


In case of error, start a fresh registration process or follow the *Alternate Flow method* to register the device.

Method 1: Alternate Flow

1. Click the *Register* button in ***Device Registration Utility*** for manual registration of the device.

Figure 177: Device Registration - portal flow



2. Follow through the website link provided to obtain pairing token and register your device.
3. Click the *Refresh* button in *Device Registration Utility* to verify Registration status.

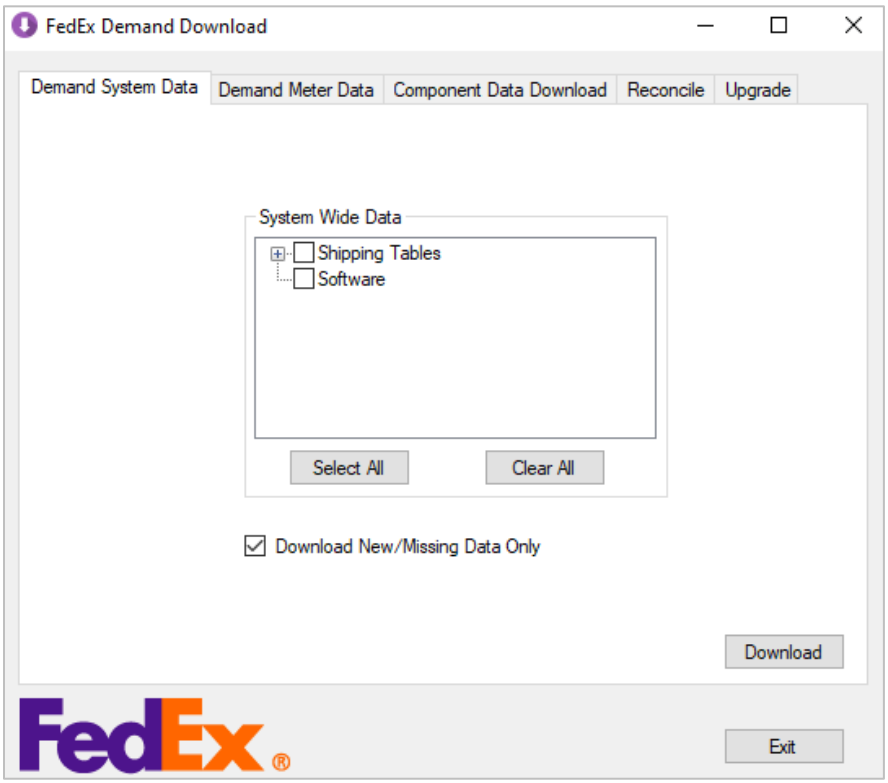
Successful registration displays **Registration status** as **Registered**. Contact customer support if any attempts result in a failed or error message.

Figure 178: Error/Invalid token message

Demand Download Utility

A new checkbox, *Download New/Missing Data Only* is added in Demand Upgrade Date Tab. Refer to the image below. The Checkbox enables/disables the selective download option.

Figure 187: Download New/Missing Data only



Corrections

This section provides the details of corrections made in the document post the release. Any corrections applicable will reflect in upcoming versions.
